InfoSec App for Splunk

Hands-On Workshop

splunk>
a cisco company

Forward-looking statements

This presentation may contain forward-looking statements regarding future events, plans or the expected financial performance of our company, including our expectations regarding our products, technology, strategy, customers, markets, acquisitions and investments. These statements reflect management's current expectations, estimates and assumptions based on the information currently available to us. These forward-looking statements are not guarantees of future performance and involve significant risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from results, performance or achievements expressed or implied by the forward-looking statements contained in this presentation. For additional information about factors that could cause actual results to differ materially from those described in the forward-looking statements made in this presentation, please refer to Cisco's periodic reports its other filings with the SEC, including the risk factors identified in Cisco's most recent quarterly report on Form 10-Q and annual report on Form 10-K, copies of which may be obtained by visiting the Cisco Investor Relations website at investor.cisco.com or the SEC's website at www.sec.gov. Any projections in this presentation are based on information currently available to Cisco, which is subject to change. The forward-looking statements made in this presentation are made as of the time and date of this presentation. If reviewed after the initial presentation, even if made available by us, on our website or otherwise, it may not contain current or accurate information. We disclaim any obligation to update or revise any forward-looking statement based on new information, future events or otherwise, except as required by applicable law.

In addition, any information about our roadmap outlines or our general product direction is subject to change at any time without notice. It is for informational purposes only and shall not be incorporated into any contract or other commitment. We undertake no obligation either to develop the features or functionalities described, in alpha or beta or in preview (used interchangeably), or to include any such feature or functionality in a future release.

Cisco, Splunk and the Cisco and Splunk logos are trademarks or registered trademarks of Cisco and/or its affiliates in the U.S. and other countries. To view a list of Cisco trademarks, go to: www.cisco.com/go/trademarks. Third-party trademarks mentioned in this presentation are the property of their respective owners. The use of the word partner does not imply a partnership relationship between Cisco and any other company.

Target Audience

Role:

- ✓ Admins or Security Analysts

Experience (Should meet at least one of these):

- ✓ Some basic Splunk knowledge or hands-on experience
- ✓ Or you have attended a hands-on Splunk workshop, e.g. Splunk4Rookies

© 2026 Cisco and/or its affiliates. All rights reserved.

Please introduce yourself!

- Name
- Company/organisation
- Role
- Are you currently using Splunk?
- What are you interested in using Splunk for?

© 2026 Cisco and/or its affiliates. All rights reserved.

Workshop Agenda

- Splunk security overview
- Data fundamentals
- InfoSec App for Splunk: setup and configuration
- Hands-on investigation
- Customizing the Infosec app
- Introduction to Splunk Security Essentials
- Combining InfoSec App for Splunk with Splunk Security Essentials
- Splunk Resources and next steps

© 2026 Cisco and/or its affiliates. All rights reserved.

REGISTRATION 5 MINS

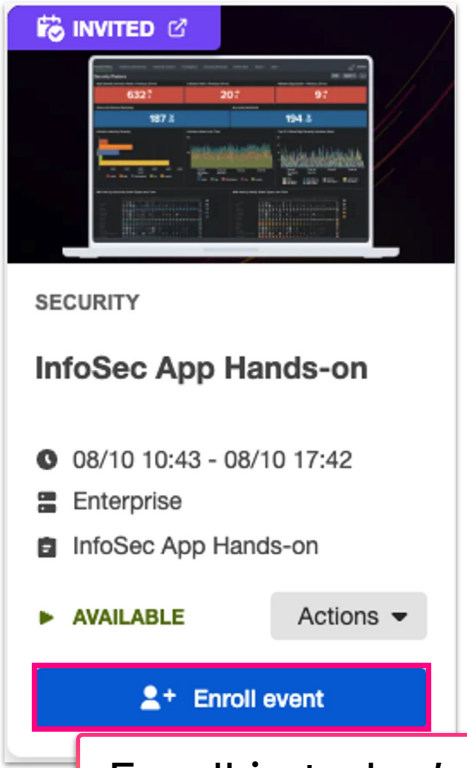
Enroll in Today's Workshop

Tasks

1. Get a splunk.com account if you don't have one yet: https://splk.it/SignUp
2. Enroll in the Splunk Show workshop event: https://splunk.show/<uniqueID>
3. Download the hands-on lab guide: https://splk.it/Infosec-Lab-Guide

   Contains step-by-step instructions for all of today's exercises!
4. Download a copy of today's slide deck: https://splk.it/Infosec-Attendee

Goal



Enroll in today's event

© 2026 Cisco and/or its affiliates. All rights reserved.

Today, It's Hard to be Resilient

Complex Environments

Siloed tools and teams

Evolving compliance and regulations

Splunk delivers unparalleled digital resilience.

Providing **end-to-end visibility** and insights across your entire digital footprint

Powering the **SOC of the future** with unified threat detection investigation and response, enhanced with network insights

Delivering **observability for the entire enterprise** to prevent unplanned downtime across all environments

Unified by a flexible platform that provides enterprise scale data management

© 2026 Cisco and/or its affiliates. All rights reserved.

cisco

Build digital resilience with Splunk.

Splunk brings SecOps, ITOps and engineering together to...

Prevent major issues

Remediate faster

Adapt quickly

© 2026 Cisco and/or its affiliates. All rights reserved.

© 2026 Cisco and/or its affiliates. All rights reserved.

The path to greater digital resilience.

Security
SecOps

Splunk Security Essentials

InfoSec App for Splunk

Foundational Visibility

See across environments

Search, monitor and investigate for real-time security monitoring

Enterprise Security (ES) Essentials

Guided Insights

Detect threats and issues with context

Reduce noise, detect more threats and identify risk with AI-powered detections

Enterprise Security (ES) Premier

Proactive Response

Get ahead of issues

Detect anomalies and accelerate investigation and response with automation

Unified Workflows

Collaborate seamlessly

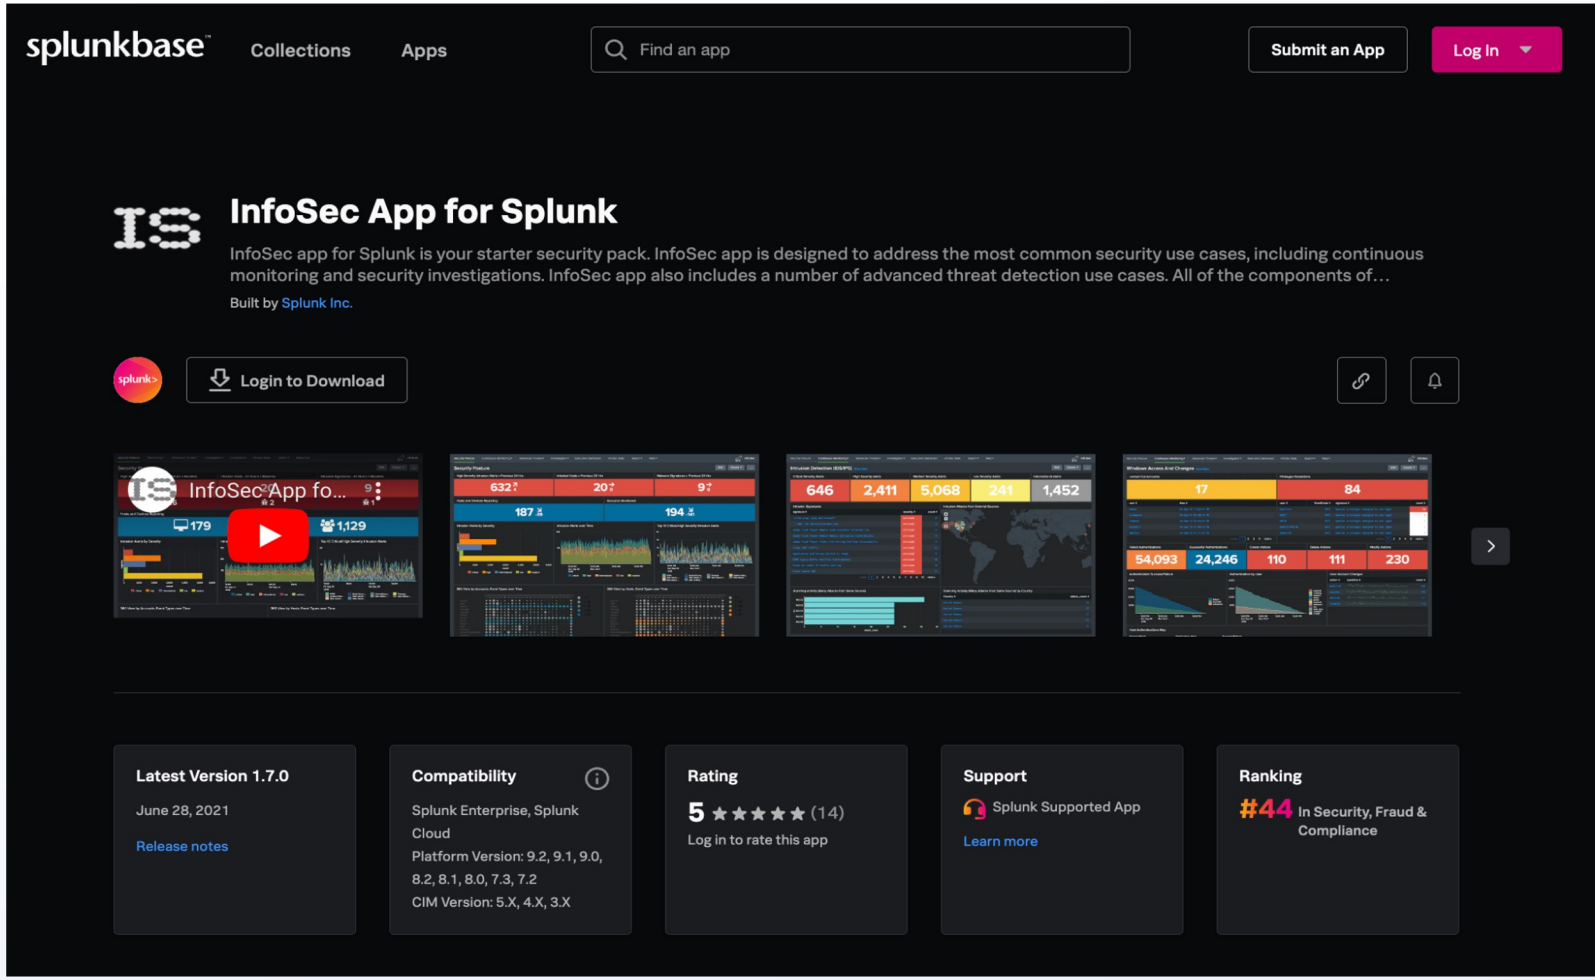
Maximize SOC efficiency with integrated threat detection, investigation, response and exposure management

Accelerated by Splunk AI

InfoSec App for Splunk Overview

Free Security app on Splunkbase

- Works on Splunk Enterprise and Splunk Cloud
- Uses standard Splunk functionality
- Requires CIM-compliant data
- Install on search head/cluster only
- 25 out-of-the-box dashboards which group many more panels
  - Security Posture
  - Compliance
  - Access Anomalies
  - Network Anomalies



Learn more: https://docs.splunk.com/Documentation/InfoSec

© 2026 Cisco and/or its affiliates. All rights reserved.

InfoSec App for Splunk design principles

Easy to use and modify with a minimal knowledge of Splunk

- Simple - no SPL knowledge required
- Out of the box content for common security use cases
- Leverages selected security content from Splunk Security Essentials (SSE)

© 2026 Cisco and/or its affiliates. All rights reserved.

What are Data Models?

A data model is a search-time mapping of data into a hierarchical structure

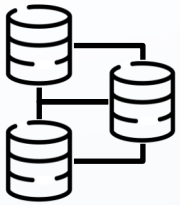
- Structured, hierarchical mapping of semantic knowledge of a collection of datasets.
- A collection of objects:
  - That have constraints and attributes
  - Where child objects inherit those constraints and attributes
  - Outlines the details necessary to enable searches of a dataset information

© 2026 Cisco and/or its affiliates. All rights reserved.

Splunk’s Common Information Model (CIM)

Preconfigured data models

Contains a collection of preconfigured data models that you can apply to your data at search time



Normalize your data

Helps you to normalize your data to match a common standard

Use common field names for equivalent events from different sources or vendors

E.g. Use "src_ip" instead of

- "sourceIPAddress" in AWS data, and
- "callerIp" in GCP data

Utilizes tags

User-defined labels that group events, hosts, or other objects for easier identification, organization, and searching

E.g. Create a “critical_error” tag for events that contain “error” and “high severity”. Then you can simply search for “tag=critical_error”

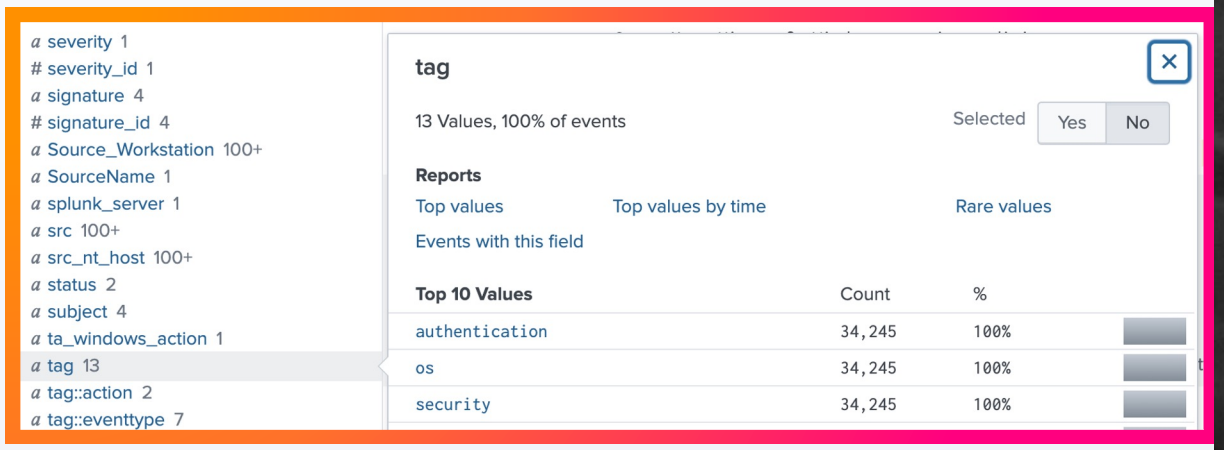
Learn More about Splunk Add-ons and the Common Information Model:
https://docs.splunk.com/Documentation/AddOns/released/Overview/Add-onsandCIM

© 2026 Cisco and/or its affiliates. All rights reserved.

How do you ensure your data is CIM compliant?

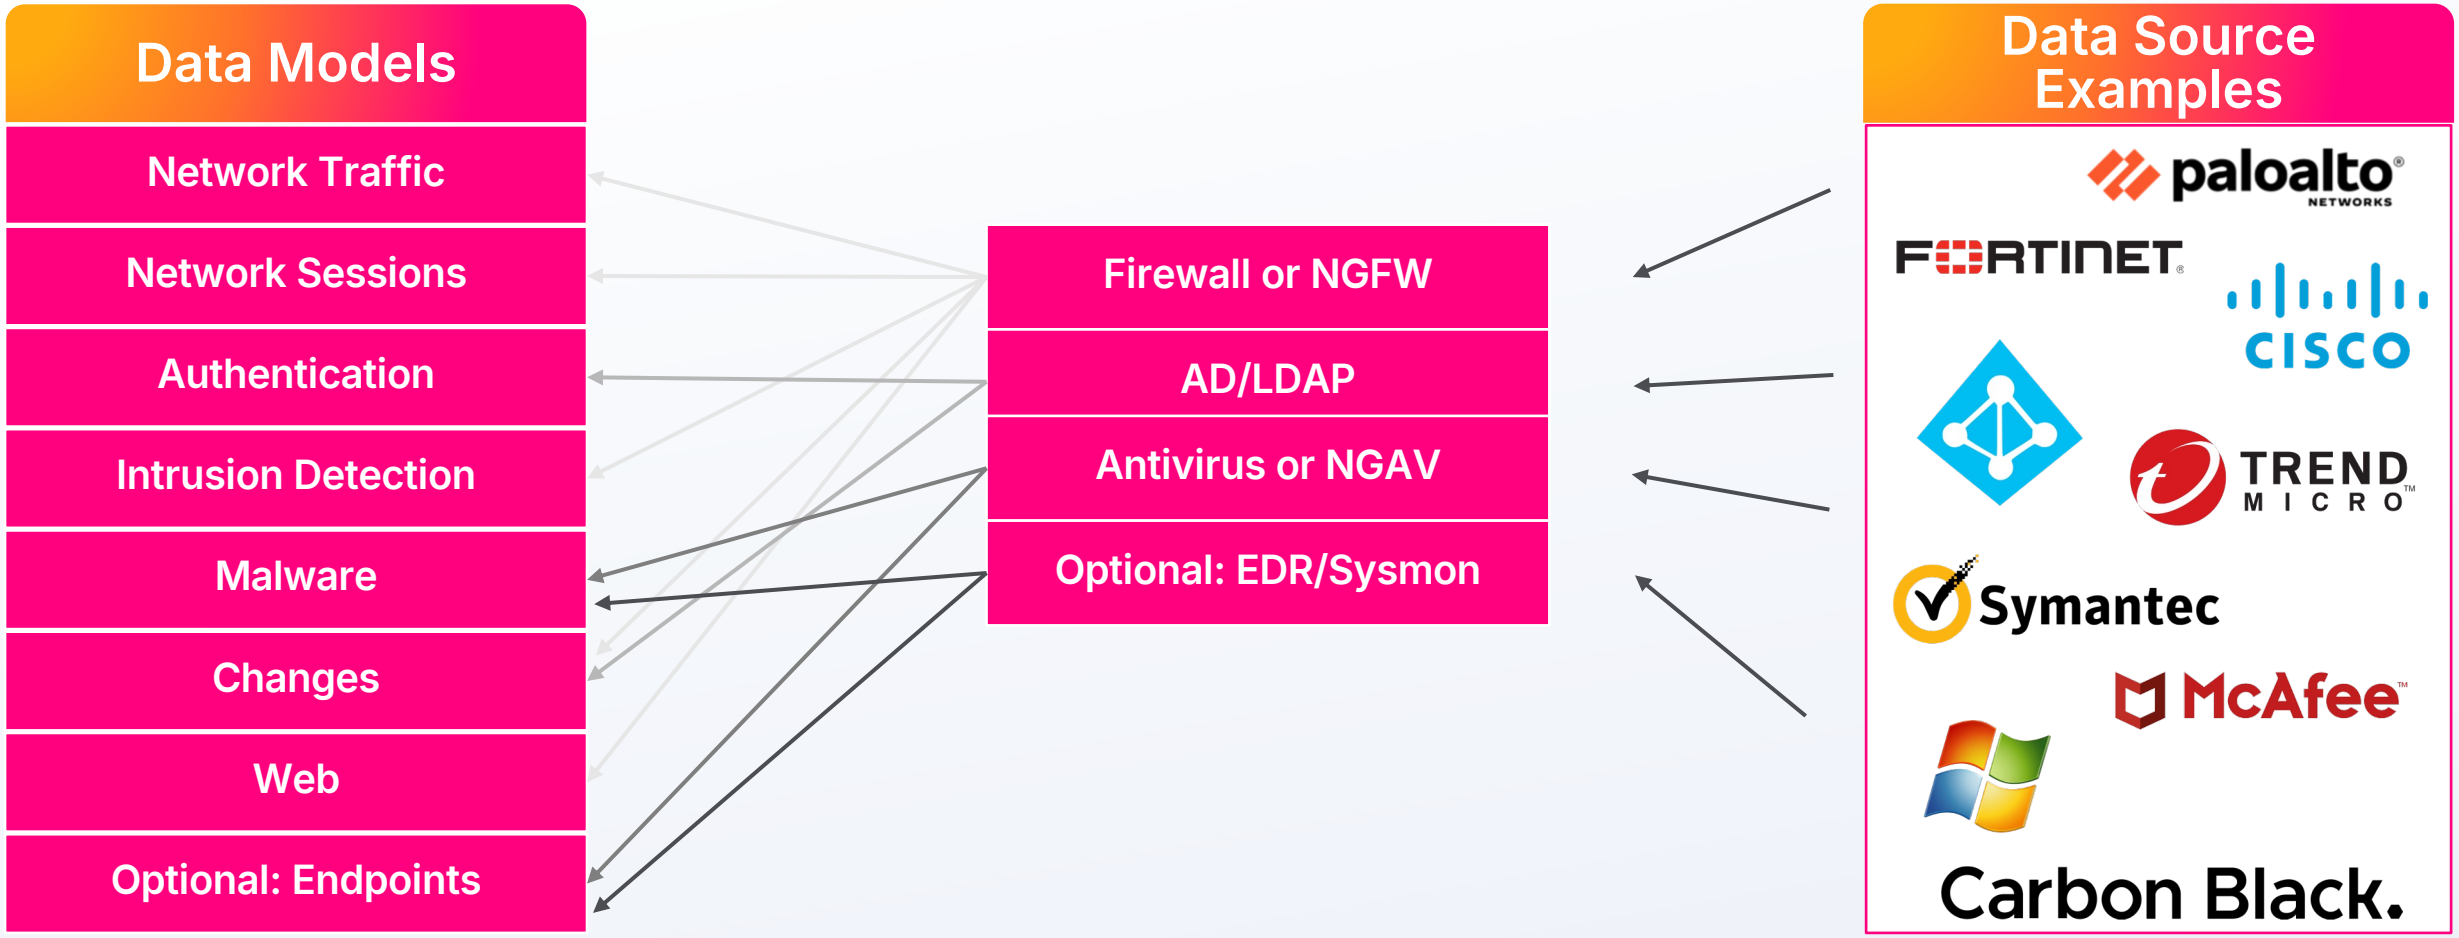
Tags!

- The CIM employs the use of tags to identify data to different data models
- Ensure your data is tagged properly
  - Example: Check the tags field



© 2026 Cisco and/or its affiliates. All rights reserved.

InfoSec App Data Sources



Splunk Common Information Model allows using many other data sources in the InfoSec App

© 2026 Cisco and/or its affiliates. All rights reserved.

InfoSec App Implementation

High level overview

1. Send AD, FW, AV data to Splunk using CIM-compliant add-ons
2. Install required add-ons from Splunkbase
   (CIM Add-On, Force Directed Visualization, Lookup File Editor)
3. Enable Data Model Acceleration via UI
   (Authentication, Change, Intrusion Detection, Malware, Network Sessions, Network Traffic, Endpoint, Web)
4. Install InfoSec App from Splunkbase, no initial configuration required

(Steps 2–4 take approximately 5 mins to complete)

Name	Folder name	Version
InfoSec	InfoSec_App_for_Splunk	1.7.0
Slack Alerts	slack_alerts	2.3.0
Search & Reporting	search	9.2.1
Sankey Diagram	sankey_diagram_app	1.4.0 | Update to 1.6.0
Punchcard	punchcard_app	1.5.0
Home	launcher	
Force Directed Visualisation App for Splunk	force_directed_viz	3.1.0
Splunk Common Information Model	Splunk_SA_CIM	5.3.2

Today's Scenario

Your Company

- Buttercup State University is a close-knit community college home to approximately 2,500 students.
- Security hasn't been a top priority but recent cyber attacks on other universities have brought it into focus.
- Buttercup State University has recently invested in Splunk to help address any potential threats or breaches swiftly.

Your Role

- You are one of the Security Analysts at Buttercup State University and are also fairly new to Splunk.
- The IT team have installed Splunk, forwarded data from a variety of sources and also installed some apps, including the InfoSec App for Splunk.
- They've now tasked you with finishing the setup and providing some specific security insights for IT management...

BUTTERCUP STATE UNIVERSITY

© 2026 Cisco and/or its affiliates. All rights reserved.

What Has the University Asked For?

IT team: Install the Splunk Add-on for AWS and finish setting up the InfoSec App for Splunk so that the dashboards populate correctly

Malware: Find Malware-infected files and setup an alert for future detections

User behavior: Look for sudden access changes, unauthorized role modifications, or unusual activity

Customize the InfoSec App: Look for ways to customize the content for Buttercup State University

Add additional security content: Review the content in Splunk Security Essentials and add any new use cases you think might be valuable

BUTTERCUP STATE UNIVERSITY

© 2026 Cisco and/or its affiliates. All rights reserved.

Set Up the InfoSec App

Install the Splunk Add-on for AWS and finish setting up the InfoSec App for Splunk

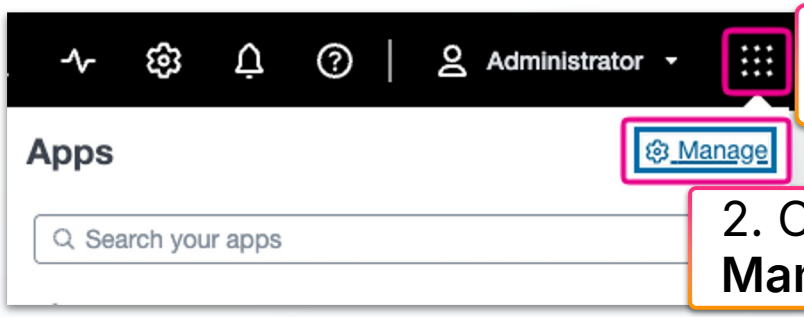
Tasks

1. Install the Splunk Add-on for AWS
2. Confirm the health of the InfoSec App for Splunk
3. Accelerate data models

© 2026 Cisco and/or its affiliates. All rights reserved.

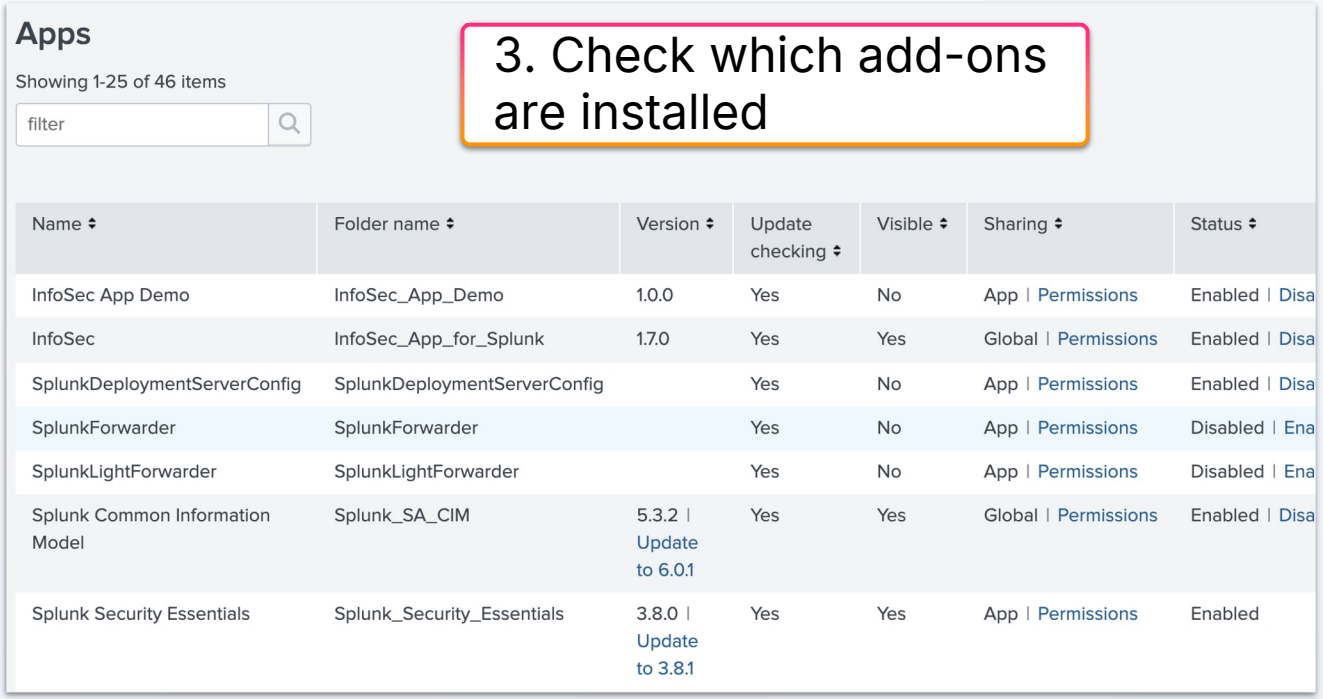
Check Which Add-ons are Installed

Via Splunk Web



1. Click on the **Apps** menu

2. Click on **Manage**



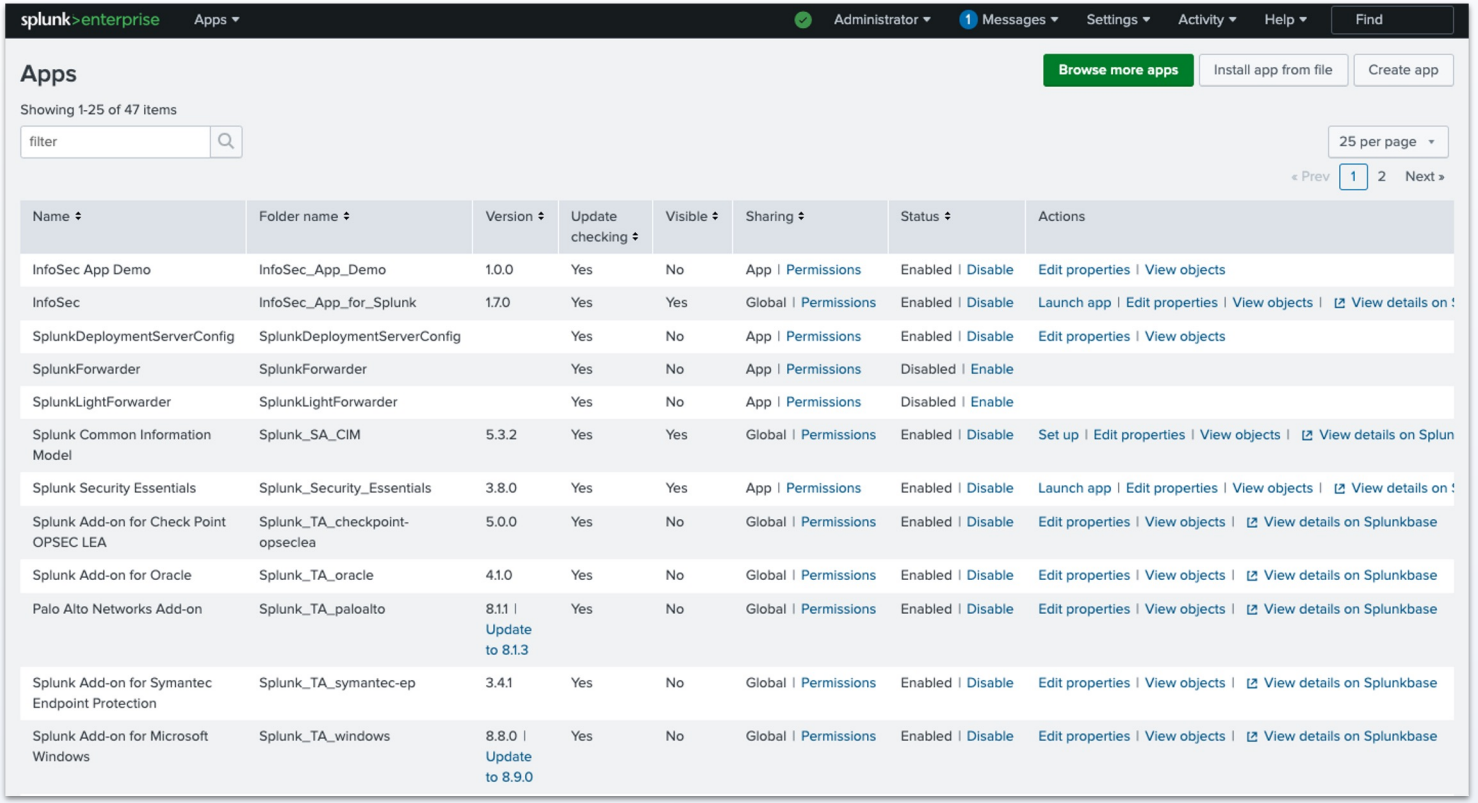
3. Check which add-ons are installed

© 2026 Cisco and/or its affiliates. All rights reserved.

