

# Splunk4Rookies - ML for IT Ops

Hands-on Splunk Workshop

**What is Splunk4Rookies?** Splunk4Rookies sessions are a great opportunity for you to discover the value of Splunk hands-on in a matter of hours. Attendees get an introduction to Splunk AI, along with hands-on experience utilising machine learning in Splunk for multiple use cases.

**Content:** During a session, we will walk you through a series of exercises designed to get you to a point where you understand AI in Splunk and how you can use it within your organisation for IT operations. Attendees will get to solve multiple different use-cases using a mixture of capabilities in Splunk.

**Target Audience:** Sessions are designed for Splunk users. Whether your organisation is just starting to consider using AI or you have just joined a team of Splunk users and need to understand the basics, Splunk4Rookies - ML for IT Ops is for you!

**Prerequisites:** An understanding of how to use Splunk, other than that, an open mind and a willingness to learn!

**Delivery Method:** Workshops are currently delivered both face to face and virtually, so anyone can join regardless of location! Ask your Splunk account manager for more information.

**Goals/Outcomes:** Attendees will gain a good understanding AI and Machine Learning in Splunk delivers and the value it delivers, particularly in the areas of IT operations.

**Duration:** Workshops typically last around 3 hours

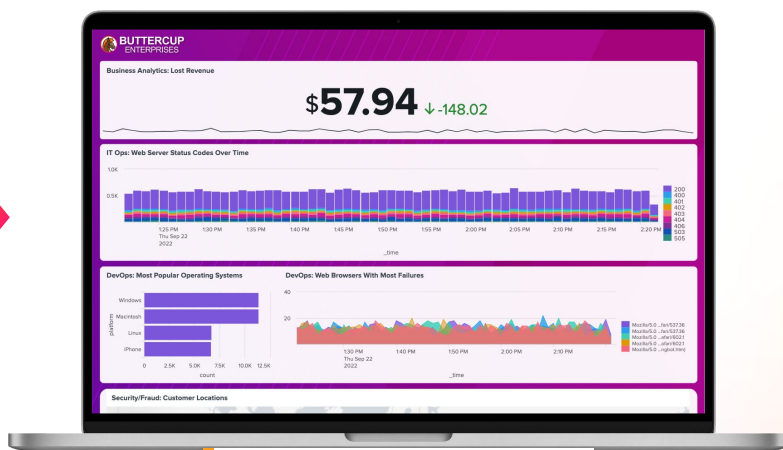

## What Do I Need to Bring?

- ❑ A web browser with Internet access to connect to a Splunk server via port 443 (Test your connectivity here: <https://domain-test.splunk.show>)
- ❑ A splunk.com account to login to the workshop environment - create an account [here](#)

Go from messy machine data...

...to a dynamic, interactive dashboard!
