#Splunk4Rookies

Forward-looking statements

This presentation may contain forward-looking statements regarding future events, plans or the expected financial performance of our company, including our expectations regarding our products, technology, strategy, customers, markets, acquisitions and investments. These statements reflect management's current expectations, estimates and assumptions based on the information currently available to us. These forward-looking statements are not guarantees of future performance and involve significant risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from results, performance or achievements expressed or implied by the forward-looking statements contained in this presentation. For additional information about factors that could cause actual results to differ materially from those described in the forward-looking statements made in this presentation, please refer to Cisco's periodic reports its other filings with the SEC, including the risk factors identified in Cisco's most recent quarterly report on Form 10-Q and annual report on Form 10-K, copies of which may be obtained by visiting the Cisco Investor Relations website at investor.cisco.com or the SEC's website at www.sec.gov. Any projections in this presentation are based on information currently available to Cisco, which is subject to change. The forward-looking statements made in this presentation are made as of the time and date of this presentation. If reviewed after the initial presentation, even if made available by us, on our website or otherwise, it may not contain current or accurate information. We disclaim any obligation to update or revise any forward-looking statement based on new information, future events or otherwise, except as required by applicable law.

In addition, any information about our roadmap outlines or our general product direction is subject to change at any time without notice. It is for informational purposes only and shall not be incorporated into any contract or other commitment. We undertake no obligation either to develop the features or functionalities described, in alpha or beta or in preview (used interchangeably), or to include any such feature or functionality in a future release.

Workshop Agenda

- **Why do we need Observability?**
- **Introduction to Splunk Observability Cloud**
- **Hands-on exercises:**
  - Shopping at our online boutique
  - Investigate experiences with Real User Monitoring (RUM)
  - Understand issues using Application Performance Monitoring (APM)
  - Enrich findings with Log Observer Connect
  - 24/7 monitoring using Synthetics
  - Create a war-room dashboard with Infrastructure Monitoring (IM)
- **Wrap-up**

cisco

This Causes 3 Core Challenges

- Slow Triage
- No Proactive Measures
- Lack of Context

© 2026 Cisco and/or its affiliates. All rights reserved.

What is Observability?

© 2026 Cisco and/or its affiliates. All rights reserved.

Monitoring vs Observability

Traditional Monitoring

- Limited cloud visibility
- Lack of speed and scale
- Disconnected tooling
- Lack of business context
- Sampled data, low-cardinality batch analytics

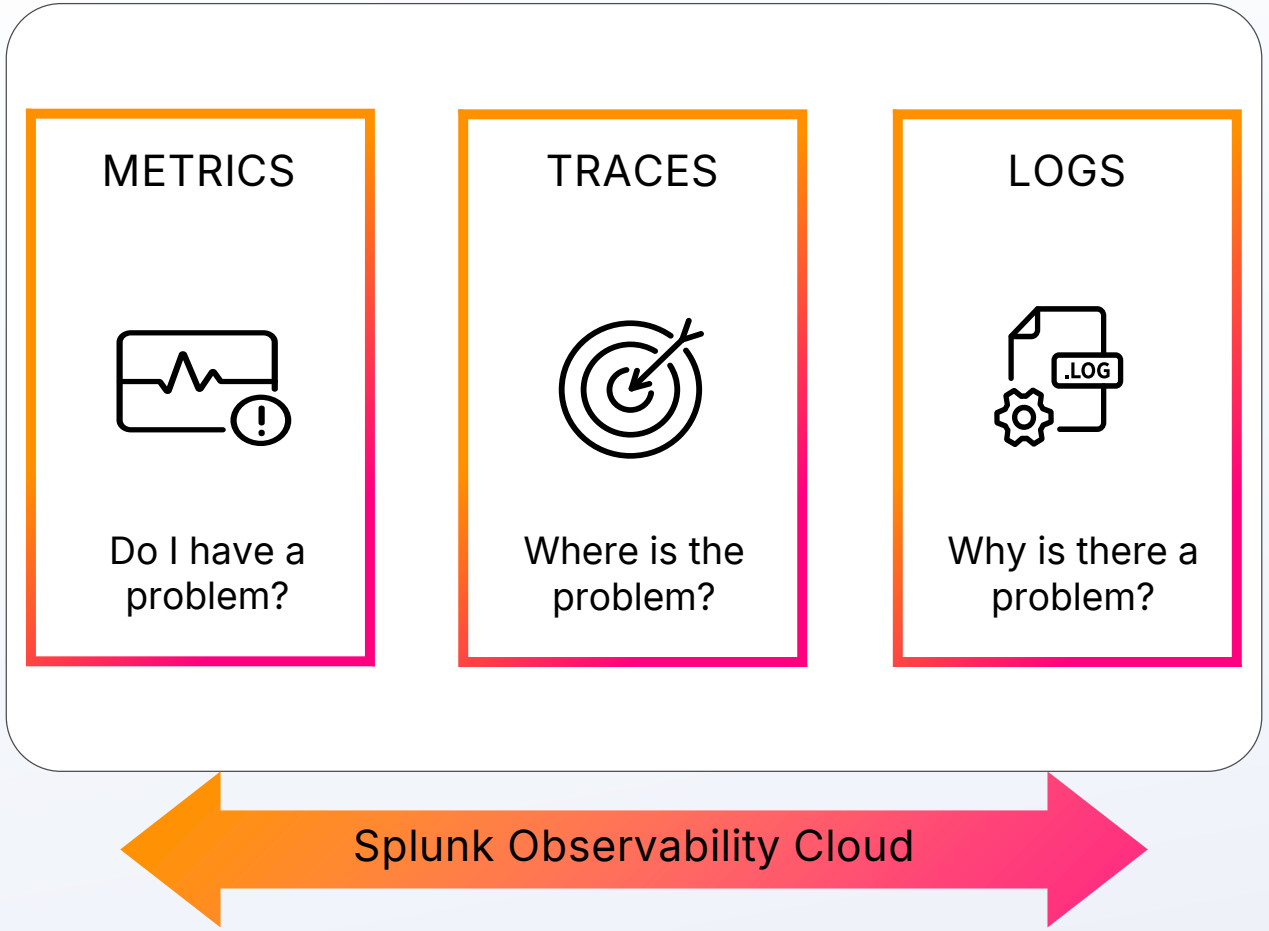

Splunk Observability Cloud

- End-to-end visibility
- Cloud native speed and scale
- Integrated analytics and biz insights
- AI-powered detection & remediation
- Full-fidelity; built for microservices & containerised/serverless tech

© 2026 Cisco and/or its affiliates. All rights reserved.

Splunk is OpenTelemetry Native

Future-Proof Your Business

Fix Less | Build More

- ✓ Simplified Instrumentation
- ✓ Easy integration with existing tools
- ✓ Flexibility in data analysis
- ✓ Improved application performance
- ✓ Enables better visibility and faster troubleshooting
- ✓ Makes developers happy

Save Money

- ✓ Vendor agnostic
- ✓ Reduces observability costs
- ✓ Reduces downtime
- ✓ Reduced development and maintenance costs
- ✓ Increased operational efficiency
- ✓ Future-proof