TA Data Sources Mapped

Looking at the installed add-ons, we notice that the **Splunk Add-on for AWS** is missing.

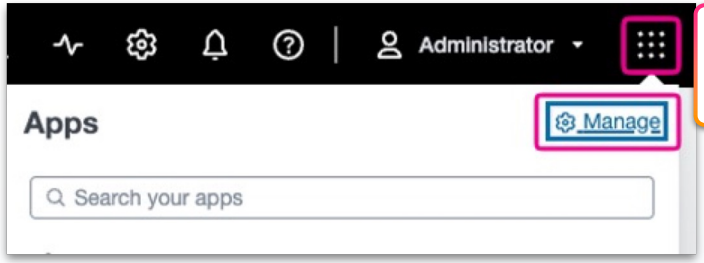
To make sure that all our data is CIM compliant and the data is showing up in our InfoSec App dashboards, we need to install the Splunk Add-on for AWS.



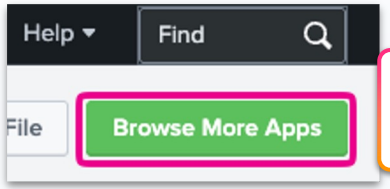
© 2026 Cisco and/or its affiliates. All rights reserved.

Install the Splunk Add-on for AWS

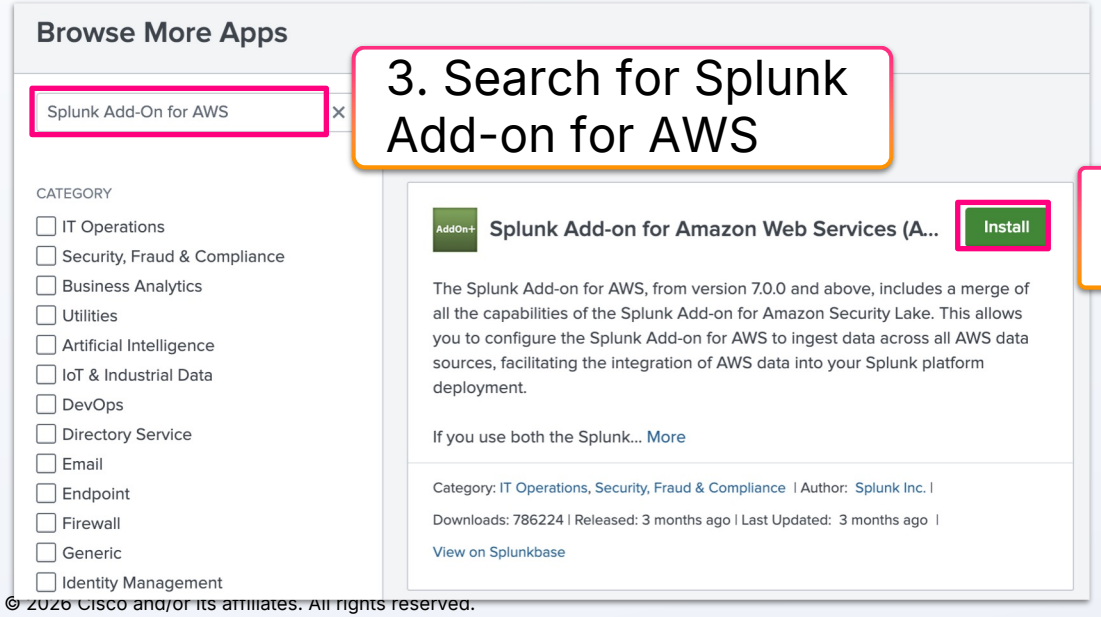
Via Splunk Web



1. Open the **Apps** menu and click on **Manage**

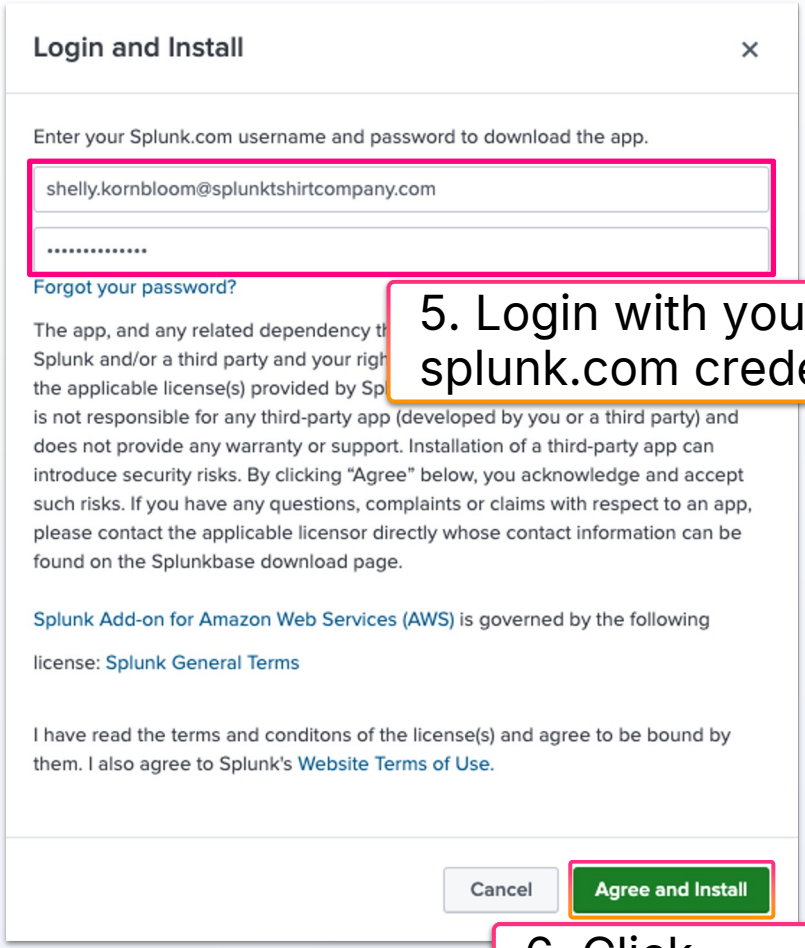


2. Click on **Browse More Apps**



3. Search for Splunk Add-on for AWS

4. Click **Install**

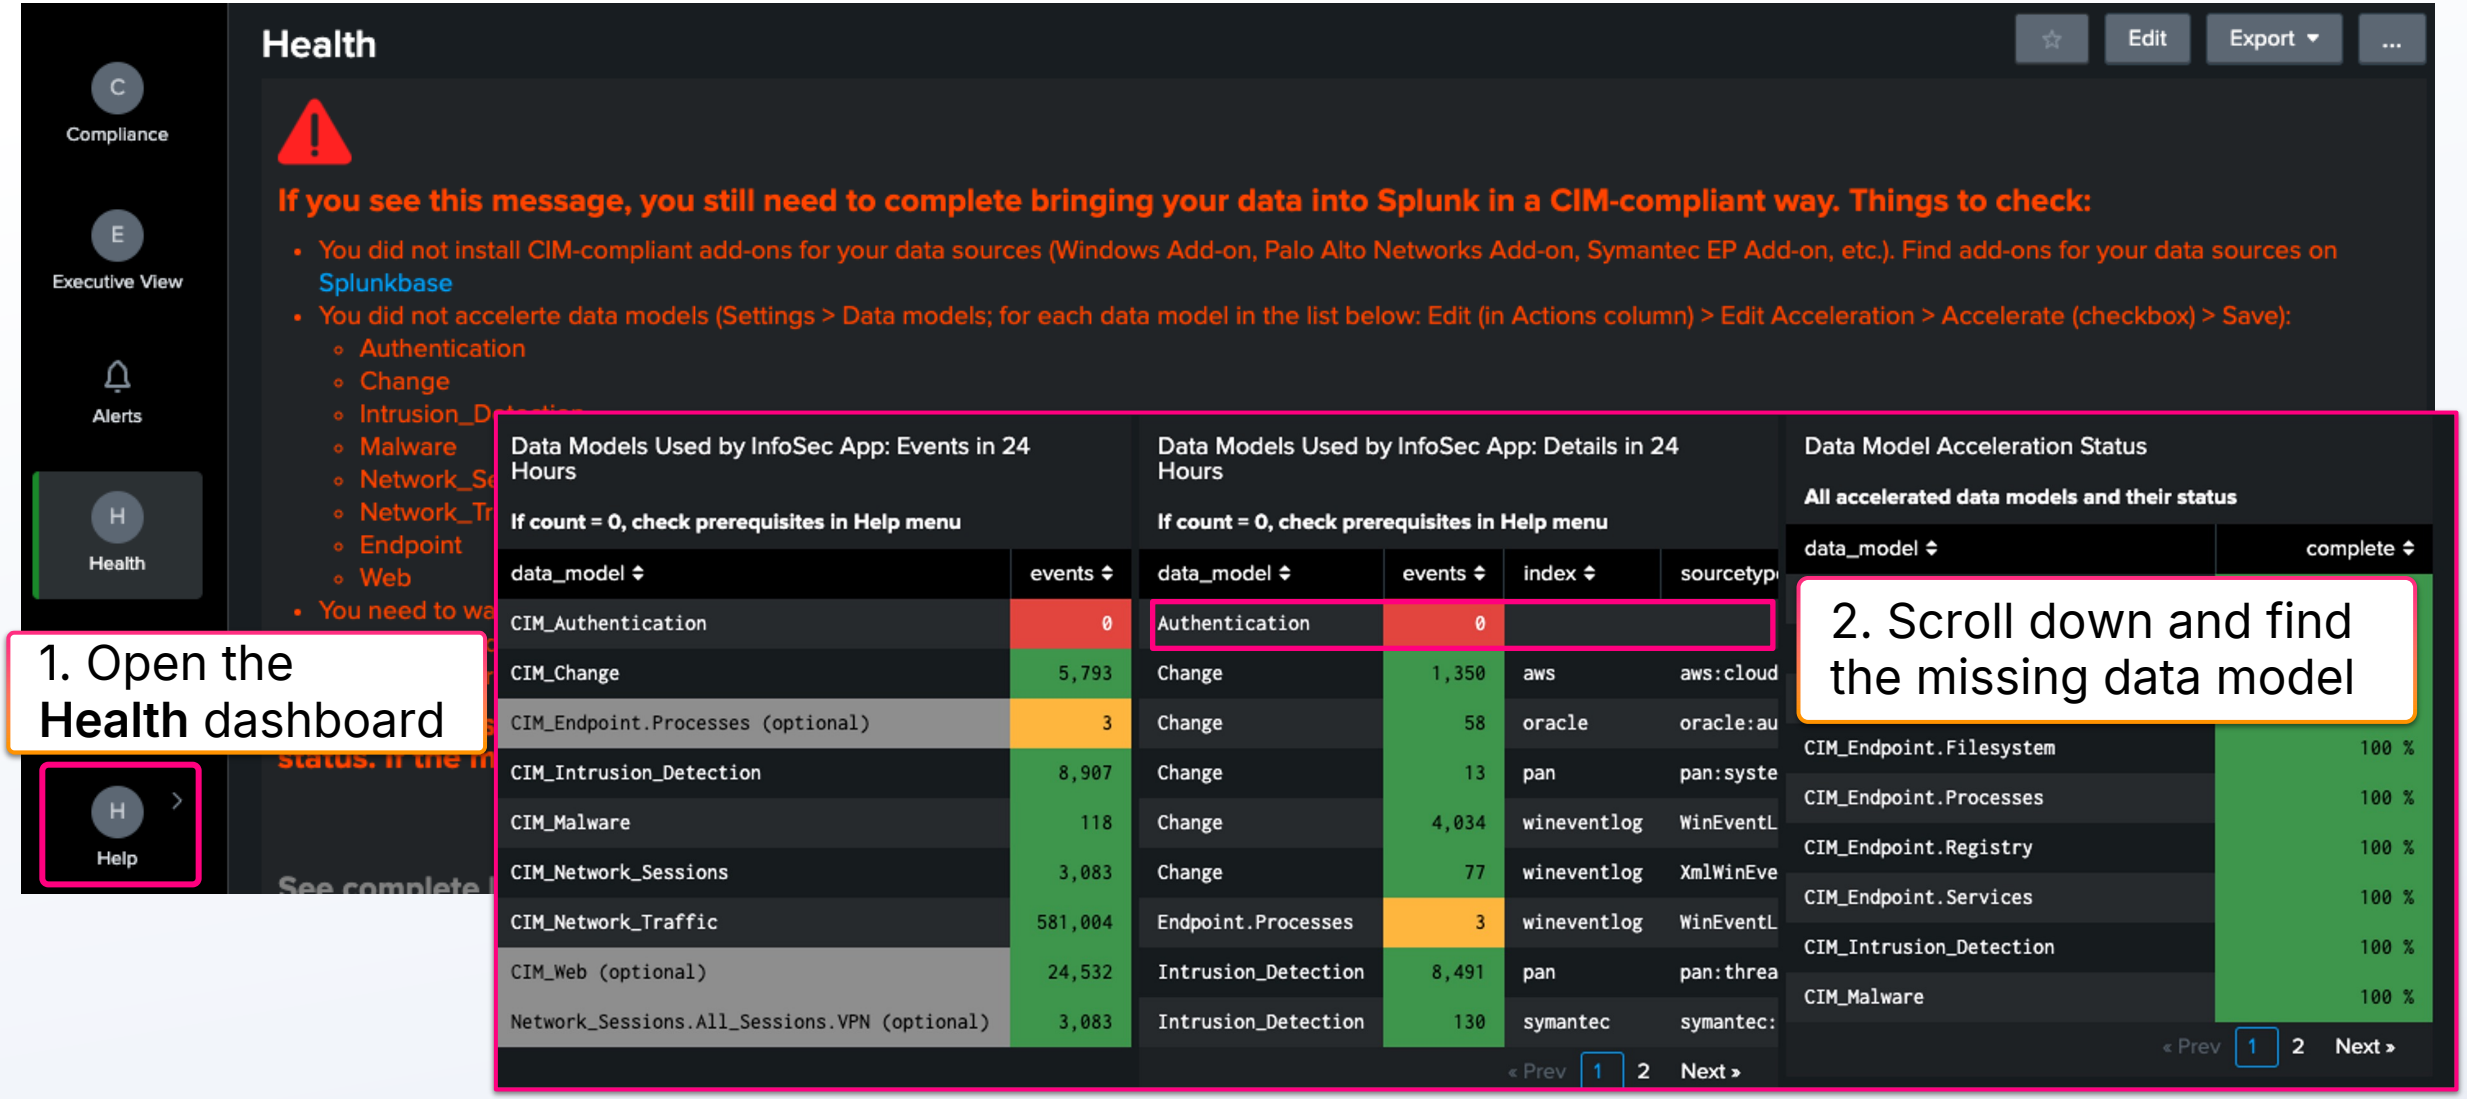


5. Login with your splunk.com credentials

6. Click **Agree and Install**

© 2026 Cisco and/or its affiliates. All rights reserved.

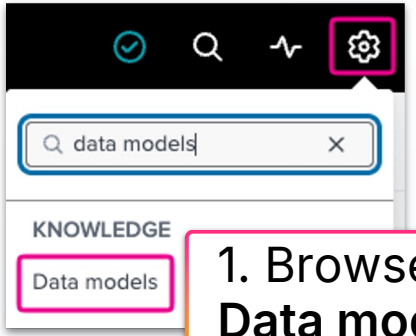
Check the Health Dashboard in the InfoSec App



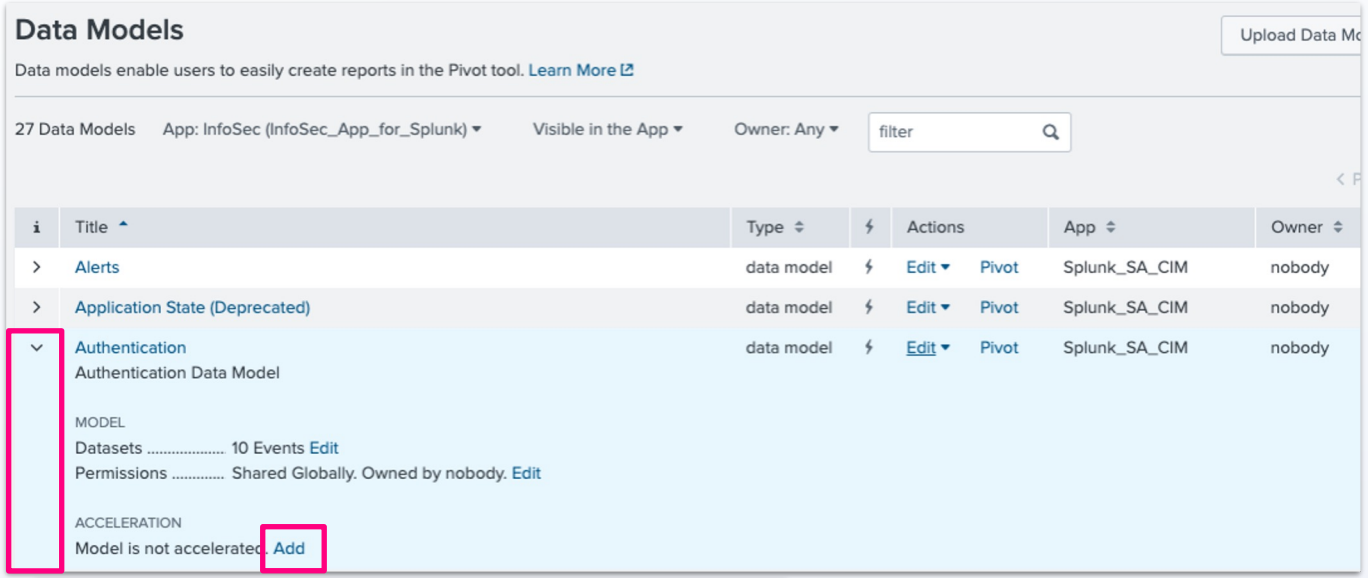
© 2026 Cisco and/or its affiliates. All rights reserved.

Accelerate the Authentication Data Model

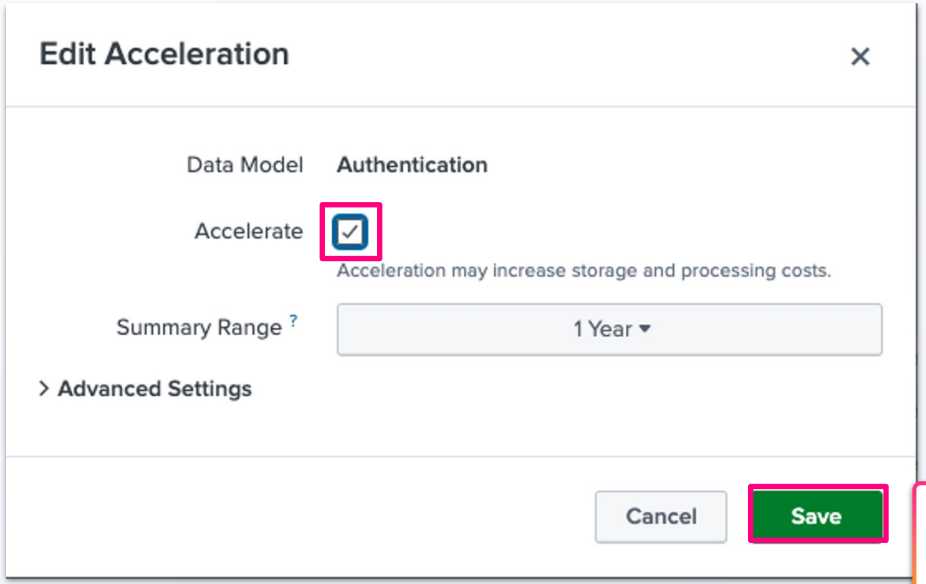
Edit the data model acceleration settings



1. Browse to the **Data models** settings



2. Expand the **Authentication** section and click **Add**

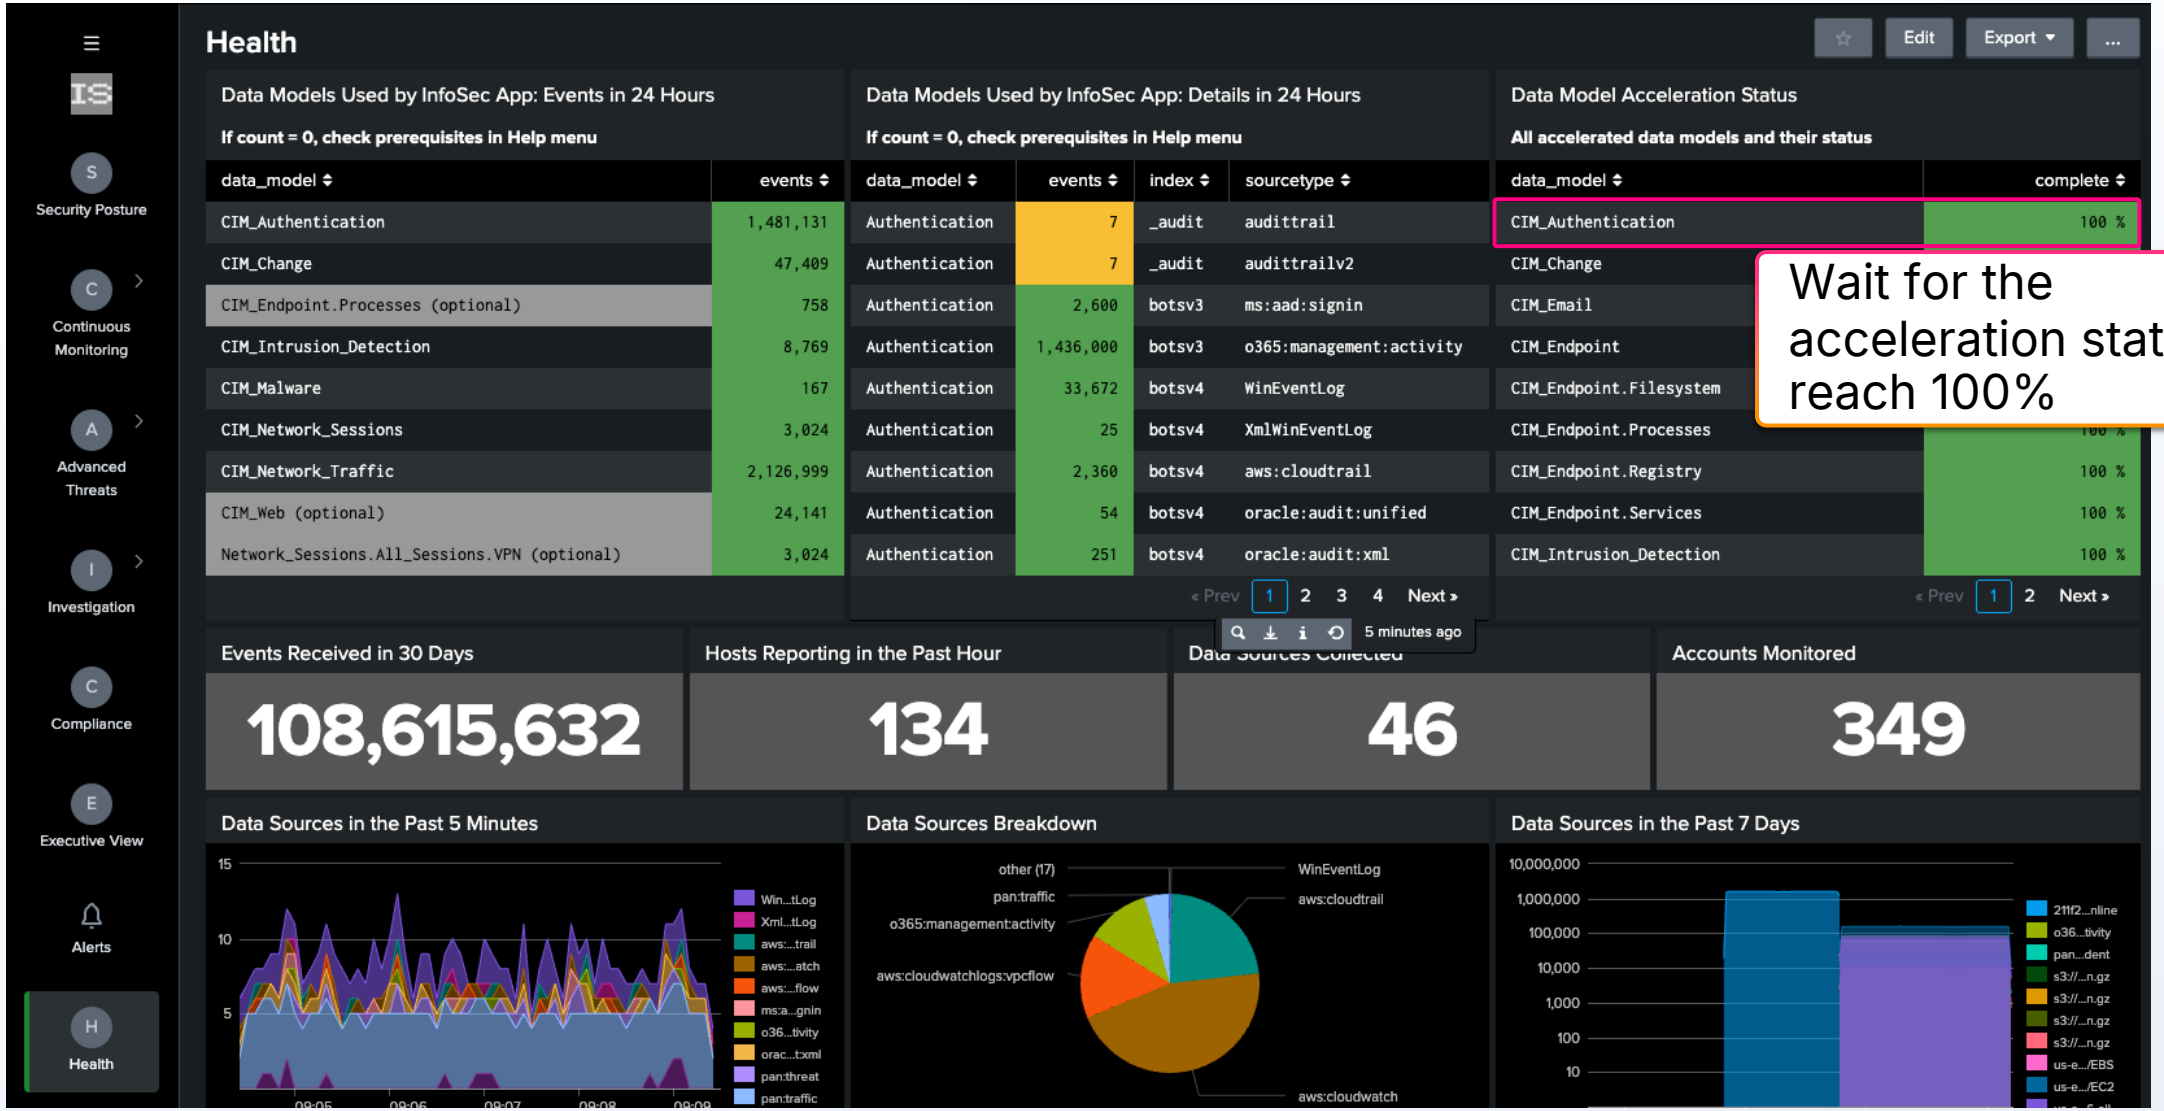


3. Check **Accelerate** and click **Save**

© 2026 Cisco and/or its affiliates. All rights reserved.

Check Health Dashboard in InfoSec App

After 5-10 min the Authentication Data Model should be accelerated



© 2026 Cisco and/or its affiliates. All rights reserved.

InfoSec App UI

© 2026 Cisco and/or its affiliates. All rights reserved.

Security Posture

InfoSec Landing Page

- Get a high-level view of your security posture
- Compare your current state to yesterday's
- Identify bursts of activity needing investigation

© 2026 Cisco and/or its affiliates. All rights reserved.

InfoSec App Investigation

Leveraging drilldowns for data insights

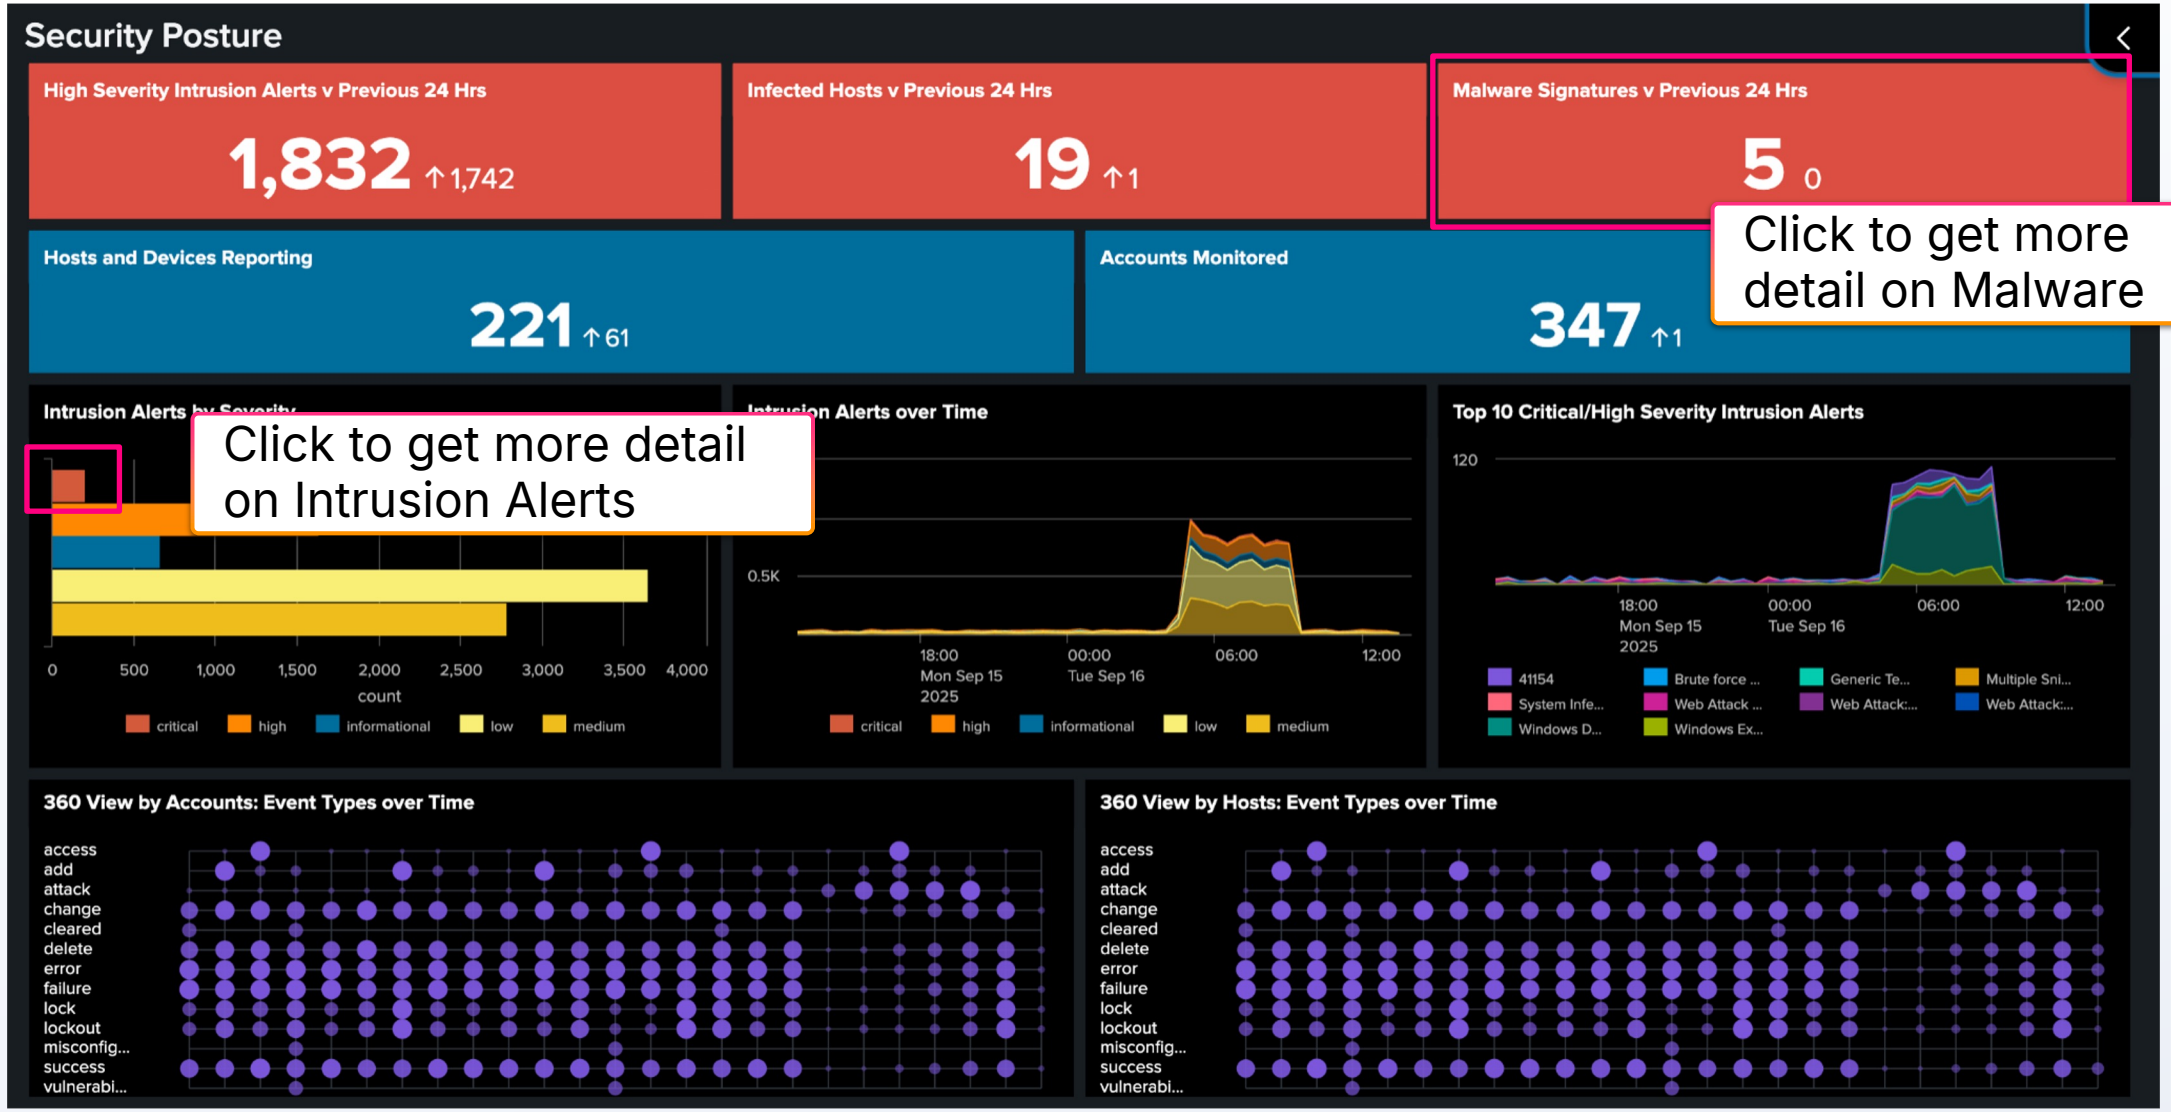
Tasks

Start your investigation on the Security Posture dashboard, identify following:

1. How many critical **Intrusion Alerts** are displayed?
   - Drill down and filter on critical alerts
   - What are the top 3 signatures?
2. How many **Malware** were detected in the last 24 hours?
   a. Which are the top 3?

