Splunk Federated Data Management Workshop

Learn How to Filter, Mask, Route, & Metricize Your Data with Ingest Processor, Edge Processor and Ingest Actions

splunk> by CISCO

Forward-looking statements

This presentation may contain forward-looking statements regarding future events, plans or the expected financial performance of our company, including our expectations regarding our products, technology, strategy, customers, markets, acquisitions and investments. These statements reflect management's current expectations, estimates and assumptions based on the information currently available to us. These forward-looking statements are not guarantees of future performance and involve significant risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from results, performance or achievements expressed or implied by the forward-looking statements contained in this presentation. For additional information about factors that could cause actual results to differ materially from those described in the forward-looking statements made in this presentation, please refer to Cisco's periodic reports its other filings with the SEC, including the risk factors identified in Cisco's most recent quarterly report on Form 10-Q and annual report on Form 10-K, copies of which may be obtained by visiting the Cisco Investor Relations website at investor.cisco.com or the SEC's website at www.sec.gov. Any projections in this presentation are based on information currently available to Cisco, which is subject to change. The forward-looking statements made in this presentation are made as of the time and date of this presentation. If reviewed after the initial presentation, even if made available by us, on our website or otherwise, it may not contain current or accurate information. We disclaim any obligation to update or revise any forward-looking statement based on new information, future events or otherwise, except as required by applicable law.

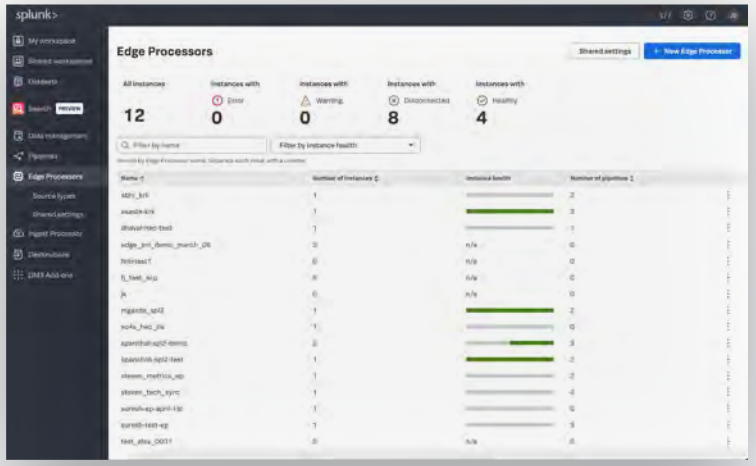

In addition, any information about our roadmap outlines or our general product direction is subject to change at any time without notice. It is for informational purposes only and shall not be incorporated into any contract or other commitment. We undertake no obligation either to develop the features or functionalities described, in alpha or beta or in preview (used interchangeably), or to include any such feature or functionality in a future release.

Why?

Quickly manage your data.

- Learn what tools exist and how to use them.
- Learn how to manage data from your browser.
- Learn to filter, mask, transform, enrich, and route data to multiple destinations.
- Learn you can get faster feedback that your changes are working.

Workshop Structure

One base use case for three labs

- Reduce noisy logs.
- Mask sensitive data.
- Route data to S3.
- Route data to a Splunk index.

Ingest Actions Lab

- Federated Search for AWS S3.

Splunk Edge Processor Lab

- Enrich data with lookups.

Ingest Processor Lab

- Logs to metrics.