cisco

3 Reasons Why Splunk for Observability

Complete business visibility across any environment & any stack

Less downtime with faster detection & guided root cause analysis

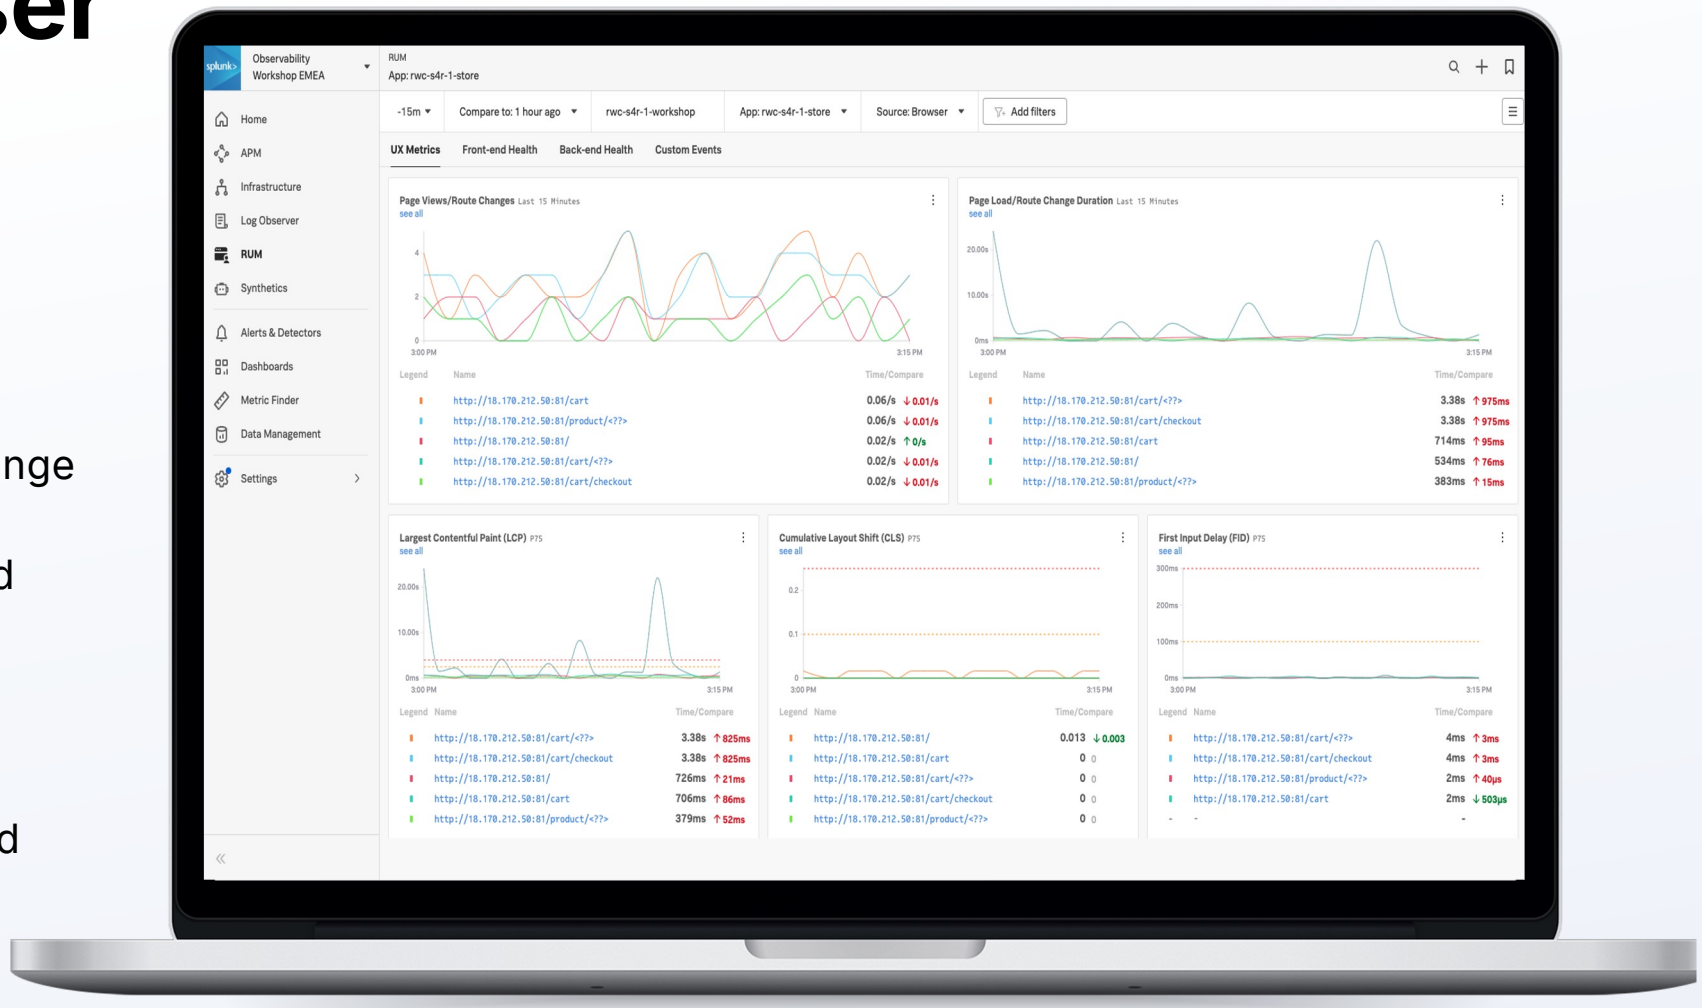

Full data ownership & flexible consumption

© 2026 Cisco and/or its affiliates. All rights reserved.

Splunk Real User Monitoring

Full-fidelity visibility into real user experiences

- Complete analysis of end users experiences, measure impact of every resource, image, route change & API call
- End-to-end tracing on unsampled data, track any front-end span to backend traces within a single UI
- Out of the box industry standard user experience & SEO metrics
- Support for iOS, Android & hybrid mobile apps

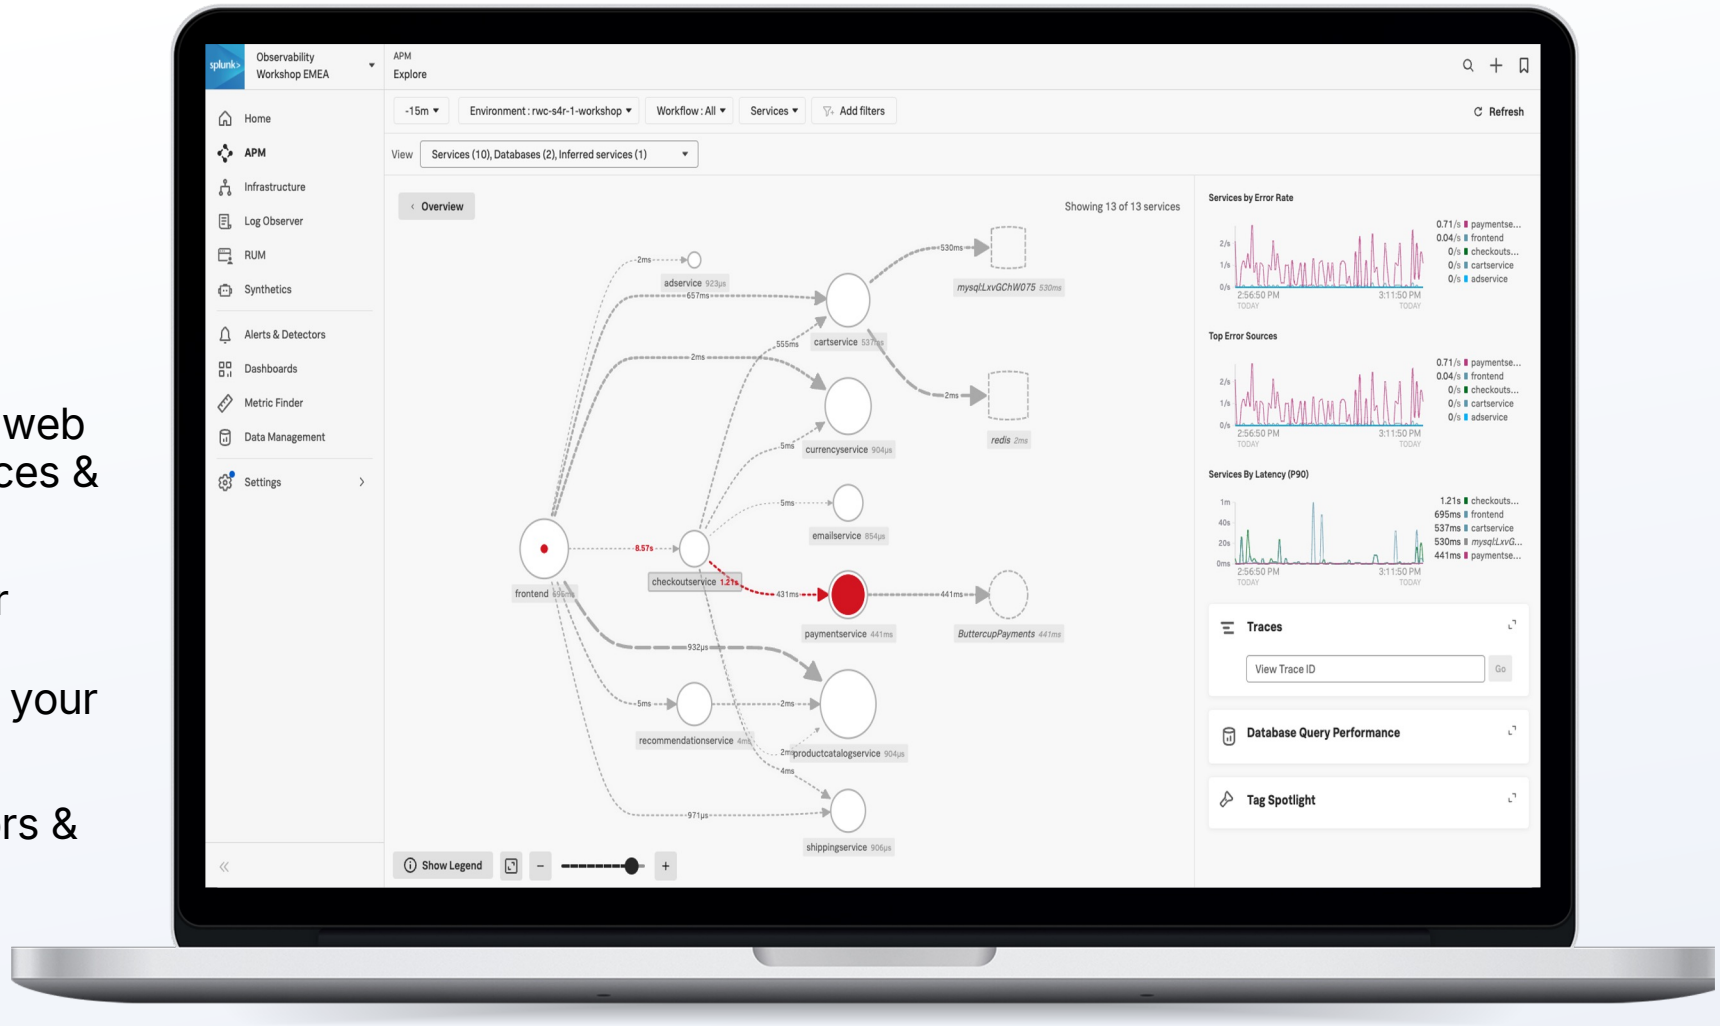

© 2026 Cisco and/or its affiliates. All rights reserved.