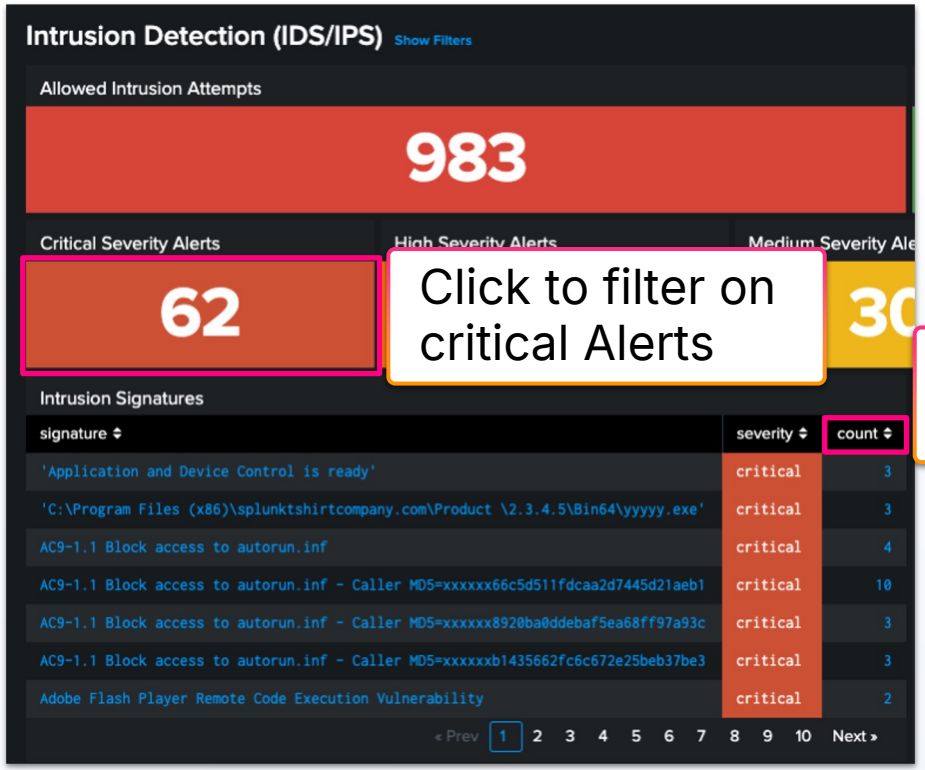
© 2026 Cisco and/or its affiliates. All rights reserved.

Check Security Posture Dashboard



© 2026 Cisco and/or its affiliates. All rights reserved.

Continuous Monitoring > Intrusion Detection (IDS/IPS)



Click to filter on critical Alerts

Click to sort from highest to lowest #

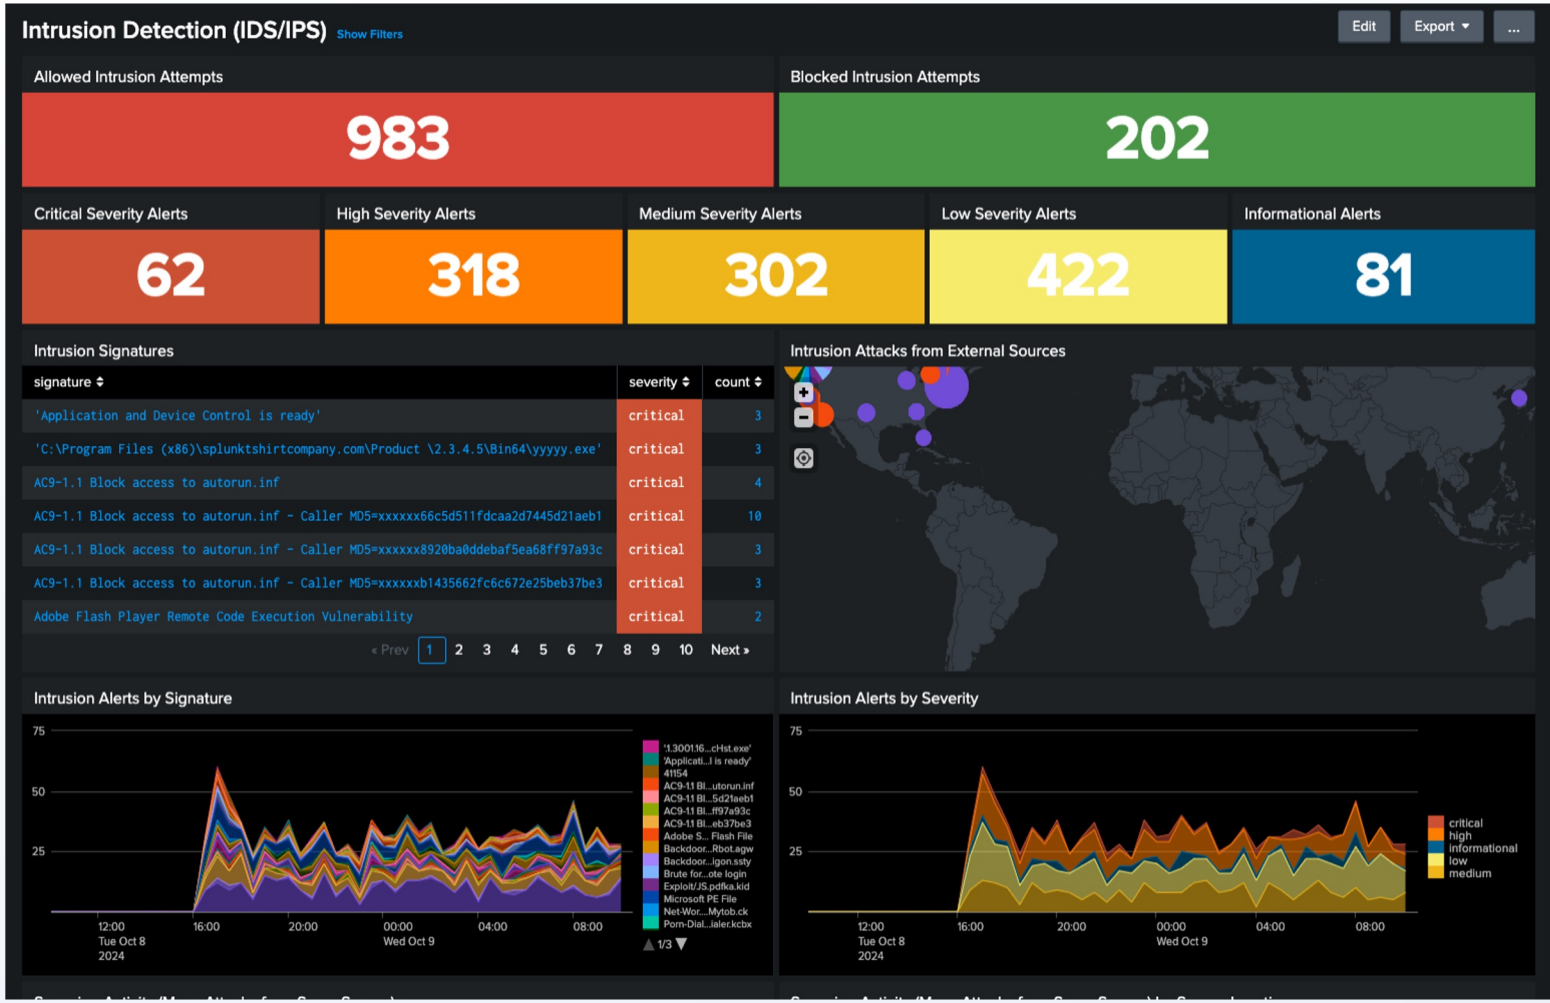
Continuous Monitoring > Malware

Find the top 3 Malware here

© 2026 Cisco and/or its affiliates. All rights reserved.

Intrusion Detection (IDS/IPS)

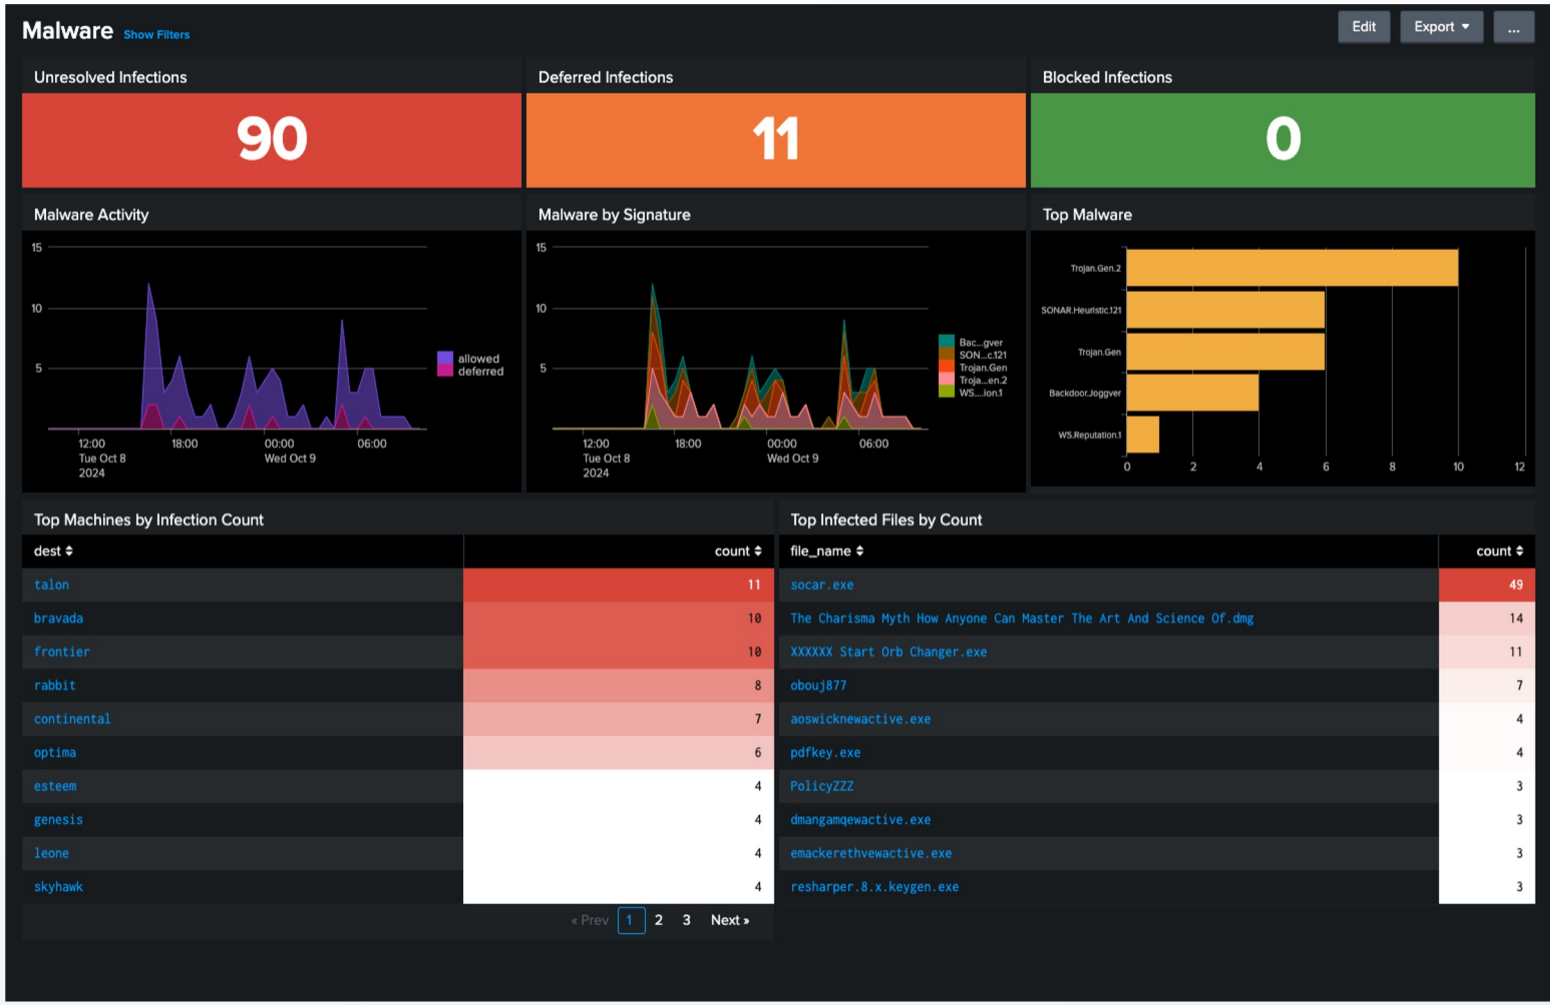
- Breakdown of total events by action/severity over the last 24 hours
- Drill-down to underlying Splunk search results for detailed analysis
- Monitoring and analyzing intrusion detection and prevention system events
- Identifying trends and anomalies in IDS/IPS data



© 2026 Cisco and/or its affiliates. All rights reserved.

Malware

- Provides an overview of Anti-Virus events and malware detections
- Identifies trends and spikes in malware activity for investigation
- Breaks down events by malware type (virus, Trojan, spyware)
- Shows top malware by host and file name



© 2026 Cisco and/or its affiliates. All rights reserved.

Our progress so far

- **IT team:** Install the Splunk Add-on for AWS and finish setting up the InfoSec App for Splunk so that the dashboards populate correctly
- **Malware:** Find Malware-infected files and setup an alert for future detections
- **User behavior:** Look for sudden access changes, unauthorized role modifications, or unusual activity
- **Customize the InfoSec App:** Look for ways to customize the content for Buttercup State University
- **Add additional security content:** Review the content in Splunk Security Essentials and add any new use cases you think might be valuable

BUTTERCUP STATE UNIVERSITY

© 2026 Cisco and/or its affiliates. All rights reserved.

Malware Investigation

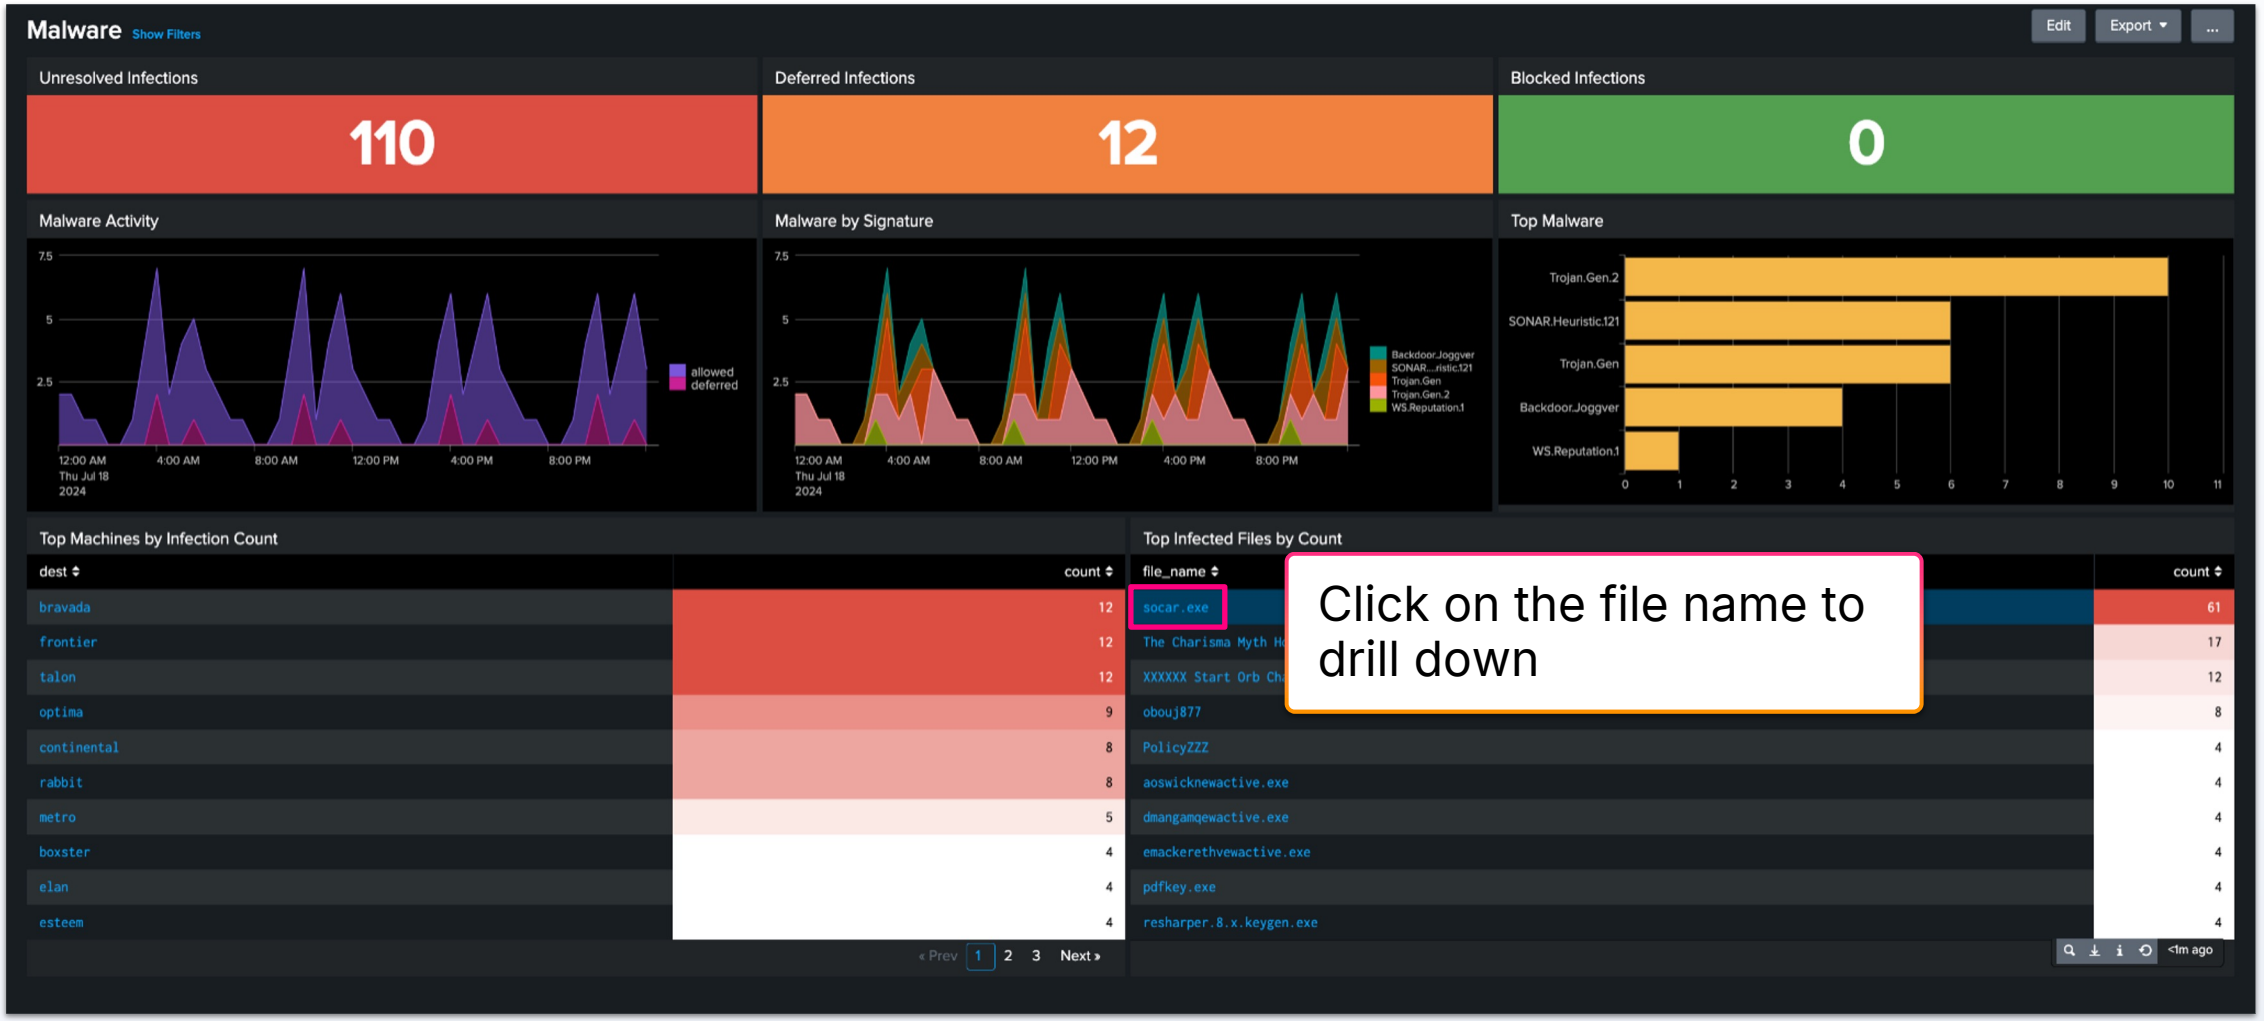
Find Malware-infected files and setup an alert for future detections

Tasks

1. Find the **top malware-infected file** using the **Malware** dashboard
2. Drill down on the search and use interesting fields to:
   - Identify **which hosts are compromised**
   - Find the **file path** of the infected file
3. **Create an alert** to trigger if this infected file is seen again

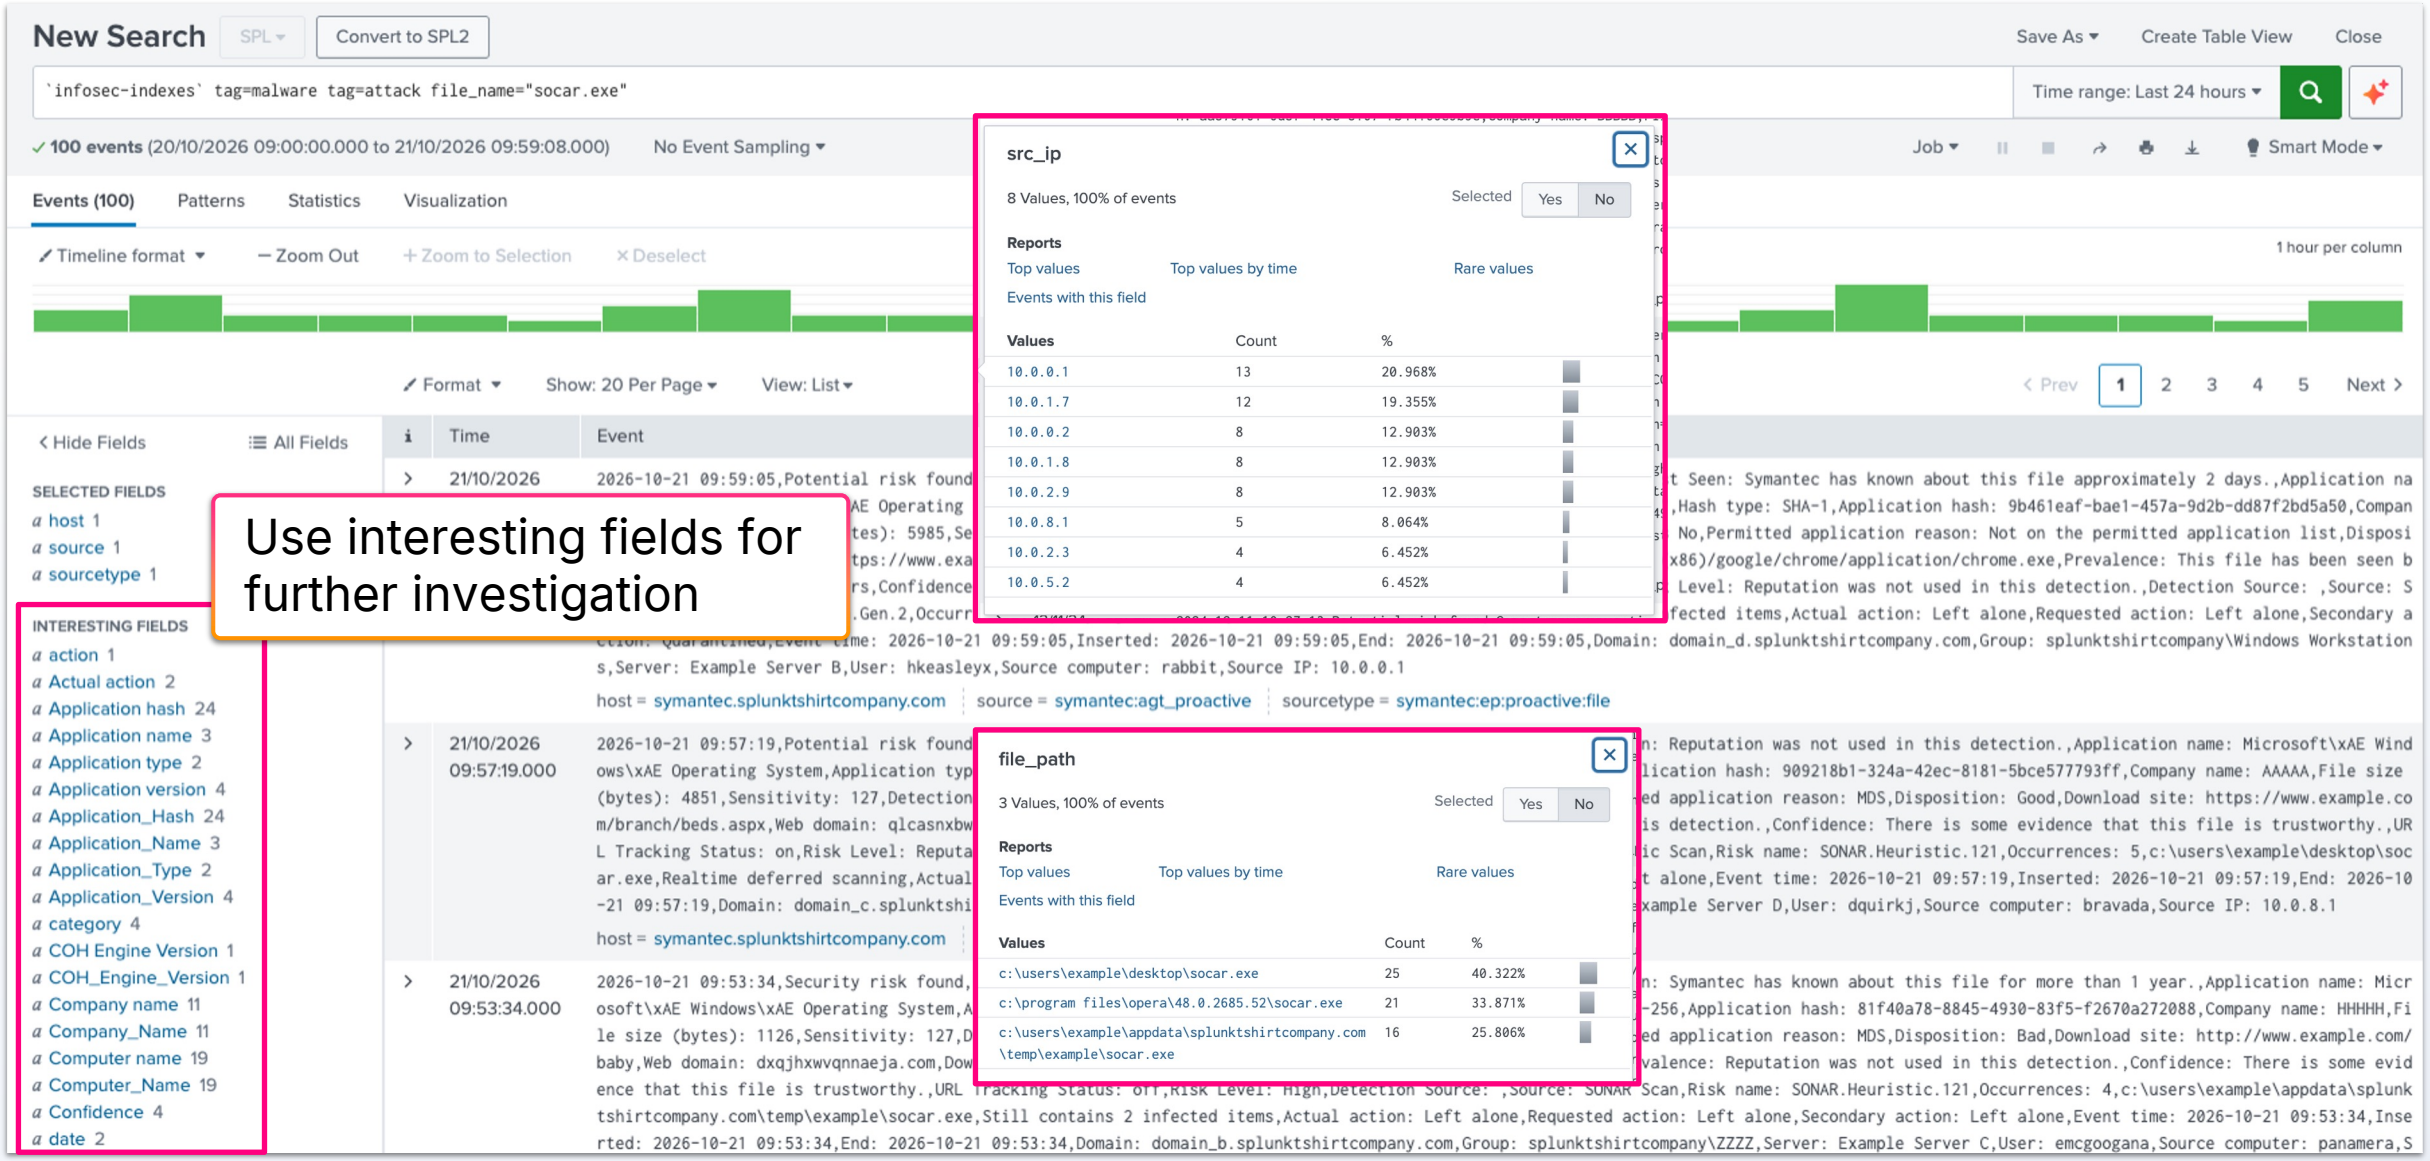
© 2026 Cisco and/or its affiliates. All rights reserved.