Short recap and Q&A after each lab

Ingest Actions

ON-PREM CLOUD

Ingest Actions

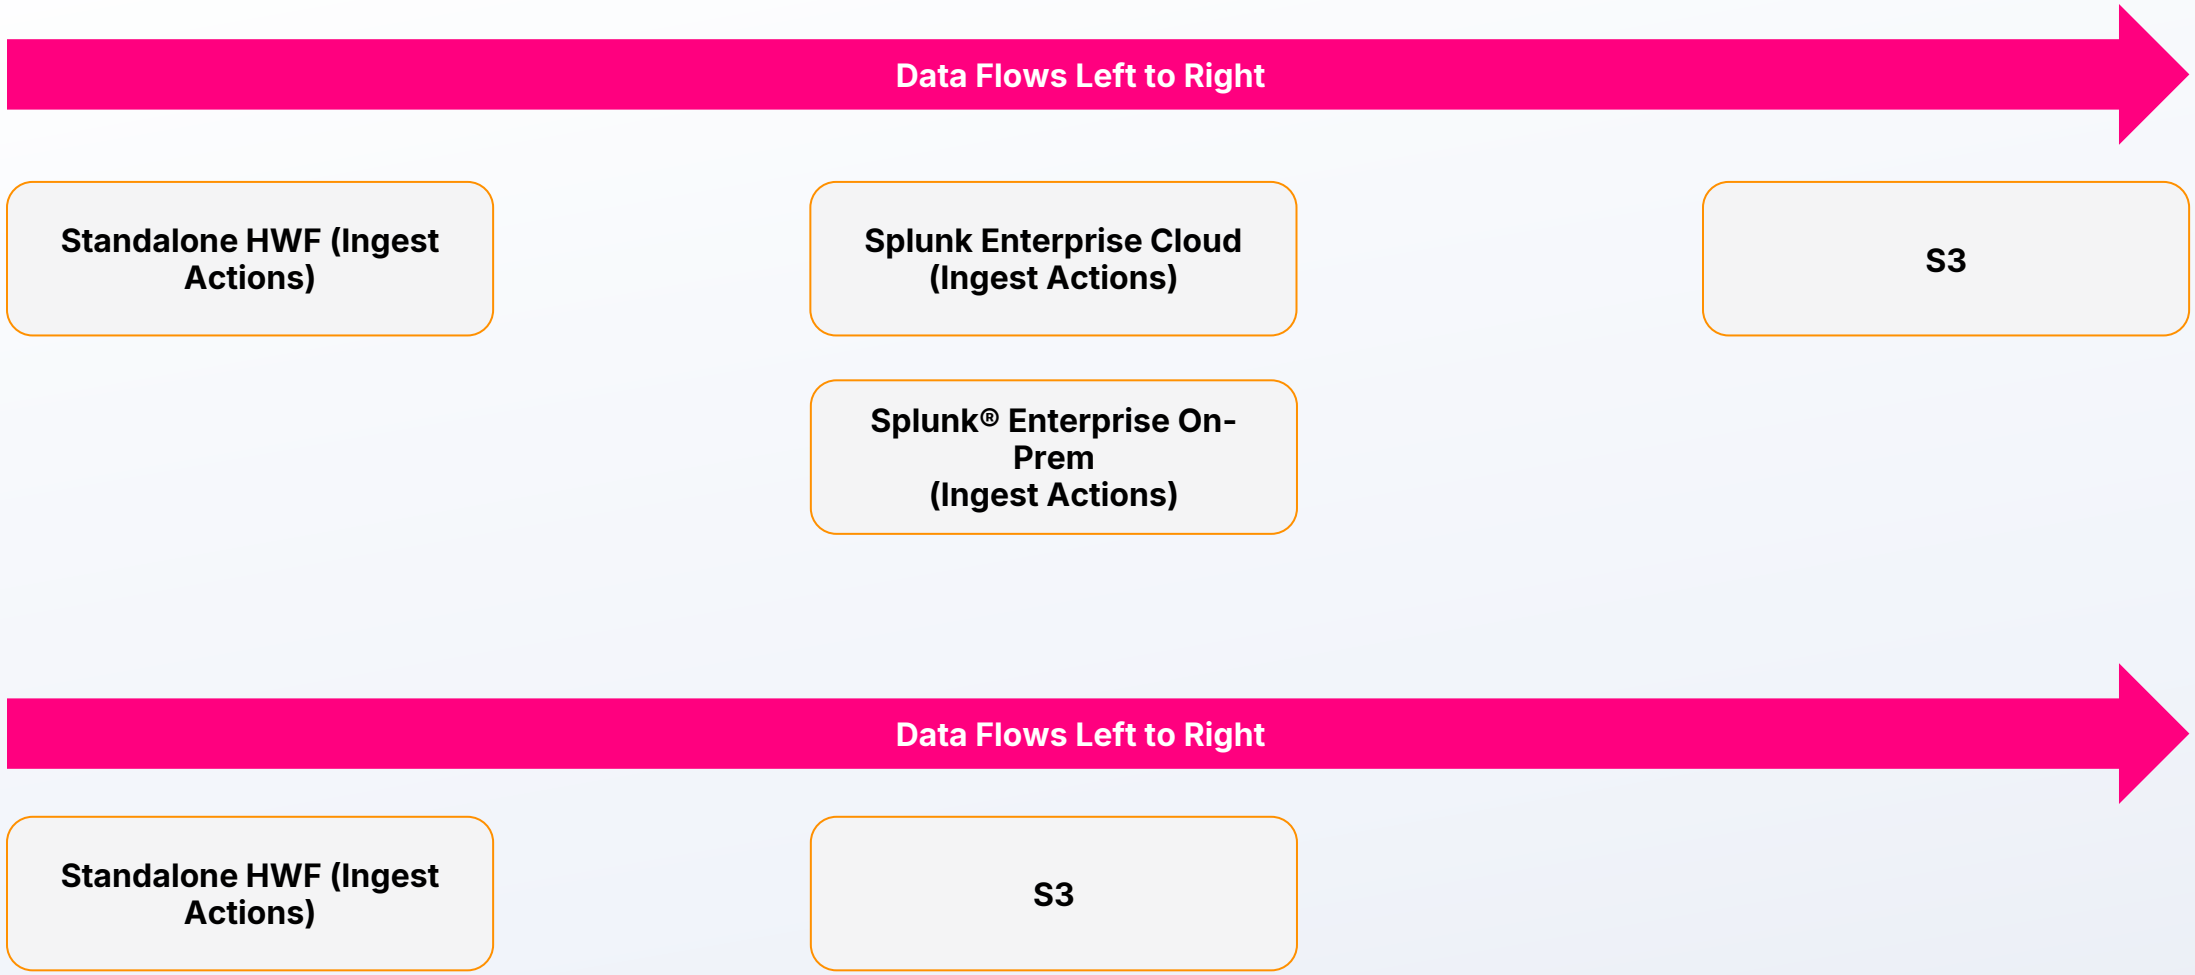

Data Admin / UI Power User

WHEN TO USE	HOW IT'S DONE	WHAT YOU NEED
● Reduce noise / volume →	● Filtering	● Good data quality — sourcetype, source, host
● Redact sensitive data →	● Masking	
● Send to indexes / S3 →	● Routing	● Simple → medium complexity use cases

REGISTRATION 5 MINS

Enroll in Today's Workshop

Tasks

1. Get a splunk.com account if you don't have one yet: https://splk.it/SignUp
2. Enroll in the Splunk Show workshop event: https://show.splunk.com/event/<eventID>
3. Download the hands-on lab guide: https://splk.it/DM-Lab-Guide

   Contains step-by-step instructions for all of today's exercises!

4. Download a copy of today's slide deck: https://splk.it/DM-Attendee

Goal

Enroll in today's event

© 2026 Cisco and/or its affiliates. All rights reserved.

Workshop

Ingest Actions

Ingest Actions Recap

What did you learn?

- How to target and manipulate events using the Ingest Actions UI.
  - No need to edit .conf files.

© 2026 Cisco and/or its affiliates. All rights reserved.

Ingest Actions Recap

What did you learn?

- How to target and manipulate events using the Ingest Actions UI.
  - No need to edit .conf files.
- How to mask specific fields in events.
  - PII stays safe from view.

© 2026 Cisco and/or its affiliates. All rights reserved.

Ingest Actions Recap

What did you learn?

- How to target and manipulate events using the Ingest Actions UI.
  - No need to edit .conf files.
- How to mask specific fields in events.
  - PII stays safe from view.
- How to route data to S3.
  - Lower cost to store.
  - Great for:
    - Compliance and audit.
    - Low value / high volume data.
  - Can use Splunk Federated Search for S3.

Ingest Actions Recap

What did you learn?

- How to target and manipulate events using the Ingest Actions UI.
  - No need to edit .conf files.
- How to mask specific fields in events.
  - PII stays safe from view.
- How to route data to S3.
  - Lower cost to store.
  - Great for:
    - Compliance and audit.
    - Low value / high volume data.
  - Can use Splunk Federated Search for S3.
- How to route data to Splunk indexes.
  - Store data you need for immediate searching.

Ingest Actions Questions

Federated Search for Amazon S3

Read datasets from your Amazon S3 buckets directly in Splunk® Cloud Platform!

Federated Search for Amazon S3 is a search capability that allows you to perform a **remote search** on your Amazon S3 buckets and retrieve the search results directly in your **Splunk® Cloud Platform** instance for investigations, enrichment and analysis.

