

# Splunk4Rookies - AWS

Hands-on Splunk Workshop

**What is Splunk4Rookies - AWS?** The Splunk4Rookies - AWS takes attendees through a series of exercises designed to help them understand how to use Splunk with AWS data sources by exploring some of the different AWS service data and go through different exercises that illustrate how to use Splunk to secure and monitor critical AWS environments and applications.

**Content:** During a session, we will walk you through a series of exercises designed to get you to a point where you understand what Splunk is and how you can use it with you AWS data. Attendees will explore data for security and observability use cases and then search and analyse that data to create an interactive dashboard.

**Target Audience:** Sessions are designed for Splunk beginners and organizations that have an AWS environment or are planning for the future . Whether your organisation is just starting to consider using Splunk or you have just joined a team of Splunk users and need to understand the basics, Splunk4Rookies is for you!

**Prerequisites:** None, other than an open mind and a willingness to learn!

**Delivery Method:** Workshops are currently delivered both face to face and virtually, so anyone can join regardless of location! Ask your Splunk account manager for more information.

**Goals/Outcomes:** Attendees will gain a good understanding of the value Splunk delivers, and how it to use Splunk with AWS data to secure and monitor your AWS environments and applications.

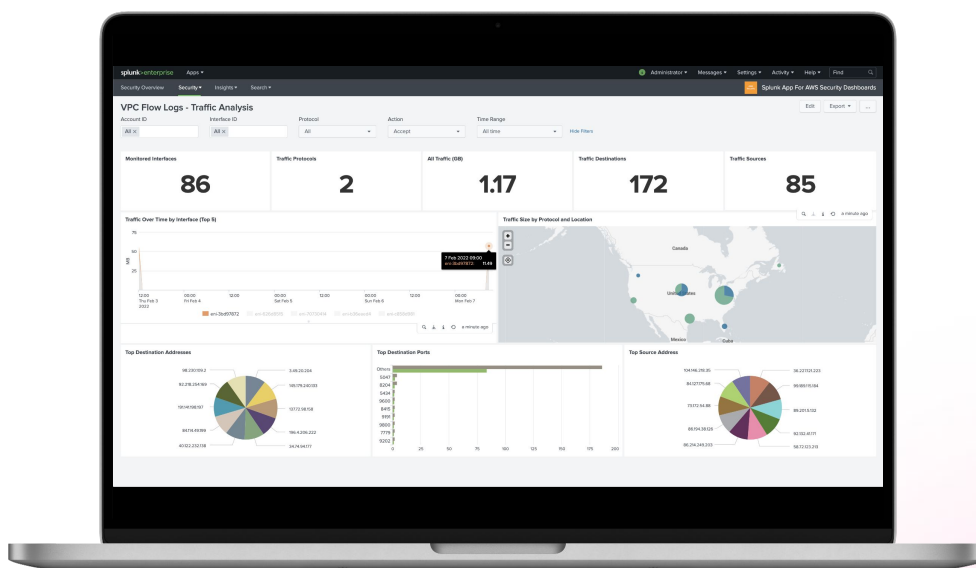

**Duration:** Workshops typically last around 3 hours

## What Do I Need to Bring?

- A web browser with Internet access to connect to a Splunk server via port 443 (Test your connectivity here: <https://domain-test.splunk.show>.)
- A splunk.com account to login to the workshop environment - create an account [here](#).