Check the Continuous Monitoring > Malware Dashboard



© 2026 Cisco and/or its affiliates. All rights reserved.

Investigate beyond the original panel

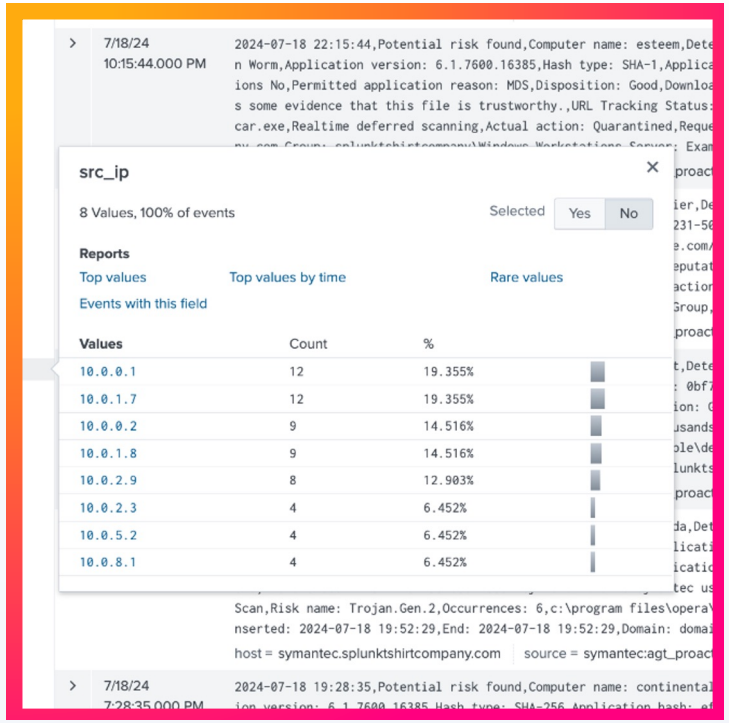


Use interesting fields for further investigation

© 2026 Cisco and/or its affiliates. All rights reserved.

Leveraging Interesting Fields

Interesting fields can help your investigating

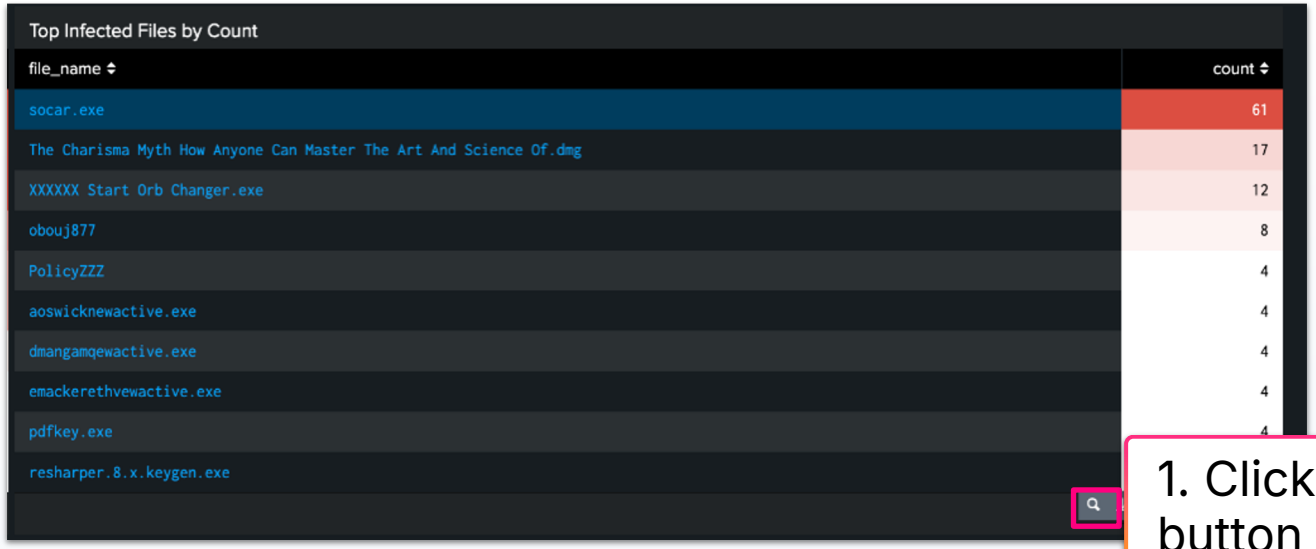


src_ip

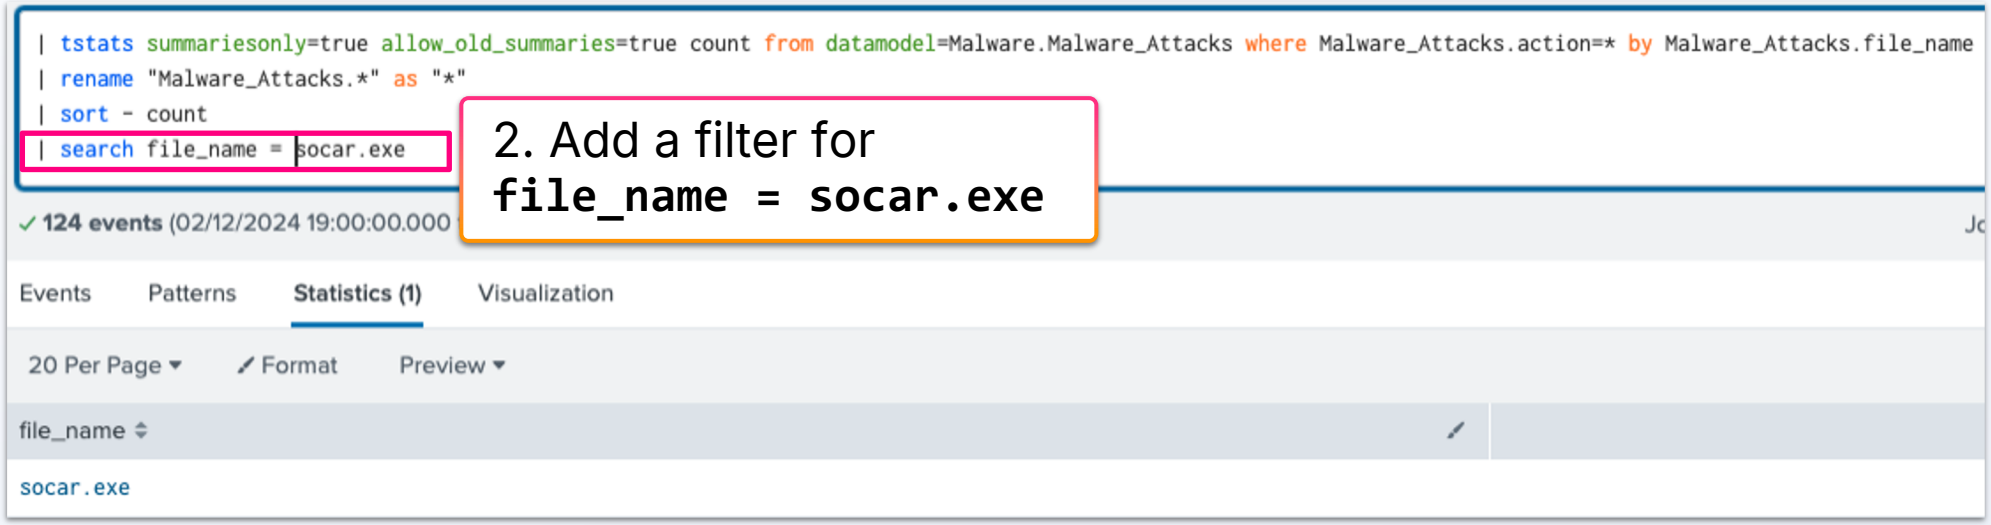
file_path

© 2026 Cisco and/or its affiliates. All rights reserved.

Alert when this infected files is seen again



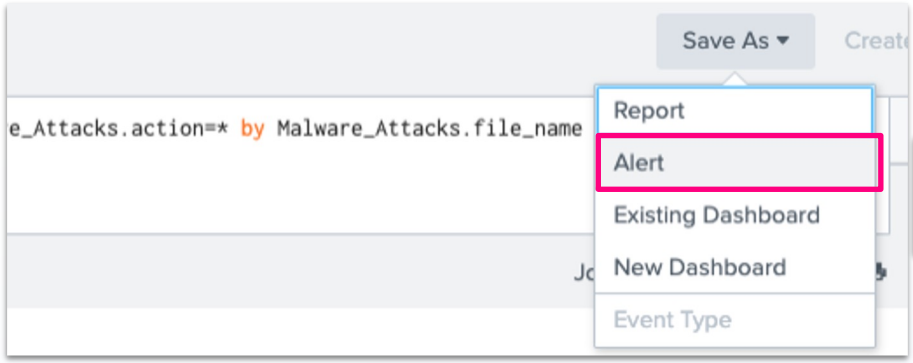
1. Click on the search button of the detection



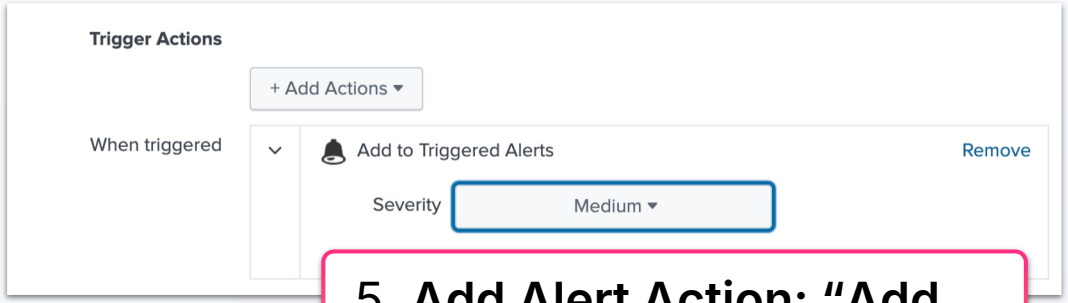
2. Add a filter for **`file_name = socar.exe`**

© 2026 Cisco and/or its affiliates. All rights reserved.

Alert when this infected files is seen again

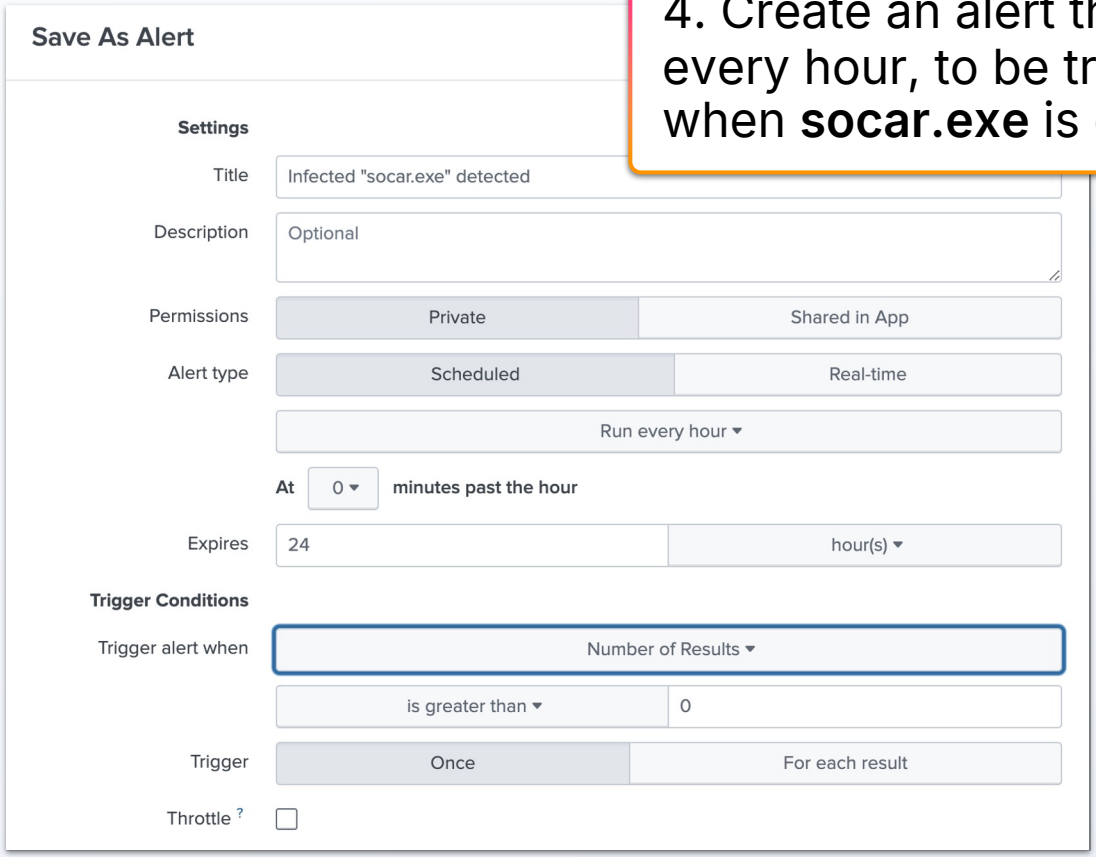


3. Click on **Save As > Alert**



5. **Add Alert Action: "Add to Triggered Alerts"** with Severity: Medium

4. Create an alert that runs every hour, to be triggered when **socar.exe** is detected



© 2026 Cisco and/or its affiliates. All rights reserved.

Alert Trigger Conditions

Alert conditions in Splunk are **criteria that determine when an alert should be triggered** based on search results

- **Types of Alerts**
  - Scheduled Alerts: run on a set schedule and can have custom trigger conditions
  - Real-time alerts: Trigger immediately when matching events occur
- **Why is this important?**
  - Monitors Specific Event Patterns
  - Prioritizes Critical Events
  - Enhances Notification Quality
  - Reduces Alert Fatigue
  - Customizes Alert Criteria

© 2026 Cisco and/or its affiliates. All rights reserved.
Refer to: https://docs.splunk.com/Documentation/Splunk/latest/Alert/AlertTriggerConditions

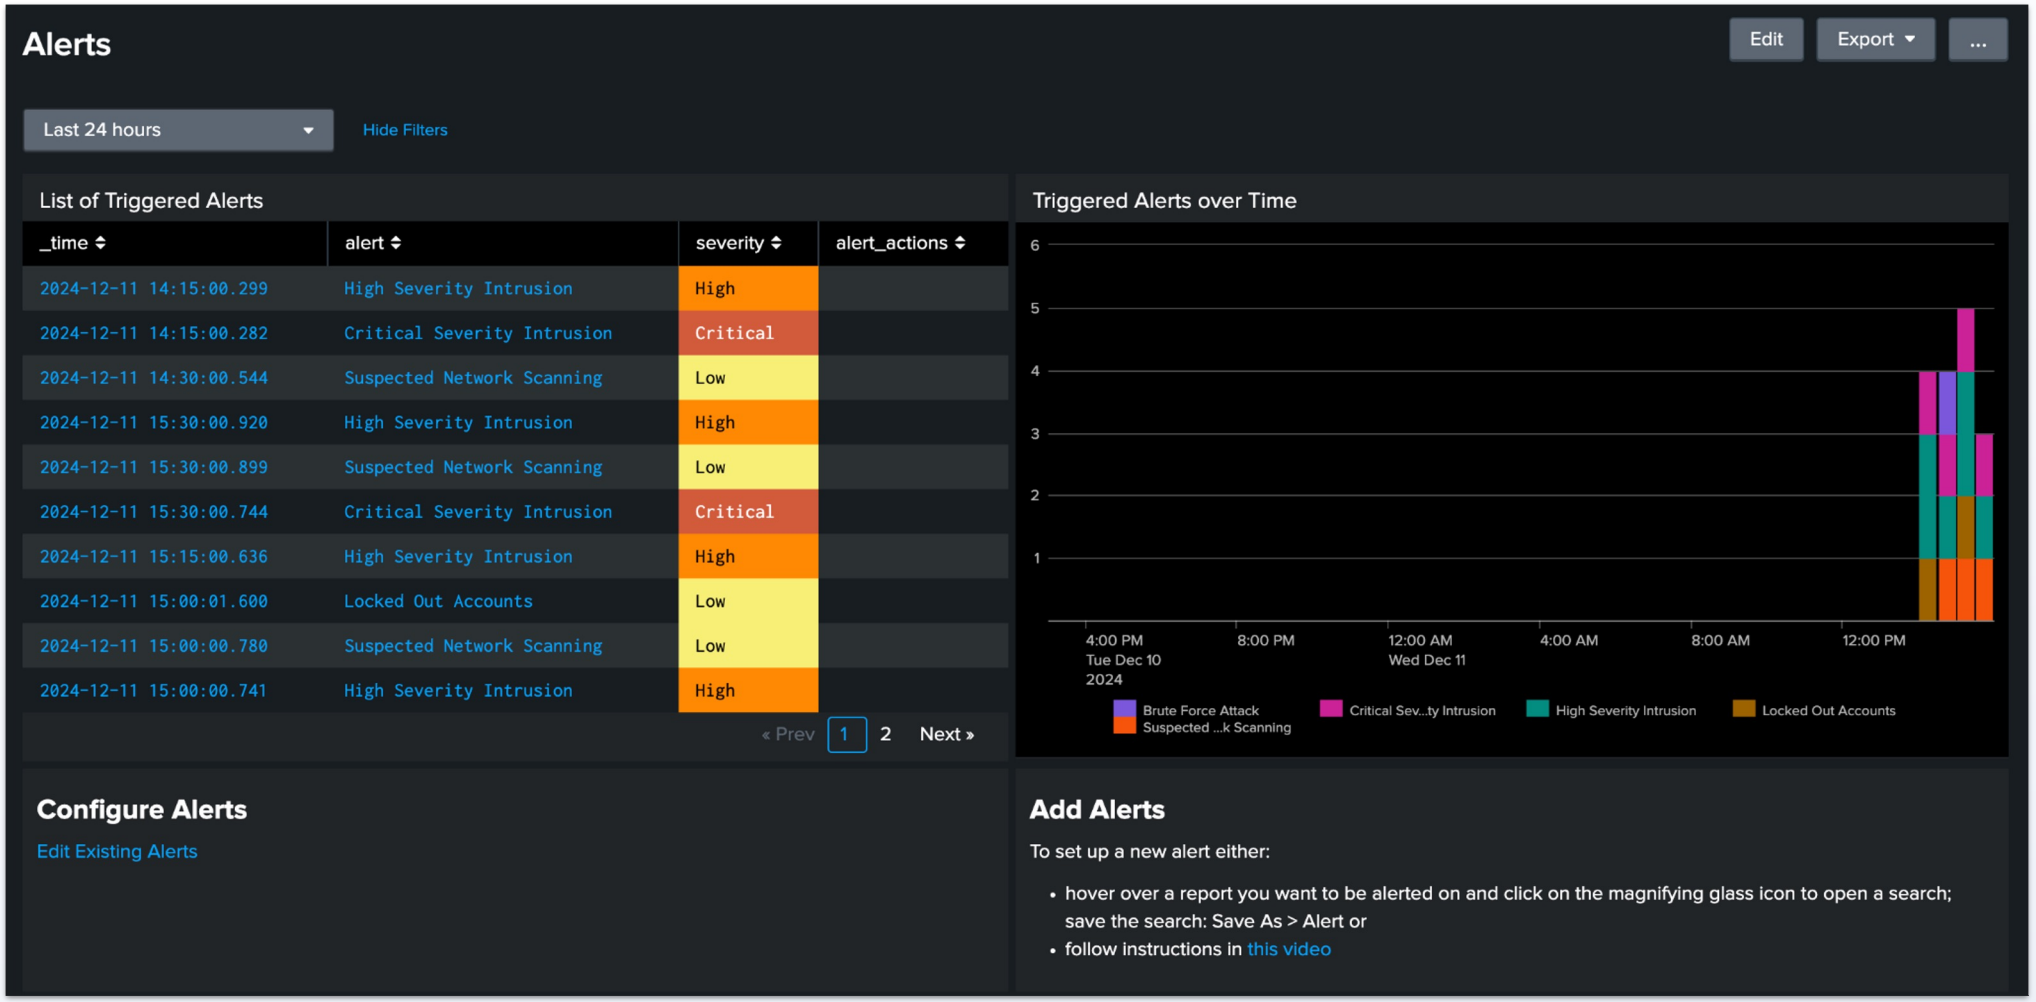
Alert Trigger Actions

Alert actions help you **respond to triggered alerts**.

- You can enable one or more alert actions
- Email Notification Action
  - Webhook Alert Action
  - Output to CSV lookup
  - Log Events
  - Monitor Triggered Alerts
  - Splunk Mobile Alerts
  - Custom Alert actions
- Why is this important?
  - Automated Response
  - Improved Operational Efficiency
  - Enhanced Timely Notifications
  - Supports Integrations with other providers

© 2026 Cisco and/or its affiliates. All rights reserved.
Refer to: https://docs.splunk.com/Documentation/SplunkCloud/latest/Alert/Setupalertactions

Alerts Dashboard



© 2026 Cisco and/or its affiliates. All rights reserved.

What we have identified

Findings:

- The top infected file is **socar.exe**
- Looking at **src_ip** we found compromised hosts
- Looking at **server** we could identify the infected hosts
- Looking at **file_path** we now know where the malware is located
- We created an alert to be notified if socar.exe is infected again

Next Steps you can take:

- Investigate other activity from those IPs to uncover additional malware or lateral movement
- Isolate infected servers to prevent lateral movement
- Investigate how the malware propagated to these servers to close vulnerabilities
- Remove the malware executable from infected systems

© 2026 Cisco and/or its affiliates. All rights reserved.

Our progress so far

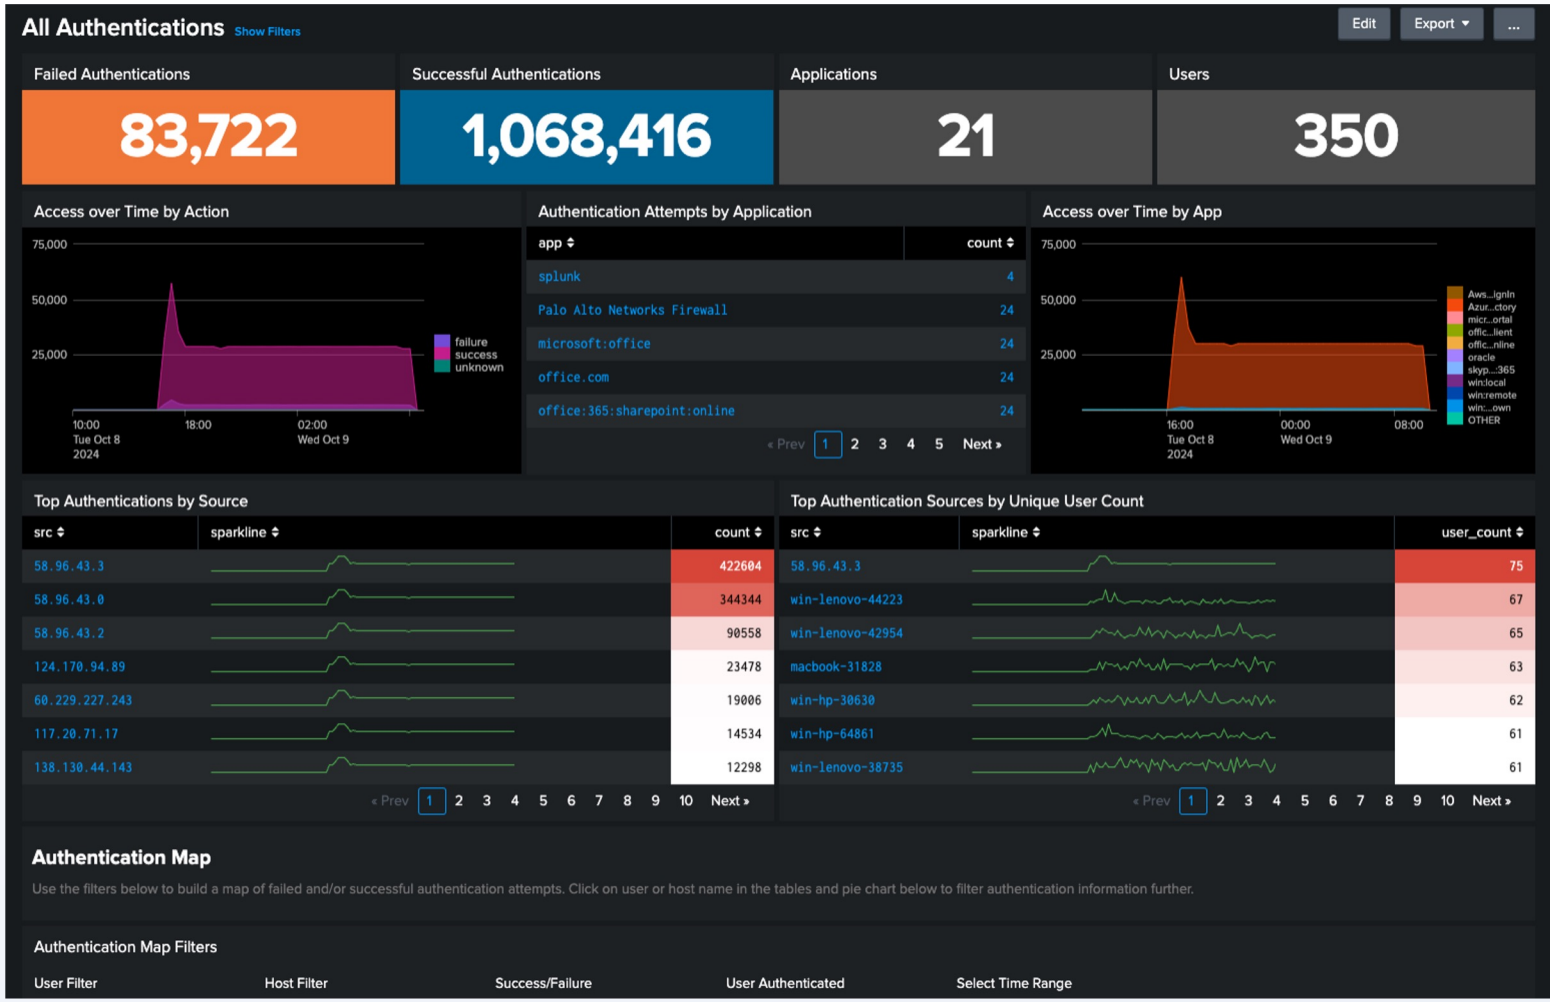
- **IT team:** Install the Splunk Add-on for AWS and finish setting up the InfoSec App for Splunk so that the dashboards populate correctly
- **Malware:** Find Malware-infected files and setup an alert for future detections
- **User behavior:** Look for sudden access changes, unauthorized role modifications, or unusual activity
- **Customize the InfoSec App:** Look for ways to customize the content for Buttercup State University
- **Add additional security content:** Review the content in Splunk Security Essentials and add any new use cases you think might be valuable

BUTTERCUP STATE UNIVERSITY

© 2026 Cisco and/or its affiliates. All rights reserved.

All Authentications

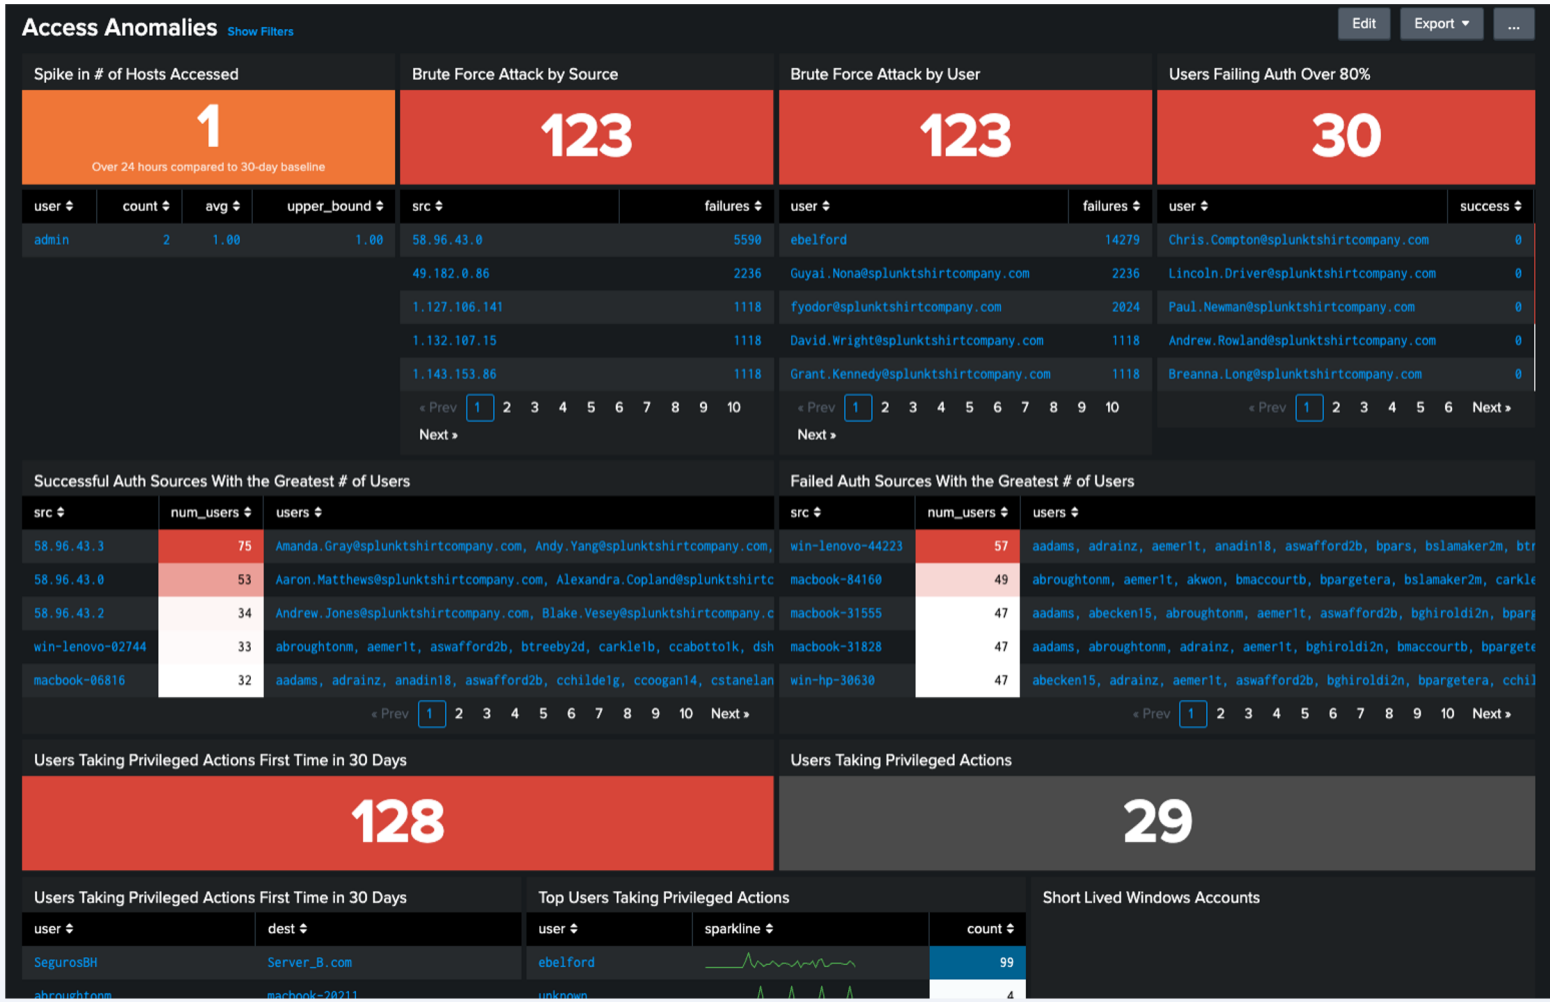
- Consolidated view of authentication actions
- Breaks down attempts by application
- Counts successful and failed events
- Identifies unusual authentication patterns
- Monitor user access and authentication activity
- Detect potential threats related to unauthorized access



© 2026 Cisco and/or its affiliates. All rights reserved.