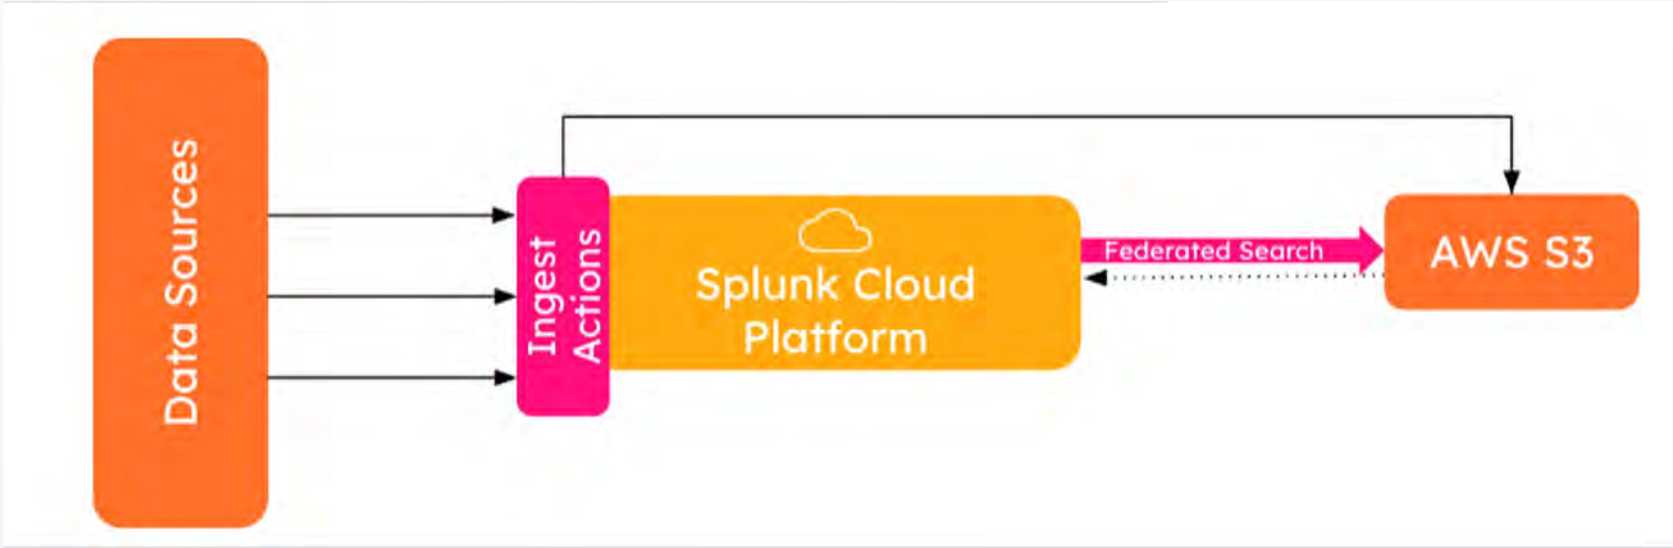

© 2026 Cisco and/or its affiliates. All rights reserved.

Scenario

Read data from AWS S3 bucket (Data Ingested by Ingest Actions from Lab 1)

"Search all data on AWS S3 bucket leveraging partitioning with AWS Glue, or using a specified location in Amazon S3 path.

```
| sdselect * from federated:fss3_cisco_index
```

Edge Processor

Edge Processor

Filter, Mask, Enrich, Transform, and Route

Works at the edge of your network to filter, mask, enrich, and transform your data close to its source before routing the processed data to external environments.

© 2026 Cisco and/or its affiliates. All rights reserved.

HYBRID

Edge Processor

Data Admin / SPL2 User

WHEN TO USE

- Reduce noise / volume
- Redact sensitive data
- **Add data via lookups / evals**
- **Add indexed fields**
- Send to indexes / S3

