Forward-looking statements

This presentation may contain forward-looking statements that are subject to the safe harbors created under the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended. All statements other than statements of historical facts are statements that could be deemed forward-looking statements. These statements are based on current expectations, estimates, forecasts, and projections about the industries in which we operate and the beliefs and assumptions of our management based on the information currently available to us. Words such as “expects,” “anticipates,” “targets,” “goals,” “projects,” “intends,” “plans,” “believes,” “momentum,” “seeks,” “estimates,” “continues,” “endeavors,” “strives,” “may,” variations of such words, and similar expressions are intended to identify such forward-looking statements. In addition, any statements that refer to (1) our goals, commitments, and programs; (2) our business plans, initiatives, and objectives; and (3) our assumptions and expectations, including our expectations regarding our financial performance, products, technology, strategy, customers, markets, acquisitions and investments are forward-looking statements. These forward-looking statements are not guarantees of future performance and involve significant risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from results, performance or achievements expressed or implied by the forward-looking statements contained in this presentation. Readers are cautioned that these forward-looking statements are only predictions and are subject to risks, uncertainties, and assumptions that are difficult to predict, including those identified in the “Risk Factors” section of Cisco’s most recent report on Form 10-Q filed on February 20, 2024 and its most recent report on Form 10-K filed on September 7, 2023, as well as the “Risk Factors” section of Splunk’s most recent report on Form 10-Q filed with the SEC on November 28, 2023. The forward-looking statements made in this presentation are made as of the time and date of this presentation. If reviewed after the initial presentation, even if made available by Cisco or Splunk, on Cisco or Splunk’s website or otherwise, it may not contain current or accurate information. Cisco and Splunk undertake no obligation to revise or update any forward-looking statements for any reason, except as required by law.

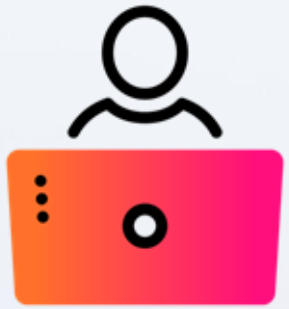

In addition, any information about new products, features, functionality or our roadmap outlines our general product direction and is subject to change at any time without notice. It is for informational purposes only and shall not be incorporated into any contract or other commitment or be relied upon in making a purchasing decision. We undertake no commitment, promise or obligation either to develop the features or functionalities described, in beta or in preview (used interchangeably), or to include any such feature or functionality in a future release. The development, release, and timing of any features or functionality described for our products remains at our sole discretion.

Please introduce yourself!

- Name
- Company/organisation
- Role
- Are you currently using Splunk?
- What are you interested in using Splunk for?

© 2026 Cisco and/or its affiliates. All rights reserved.

Cisco Confidential

Workshop Agenda

- Splunk security overview
- Data fundamentals
- InfoSec App for Splunk: setup and configuration
- Hands-on investigation
- Customizing the Infosec app
- Introduction to Splunk Security Essentials
- Combining InfoSec App for Splunk with Splunk Security Essentials
- Splunk Resources and next steps

Today, It's Hard to be Resilient

Complex Environments

Siloed tools and teams

Evolving compliance and regulations

Splunk delivers unparalleled digital resilience.

Providing **end-to-end visibility** and insights across your entire digital footprint

Powering the **SOC of the future** with unified threat detection investigation and response, enhanced with network insights

Delivering **observability for the entire enterprise** to prevent unplanned downtime across all environments

Unified by a flexible platform that provides enterprise scale data management

Easy to use and modify with a minimal knowledge of Splunk

- Simple - no SPL knowledge required
- Out of the box content for common security use cases
- Leverages selected security content from Splunk Security Essentials (SSE)

© 2026 Cisco and/or its affiliates. All rights reserved.