Access Anomalies

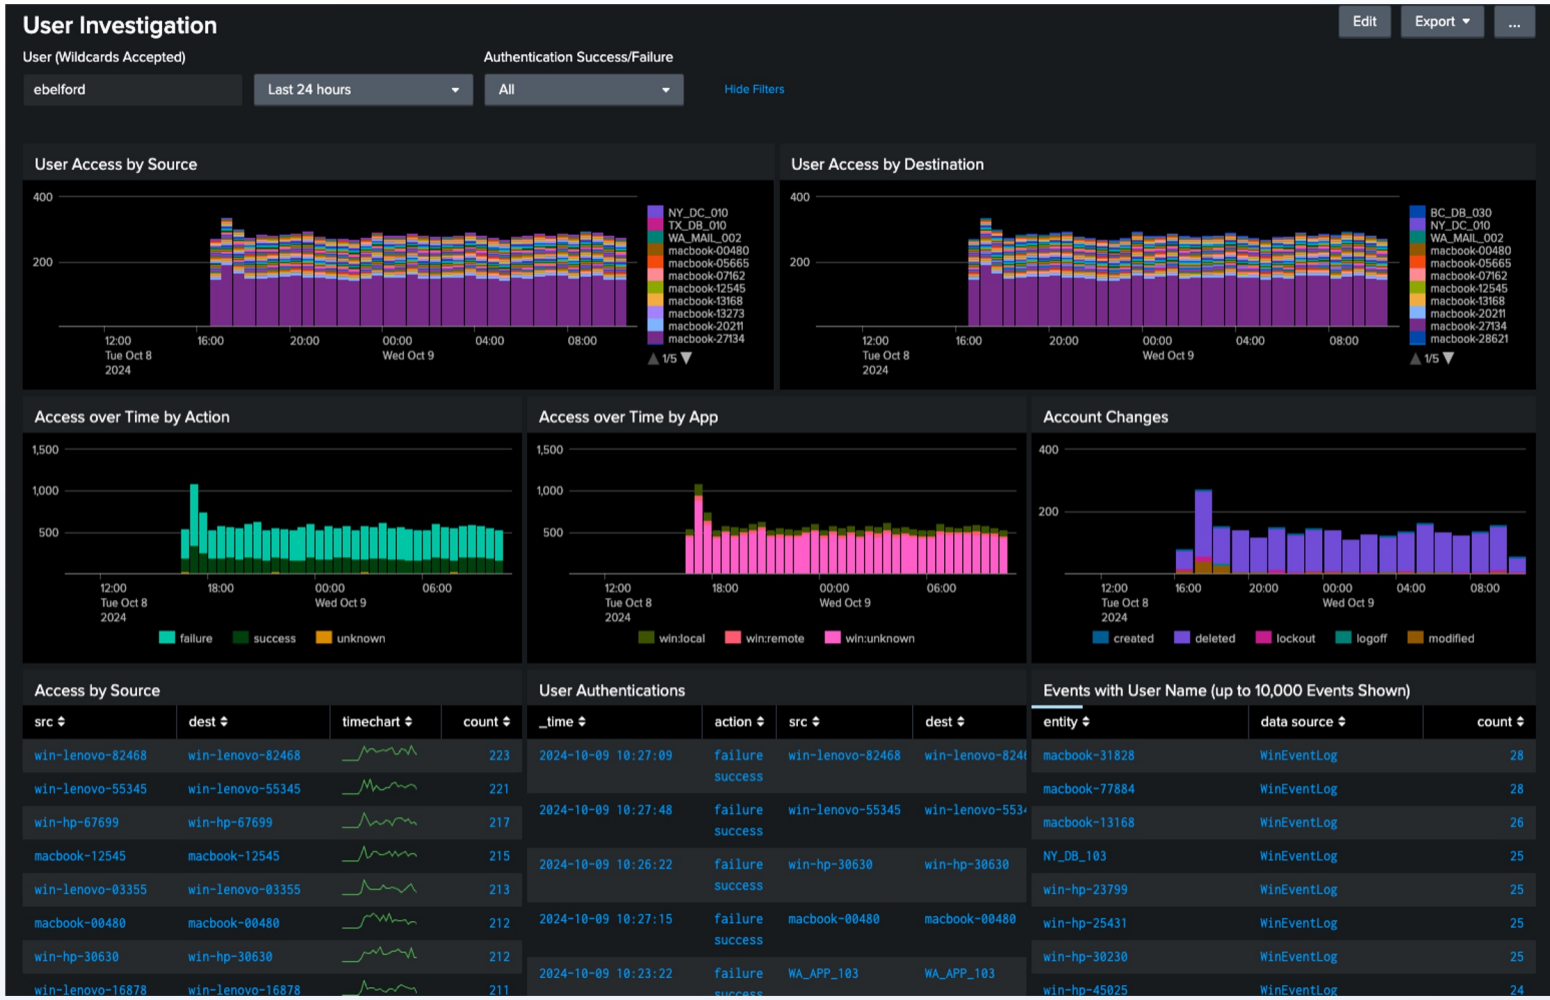
- Identifies spikes in access to hosts
- Detects brute force attacks by source or user
- Monitors accounts with high logon failure rates
- Flags users performing new privileged actions
- Highlights geographically improbable access
- Detecting potential security risks
- Investigating unusual access patterns



© 2026 Cisco and/or its affiliates. All rights reserved.

User Investigation

- Provides an interface to investigate user behaviors
- Allows drill-down into specific user actions
- Offers filters for detailed searches
- Displays underlying search results for analysis
- Analyzing user activity and identifying anomalies
- Supporting incident response and threat investigations



© 2026 Cisco and/or its affiliates. All rights reserved.

User Behavior Investigation

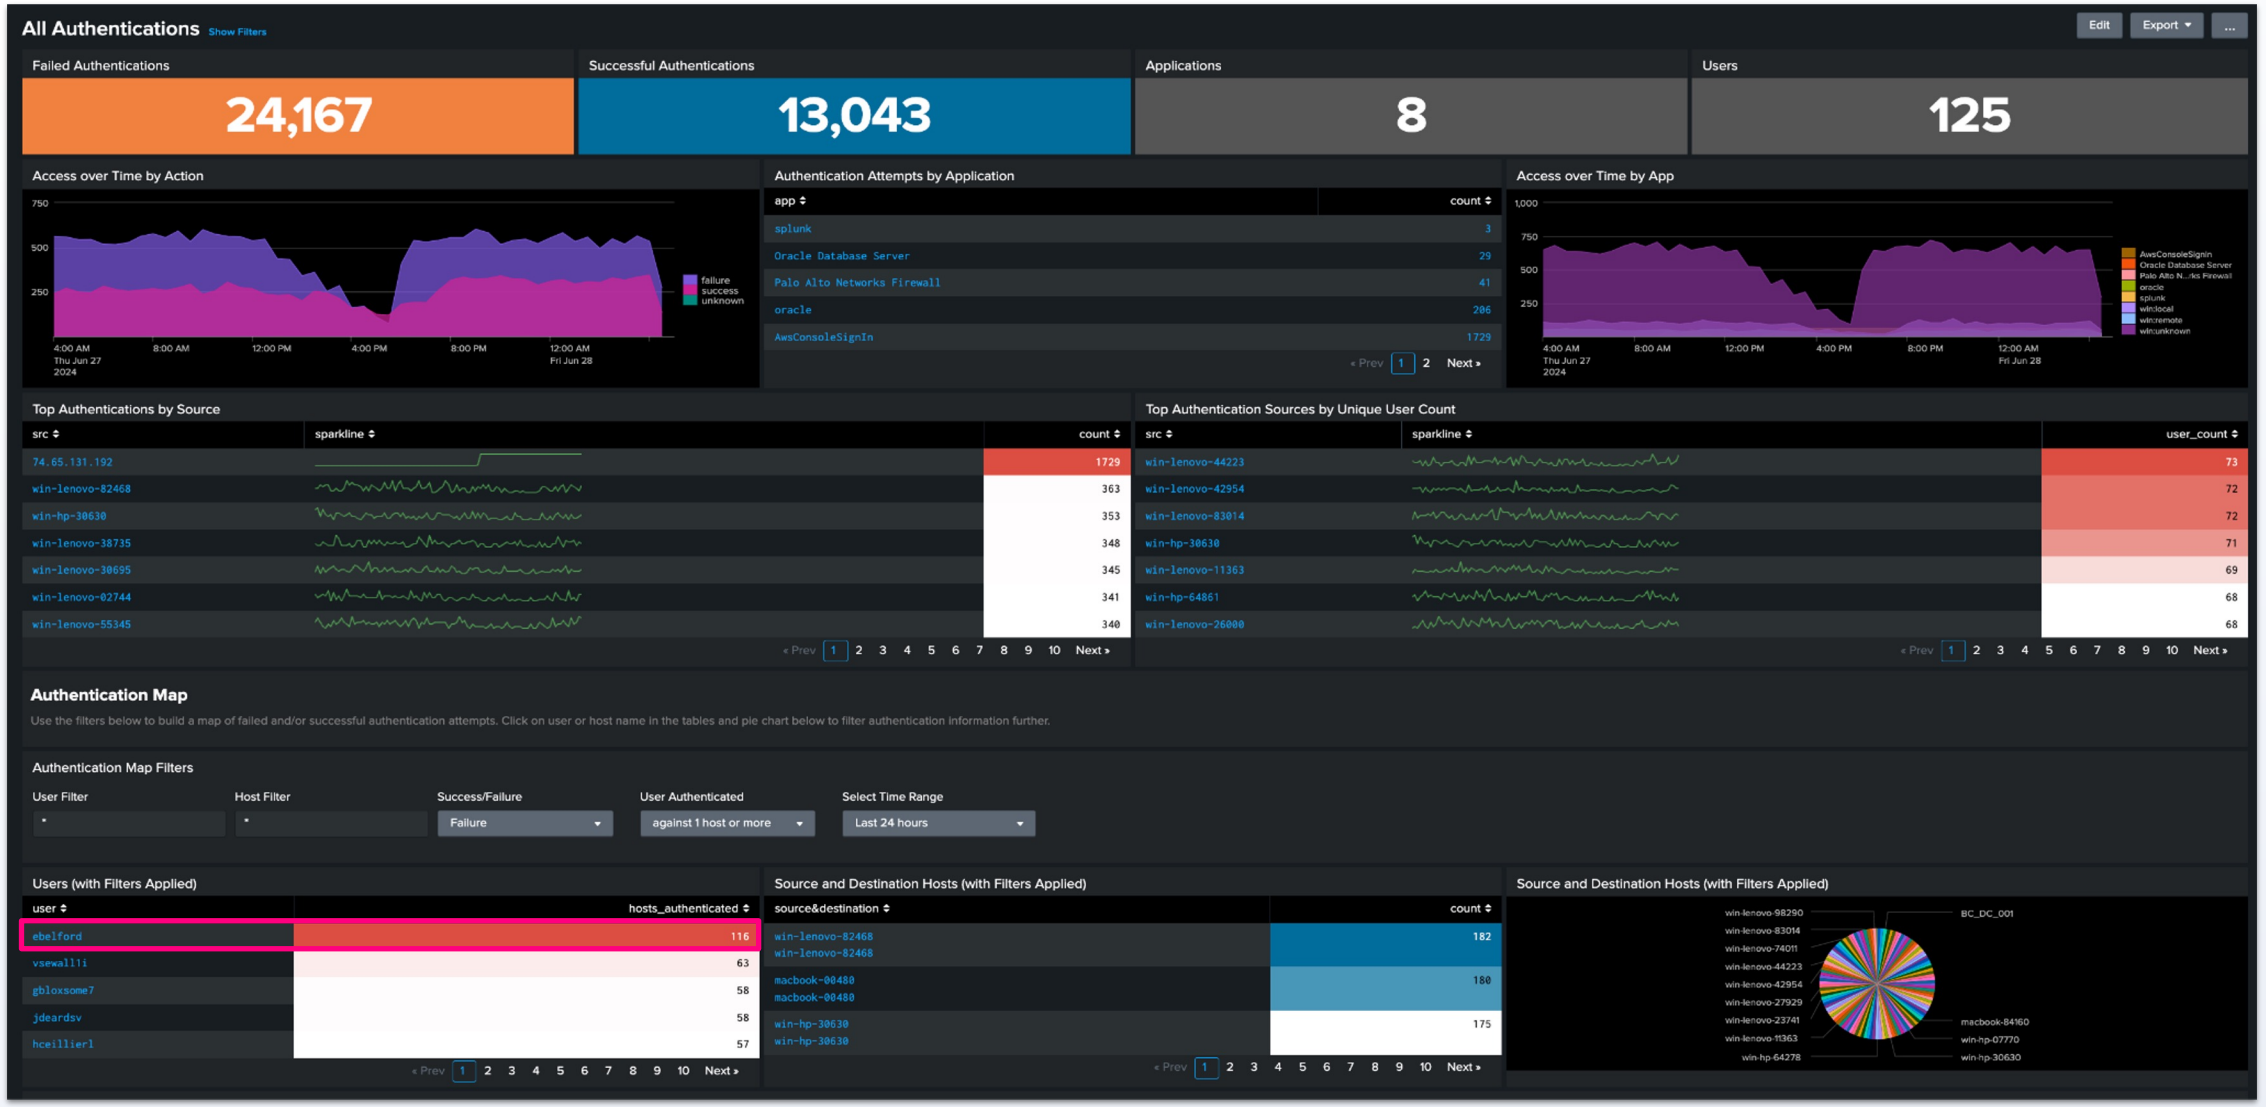
Look for sudden access changes, unauthorized role modifications, or unusual activity

Tasks

1. Use the **All Authentications** dashboard to identify which user accessed an unusual amount of hosts
2. Use the **Access Anomalies** dashboard to identify:
   - The user with most failures
   - The user taking the most privileged actions
3. Drill into the user identified and review the account changes made

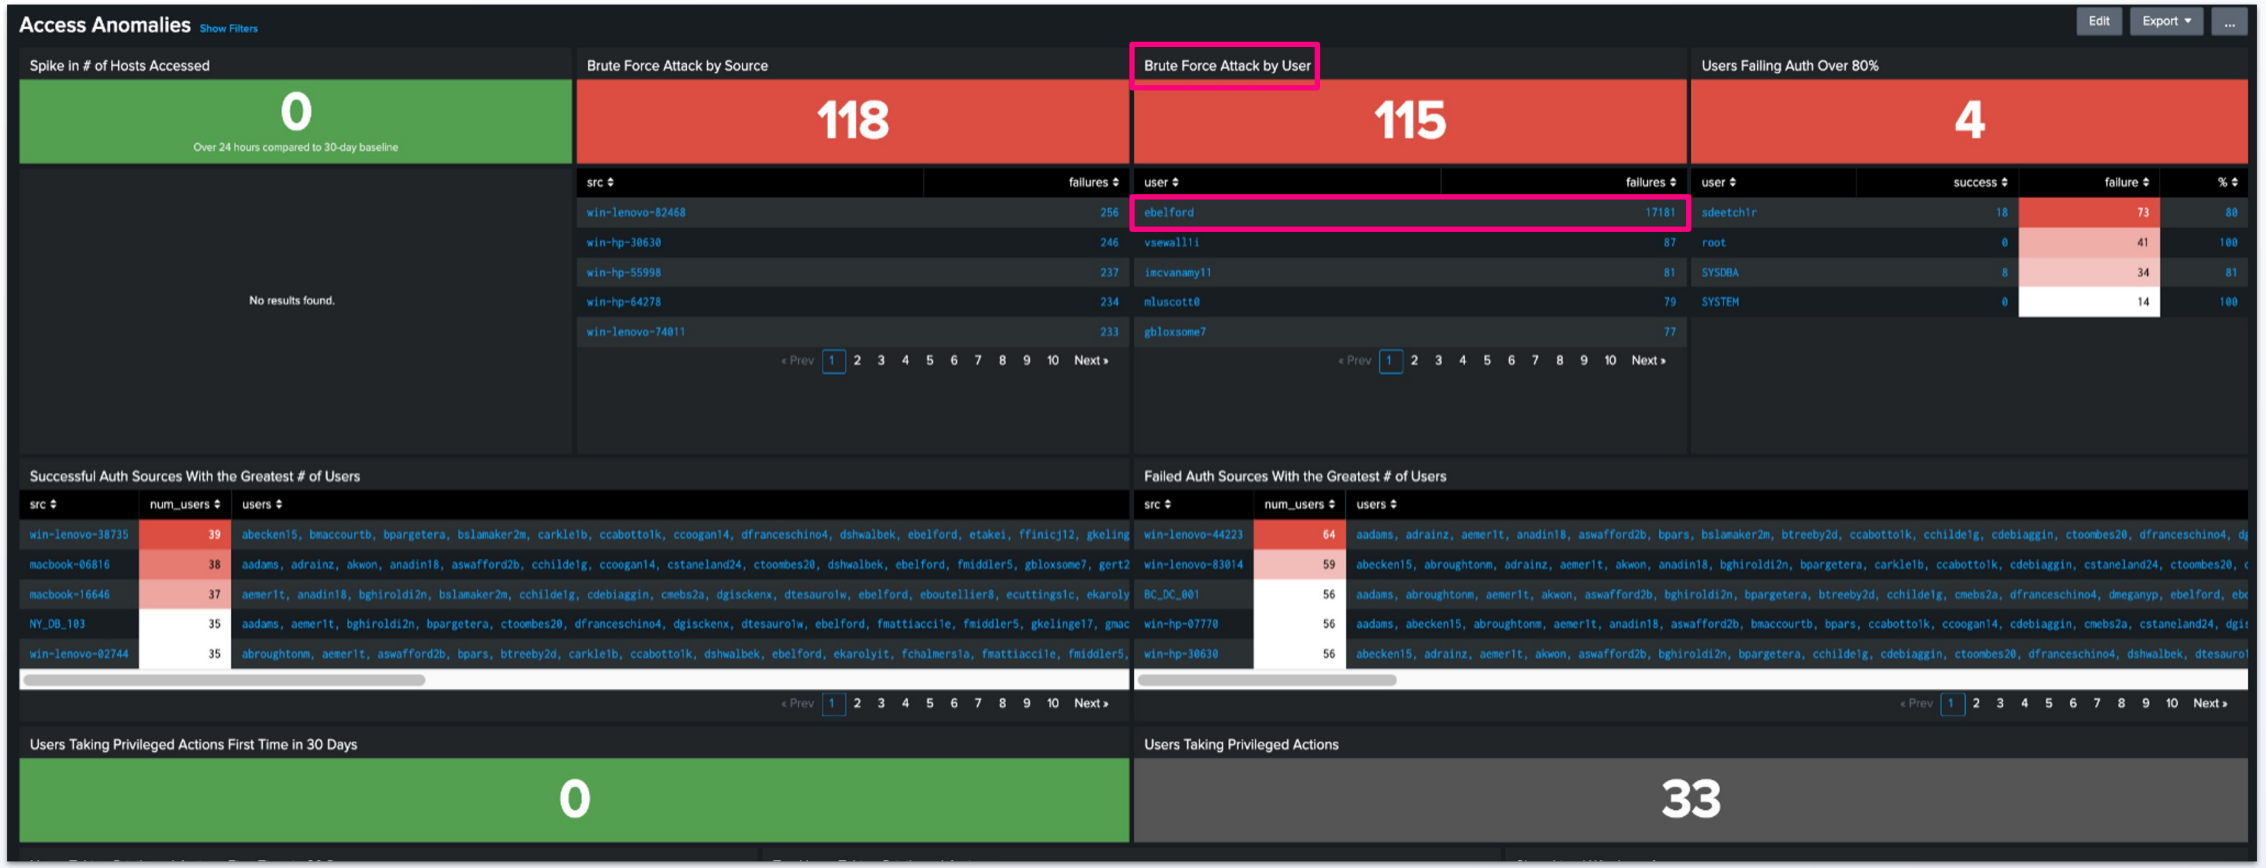
© 2026 Cisco and/or its affiliates. All rights reserved.

Check the Continuous Monitoring > All Authentications Dashboard



© 2026 Cisco and/or its affiliates. All rights reserved.

Check the Advanced Threats > Access Anomalies Dashboard



© 2026 Cisco and/or its affiliates. All rights reserved.

Check the Investigation > User Investigation Dashboard

© 2026 Cisco and/or its affiliates. All rights reserved.

What we have identified

Findings:

- We identified **ebelford** with the following unusual behaviors:
  - ebelford was the user accessing a **high number of hosts within a 24 hour period**
  - ebelford has made the **highest number of privileged actions**
  - ebelford is the user with the **most failed login attempts**
- ebelford did **delete a large number of accounts**

Next Steps you can take:

- Lock out the user account and force them to reset the password
- Document all malicious activities and reverse the malicious activities
- Identify all servers accessed and see if there where other malicious activities taking place

© 2026 Cisco and/or its affiliates. All rights reserved.

Our progress so far

- **IT team:** Install the Splunk Add-on for AWS and finish setting up the InfoSec App for Splunk so that the dashboards populate correctly
- **Malware:** Find Malware-infected files and setup an alert for future detections
- **User behavior:** Look for sudden access changes, unauthorized role modifications, or unusual activity
- **Customize the InfoSec App:** Look for ways to customize the content for Buttercup State University
- **Add additional security content:** Review the content in Splunk Security Essentials and add any new use cases you think might be valuable

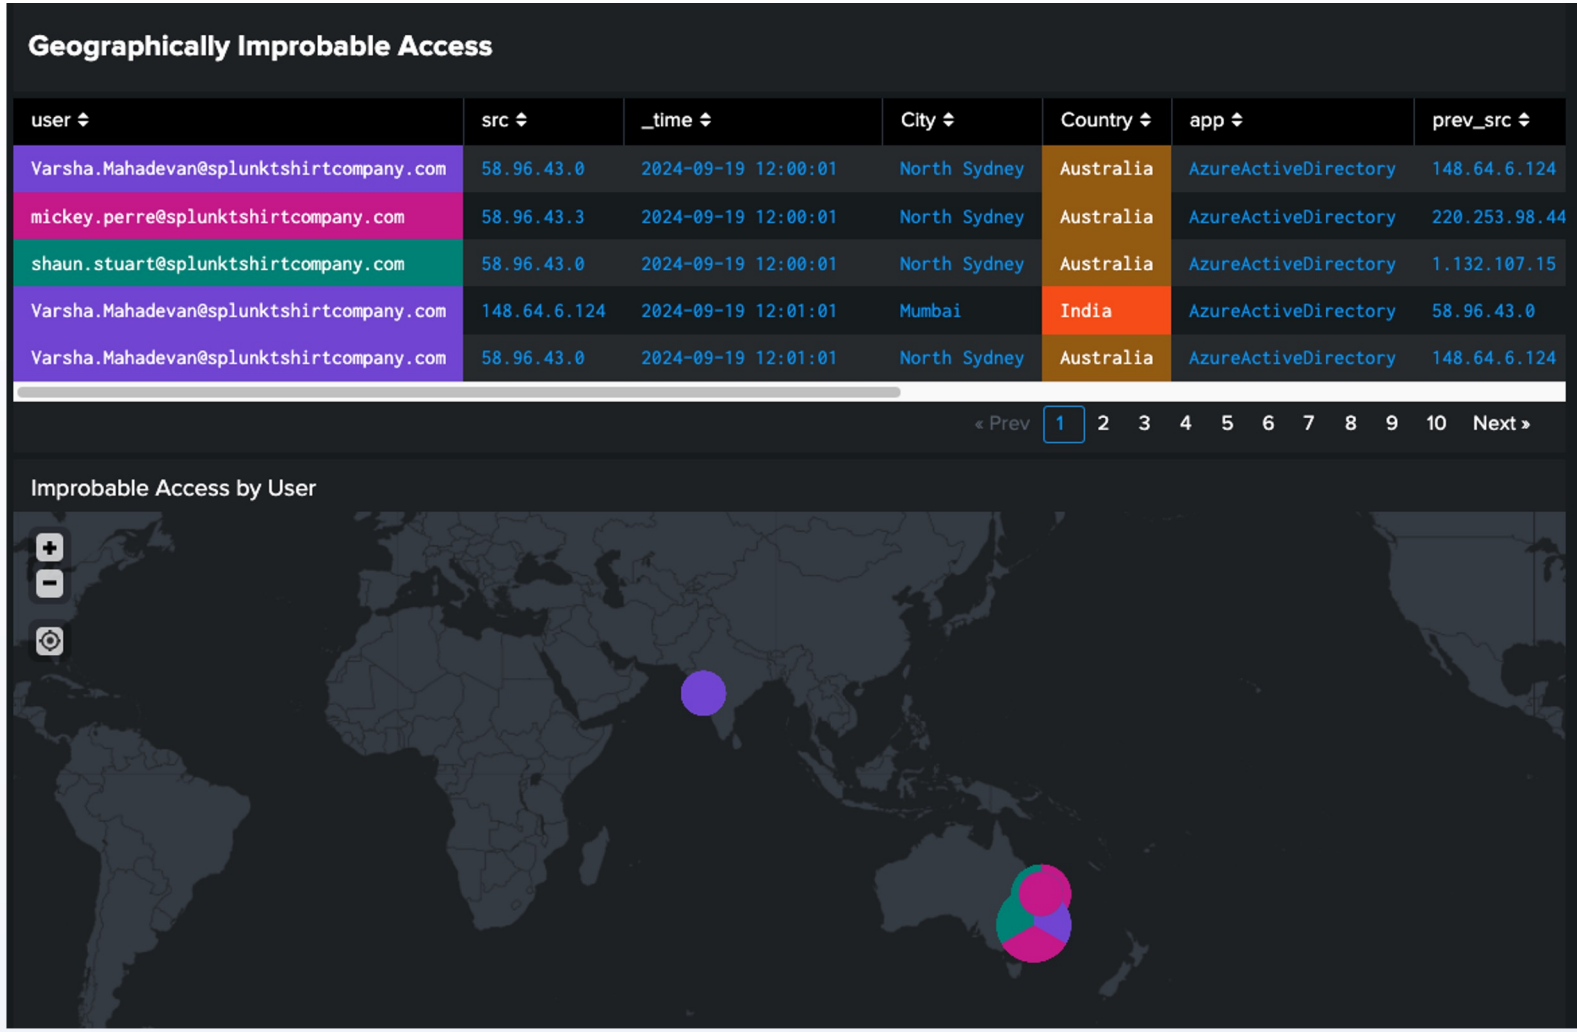
BUTTERCUP STATE UNIVERSITY

© 2026 Cisco and/or its affiliates. All rights reserved.

Let’s focus on GIA!

Geographically Improbable Accesses and Allow Lists

- Triggers alerts when a user authenticates from 2 distant locations in a too short time frame
- Can trigger numerous false positives
- You may need Splunk to take into account expected behaviors, such as use of an authentication system or a VPN

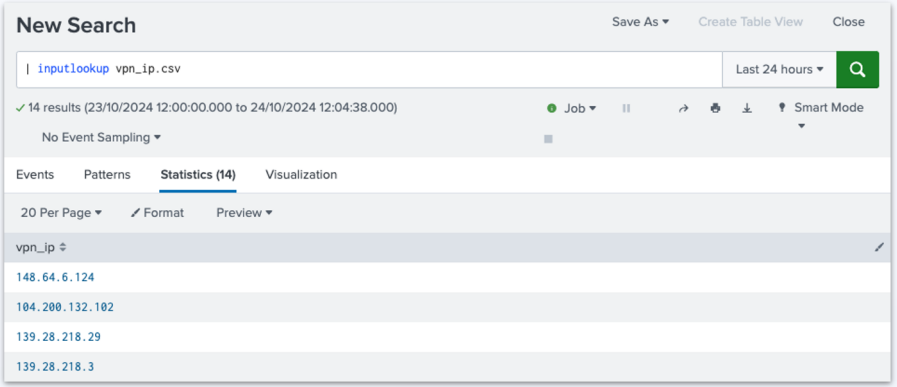


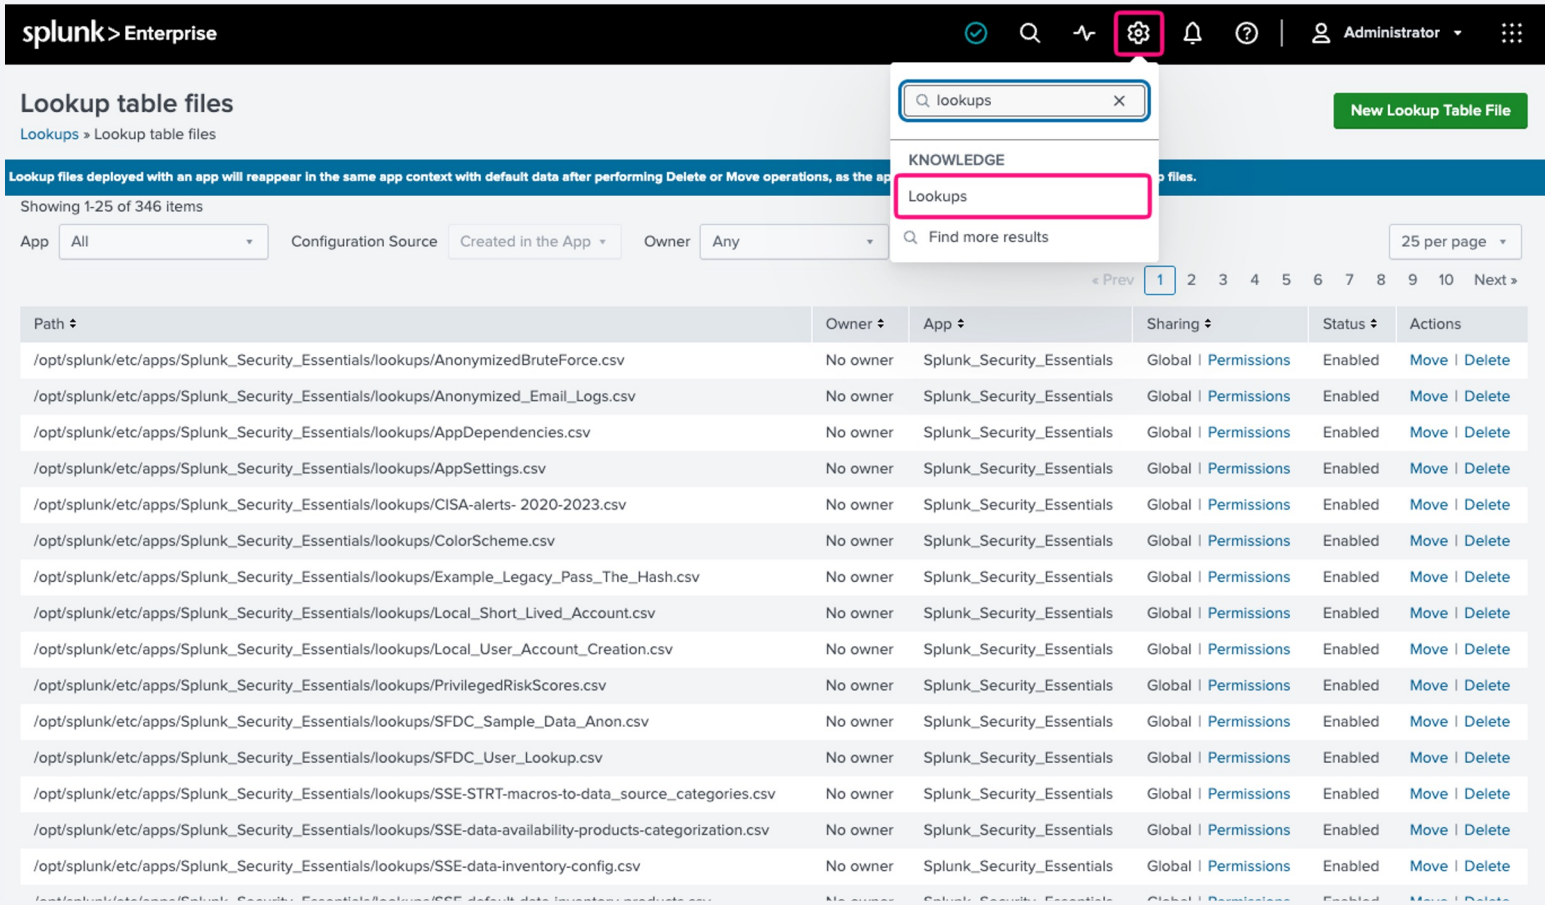
© 2026 Cisco and/or its affiliates. All rights reserved.