HOW IT'S DONE

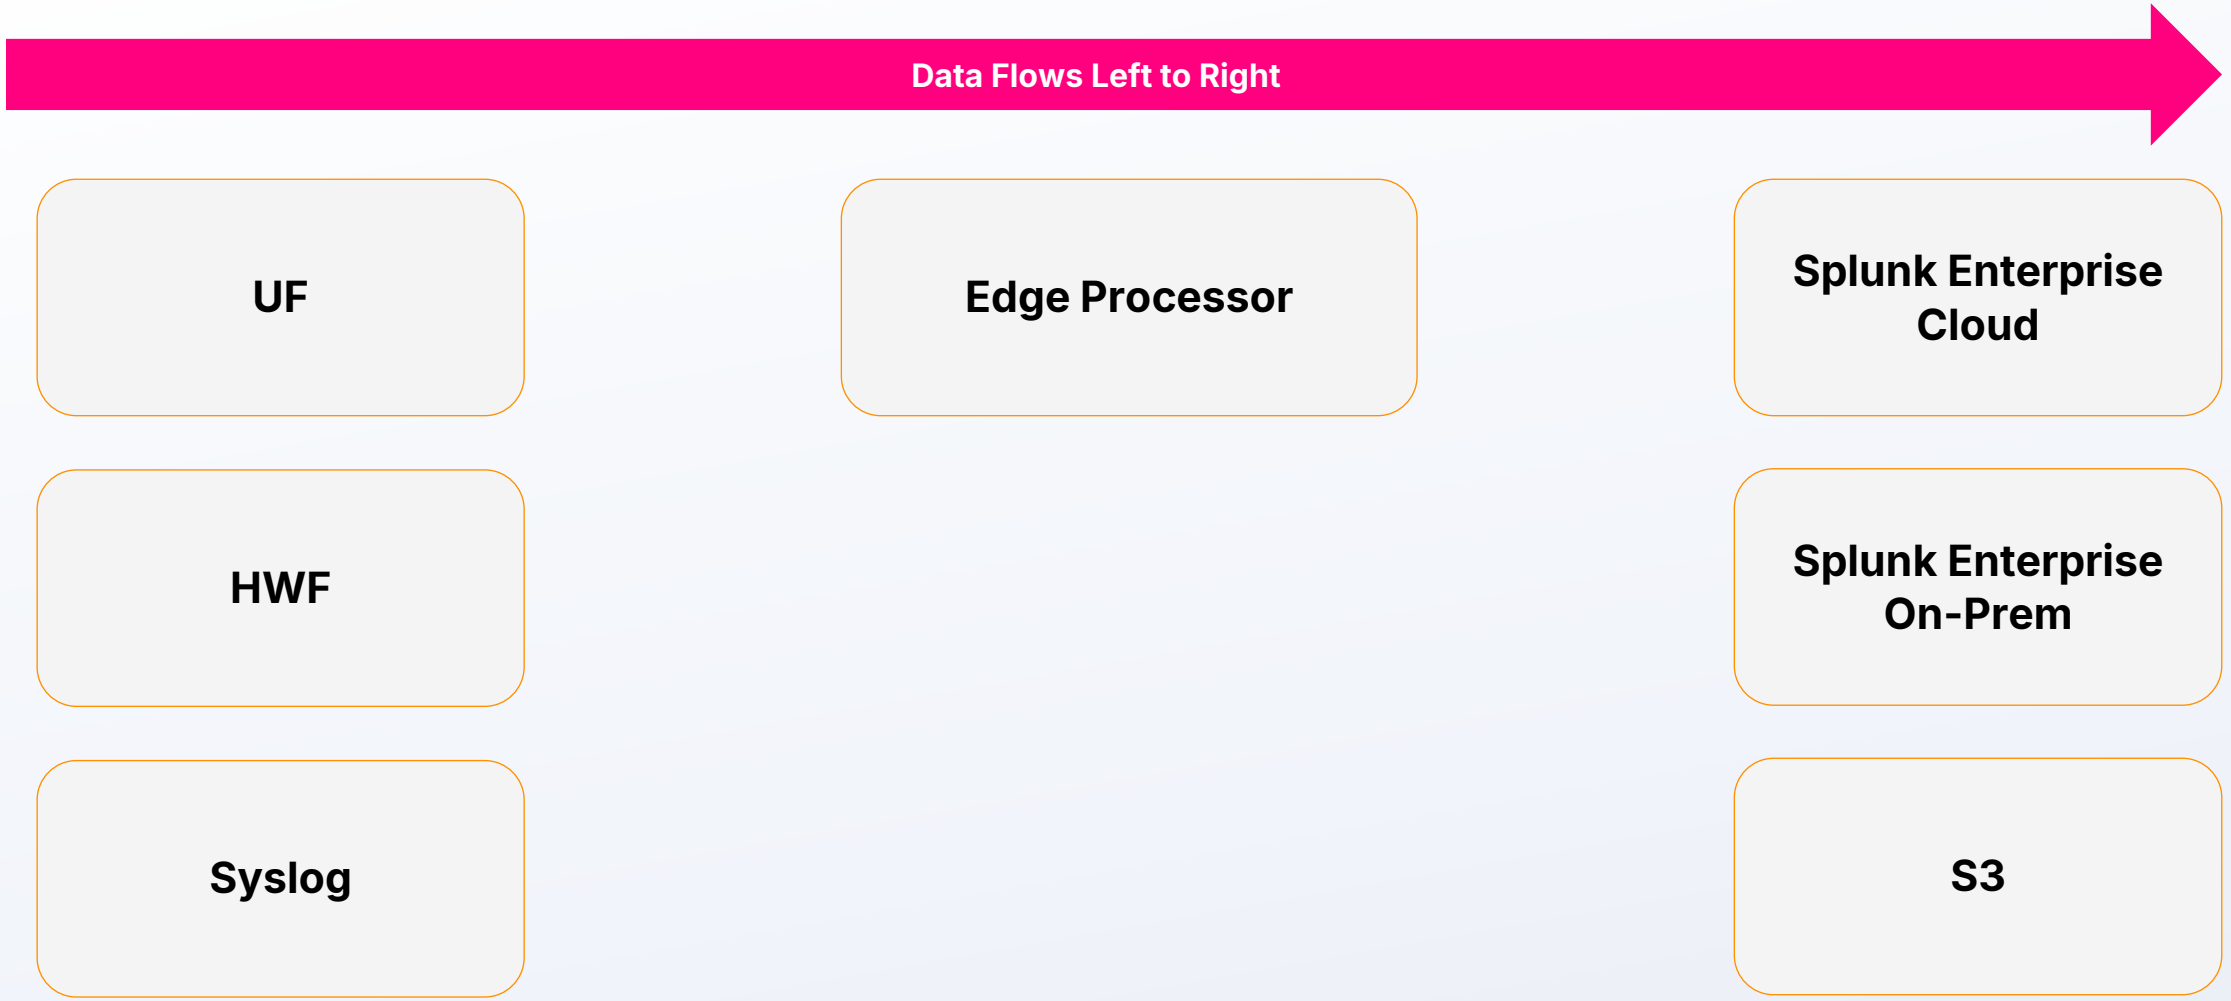

- Filtering
- Masking
- **Enriching**
- **Transforming**
- Routing

WHAT YOU NEED

- Edge Processing nodes in your own network
- **Cloud stack for pipeline authoring and management of Edge Processing nodes**
- Defined sourcetypes

Edge Processor Dataflow

© 2026 Cisco and/or its affiliates. All rights reserved.

Workshop

Edge Processor

© 2026 Cisco and/or its affiliates. All rights reserved.

Edge Processor Recap

What did you learn?

- Reinforced what you learned in the Edge Processor Lab.
  - Using SPL2.

© 2026 Cisco and/or its affiliates. All rights reserved.

Edge Processor Recap

What did you learn?

- Reinforced what you learned in the Edge Processor Lab.
  - Using SPL2.
- How to author and manage SPL2 pipelines using Edge Processor service UI.
  - No need to manage the Edge Processor nodes.

© 2026 Cisco and/or its affiliates. All rights reserved.

Edge Processor Recap

What did you learn?

- Reinforced what you learned in the Edge Processor Lab.
  - Using SPL2.
- How to author and manage SPL2 pipelines using Edge Processor service UI.
  - No need to manage the Edge Processor nodes.
- How to enrich data using lookups as it passes through the Edge Processor.
  - Move data enrichment to the edge.

