## Splunk4Rookies - Business Insights

Hands-on Splunk Workshop

What is Splunk4Rookies - Business Insights? Hosted by our Sales Engineering team, Splunk4Rookies - Business Insights sessions are a great opportunity for you to discover the value of Splunk hands-on in a matter of hours. Attendees get an introduction to Splunk, along with hands-on experience creating a dashboard based on multiple use cases.

Content: During a session, we will walk through a series of exercises designed to get someone new to Splunk to the point where they understand how they can easily use Splunk to derive valuable business insights.

Target Audience: Whether your organisation is just starting to consider using Splunk or you have just joined a team of Splunk Ninjas and need to understand functions of Splunk you may never have heard of, Splunk4Rookies - Business Insights is for you!

Prerequisites: None, other than an open mind and a willingness to learn!

Delivery Method: Splunk4Rookies - Business Insights workshops are typically run at Splunk offices but are also run virtually and even onsite at your office. Ask you Splunk account manager for more information!

Goals/Outcomes: Attendees will gain a good understanding of the value Splunk delivers, particularly around business insights using the simple intuitive interface and no code!

**Duration:** Workshops typically last between 2½-3 hours

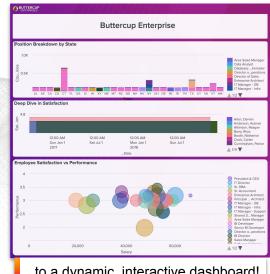

## What Do I Need to Bring?:

- A web browser with Internet access to connect to an AWS server via port 443 (Test connectivity here: https://domain-test.splunk.show.