Lookups

Use lookups to customize your search queries

- Add CSVs to your Splunk to enable use of new information
- Unlock new possibilities by enriching your events data
- Read file with command:
  `| inputlookup filename.csv`





Learn more: https://docs.splunk.com/Documentation/Splunk/latest/Knowledge/Aboutlookupsandfieldactions

© 2026 Cisco and/or its affiliates. All rights reserved.

Customize the InfoSec App

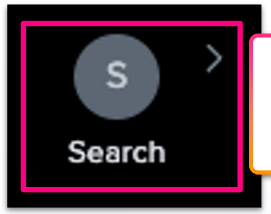
Look for ways to customize the content for Buttercup State University

Tasks

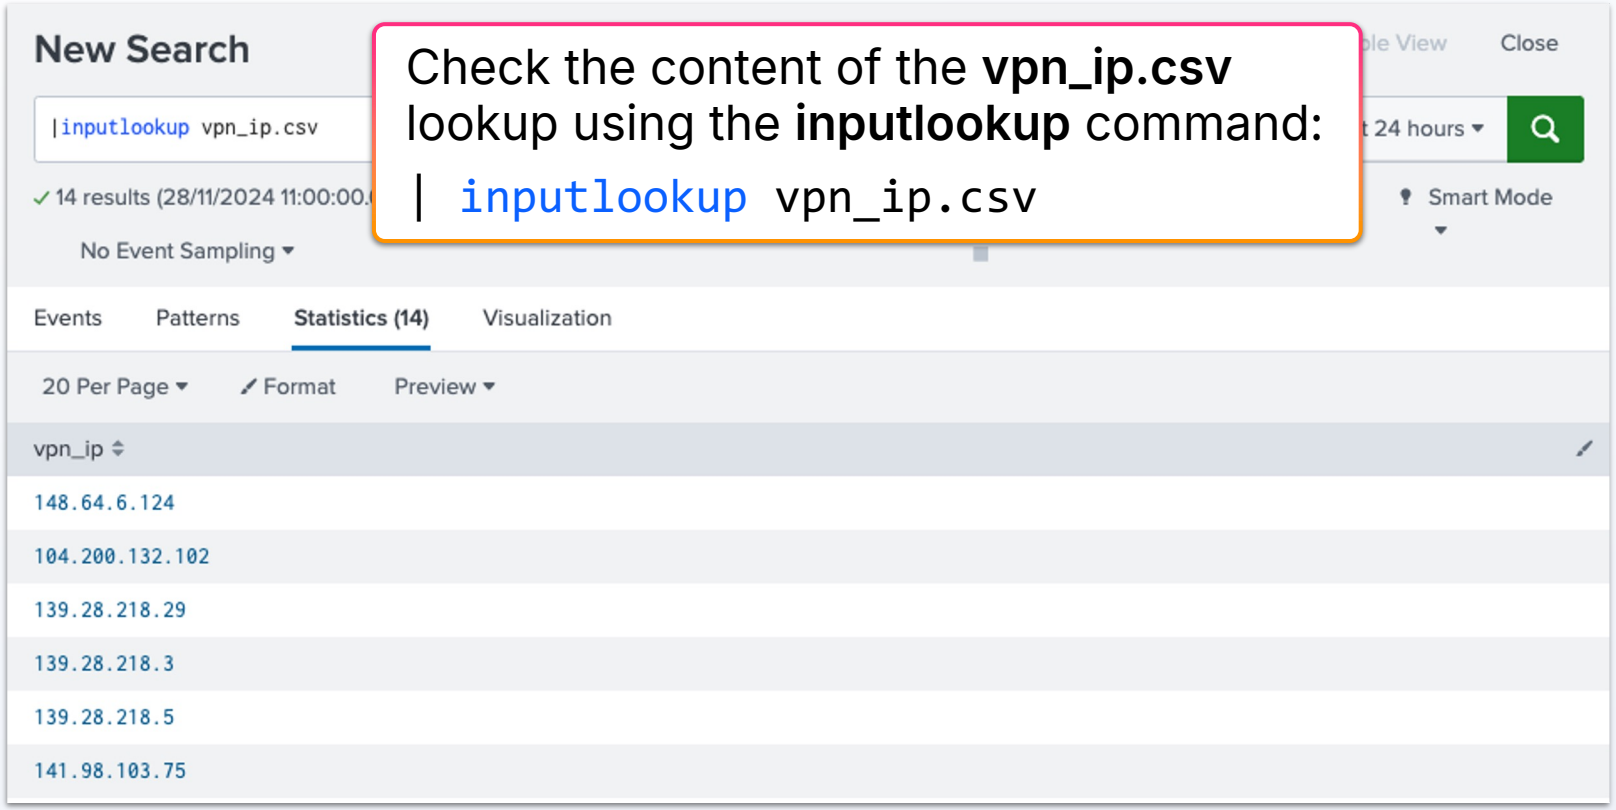
1. Check the contents of the **vpn_ip.csv** lookup, which contains the University's VPN IP ranges
2. Customize the **Geographically Improbable Access** table on the **Access Anomalies** dashboard to ignore these ranges
3. (Optional) Edit the **Geographically Improbable Access** map visualization using the same logic

© 2026 Cisco and/or its affiliates. All rights reserved.

Customize the Geographically Improbable Access Table



Go to the **Search** page

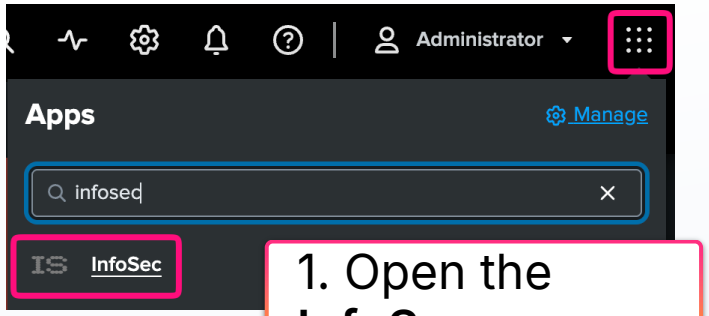


Check the content of the **vpn_ip.csv** lookup using the **inputlookup** command:

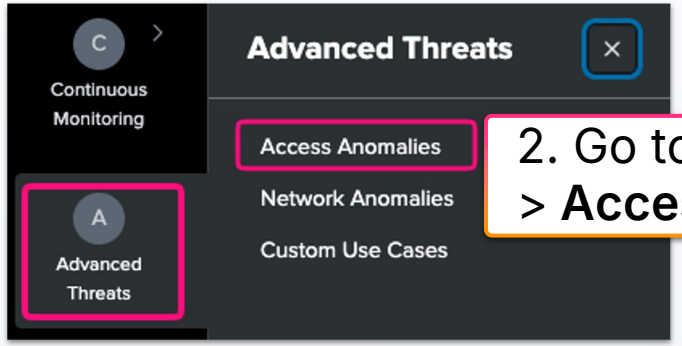
```
| inputlookup vpn_ip.csv
```

© 2026 Cisco and/or its affiliates. All rights reserved.

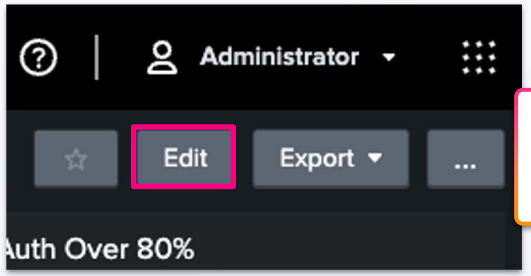
Customize the Geographically Improbable Access Table



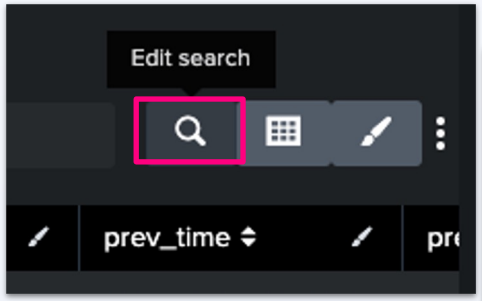
1. Open the **InfoSec** app



2. Go to **Advanced Threat > Access Anomalies**



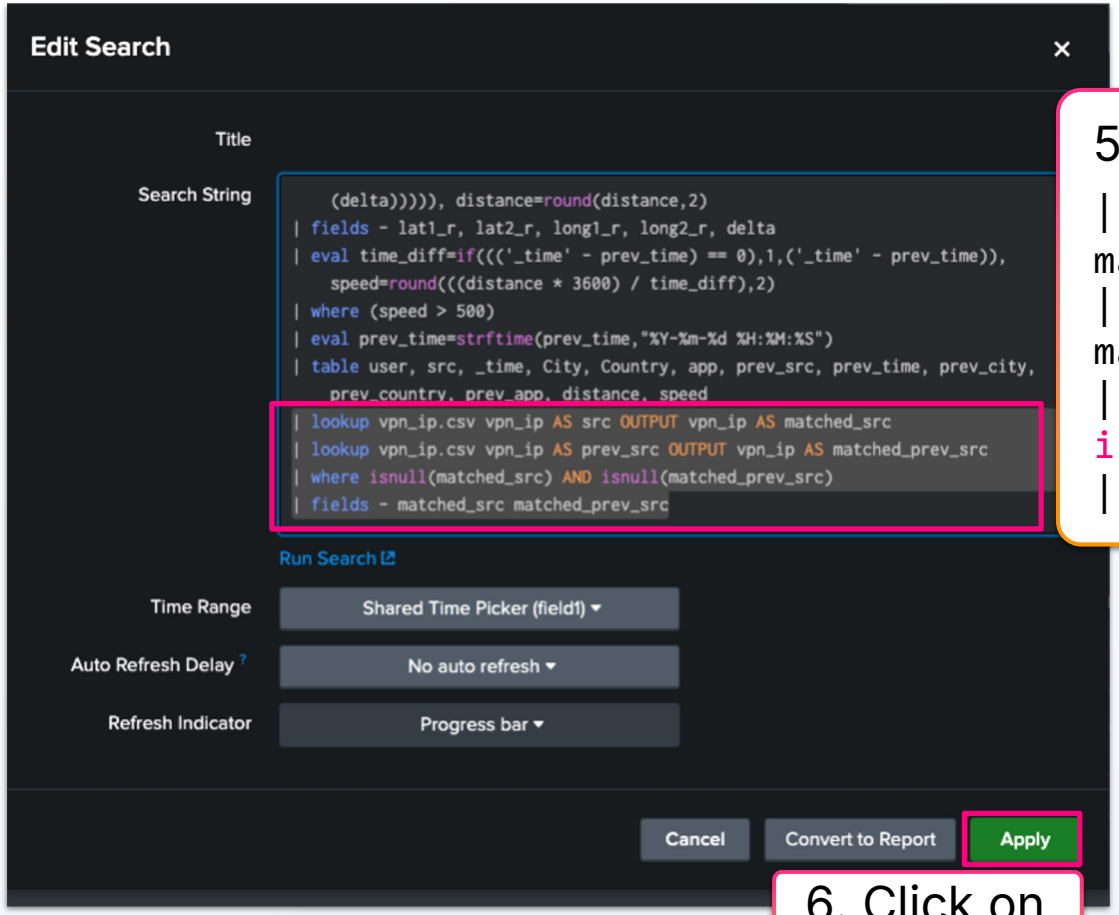
3. Switch to **Edit** mode



4. Scroll down to the **Geographically Improbable Access** table and click **Edit search** (magnifying glass)

© 2026 Cisco and/or its affiliates. All rights reserved.

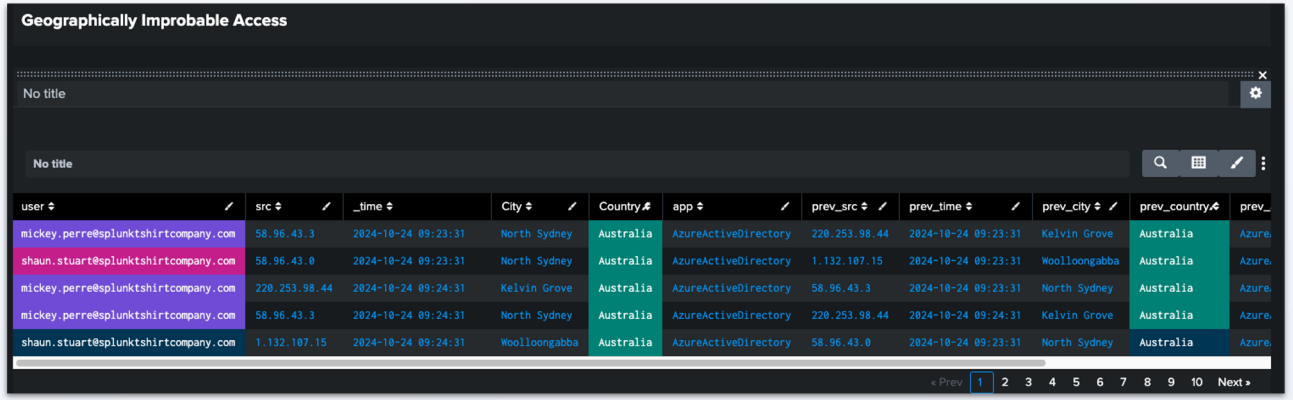
Customize the Geographically Improbable Access Table



5. At the end of the search, **add the following SPL:**

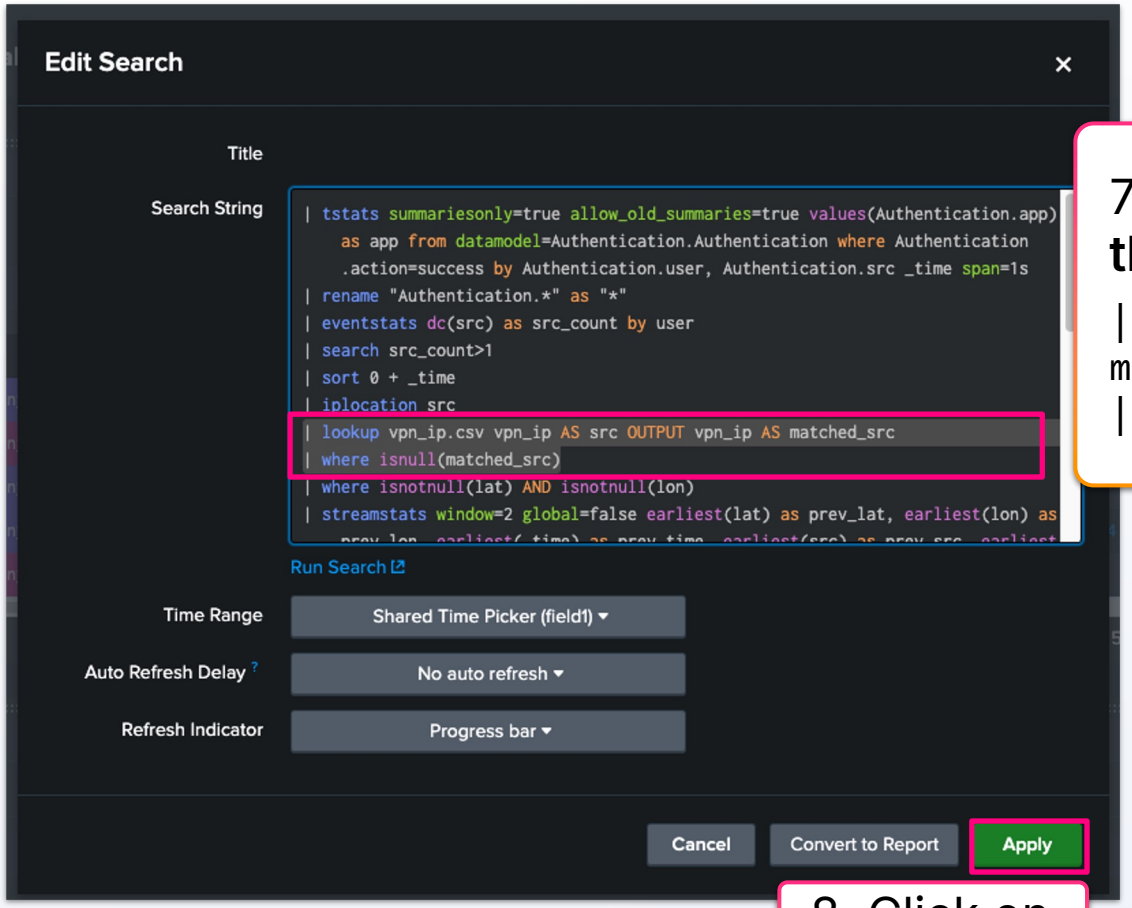
```
| lookup vpn_ip.csv vpn_ip AS src OUTPUT vpn_ip AS matched_src
| lookup vpn_ip.csv vpn_ip AS prev_src OUTPUT vpn_ip AS matched_prev_src
| where isnull(matched_src) AND isnull(matched_prev_src)
| fields - matched_src matched_prev_src
```

6. Click on **Apply**



© 2026 Cisco and/or its affiliates. All rights reserved.

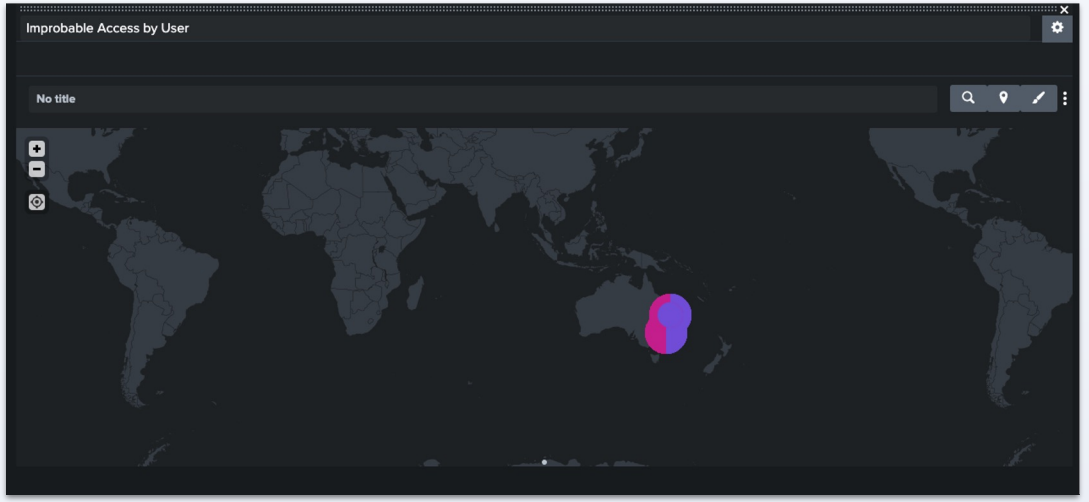
(Optional)
Customize the Improbable Access by User Map



7. Edit the search of the **map visualisation** and **add these two lines** under the iplocation line:

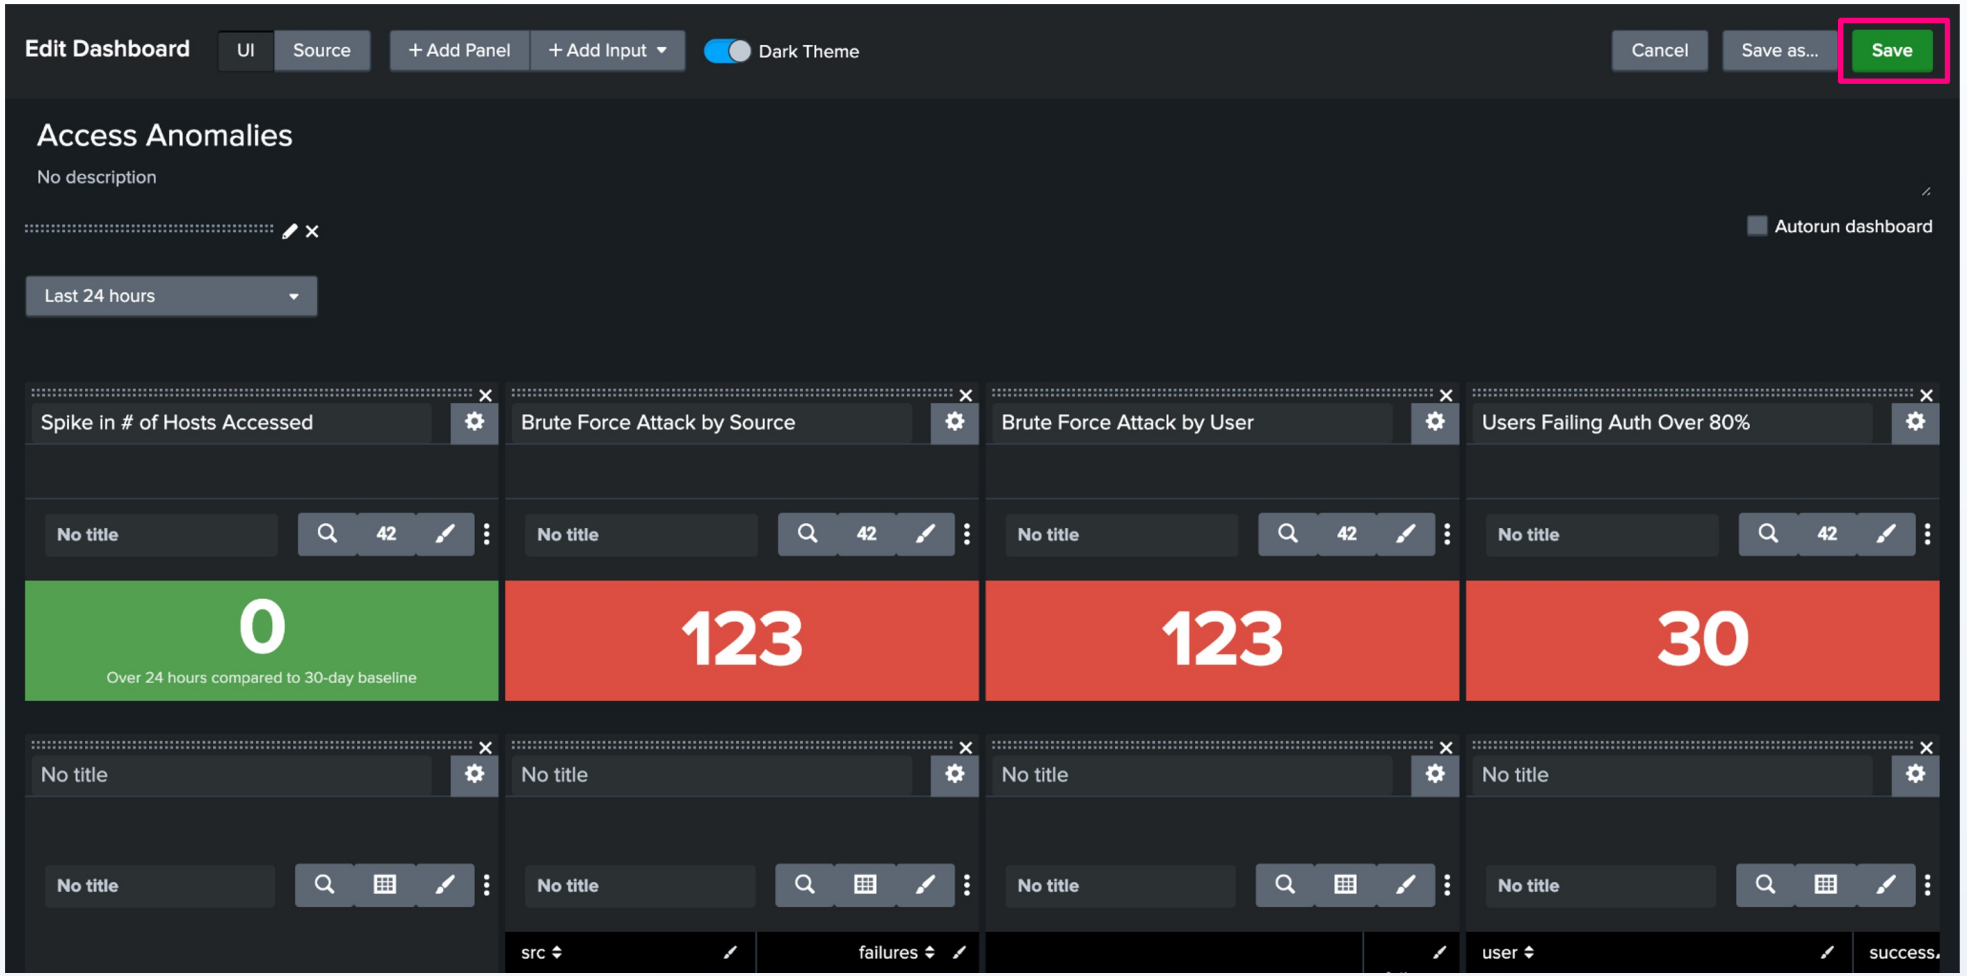
```
| lookup vpn_ip.csv vpn_ip AS src OUTPUT vpn_ip AS matched_src
| where isnull(matched_src)
```

8. Click on **Apply**



© 2026 Cisco and/or its affiliates. All rights reserved.

Save Your Dashboard!



Click **Save**

© 2026 Cisco and/or its affiliates. All rights reserved.

Our progress so far

- **IT team:** Install the Splunk Add-on for AWS and finish setting up the InfoSec App for Splunk so that the dashboards populate correctly
- **Malware:** Find Malware-infected files and setup an alert for future detections
- **User behavior:** Look for sudden access changes, unauthorized role modifications, or unusual activity
- **Customize the InfoSec App:** Look for ways to customize the content for Buttercup State University
- **Add additional security content:** Review the content in Splunk Security Essentials and add any new use cases you think might be valuable

BUTTERCUP STATE UNIVERSITY

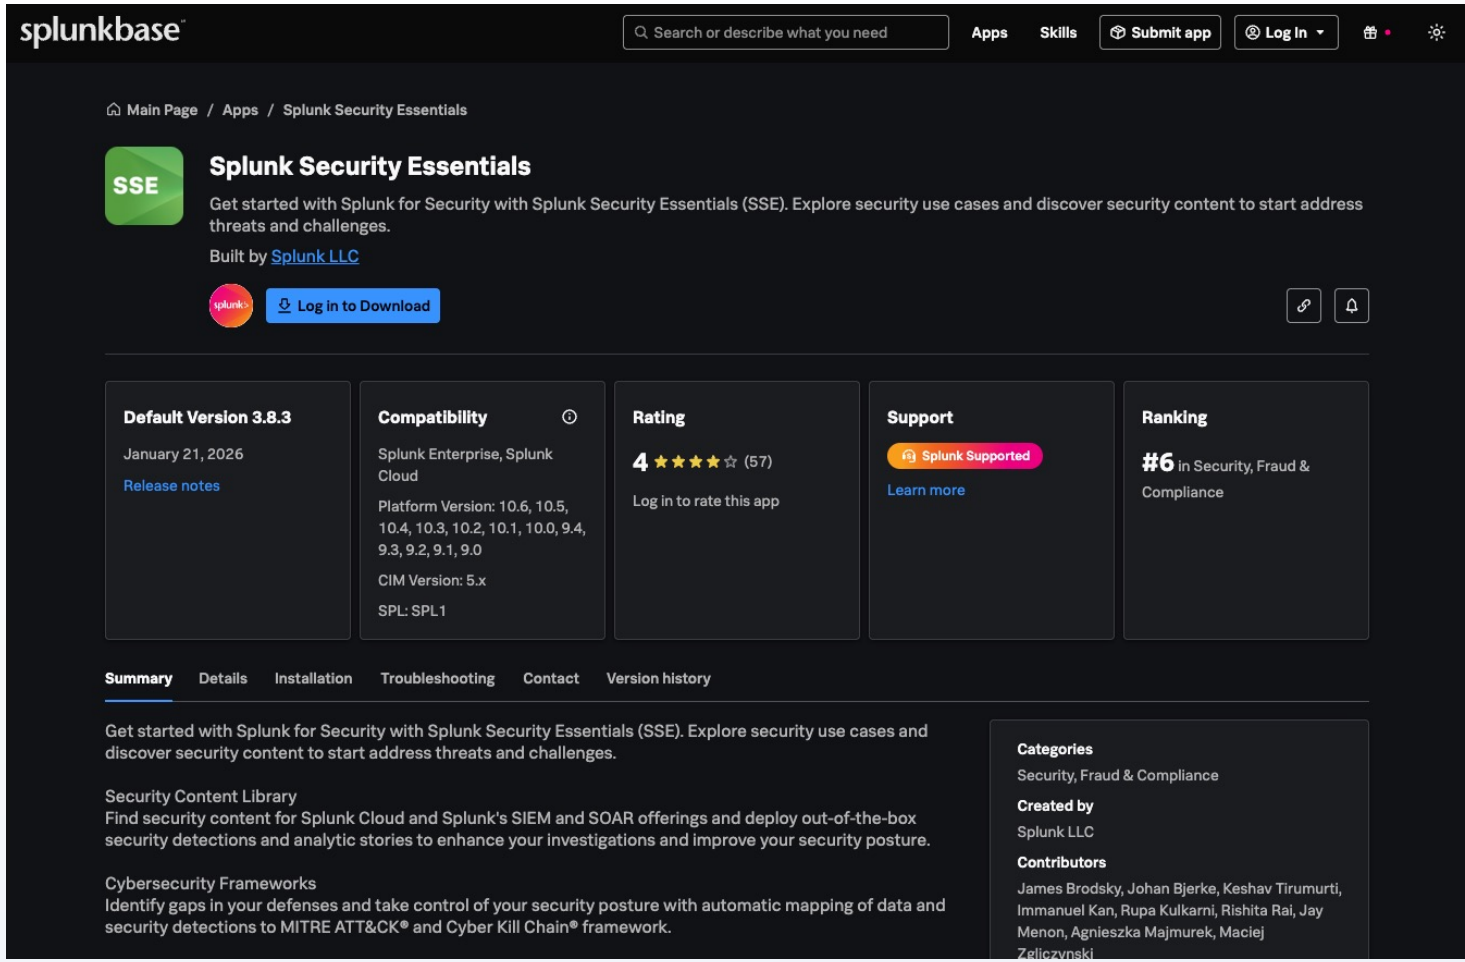
Splunk Security Essentials

Free security app on Splunkbase

- Works on Splunk Enterprise and Cloud
- Repository of over 1600 searches and detections out-of-the-box (OOTB)
- Maps detections to the MITRE ATT&CK framework
- Data inventory checking capabilities
- Categorized into sections:
  - Compliance
  - Insider Threat
  - Security Monitoring



© 2026 Cisco and/or its affiliates. All rights reserved.

