

Splunk4Ninjas - Dashboard Studio

Hands-on Splunk Workshop

What is Splunk4Ninjas - Dashboard Studio? Splunk4Ninjas - Dashboard Studio sessions are a great opportunity for you to get hands-on and take your Dashboard Studio skills to the next level!

Content: During this workshop we will walk you through a series of exercises designed to help you understand advanced dashboard configuration, including configuring tokens and interactivity, performing advanced source code editing, and applying performance best practices.

Target Audience: Sessions are designed for people who have hands-on experience with Dashboard Studio or who have already attended a *Splunk4Rookies - Dashboard Studio* workshop.

Prerequisites: Some basic hands-on and source code editing experience with Splunk Dashboard Studio.

Delivery Method: Splunk4Ninjas events are currently delivered both face to face and virtually, so anyone can join regardless of location!

Goals/Outcomes: Attendees will gain a good understanding of how to improve dashboard performance, configure interactivity, and learn design best practices and tips!

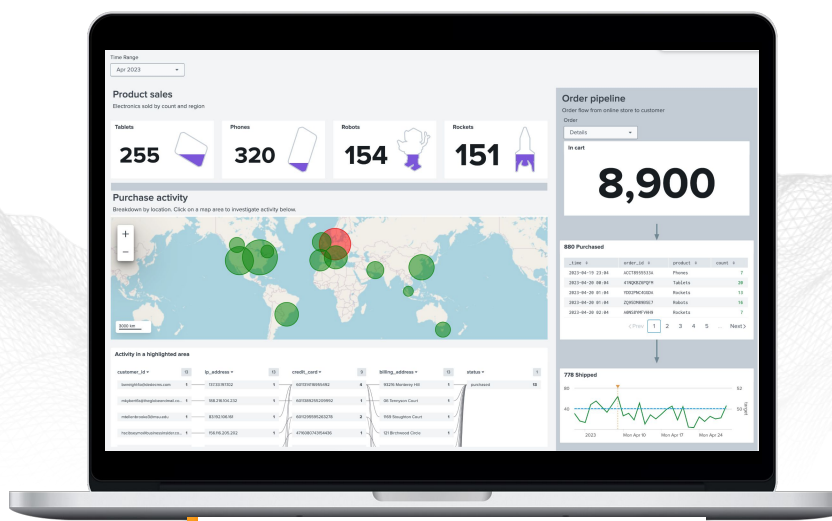

Duration: Workshops typically last around 2 hours

What Do I Need to Bring?

- A web browser with Internet access to connect to an AWS server via port 443 (Test connectivity here: <https://domain-test.splunk.show>).
- A splunk.com account to login to the workshop environment (create an account [here](#)).

Create an advanced Splunk dashboard!