Splunk APM

Isolate problems faster, from monoliths to microservices

- Analyze every transaction from web & mobile apps to backend services & database queries
- Continuously measure how your code impacts CPU & memory allocation to spot bottlenecks in your services
- Identify sources of latency, errors & anomalies with directed troubleshooting and dynamic telemetry maps

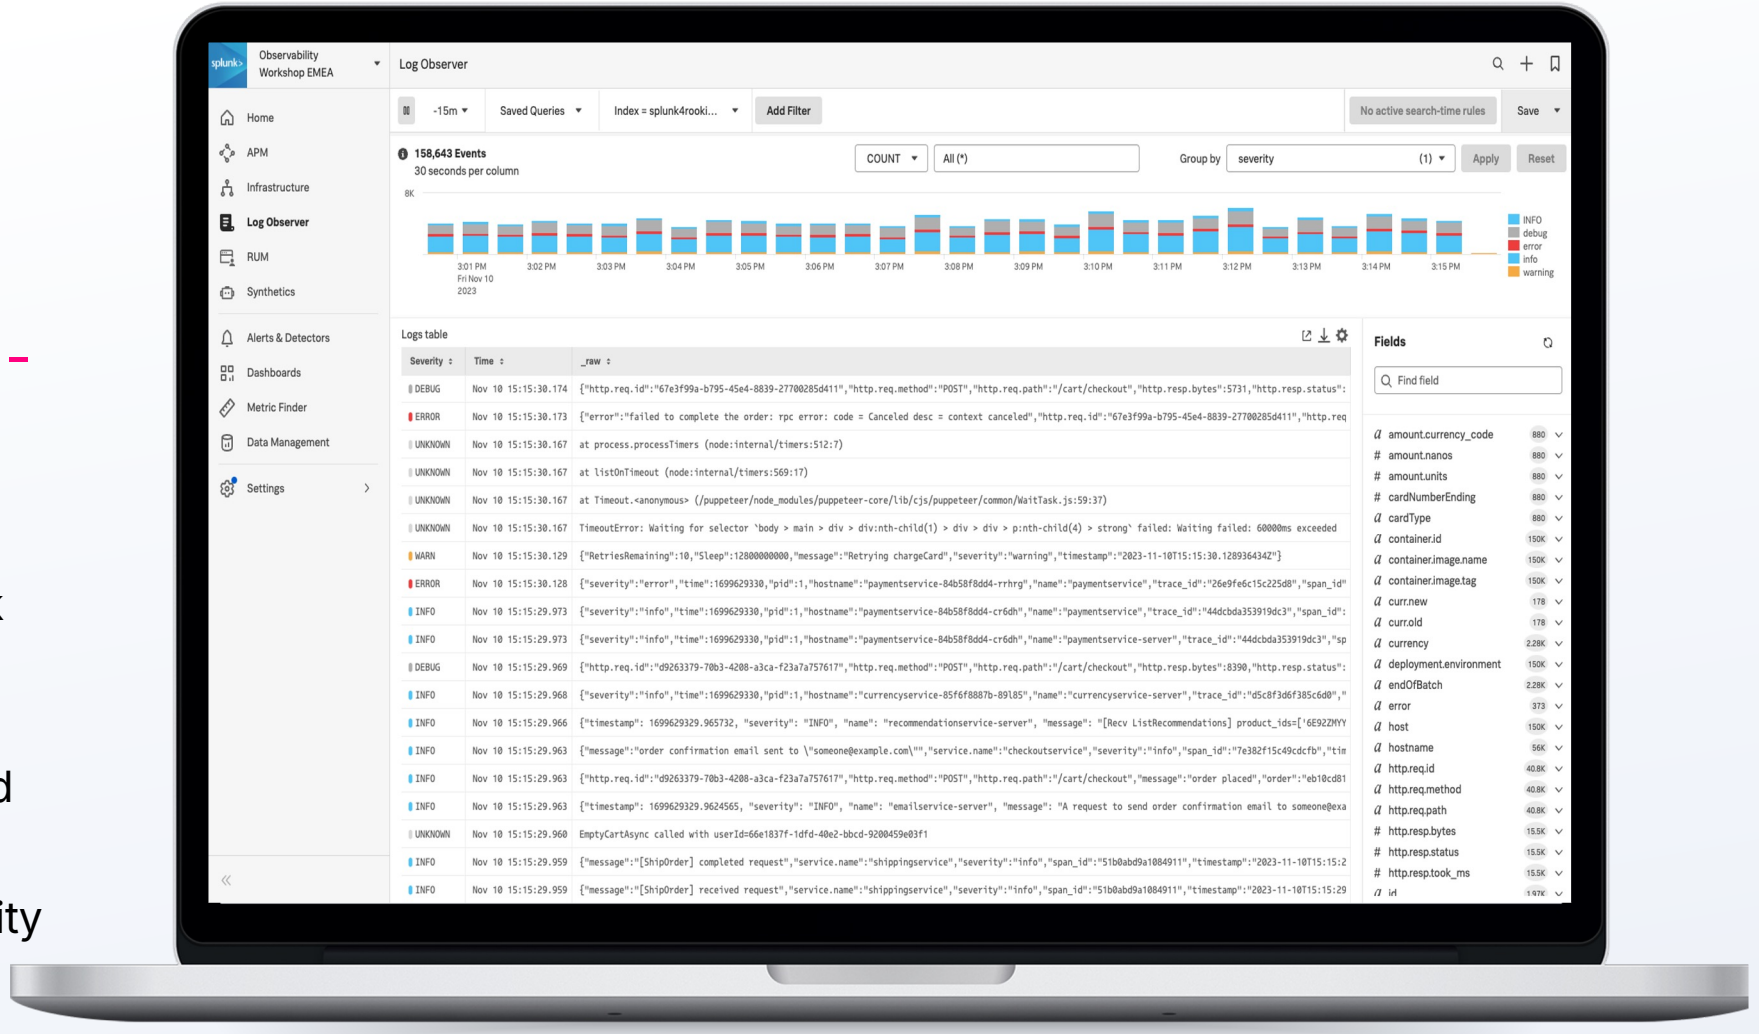

© 2026 Cisco and/or its affiliates. All rights reserved.

Splunk Log Observer Connect

No-code, in-context log-based troubleshooting

- Easily connect app and infrastructure logs from Splunk Enterprise/Cloud in Splunk Observability Cloud
- Point-and-click log filtering and analysis, no learning curve
- Leverages your existing capacity in Splunk Enterprise/Cloud