Edge Processor Questions

Ingest Processor

CLOUD

Ingest Processor

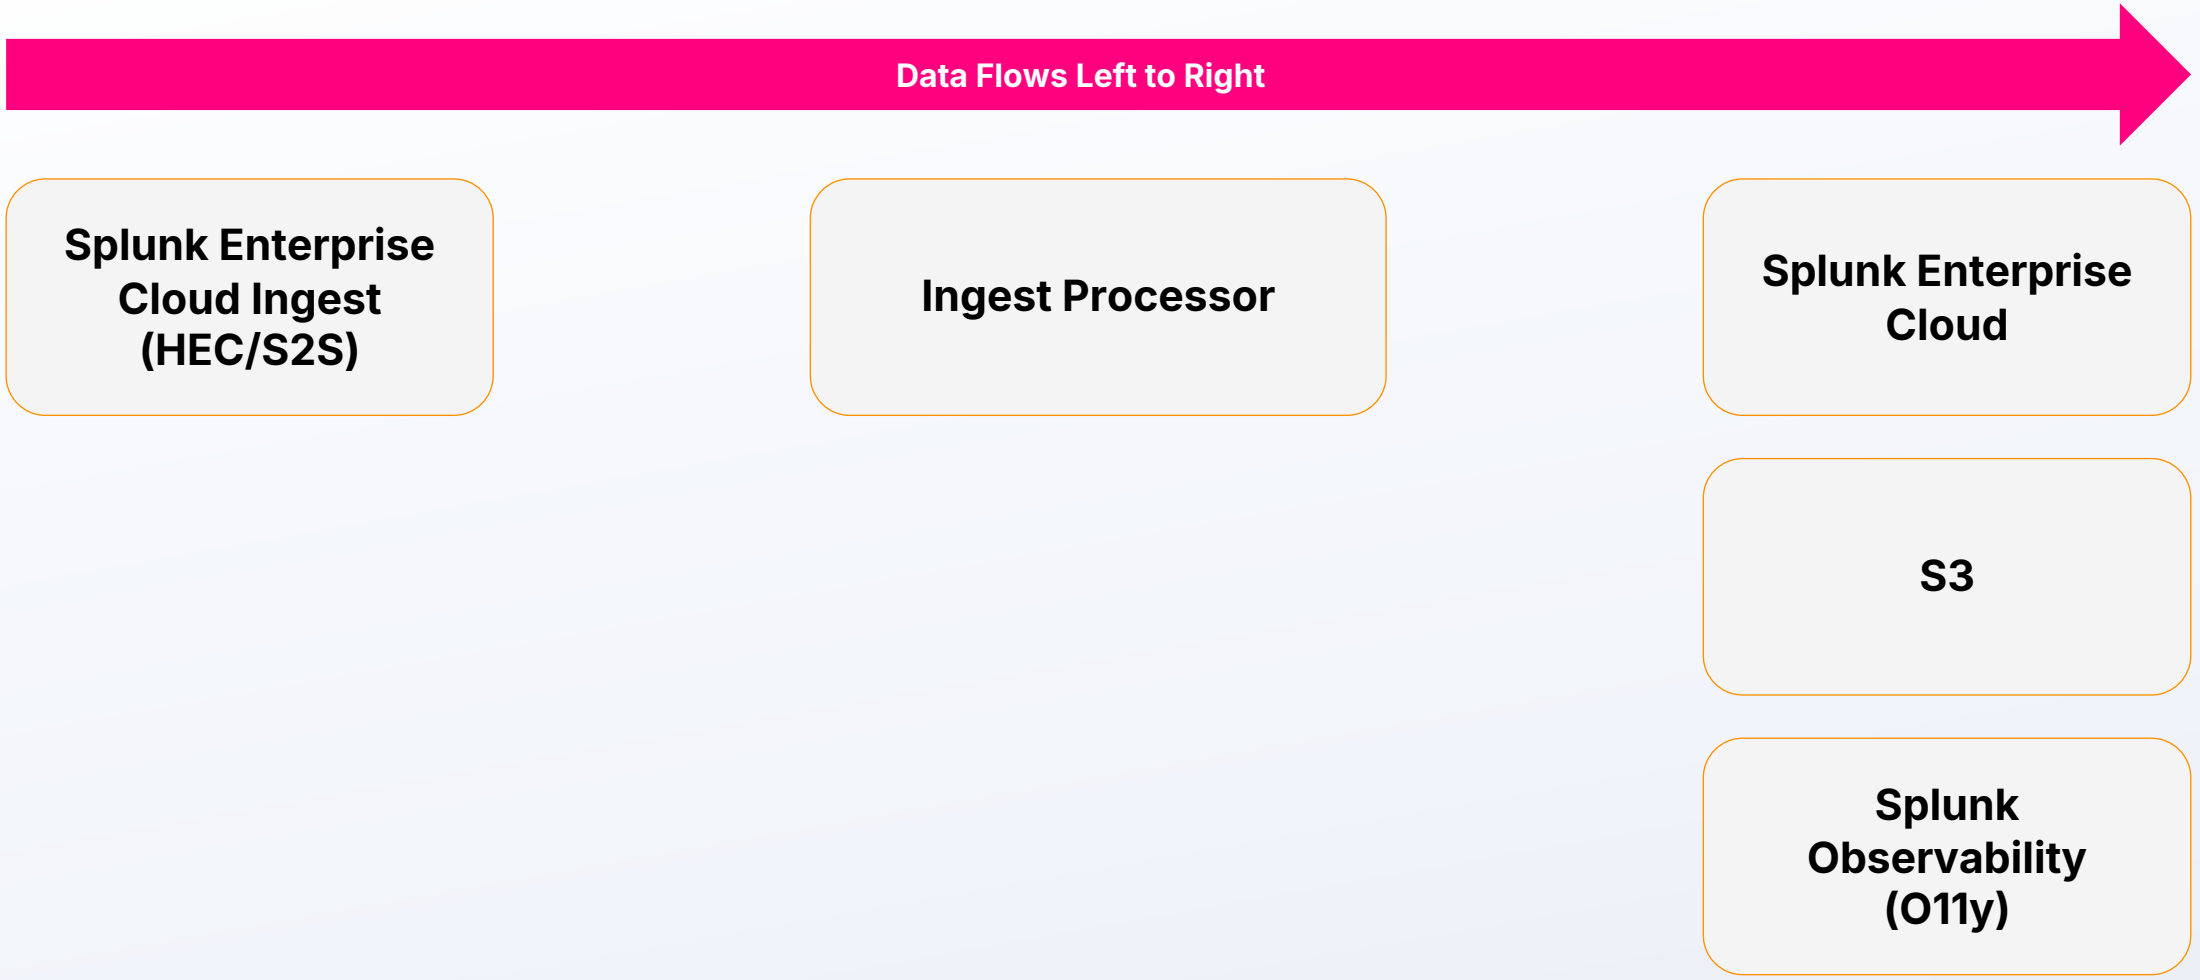

Data Admin / SPL2 User

WHEN TO USE	HOW IT'S DONE	WHAT YOU NEED
• Reduce noise / volume →	• Filtering	• Cloud stack
• Redact sensitive data →	• Masking	• **No infrastructure setup required**
• Add data via evals →	• Calculated enrichment	
• **Logs to O11y metrics** →	• Transforming	
• Send to indexes / **O11y** / S3 →	• Routing

Ingest Processor Recap

What did you learn?

- Reinforced what you learned in the Ingest Processor lab.
  - SPL2 processing fully in cloud.
  - No infrastructure needed.

© 2026 Cisco and/or its affiliates. All rights reserved.

Ingest Processor Recap

What did you learn?

- Reinforced what you learned in the Ingest Processor lab.
  - SPL2 processing fully in cloud.
  - No infrastructure needed.
- How to author and manage SPL2 pipelines using Ingest Processor service UI.
  - No need to synchronize to edge nodes.

© 2026 Cisco and/or its affiliates. All rights reserved.

cisco

Ingest Processor Recap

What did you learn?

- Reinforced what you learned in the Ingest Processor lab.
  - SPL2 processing fully in cloud.
  - No infrastructure needed.
- How to author and manage SPL2 pipelines using Ingest Processor service UI.
  - No need to synchronize to edge nodes.
- How to preview snapshot data.
  - No need to upload sample data.

© 2026 Cisco and/or its affiliates. All rights reserved.

Ingest Processor Recap

What did you learn?

- Reinforced what you learned in the Ingest Processor lab.
  - SPL2 processing fully in cloud.
  - No infrastructure needed.
- How to author and manage SPL2 pipelines using Ingest Processor service UI.
  - No need to synchronize to edge nodes.
- How to preview snapshot data.
  - No need to upload sample data.