Adding Security Content: New Use Case

The Security team wants a new dashboard panel to show recurring infections on hosts

Tasks

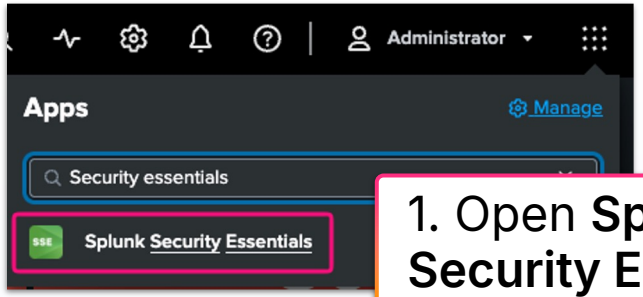
The Security team would like you to:

1. Add the '**Recurring Infection on Host**' use case from SSE to the InfoSec App's **Custom Use Cases** dashboard
2. Edit the search so only the **Risk_Name**, **Computer_Name** and **count** fields are displayed
3. Format the table to highlight the **count** in red if it's **greater than 10**

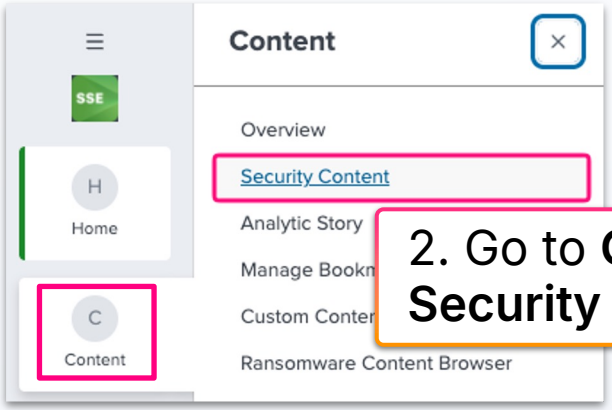
© 2026 Cisco and/or its affiliates. All rights reserved.

Edit the Custom Use Case Dashboard

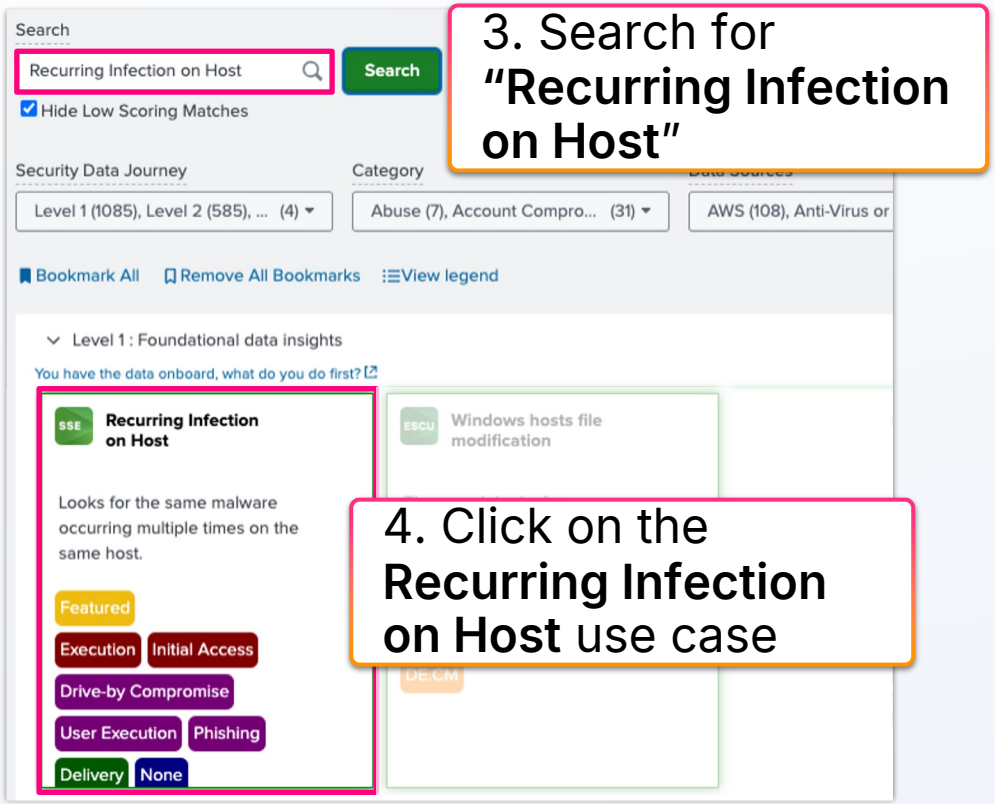
Add new content from Splunk Security Essentials



1. Open **Splunk Security Essentials**



2. Go to **Content > Security Content**



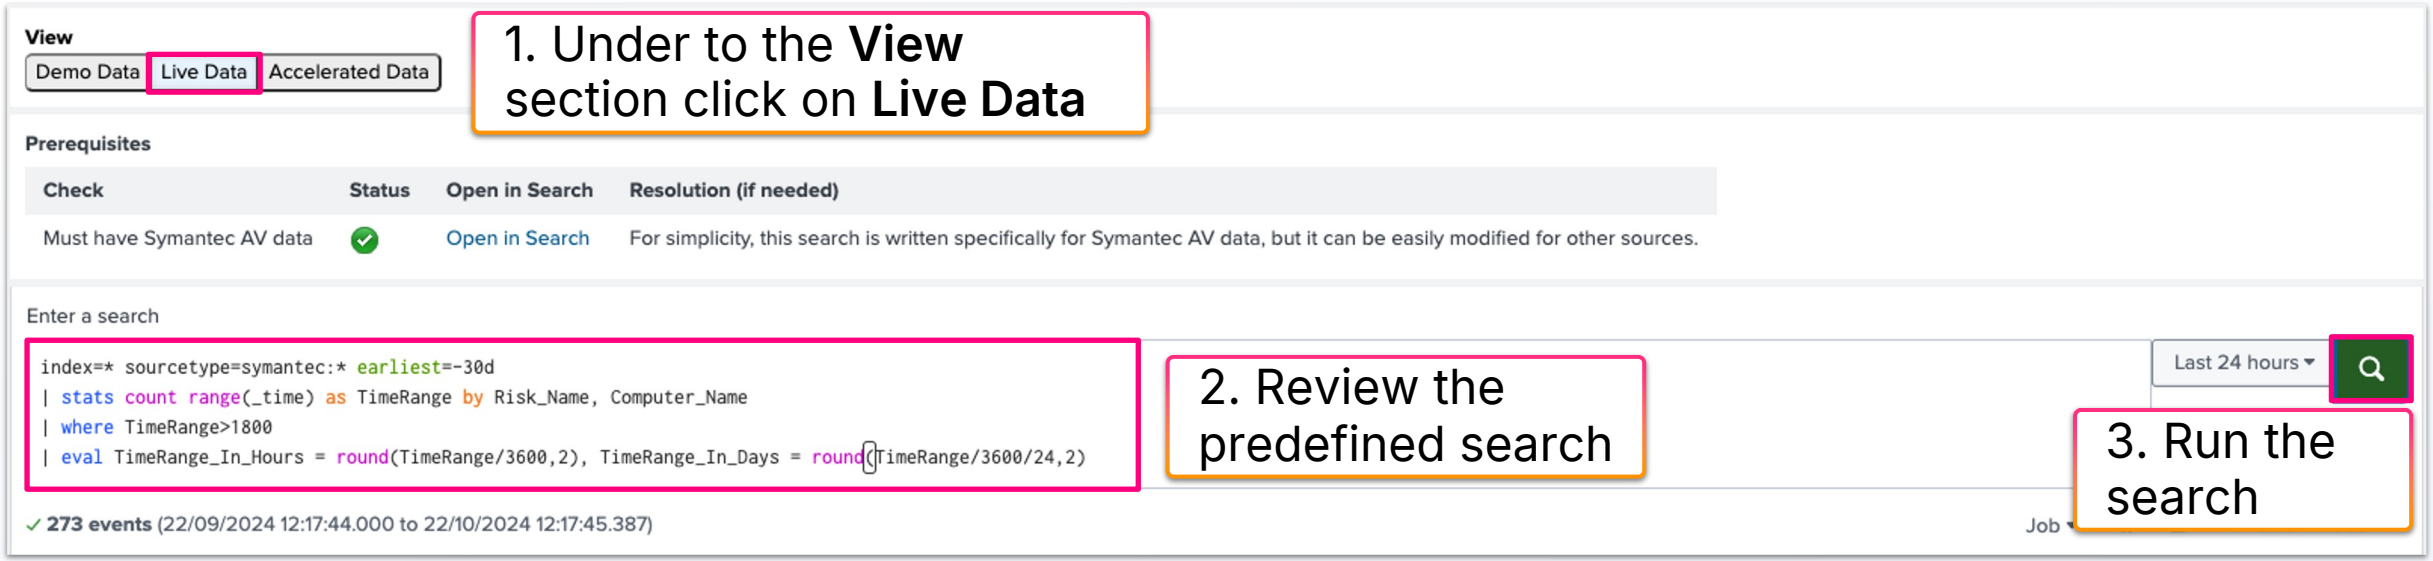
3. Search for **"Recurring Infection on Host"**

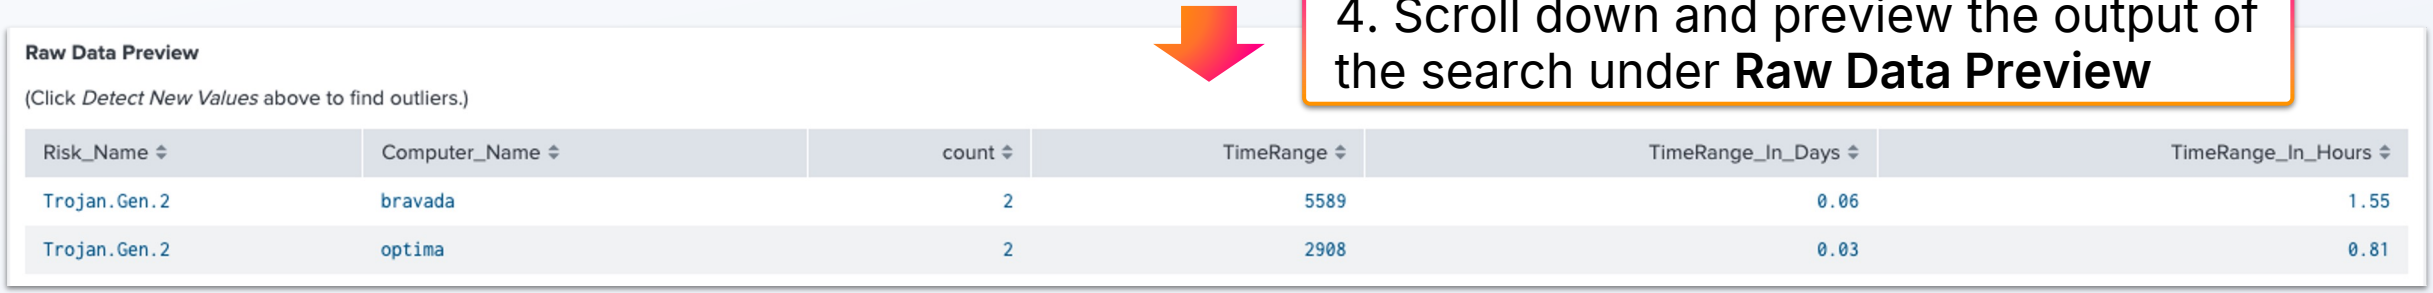
4. Click on the **Recurring Infection on Host** use case

© 2026 Cisco and/or its affiliates. All rights reserved.

Edit the Custom Use Case Dashboard

Add new content from Splunk Security Essentials

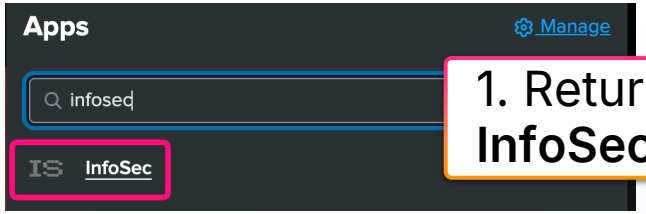




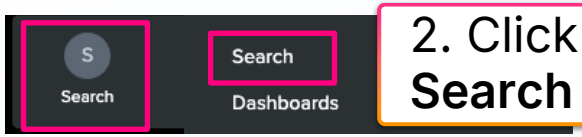
© 2026 Cisco and/or its affiliates. All rights reserved.

Edit the Custom Use Case Dashboard

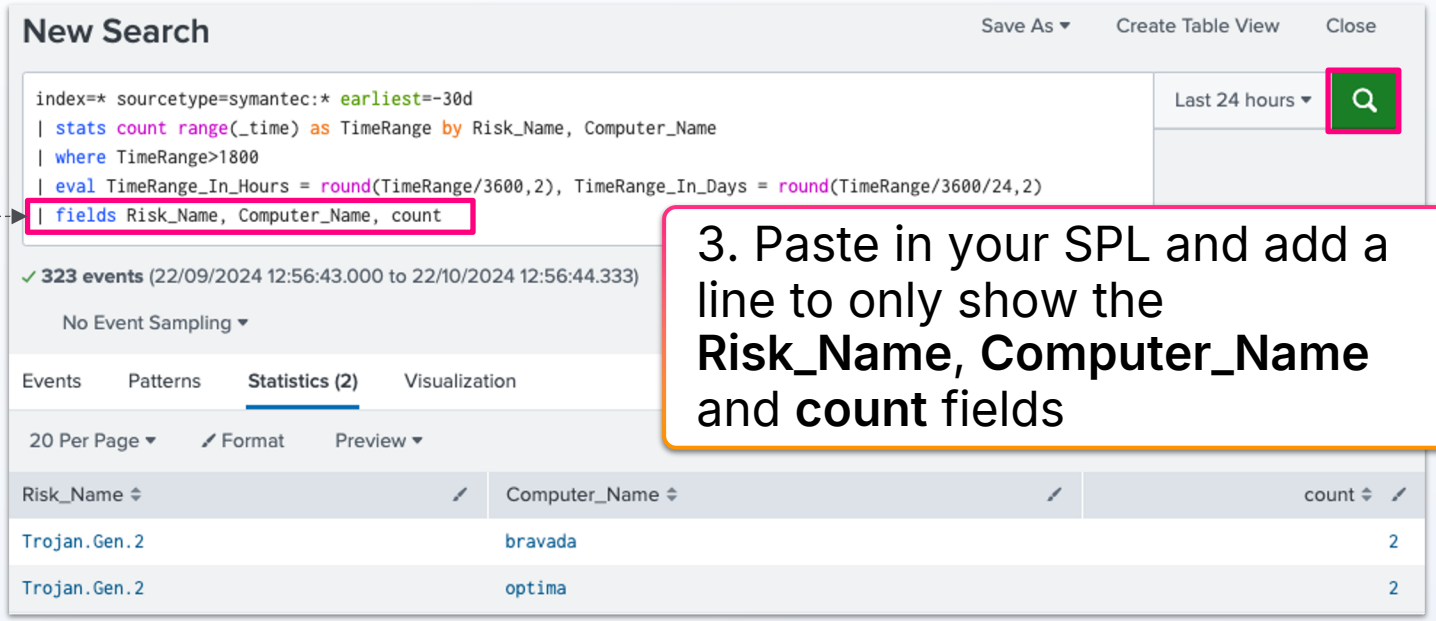
Add the new content to the Custom Use Case dashboard



1. Return to the **InfoSec** app



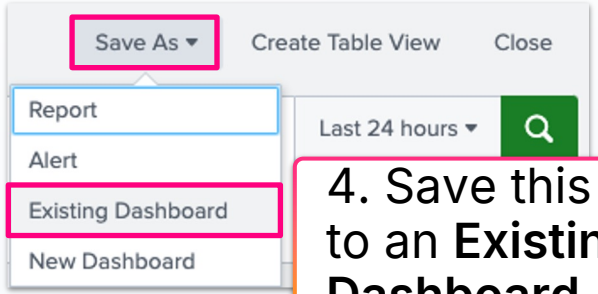
2. Click on **Search** > **Search**



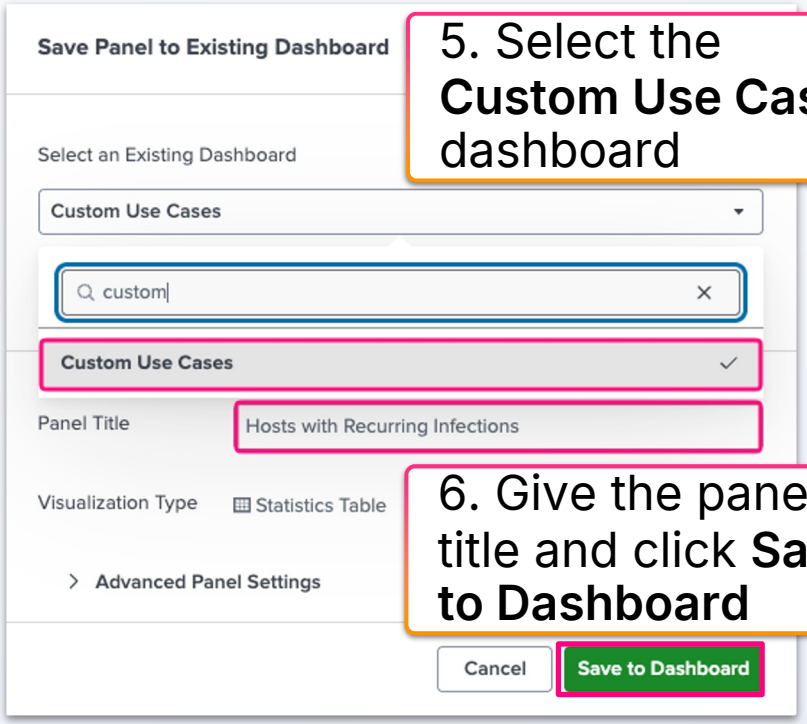
3. Paste in your SPL and add a line to only show the **Risk_Name**, **Computer_Name** and **count** fields

Line to add:

```
| fields Risk_Name, Computer_Name, count
```



4. Save this search to an **Existing Dashboard**



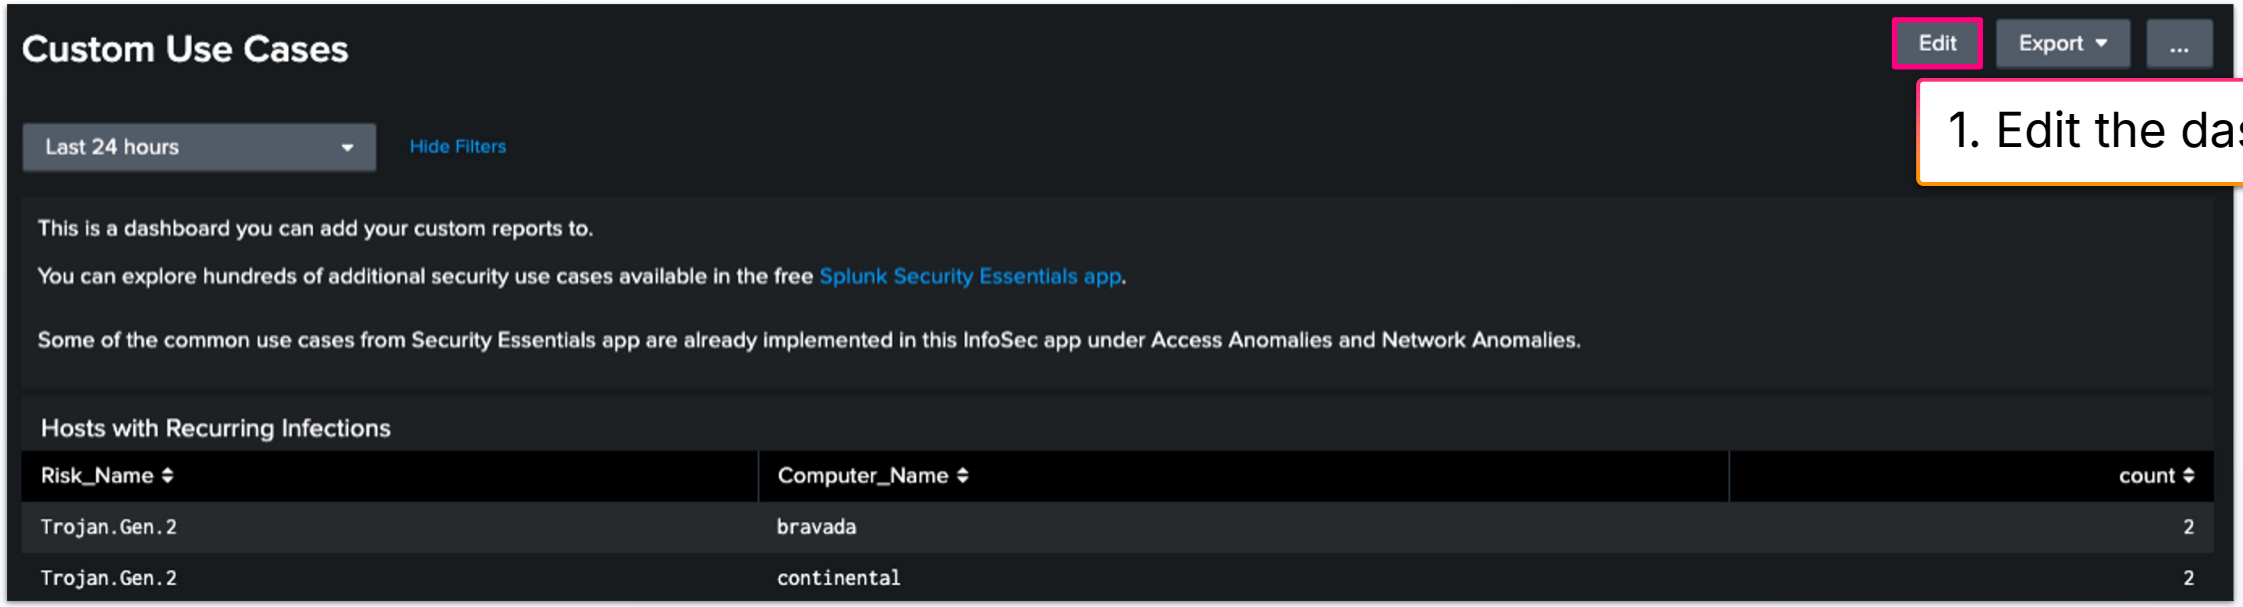
5. Select the **Custom Use Cases** dashboard

6. Give the panel a title and click **Save to Dashboard**

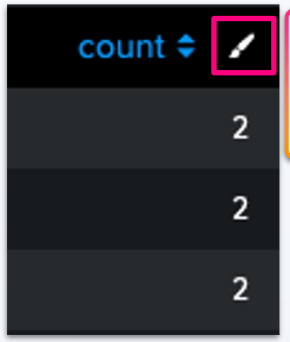
© 2026 Cisco and/or its affiliates. All rights reserved.

Edit the Custom Use Case Dashboard

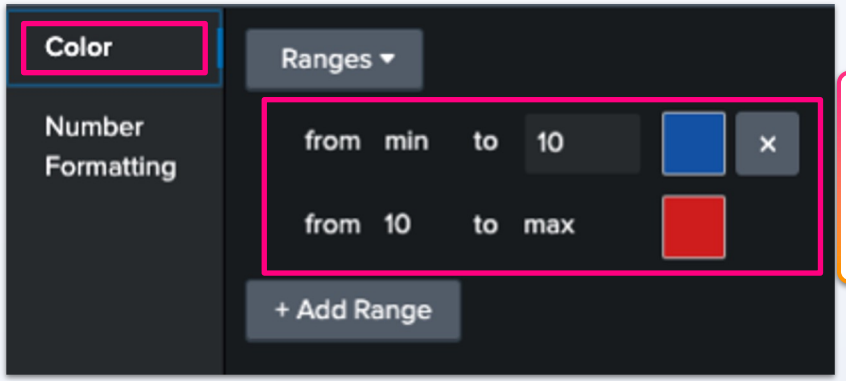
Add color to the new dashboard panel



1. Edit the dashboard

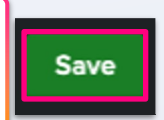


2. Format the **count** column



3. Edit the color ranges as shown so a **count** of 10 or greater will be red

Make sure you **save** your dashboard!



© 2026 Cisco and/or its affiliates. All rights reserved.

Adding Security Content: New Dashboard

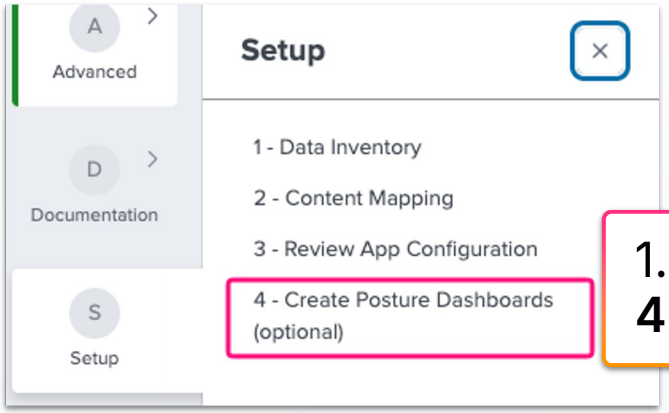
The Security team wants a new custom dashboard showing network security insights

Tasks

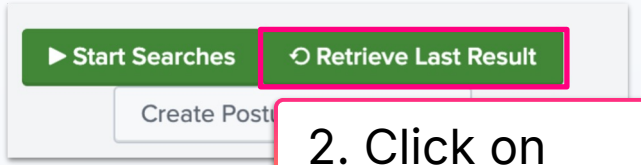
1. Use SSE's **Setup** menu to create a new **"Posture Dashboard"**
2. Create a new **"Essential Network Security"** dashboard containing the following insights:
   - Rare Internal Destination Ips
   - Rare Internal Source Ips
   - Hosts that communicate with the greatest number of destinations on SMB Ports
3. Add the dashboard to the **Continuous Monitoring** section of the InfoSec App

© 2026 Cisco and/or its affiliates. All rights reserved.

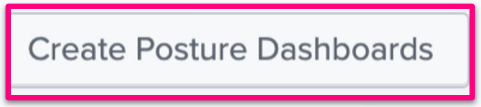
Create a Dashboard from Splunk Security Essentials



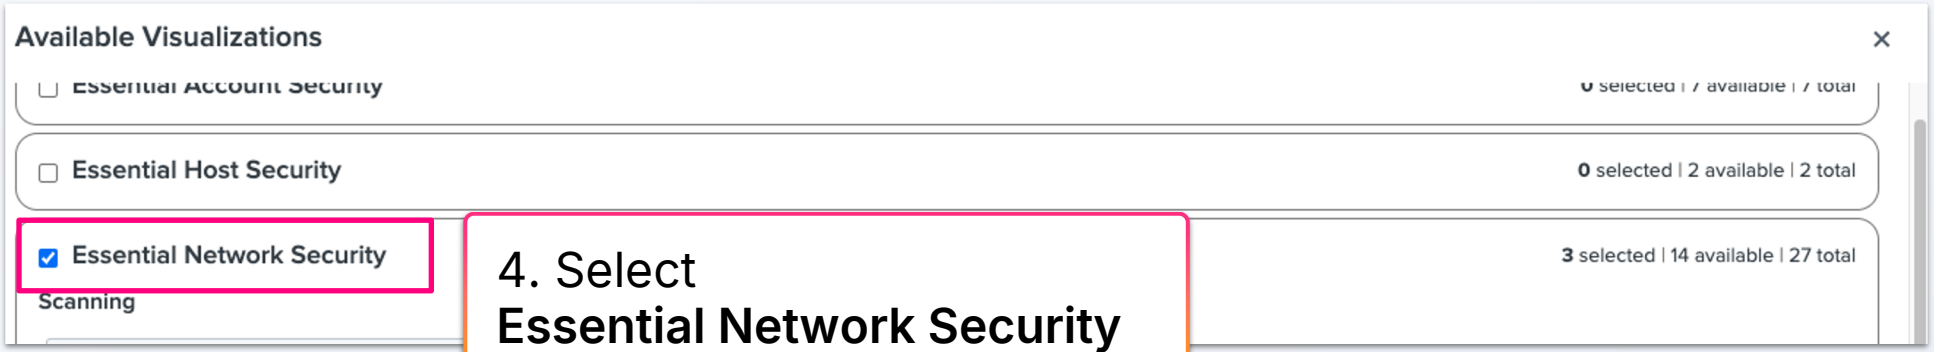
1. In SSE click on **Setup > 4 - Create Posture Dashboards**



2. Click on **Retrieve Last Result**



3. Click on **Create Posture Dashboards**

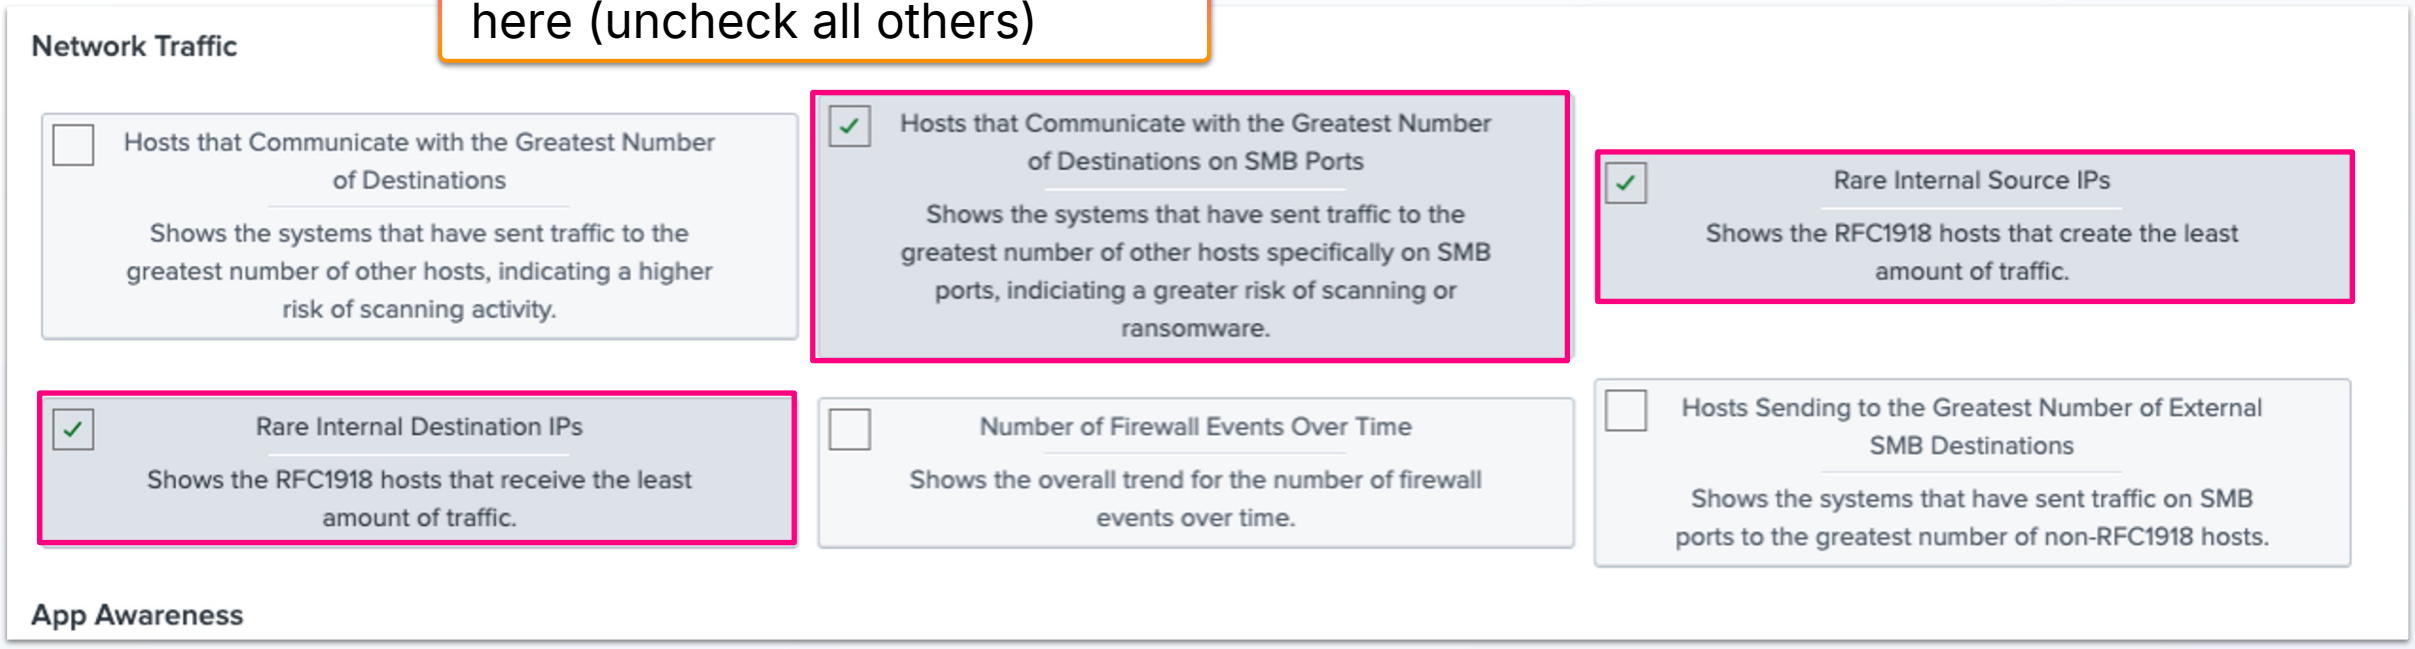


4. Select **Essential Network Security**

© 2026 Cisco and/or its affiliates. All rights reserved.