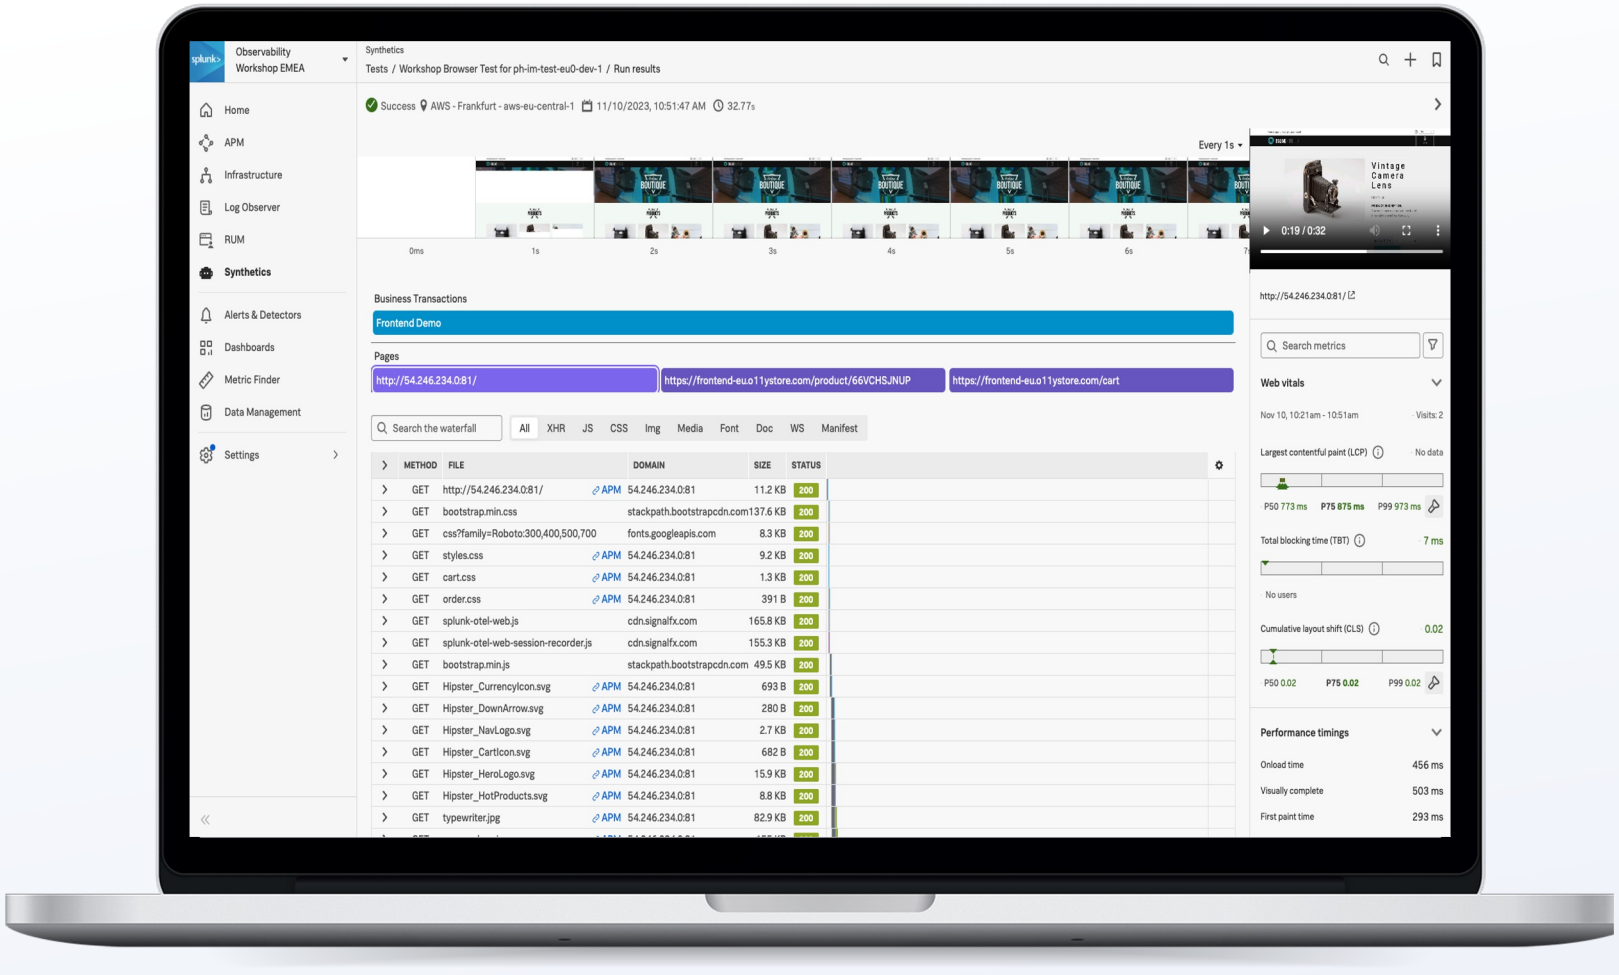

© 2026 Cisco and/or its affiliates. All rights reserved.

Splunk Synthetic Monitoring

Optimize performance and ensure exceptional CX with every deployment

- URL, API & service performance alerts
- 50+ public locations simulate performance of users globally
- Test within CI/CD pipelines to auto-pass/fail SLA-tier deployments
- 300+ performance recommendations prioritize issues & optimize critical web services

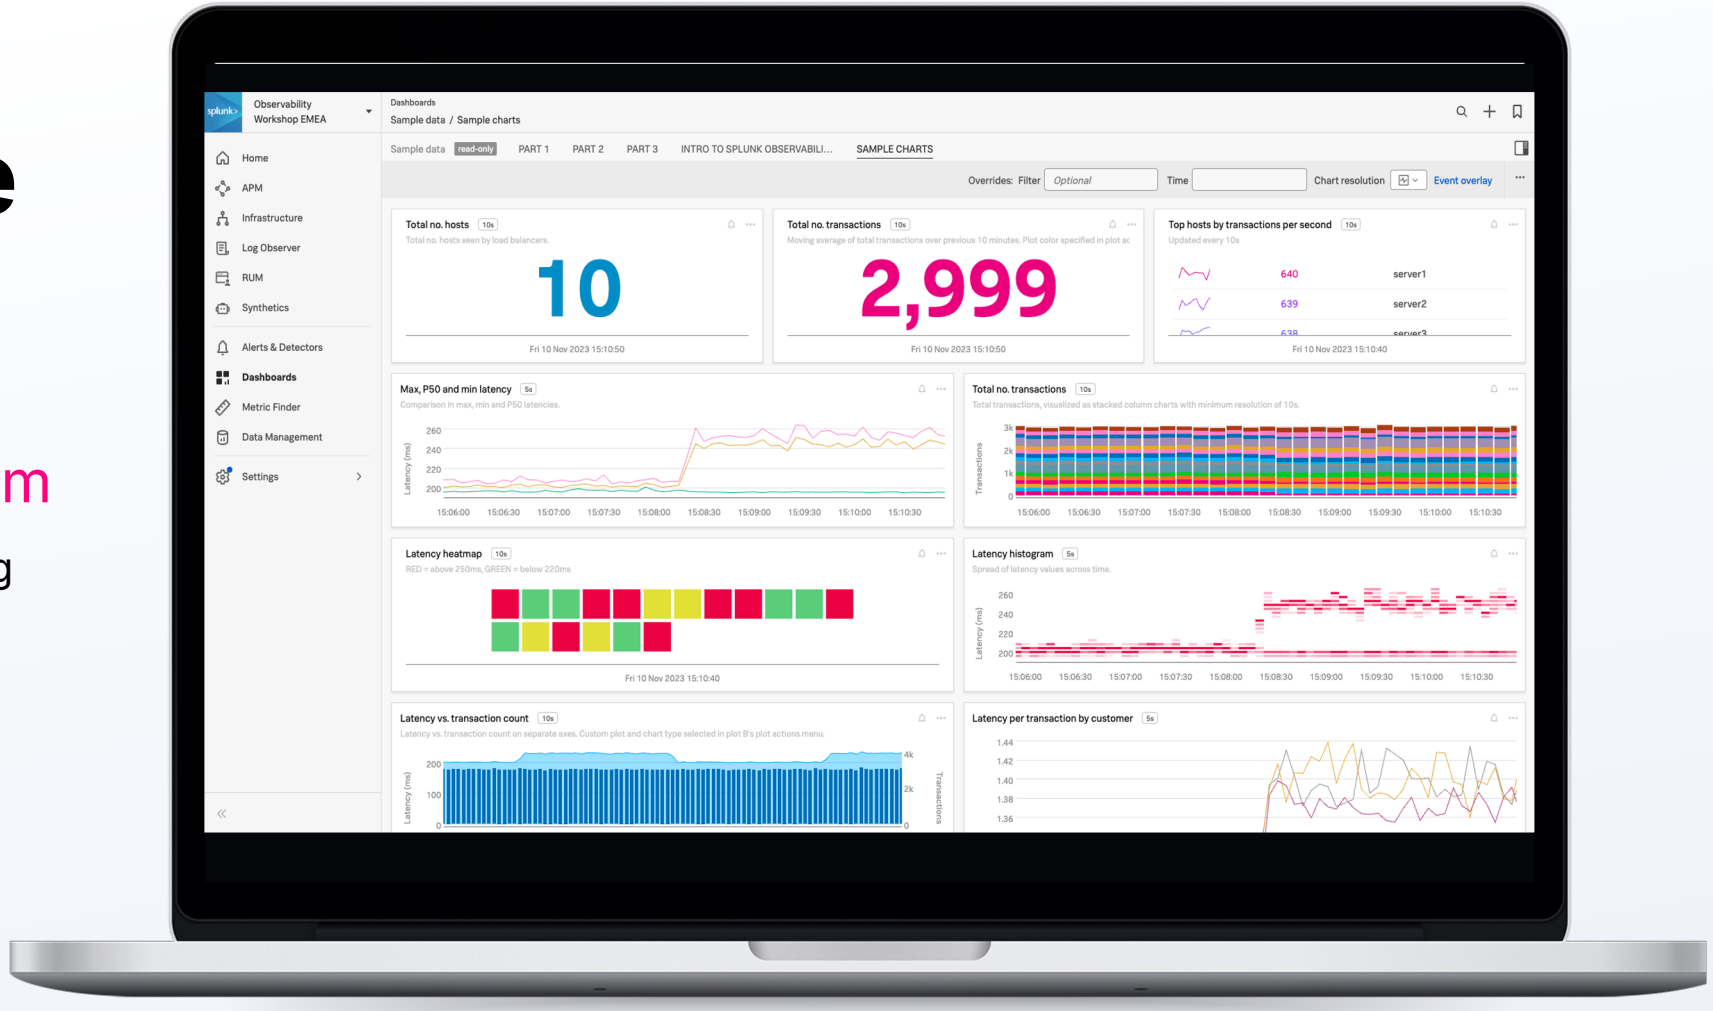

© 2026 Cisco and/or its affiliates. All rights reserved.