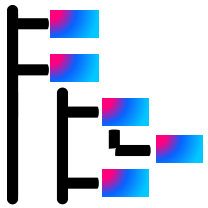

A data model is a search-time mapping of data into a hierarchical structure

- Structured, hierarchical mapping of semantic knowledge of a collection of datasets.
- A collection of objects
  - That have constraints and attributes
  - Where child objects inherit those constraints and attributes
  - Outlines the details necessary to enable searches of a dataset information

© 2026 Cisco and/or its affiliates. All rights reserved.

Splunk's Common Information Model (CIM)

Preconfigured data models

Contains a collection of preconfigured data models that you can apply to your data at search time

Normalize your data

Helps you to normalize your data to match a common standard

Use common field names for equivalent events from different sources or vendors

E.g. Use "src_ip" instead of

- "sourceIPAddress" in AWS data, and
- "callerIp" in GCP data

Utilizes tags

User-defined labels that group events, hosts, or other objects for easier identification, organization, and searching

E.g. Create a "critical_error" tag for events that contain "error" and "high severity". Then you can simply search for "tag=critical_error"

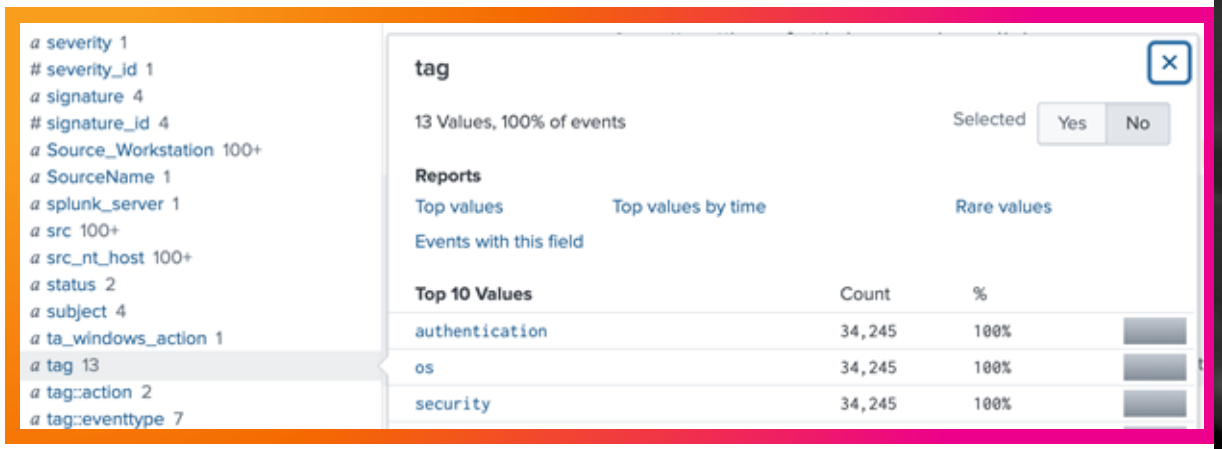

Learn More about Splunk Add-ons and the Common Information Model:
https://docs.splunk.com/Documentation/AddOns/released/Overview/Add-onsandCIM

© 2026 Cisco and/or its affiliates. All rights reserved.

