

The Splunk logo is a black circle with a red border. Inside the circle, there is a red arc representing a progress bar. The arc starts at the bottom left and goes up to the top right. The word "Rookie" is written in white at the bottom left, and "Ninja" is written in white at the top right. The word "splunk" is written in white at the bottom center, followed by a red greater-than sign (>).

- A web browser with Internet access to connect to an AWS server via port 443 (Test connectivity here: <https://domain-test.splunk.show>.)
- A splunk.com account to login to the workshop environment (create an account [here](#)).

The screenshot displays the gVisor Security Operations dashboard. At the top, there are navigation tabs: Search, Settings, Alerts, Dashboard, Network Diagram, and Ready Made Scanners. The main header is 'Security Operations' with filters for 'Time Period' (set to 'All time') and 'User' (set to 'ALL'). Below this, there are several sections:

- Website logins from external IP:** A large green bar with a '0' and a refresh icon, indicating zero logins.
- Scanning Activity by Known Scanners:** A large green bar with a '0' and a refresh icon, indicating zero scanning activity.
- Password attempts per user:** A bar chart showing password attempts for four users: 'sarah@02', 'sarah@03', 'sarah@04', and 'sarah@05'. The legend indicates different password types: 'passwords containing numbers', 'passwords containing special characters', 'passwords containing lowercase letters', 'passwords containing uppercase letters', 'passwords containing digits', 'passwords containing symbols', and 'passwords containing spaces'.
- Web Traffic Over Time:** A line chart showing connections over time. The x-axis is labeled 'Time' and ranges from 00:00 to 01:00. The y-axis is labeled 'Connections' and ranges from 0 to 3000. The chart shows a peak in connections around 00:30.
- User agent string analysis:** A bar chart showing the distribution of user agent strings. The x-axis is labeled 'User Agent String' and ranges from 0 to 20000. The y-axis is labeled 'Count' and ranges from 0 to 200. The chart shows a high frequency of user agent strings starting with 'Mozilla/5.0'.
- External Logon Attempts:** A map of the world showing logon attempts. A blue dot is visible on the map, indicating a logon attempt from a specific location.