Splunk Infrastructure Monitoring

Built on a real-time streaming metrics platform

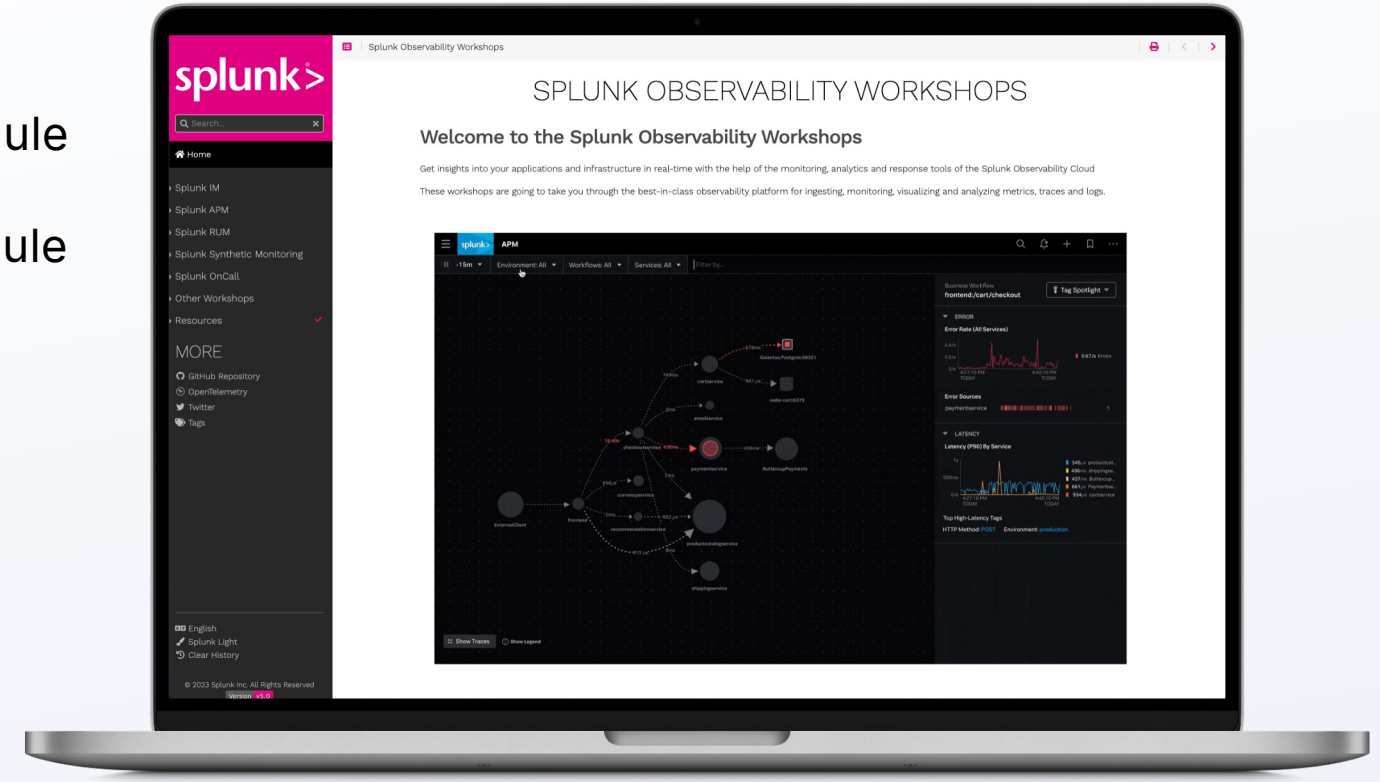

- On-prem to multi cloud monitoring
  - Linux, Windows, VMware
  - AWS, Google Cloud, Azure
  - Kubernetes & Serverless
- Automatic service discovery
- 200+ pre-built integrations
- Analytics-driven alerting

Logistics

- 🎓 The workshop host will introduce each module
- 👣 Your host will quickly walk through the module steps
- ⏰ You will then have time to work through the module yourself
- ✋ For help, please raise your hand in Zoom and one of the hosts will contact you

APPDYNAMICS

Monitor Three-Tier Apps

Optimize hybrid application performance with business context

- End-to-end visibility from end-user experience to back-end code & infra
- Insight into cross-application dependencies
- Visualize the business impact of application performance issues
- Baseline what “normal” looks like and alert on anomalies
- Monitor SAP performance down to code-level insights

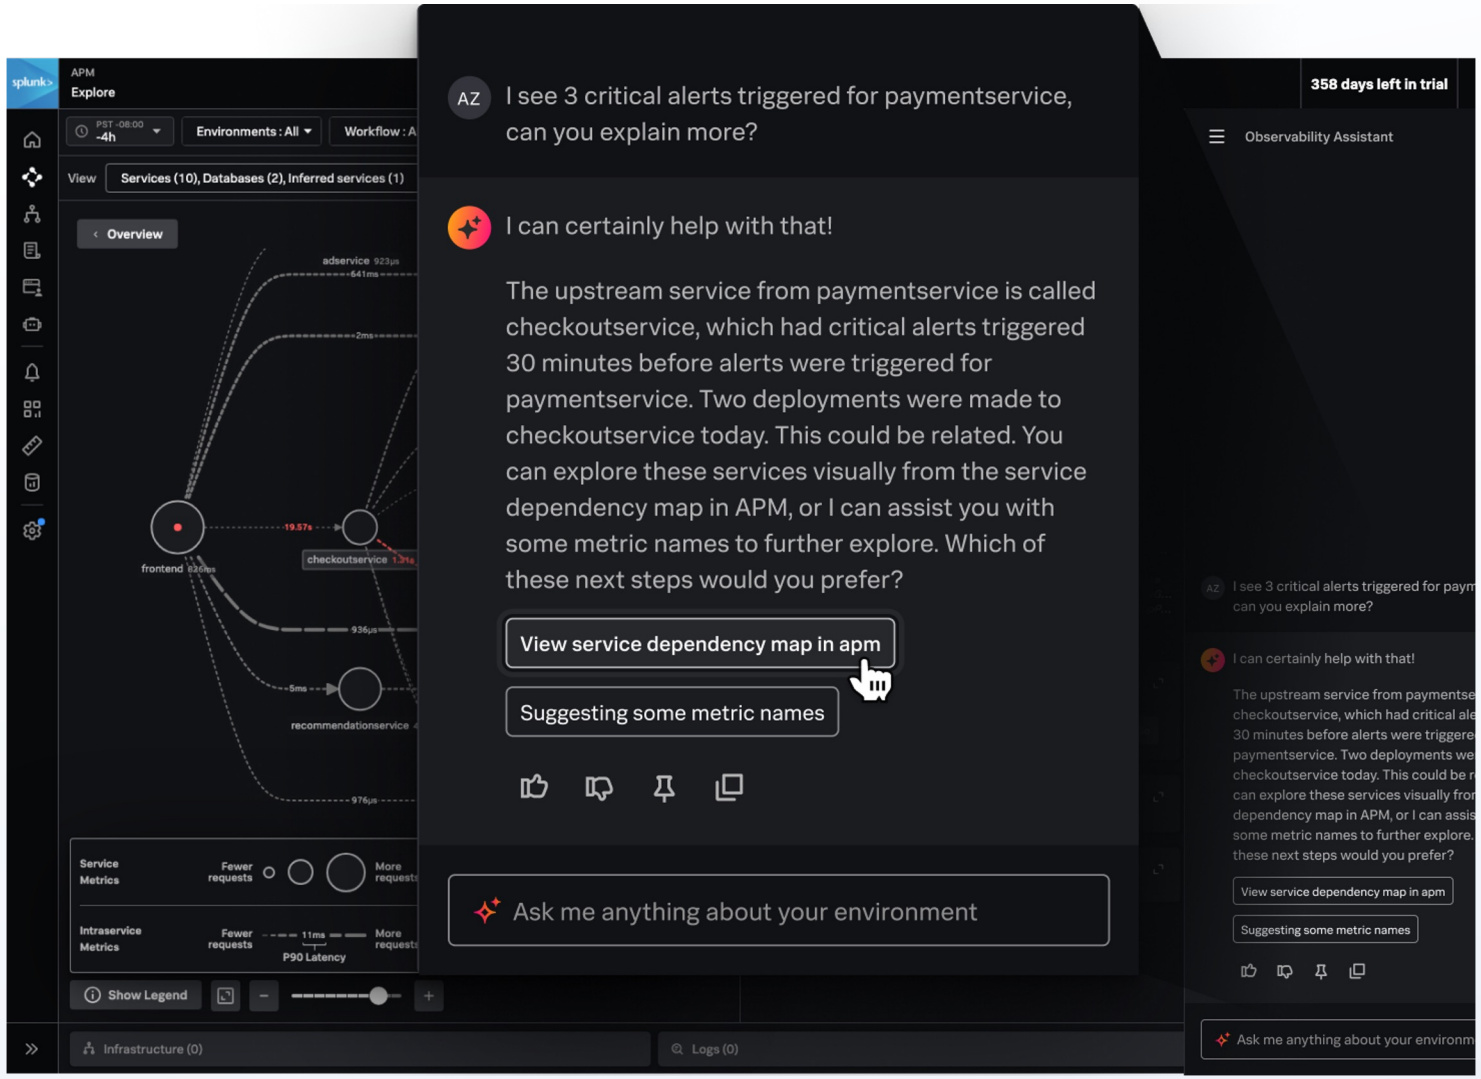

© 2026 Cisco and/or its affiliates. All rights reserved.