Cisco Confidential

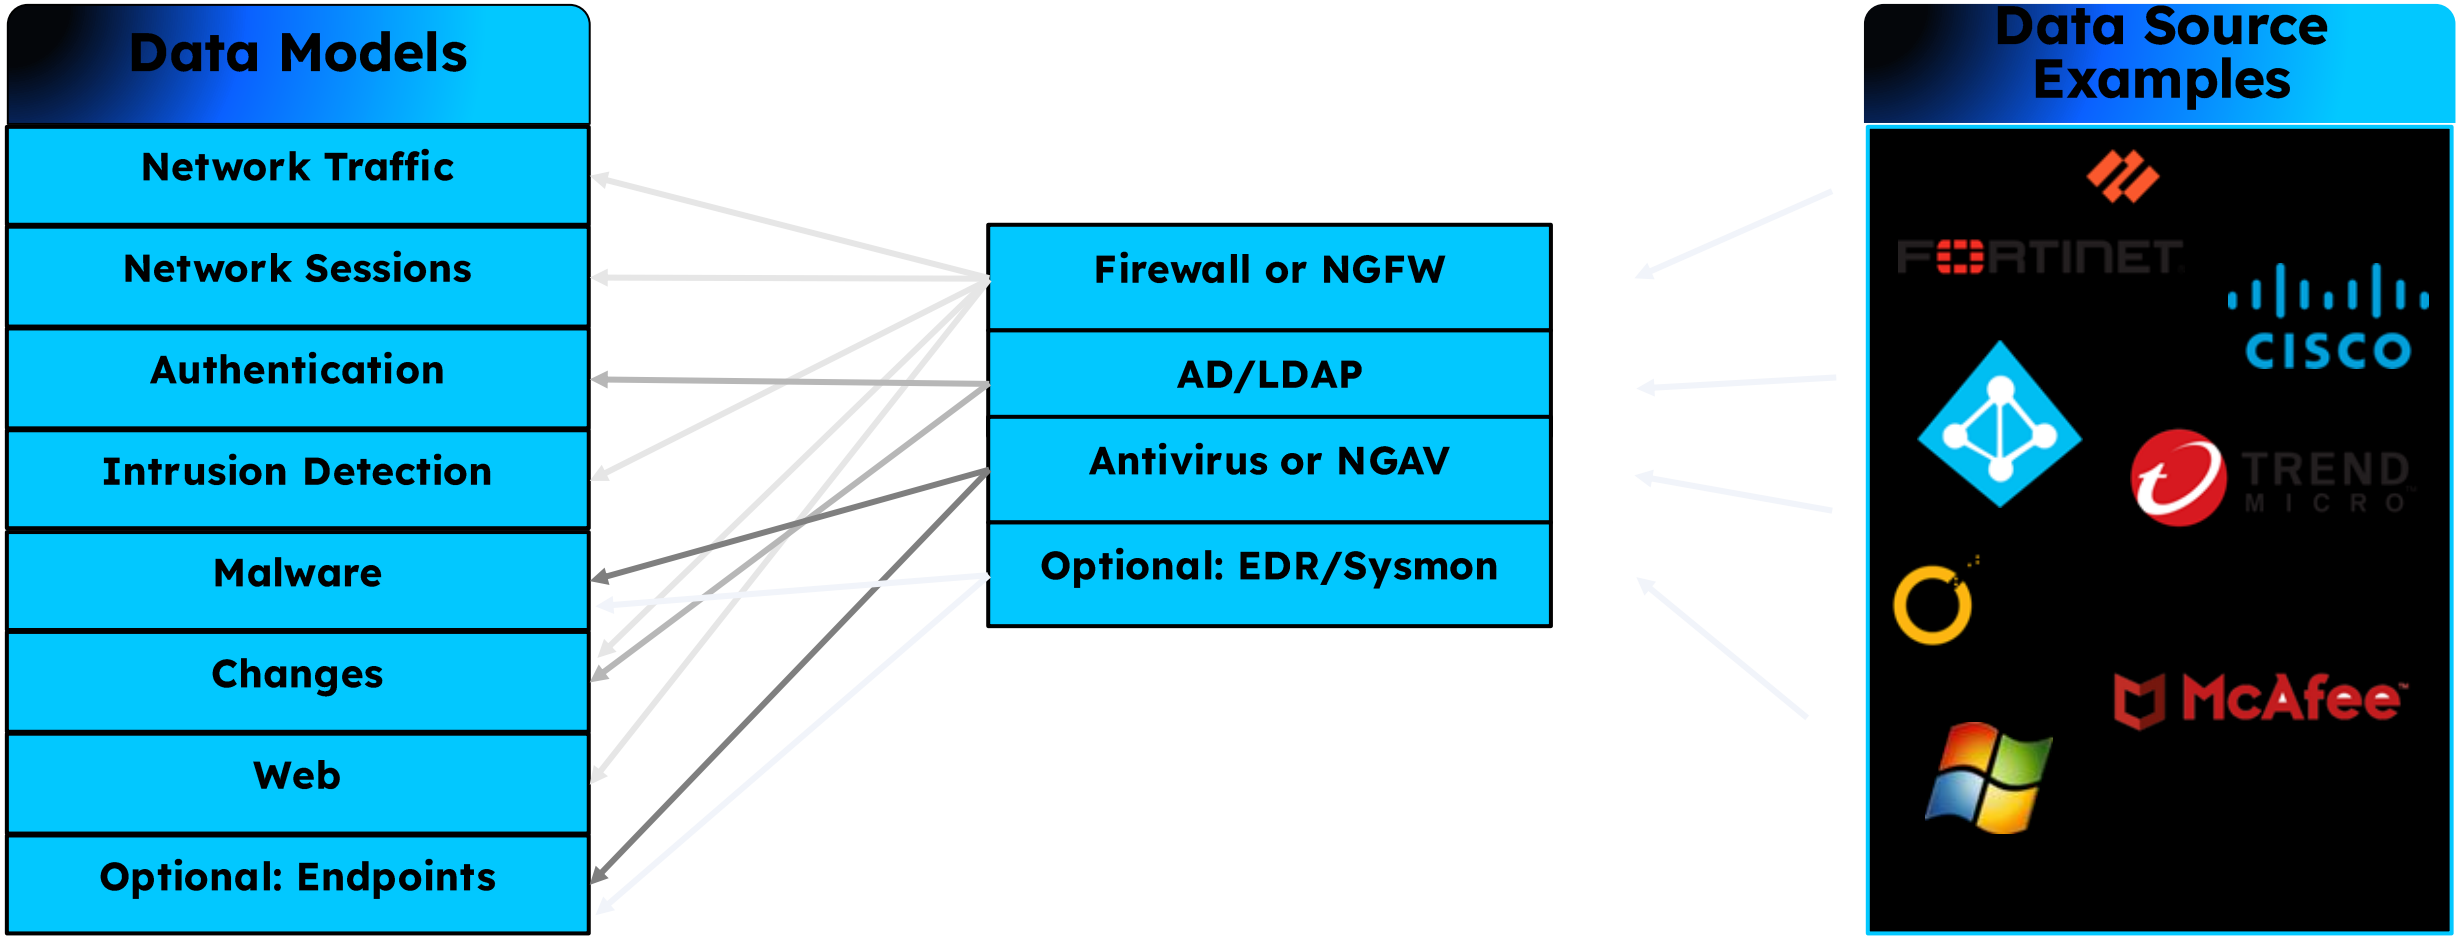

Tags!

- The CIM employs the use of tags to identify data to different data models
- Ensure your data is tagged properly
  - Example: Check the tags field

InfoSec App Implementation

High level overview

1. Send AD, FW, AV data to Splunk using CIM-compliant add-ons
2. Install required add-ons from Splunkbase
   (CIM Add-On, Force Directed Visualization, Lookup File Editor)
1. Enable Data Model Acceleration via UI
   (Authentication, Change, Intrusion Detection, Malware, Network Sessions, Network Traffic, Endpoint, Web)
1. Install InfoSec App from Splunkbase, no initial configuration required

(Steps 2–4 take approximately 5 mins to complete)

Name	Folder name	Version
InfoSec	InfoSec_App_for_Splunk	1.7.0
Slack Alerts	slack_alerts	2.3.0
Search & Reporting	search	9.2.1
Sankey Diagram	sankey_diagram_app	1.4.0 | Update to 1.6.0
Punchcard	punchcard_app	1.5.0
Home	launcher	
Force Directed Visualisation App for Splunk	force_directed_viz	3.1.0
Splunk Common Information Model	Splunk_SA_CIM	5.3.2

Today's Scenario

Your Company

- Buttercup State University is a close-knit community college home to approximately 2,500 students.
- Security hasn't been a top priority but recent cyber attacks on other universities have brought it into focus.
- Buttercup State University has recently invested in Splunk to help address any potential threats or breaches swiftly.