- How to convert logs to metrics.
  - Reduce log data.

Ingest Processor Questions

Workshop Recap

- You learned what you can do with Ingest Actions, Edge Processor, and Ingest Processor that helps you with your data.

Workshop Recap

- You learned what you can do with Ingest Actions, Edge Processor, and Ingest Processor that helps you with your data.
- You learned when you should use Ingest Actions, Edge Processor, and Ingest Processor to process data.

Workshop Recap

- You learned what you can do with Ingest Actions, Edge Processor, and Ingest Processor that helps you with your data.
- You learned when you should use Ingest Actions, Edge Processor, and Ingest Processor to process data.
- You learned where Ingest Actions, Edge Processor and Ingest Processor components reside.

Workshop Recap

- You learned what you can do with Ingest Actions, Edge Processor, and Ingest Processor that helps you with your data.
- You learned when you should use Ingest Actions, Edge Processor, and Ingest Processor to process data.
- You learned where Ingest Actions, Edge Processor, and Ingest Processor components reside.
- You learned how Ingest Actions, Edge Processor, and Ingest Processor work and where they do data processing.

Workshop Recap

- You learned what you can do with Ingest Actions, Edge Processor, and Ingest Processor that helps you with your data.
- You learned when you should use Ingest Actions, Edge Processor, and Ingest Processor to process data.
- You learned where Ingest Actions, Edge Processor, and Ingest Processor components reside.
- You learned how Ingest Actions, Edge Processor, and Ingest Processor work and where they do data processing.
- You learned why you should use Ingest Actions, Edge Processor, and Ingest Processor instead of editing configuration files.