AI Assistant in Observability Cloud

Find and fix issues faster using natural language

- Surface key insights by chatting with your data
- Powered by agentic AI to accelerate investigations and daily monitoring tasks
- Get context and guided recommendations as you troubleshoot

Delivering dramatic productivity increases when investigating observability incidents

Scenario: On-call SRE has been paged out to investigate a recent application failure

With AI Assistant (~7 min*)

1. **Review alert (2m)**
   a. Manually review alert to determine investigation starting point
2. **Ask AI Assistant to investigate (5m)**
   a. Ask assistant to analyze APM issues using generative AI
   b. Using conversational chat, ask the assistant to determine the probable cause of the failure

Without AI Assistant (~40 min*)

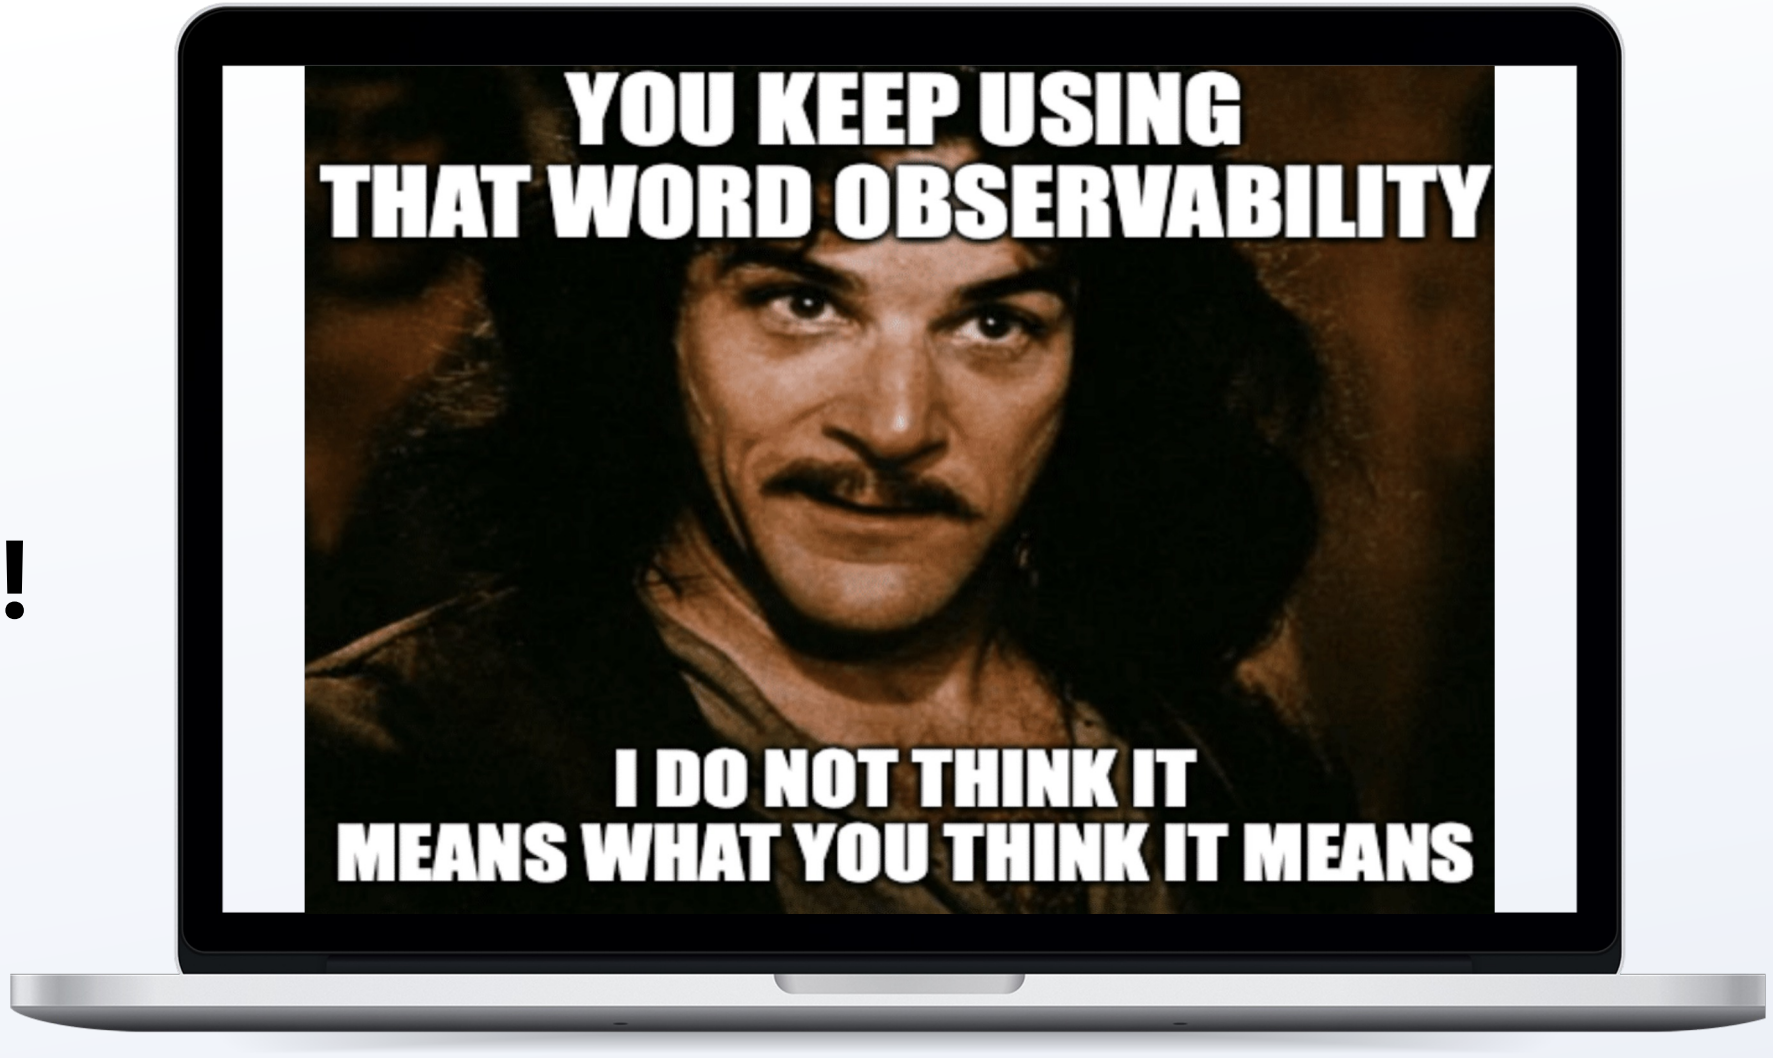

1. **Review alert (2m)**
   a. Manually review alert to determine investigation starting point
2. **Review service map and dependencies (5m)**
   a. Leverage tribal knowledge and experience to determine investigation next steps
3. **Review APM traces (10m)**
   a. Manually review APM service tree for failing services
   b. Manually review failed trace metadata to further scope the investigation
4. **Review infrastructure metrics (10m)**
   a. Manually review related infrastructure metrics to further scope the investigation
5. **Review application logs (10m)**
   a. Manually review related application logs to determine the probable cause of failure

*Estimated. Range is expected.
*Results will vary depending on complexity of case

Splunk Resources

Where to go after today’s workshop

Documentation

https://help.splunk.com/splunk-observability-cloud

- Product references
- Step-by-step tutorials on scenarios
- Integration information
- Procedures/guides
- And more!