Your Role

- You are one of the Security Analysts at Buttercup State University and are also fairly new to Splunk.
- The IT team have installed Splunk, forwarded data from a variety of sources and also installed some apps, including the InfoSec App for Splunk.
- They've now tasked you with finishing the setup and providing some specific security insights for IT management…

BUTTERCUP STATE UNIVERSITY

© 2026 SPLUNK LLC

What Has the University Asked For?

[redacted]

- **IT teams:** Install the Splunk Add-on for AWS and finish setting up the InfoSec app so the dashboards populate correctly
- **Malware:** Find Malware-infected files and setup an alert for future detections
- **User behavior:** Look for sudden access changes, unauthorized role modifications, or unusual activity
- **Customize the InfoSec App:** Look for ways to customize the content for Buttercup State University
- **Add additional security content:** Review the content in Splunk Security Essentials and add any new use cases you think might be valuable

BUTTERCUP STATE UNIVERSITY

Set Up the InfoSec App

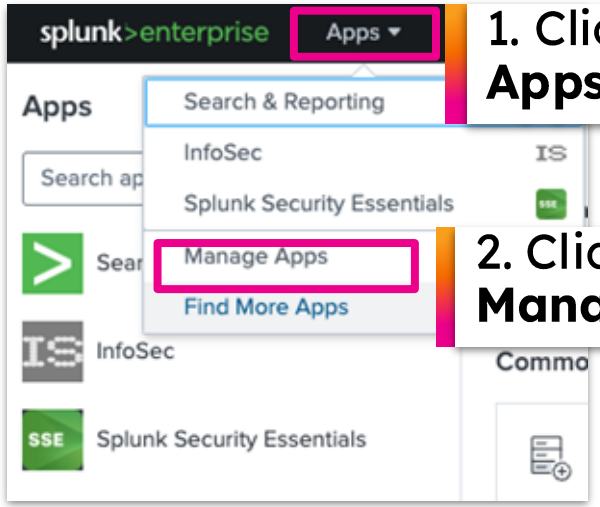

Install the Splunk Add-on for AWS and finish setting up the InfoSec App for Splunk

© 2026 Cisco and/or its affiliates. All rights reserved.

