

Splunk4Champions - Power Users

Unleashing Advanced Insights and Techniques

What is Splunk4Champions?

Are you an experienced Splunk user looking to level up your skills and uncover new tricks? Join us for Splunk4Champions, the ultimate presales workshop designed exclusively for Splunk champions like you!

Discover the secrets of maximizing your Splunk search capabilities and gain a deeper understanding of how Splunk search works. In this interactive and hands-on workshop, we'll share invaluable hints and tricks that will increase your efficiency in using Splunk searches. But that's not all - we'll also delve into the **underlying theory** behind it all.

Targeting advanced Splunk users, this workshop covers a wide range of topics to enhance your expertise. Explore options and GUI settings, master the art of using the Job Inspector, and unravel the mysteries of how data is stored in Splunk. We'll dive deep into search performance, exploring the realm of good and bad searches, and show you how to convert log data into powerful metrics and utilize Analytics Workspace.

Get ready to take your dashboards to the next level! We'll provide you with hints for creating effective dashboards using XML and introduce you to the game-changing Dashboard Studio. It's time to unleash your creativity and build captivating dashboards that deliver real-time insights.

But wait, there's more! We'll equip you with dozens of follow-up links, ensuring you have all the information you need to continue your Splunk journey long after the workshop ends.

Benefits you can expect from Splunk4Champions:

- Sustainable and energy-saving usage of Splunk
- Unlock new insights and gain inspiration for your projects
- Amplify your Splunk skills and become an unstoppable force in data analysis

Target Audience:

Splunk power users, use case owners and implementers and admin team. Min. 1 year Splunk search and dashboarding experience and at least some Splunk Education courses recommended.