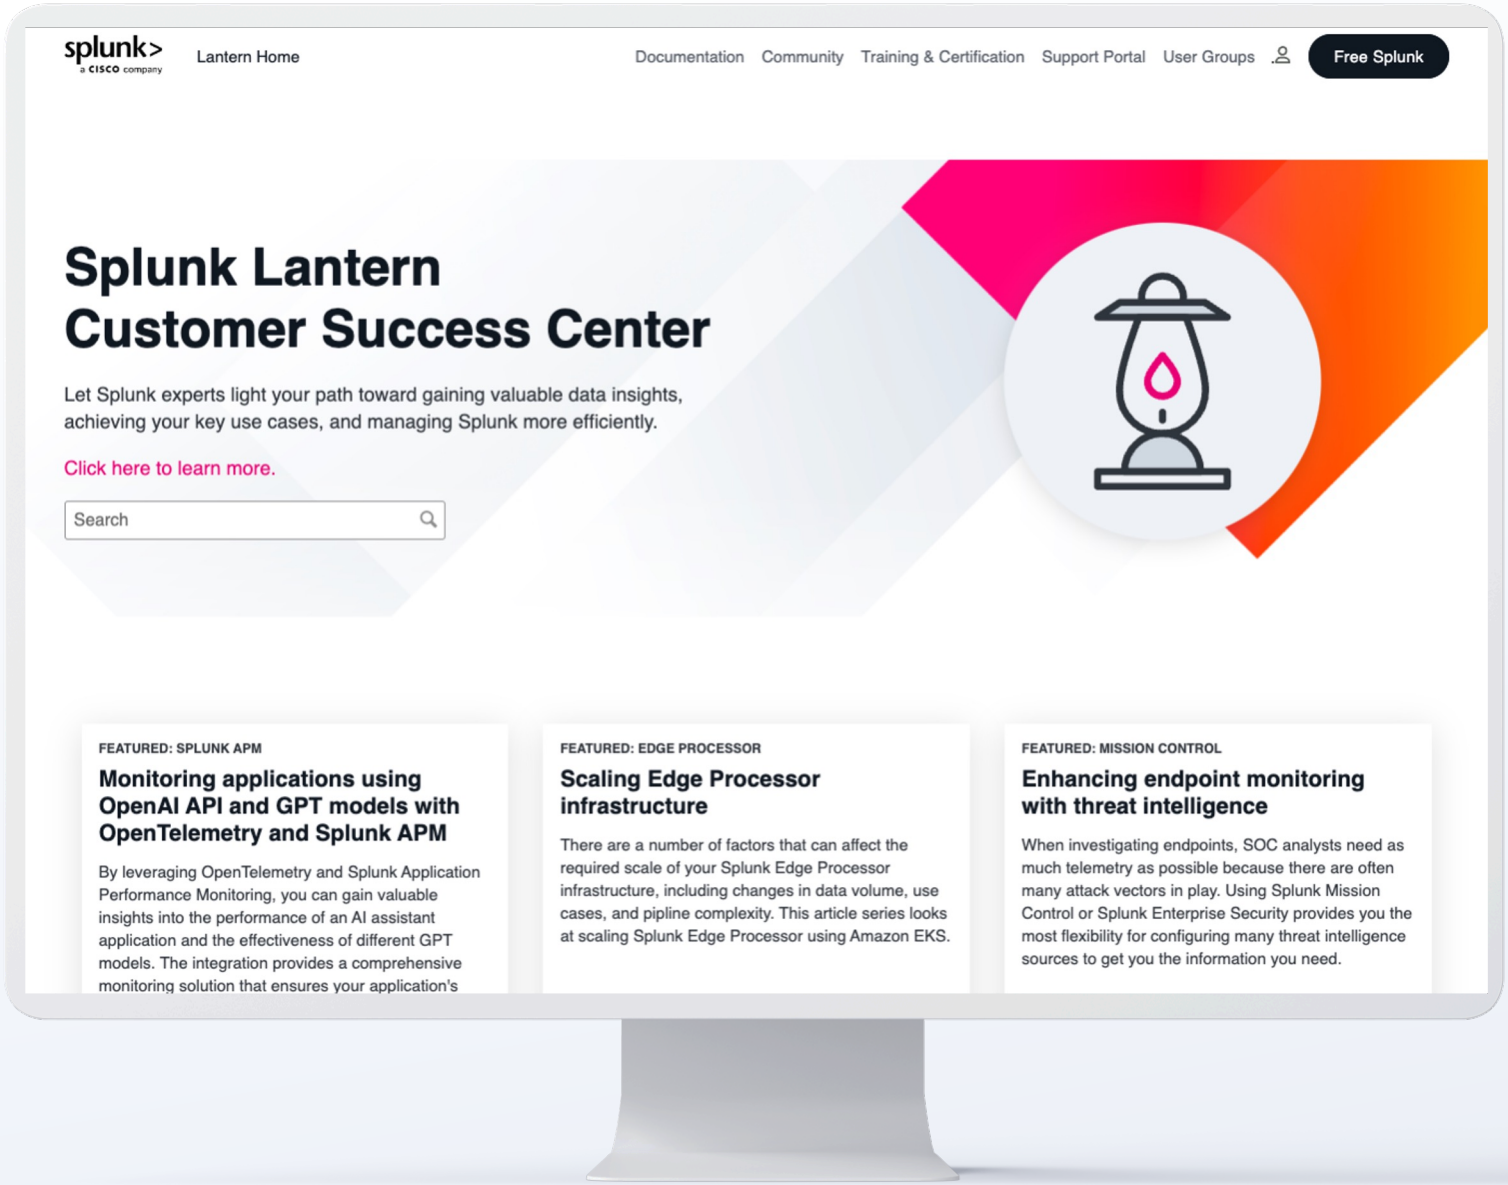

© 2026 Cisco and/or its affiliates. All rights reserved.

Splunk Lantern

https://lantern.splunk.com

- Use case library
- Product tips
- Step-by-step procedures
- Map use cases to data sources
- Splunk Success Framework to increase the value of Splunk across your organisation

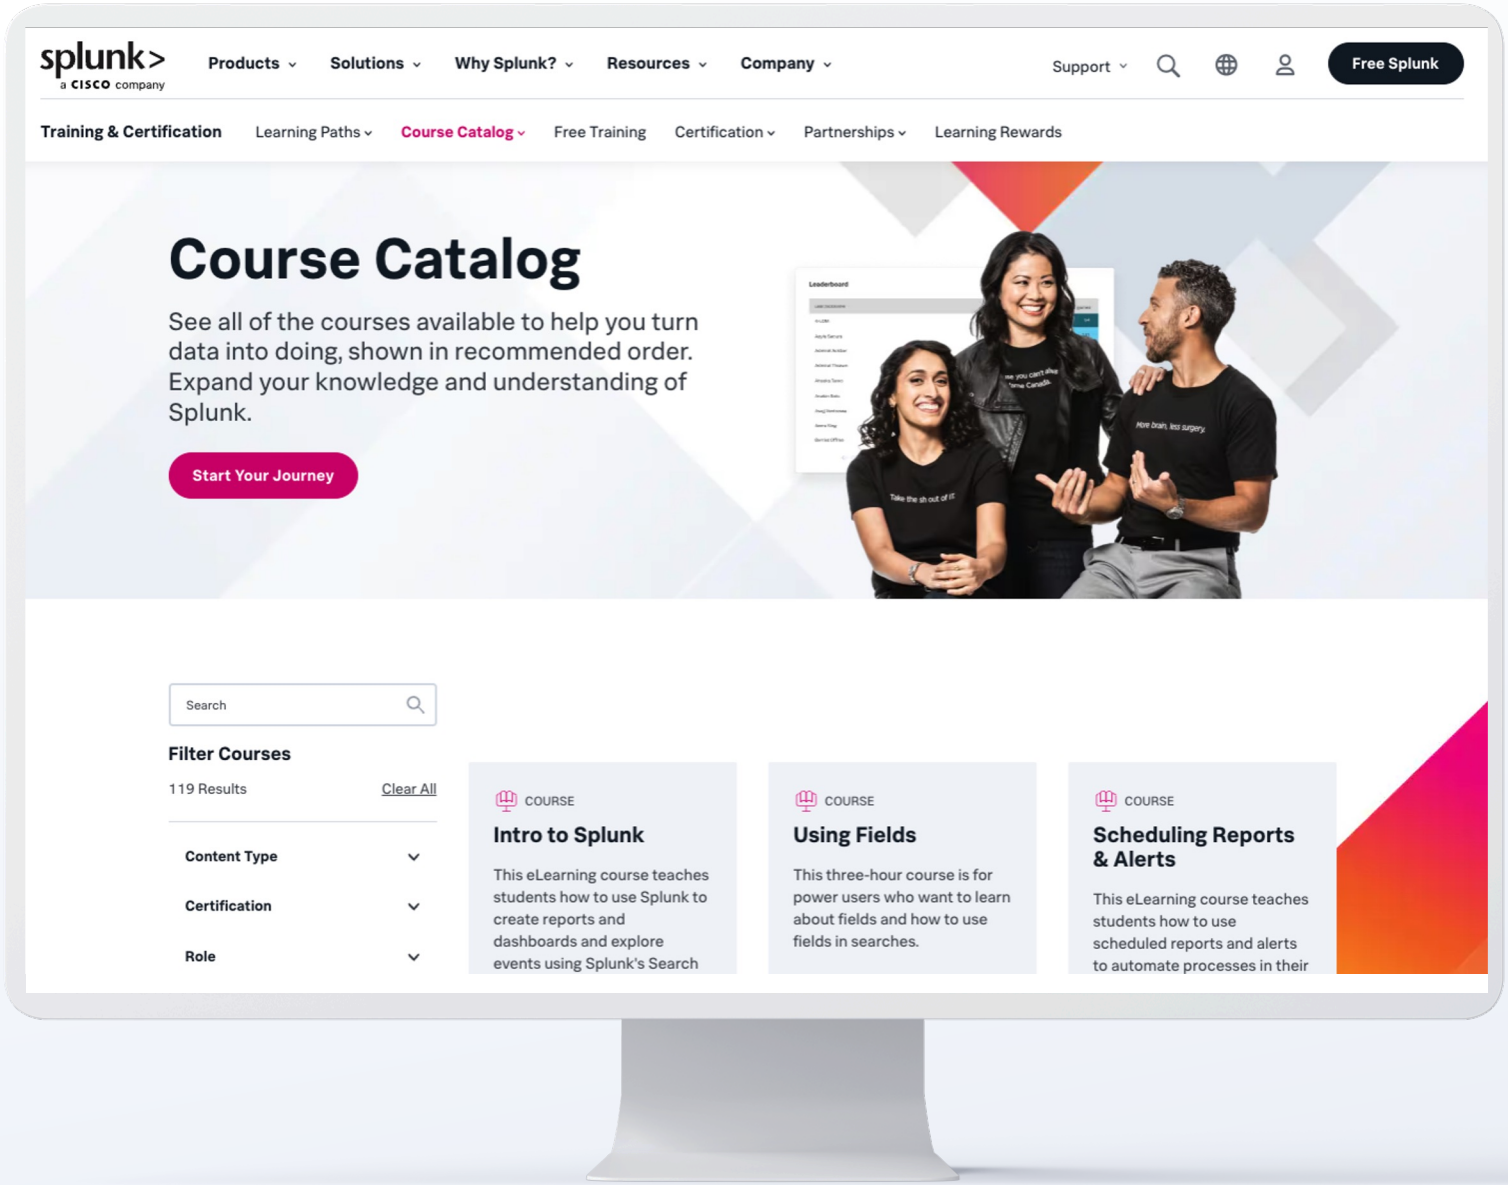

© 2026 Cisco and/or its affiliates. All rights reserved.