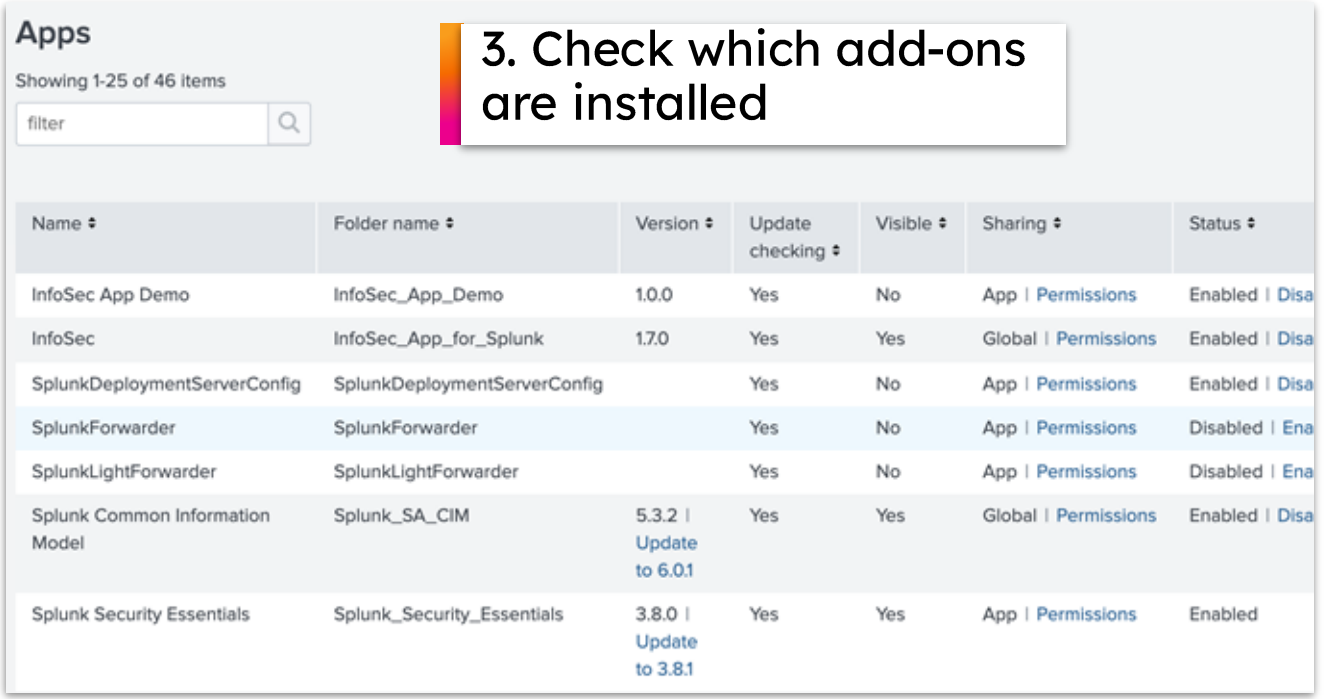

Confidential

Via Splunk Web

1. Click on the **Apps** dropdown

2. Click on **Manage Apps**

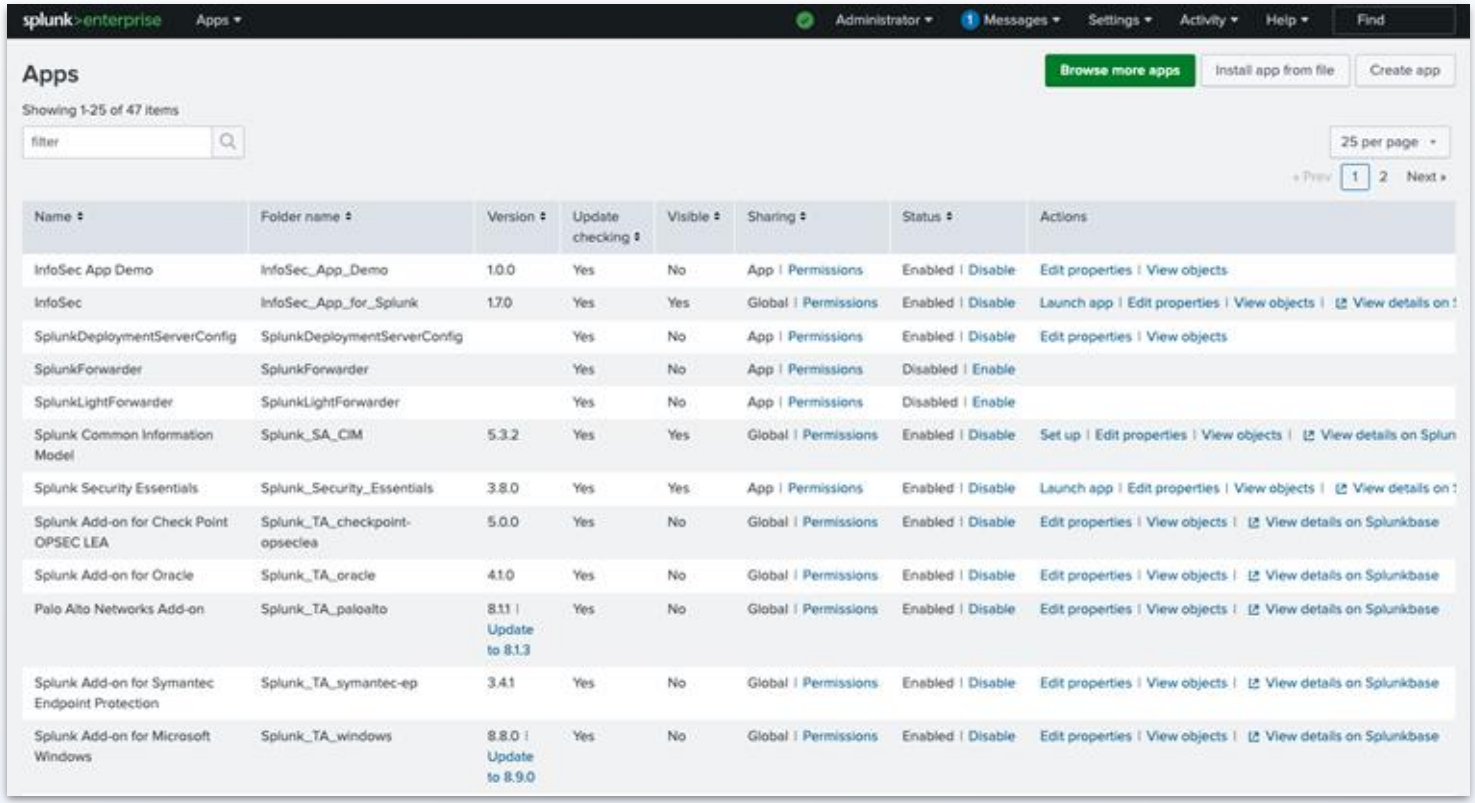

3. Check which add-ons are installed

TA Data Sources Mapped

Looking at the installed add-ons, we notice that the **Splunk Add-on for AWS** is missing.

In order to make sure that all our data is CIM compliant and the data is showing up in our InfoSec App dashboards we need to install the Splunk Add-on for AWS.

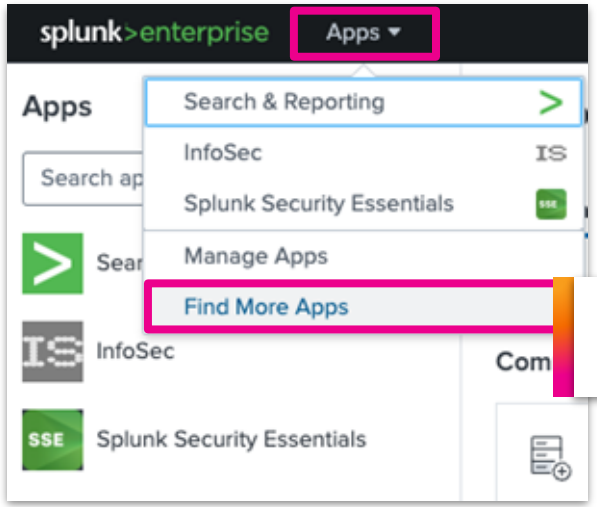

© 2026 Cisco and/or its affiliates. All rights reserved.