Create a Dashboard from Splunk Security Essentials

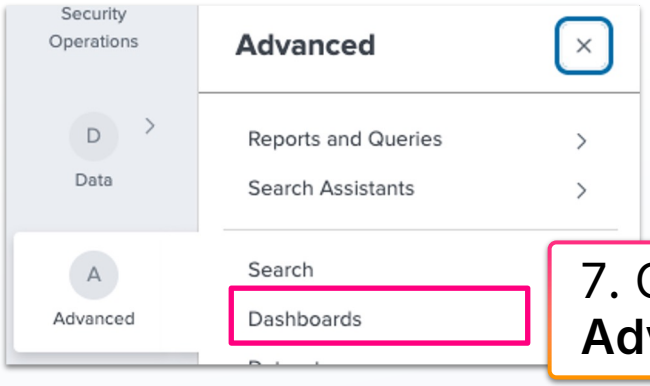
5. Select the detections shown here (uncheck all others)



6. Click on **Create Dashboards**

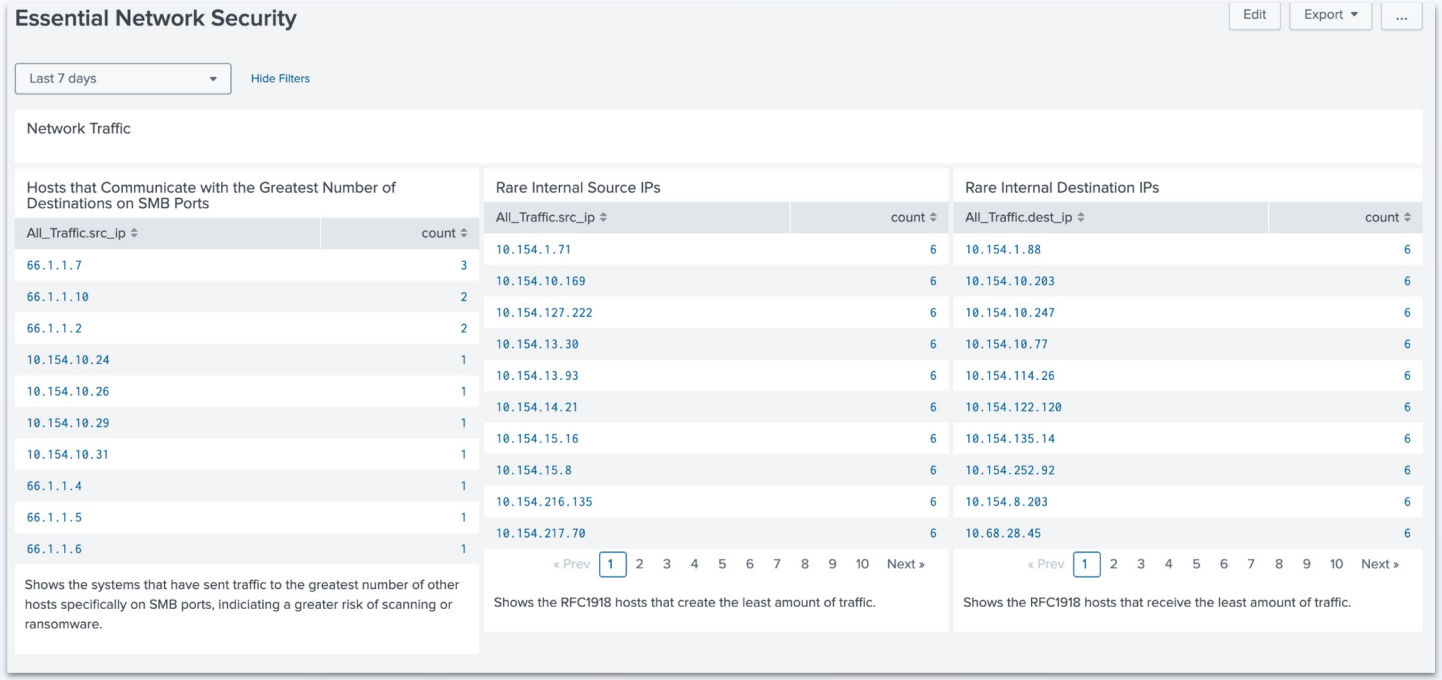
© 2026 Cisco and/or its affiliates. All rights reserved.

Create a Dashboard from Splunk Security Essentials



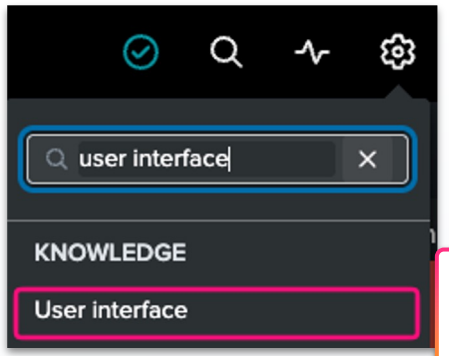
7. Click on **Advanced** > **Dashboards**

8. Find the new dashboard and verify it contains the chosen detections

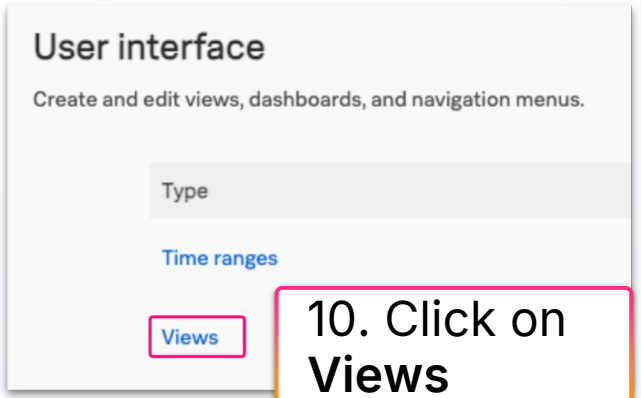


© 2026 Cisco and/or its affiliates. All rights reserved.

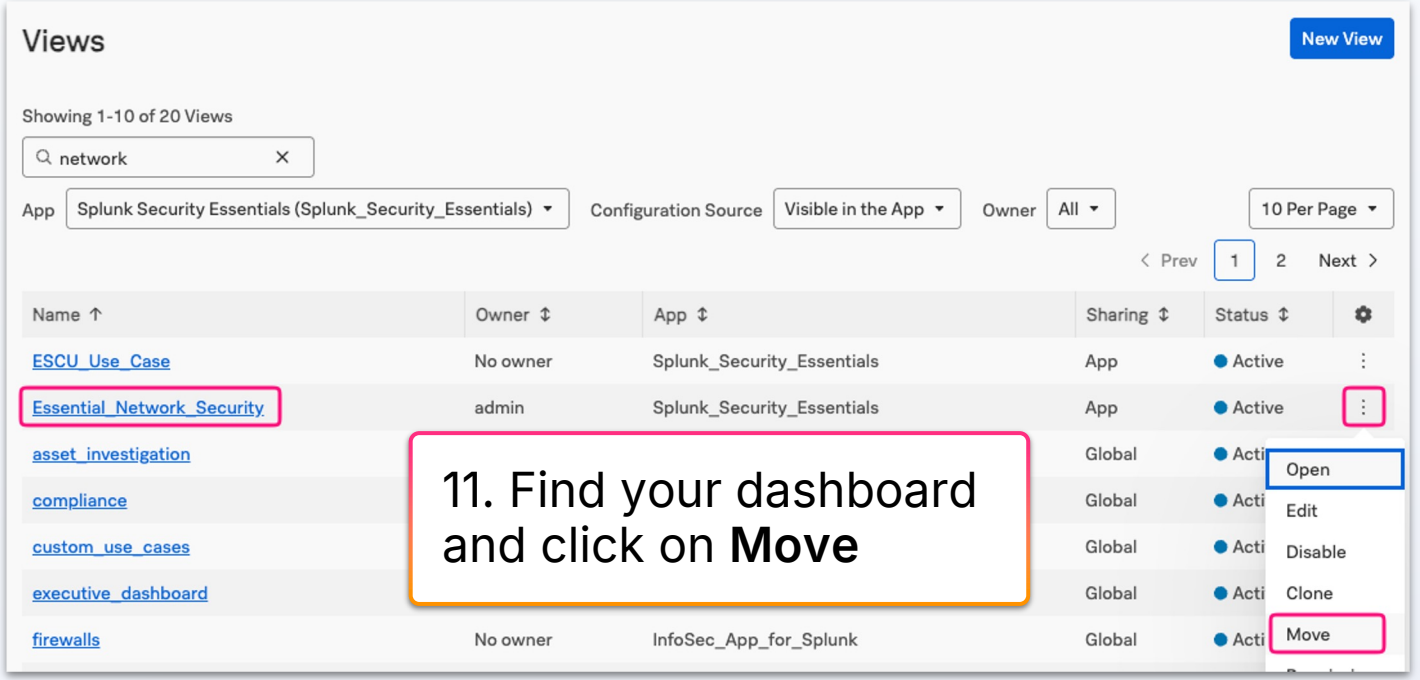
Move the Dashboard from SSE to the InfoSec App



9. Click on **Settings** > **User Interface**



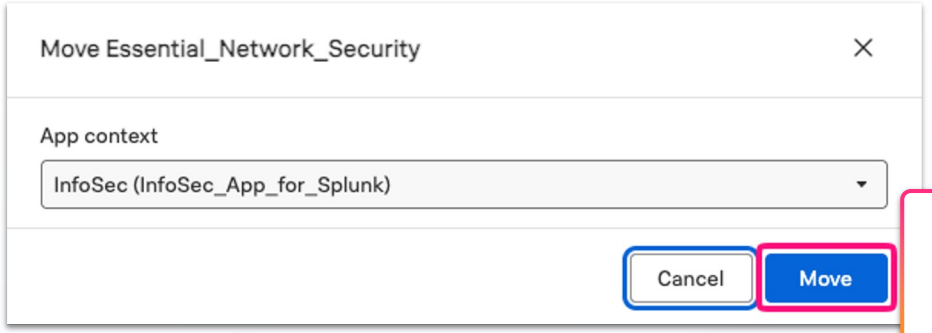
10. Click on **Views**



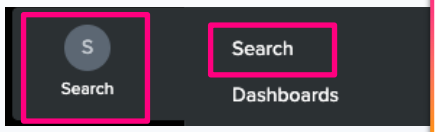
11. Find your dashboard and click on **Move**

© 2026 Cisco and/or its affiliates. All rights reserved.

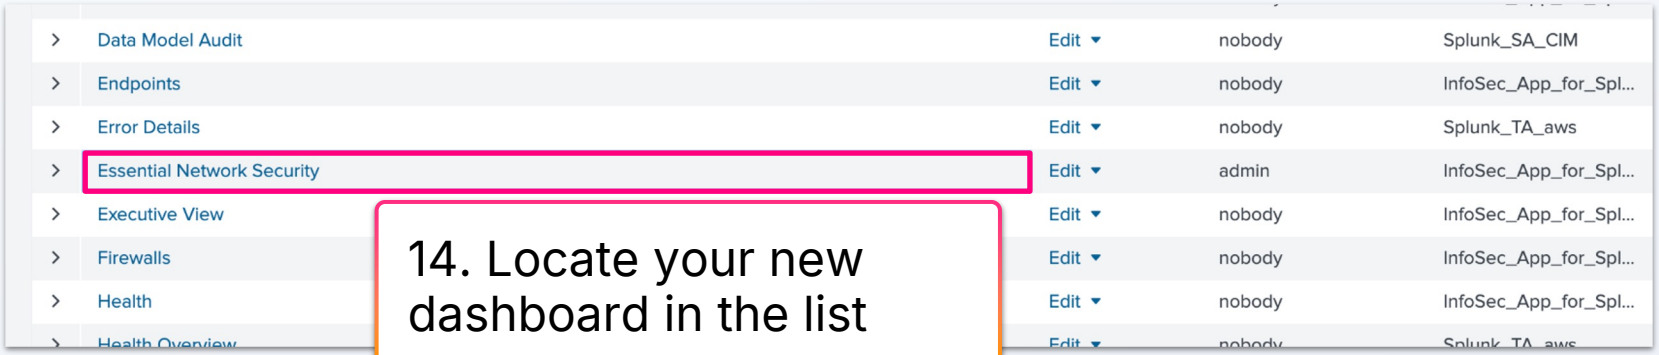
Move the Dashboard from SSE to the InfoSec App



12. Find the **InfoSec** app in the list and click on **Move**



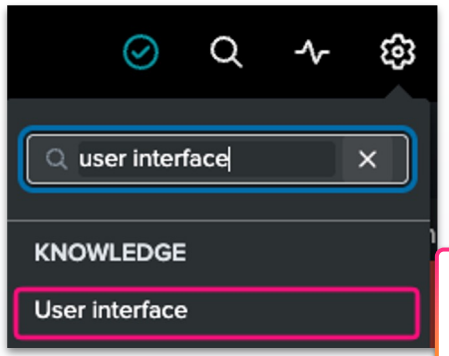
13. Go to the InfoSec App and navigate to **Search** > **Dashboards**



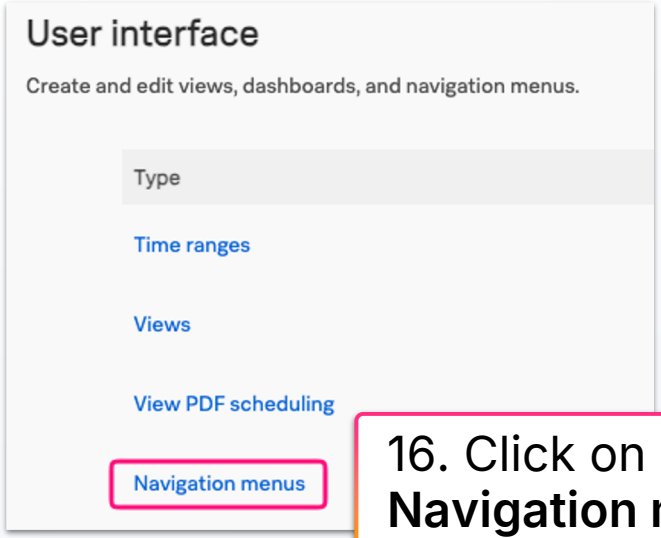
14. Locate your new dashboard in the list

© 2026 Cisco and/or its affiliates. All rights reserved.

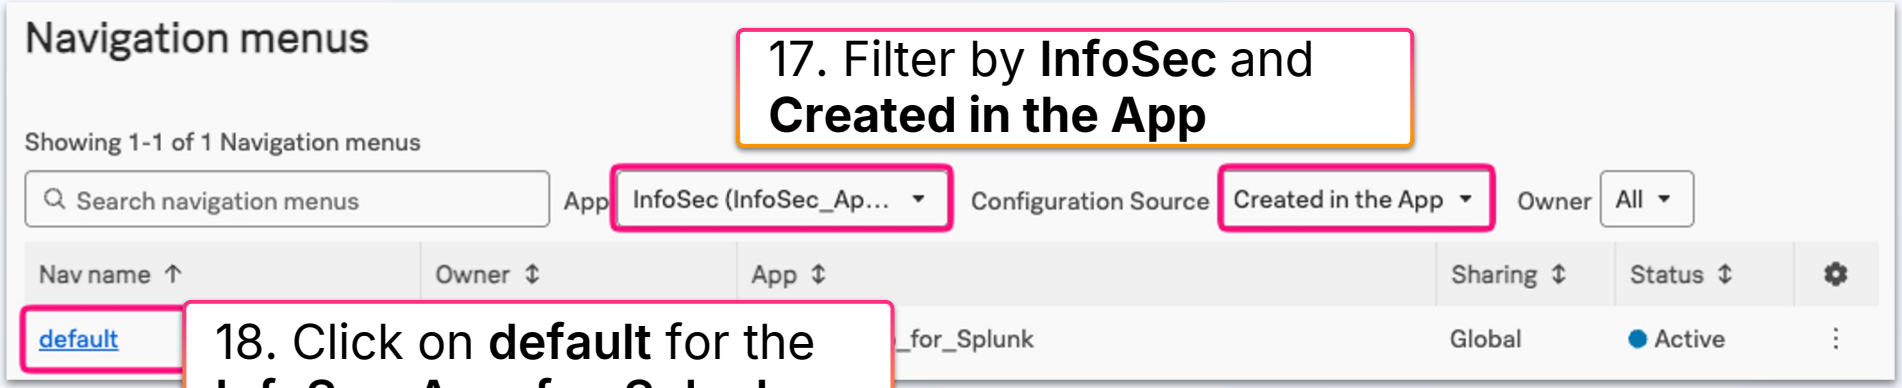
Add the Dashboard to the Navigation Menu



15. Click on **Settings** > **User Interface**



16. Click on **Navigation menus**



17. Filter by **InfoSec** and **Created in the App**

18. Click on **default** for the **InfoSec_App_for_Splunk**

© 2026 Cisco and/or its affiliates. All rights reserved.

Add the Dashboard to the Navigation Menu

* Navigation menu XML

```
<nav>

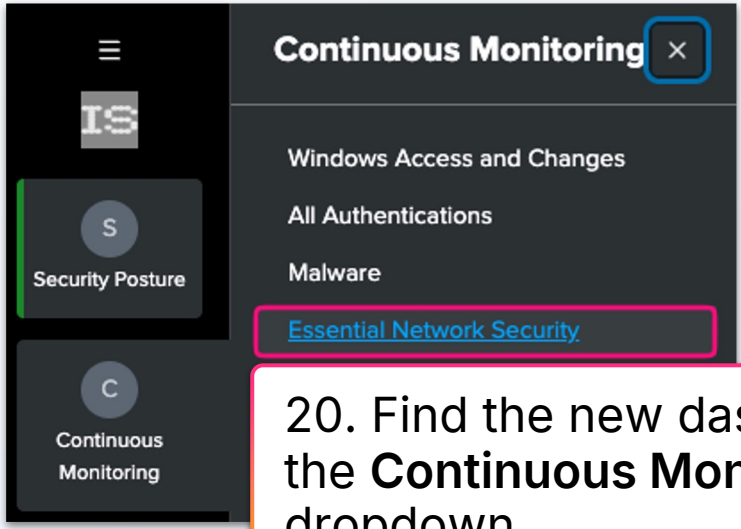
  <view name="security_posture" default='true' />

  <collection label="Continuous Monitoring">
    <view name="windows" />
    <view name="access" />
    <view name="malware" />
    <view name="Essential_Network_Security"/>
    <view name="ids" />
```

19. **Edit the XML** and add the "**Essential_Network_Security**" view after "**malware**" and save
Note: The view name is case sensitive!

XML to add:

```
<view name="Essential_Network_Security"/>
```



20. Find the new dashboard in the **Continuous Monitoring** dropdown

© 2026 Cisco and/or its affiliates. All rights reserved.

You've Finished the Hands-on Exercises!

- **IT team:** Install the Splunk Add-on for AWS and finish setting up the InfoSec App for Splunk so that the dashboards populate correctly
- **Malware:** Find Malware-infected files and setup an alert for future detections
- **User behavior:** Look for sudden access changes, unauthorized role modifications, or unusual activity
- **Customize the InfoSec App:** Look for ways to customize the content for Buttercup State University
- **Add additional security content:** Review the content in Splunk Security Essentials and add any new use cases you think might be valuable

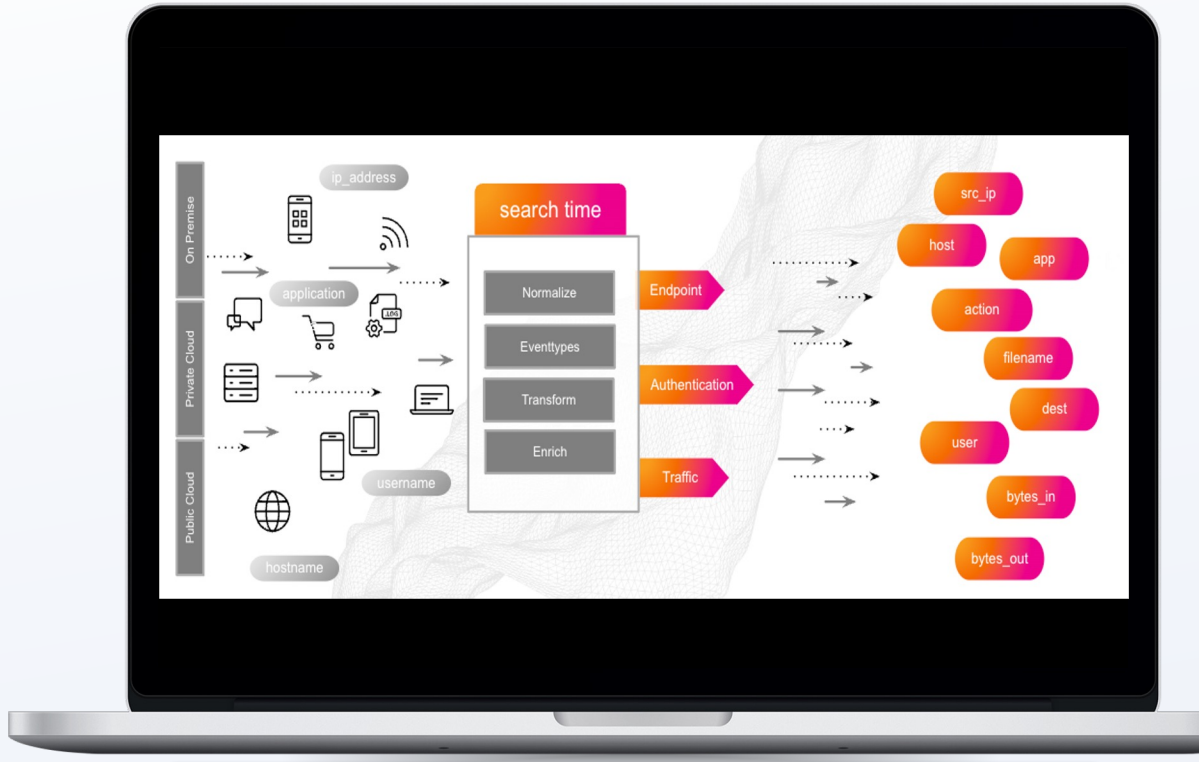
Splunk Resources

Where to go after today’s workshop

Splunk4Ninjas - Common Information Model (CIM)

Hands-on Workshop

- Go from Splunk CIM zero to hero in 3 hours!
  In-person and remote options available
- Learn how data maps to CIM data models
  Discover how you can use Splunk add-ons and custom knowledge objects to make data CIM compliant
- Apply SPL best practices for CIM data
  Learn the SPL commands available to search data mapping to CIM data models and accelerated data models
- Basic Splunk experience required
  Ideal for those who have experience using the stats command, creating Splunk dashboards and using add-ons



Normalize and visualize custom data using CIM data models and tstats!

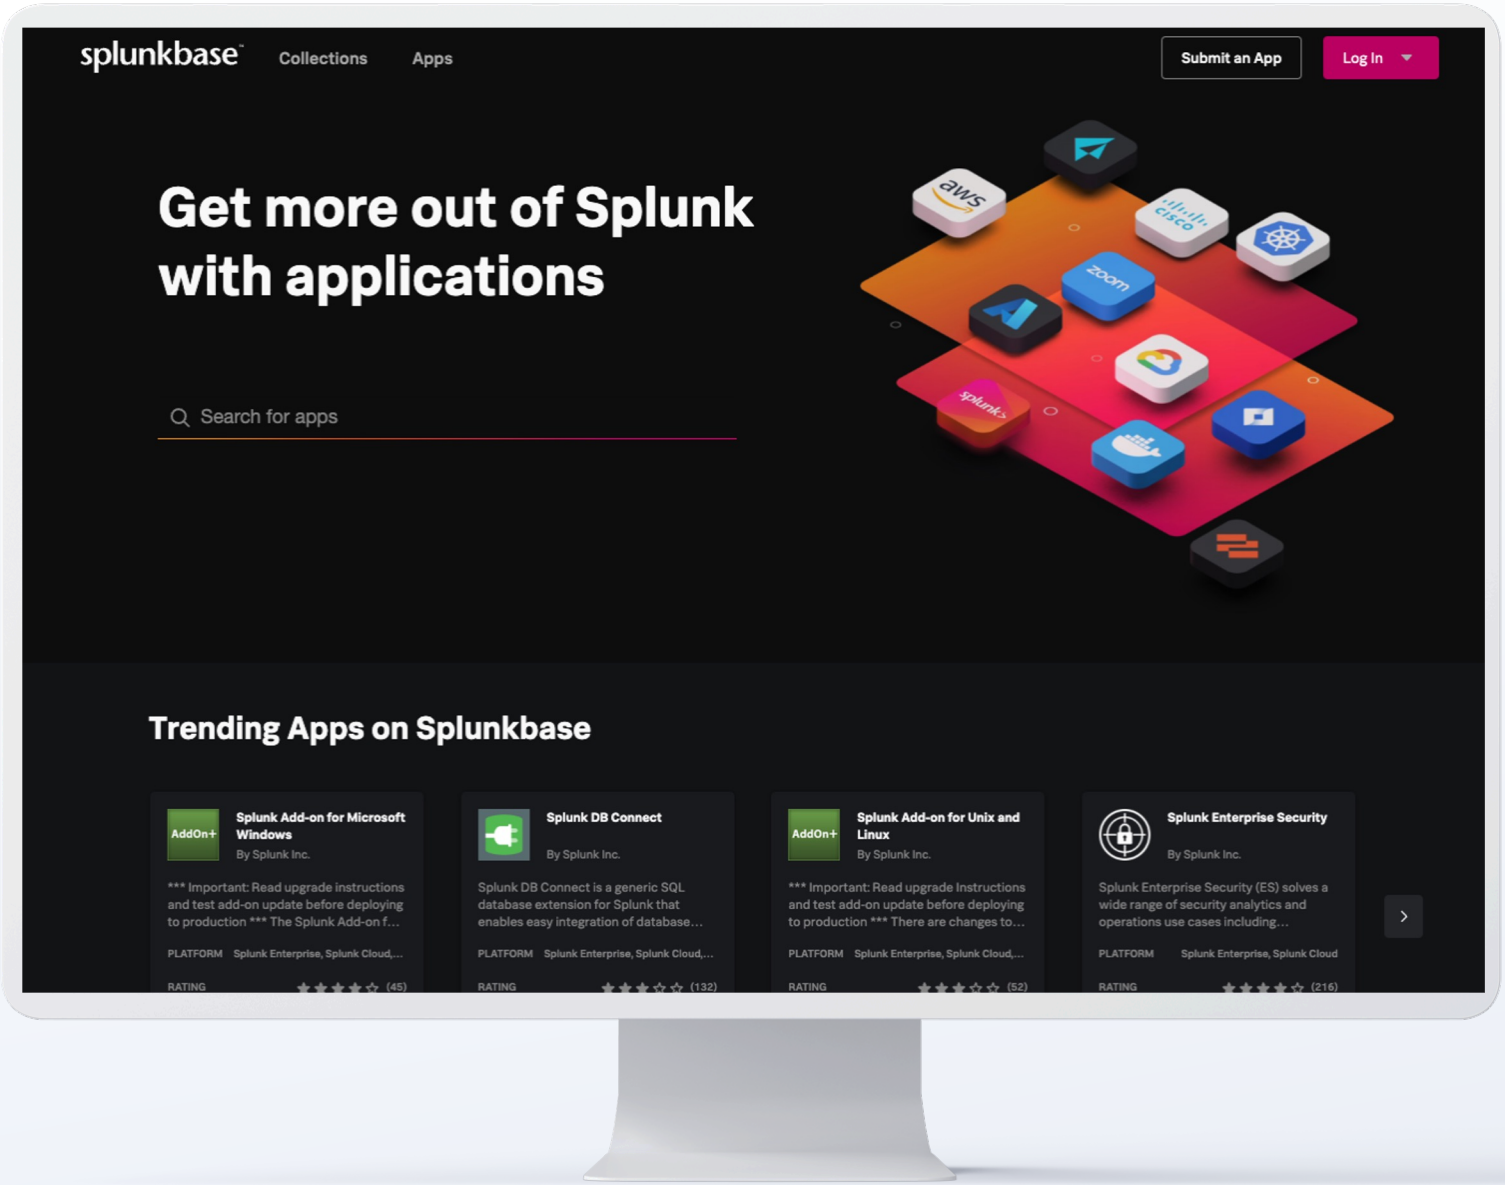
Splunk Apps & Add-ons

https://splunkbase.splunk.com

- 2200+ apps and add-ons
- Pre-built searches, reports, visualisations and integrations for specific use cases and technologies
- Download apps and customise them based on your requirements
- Fast time to value from your data
- Build and contribute your own apps



© 2026 Cisco and/or its affiliates. All rights reserved.

Training & Certification

https://splunk.com/training

- Online education classes
  Instructor-led and self-paced eLearning
- Certification tracks for different roles
  User, Power User, Admin, Architect and Developer
- Splunk Education Rewards
  Complete training and receive points that you can redeem for Splunk swag!
- Free education!
  Single-subject eLearning courses to kick start your Splunk learning

cisco

Scales to Petabytes Per Day

Enterprise-Class Scale, Resilience and Interoperability

splunk>cloud

Public or private cloud
On-premise

Searches are run on **Splunk Search Heads**

(Scalable)

- Distribute searches to Indexers
- Can be clustered (active-active)

Data is processed on **Splunk Indexers**

(Scalable)

- Receive and store raw data
- Data is analysed and indexed
- Can be clustered (active-active)

Collect data using a variety of data collection methods, such as **Splunk Forwarders**

Wire Data | API | SDKs | HTTP | TCP/UDP | RDBMS | Containers | Apps | Cloud Services | OpenTelemetry | Splunk Forwarders

- Collect/monitor and forward data to Indexers
- Collection options for a variety of data sources

Apps and Add-ons

- 2200+ free apps and add-ons available from https://splunkbase.splunk.com/
- Built either by Splunk, our technology partners or members of our user community
- Prebuilt packages that help to enhance and extend the Splunk platform
- Provide content and capabilities – such as reports, dashboards and integrations – for a specific technology, purpose or use case, with the flexibility to customise for your own needs

Apps

Content designed to bring fast time-to-value from your data in Splunk, including pre-built dashboards, reports, alerts, visualisations and workflows

Add-ons

Provide specific capabilities to Splunk, such as getting data in, mapping data, or providing saved searches and macros