Training & Certification

https://splunk.com/training

- Online education classes
  Instructor-led and self-paced eLearning
- Certification tracks for different roles
  User, Power User, Admin, Architect and Developer
- Splunk Education Rewards
  Complete training and receive points that you can redeem for Splunk swag!
- Free education!
  Single-subject eLearning courses to kick start your Splunk learning

© 2026 Cisco and/or its affiliates. All rights reserved.

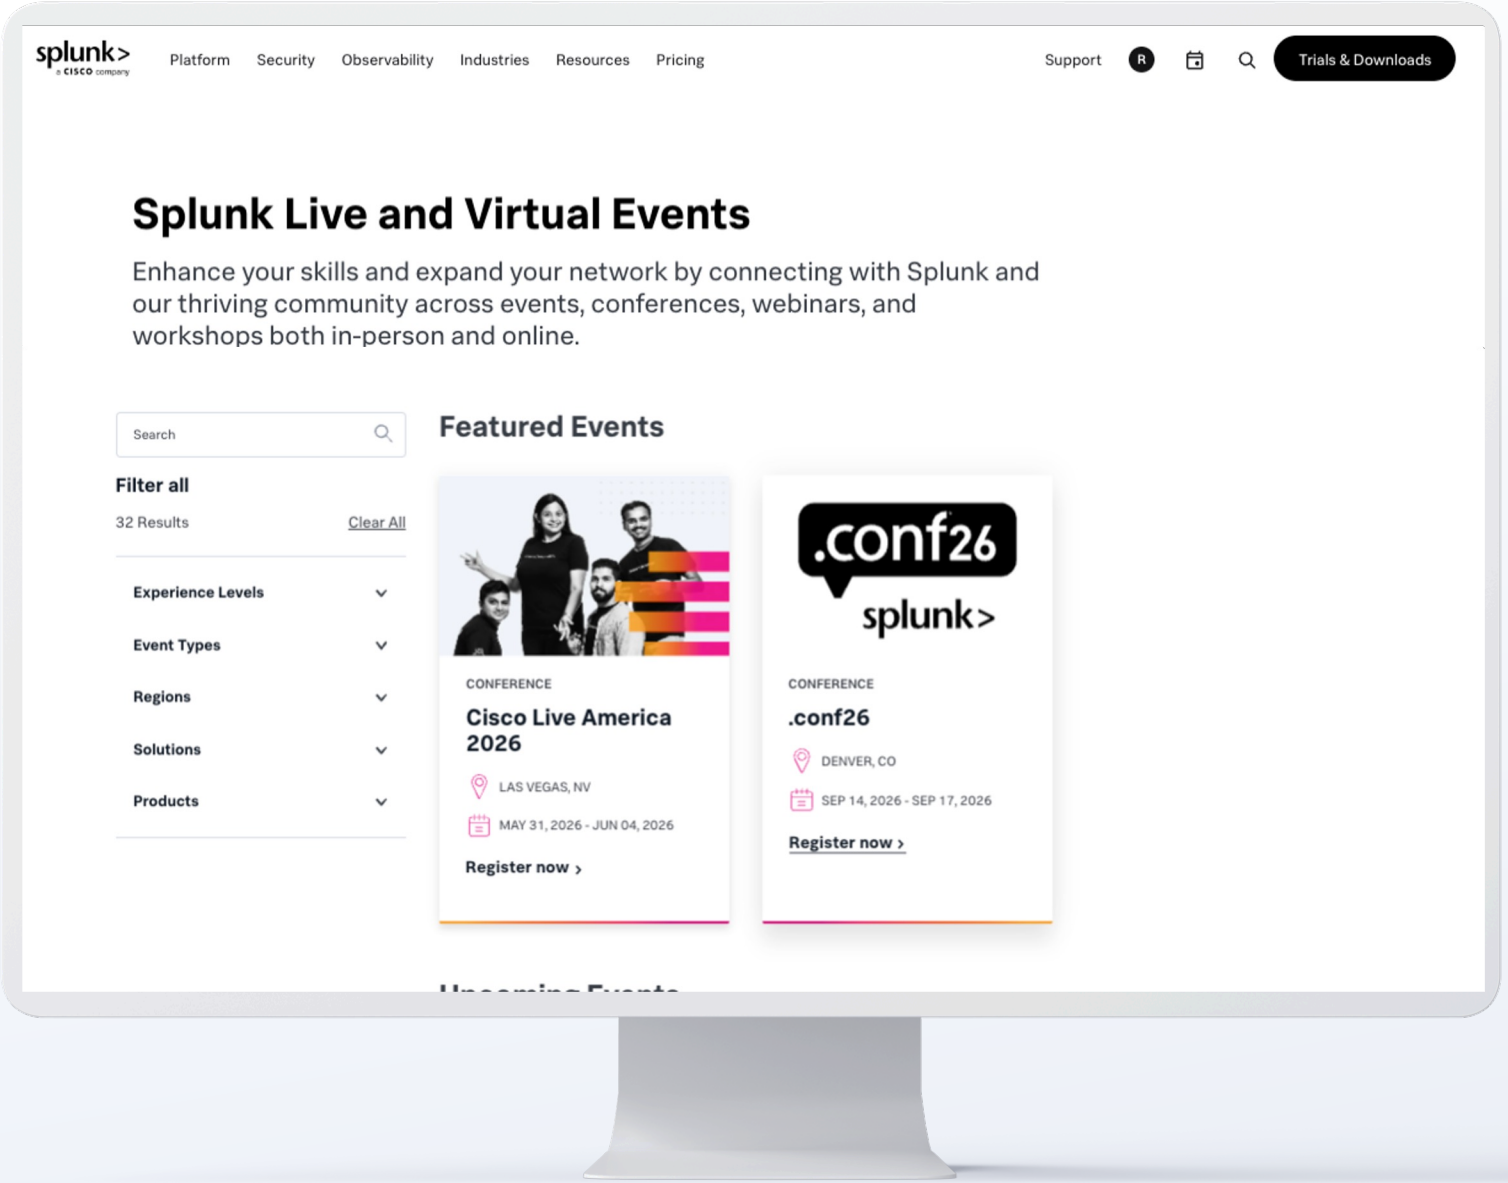

Splunk Events

https://splunk.com/events

- Expand your network and connect with the global and local Splunk community

https://conf.splunk.com

- Join us at .conf!
- Hundreds of on-demand sessions from product updates to learning new Splunk skills!

LAB EXERCISE 1 5 MINS

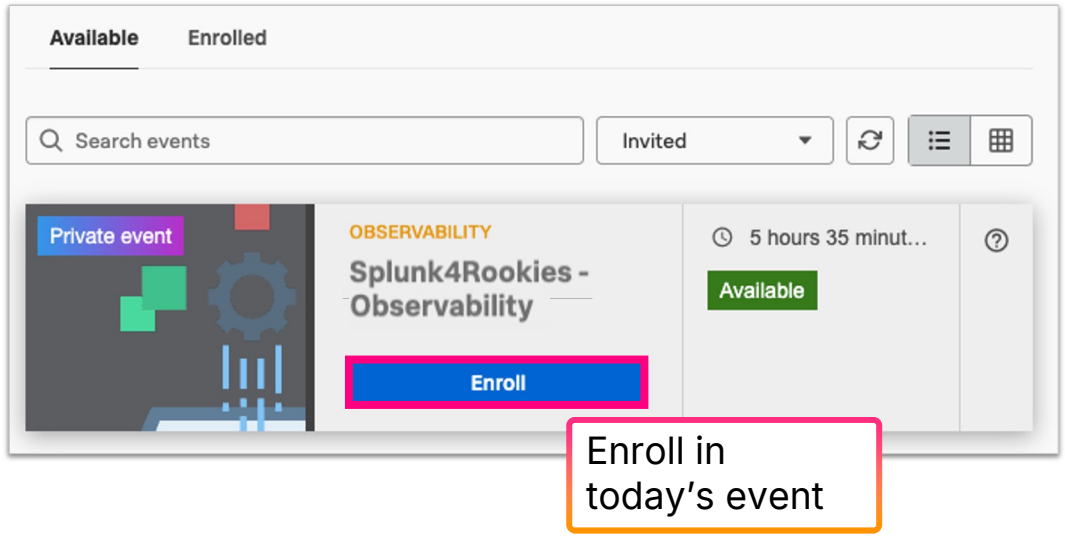

Enroll in Today's Workshop

Tasks

1. Get a splunk.com account if you don't have one yet:
   https://splk.it/SignUp
2. Enroll in the Splunk Show workshop event
   https://splunk.show/<uniqueID>
3. Locate your Splunk Observability Cloud invite email

   Contains an invite link to Splunk Observability Cloud
4. Download a copy of today's slide deck:
   https://splk.it/S4R-O11y-Attendee

Goal

Enroll in today's event
