Splunk4Rookies - Dashboard Studio

Hands-on Splunk Workshop

What is Splunk4Rookies - Dashboard Studio? Splunk4Rookies sessions are a great opportunity for you to discover the value of Splunk hands-on in a matter of hours. Attendees get an introduction to Splunk Dashboard Studio, along with hands-on experience creating a Splunk dashboard based on multiple use cases.

Content: Participants will learn the basics of creating a dashboard using Splunk Dashboard Studio, and how to populate the dashboard with visualizations and manipulate them to provide maximum value.

Target Audience: Sessions are designed for Splunk beginners. Whether your organisation is just starting to consider using Splunk or you have just joined a team of Splunk users and need to understand the basics of dashboarding, Splunk4Rookies - Dashboard Studio is for you!

Prerequisites: It is recommended that participants either attend a Splunk4Rookies workshop first or have a small amount of previous Splunk experience.

Delivery Method: Splunk4Rookies events are currently delivered both face to face and virtually. Ask your Splunk account manager for more information!

Goals/Outcomes: Attendees will gain an understanding of the basics of Splunk Dashboard Studio and how to build a dashboard from the ground up based on multiple use cases.
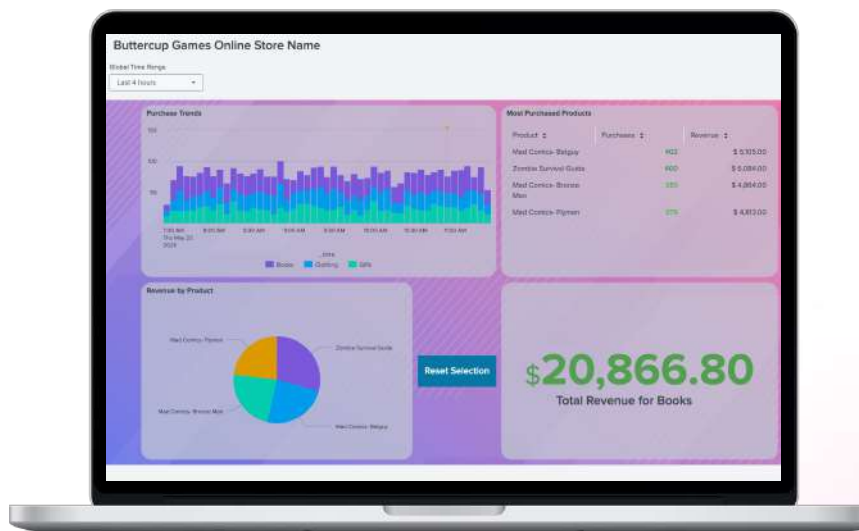

Duration: Workshops typically last around 2 hours

What Do I Need to Bring?
- A web browser with Internet access to connect to a Splunk server via port 443 (Test your connectivity here: https://domain-test.splunk.show.)
- A splunk.com account to login to the workshop environment - create an account here.

Create your own Splunk dashboard!