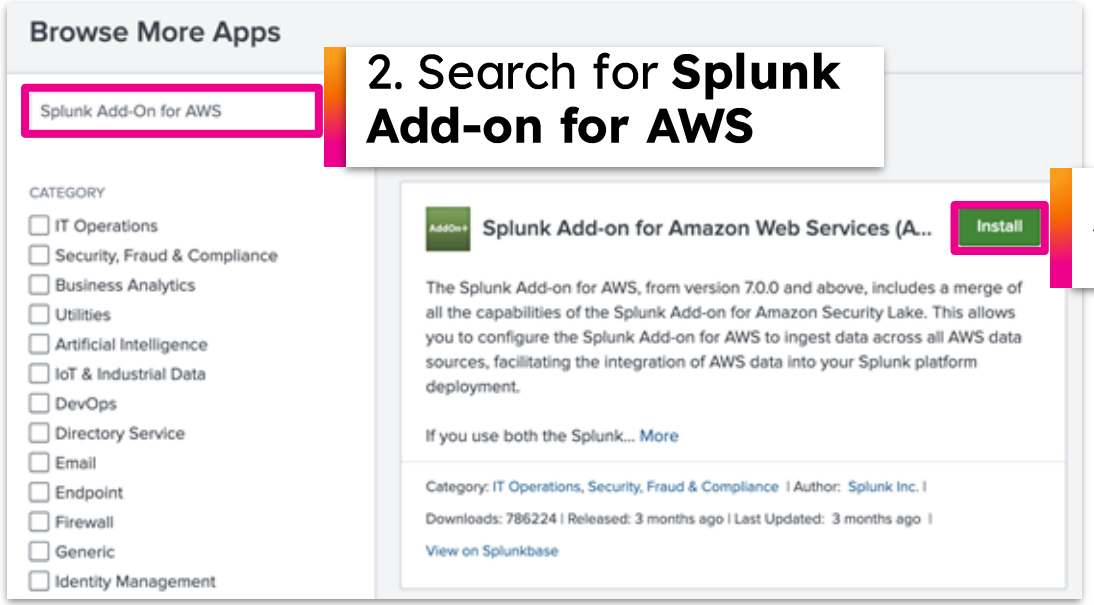

Cisco Confidential

Splunk Add-on for AWS

Via Splunk Web

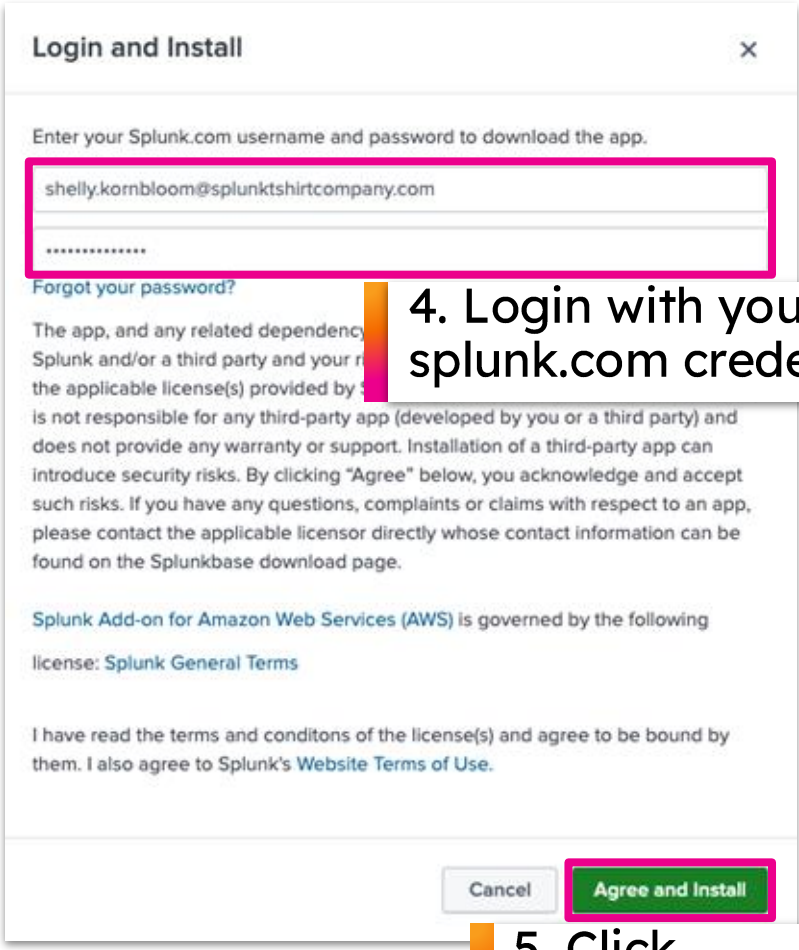

1. Click **Apps**, then **Find More Apps**

2. Search for **Splunk Add-on for AWS**

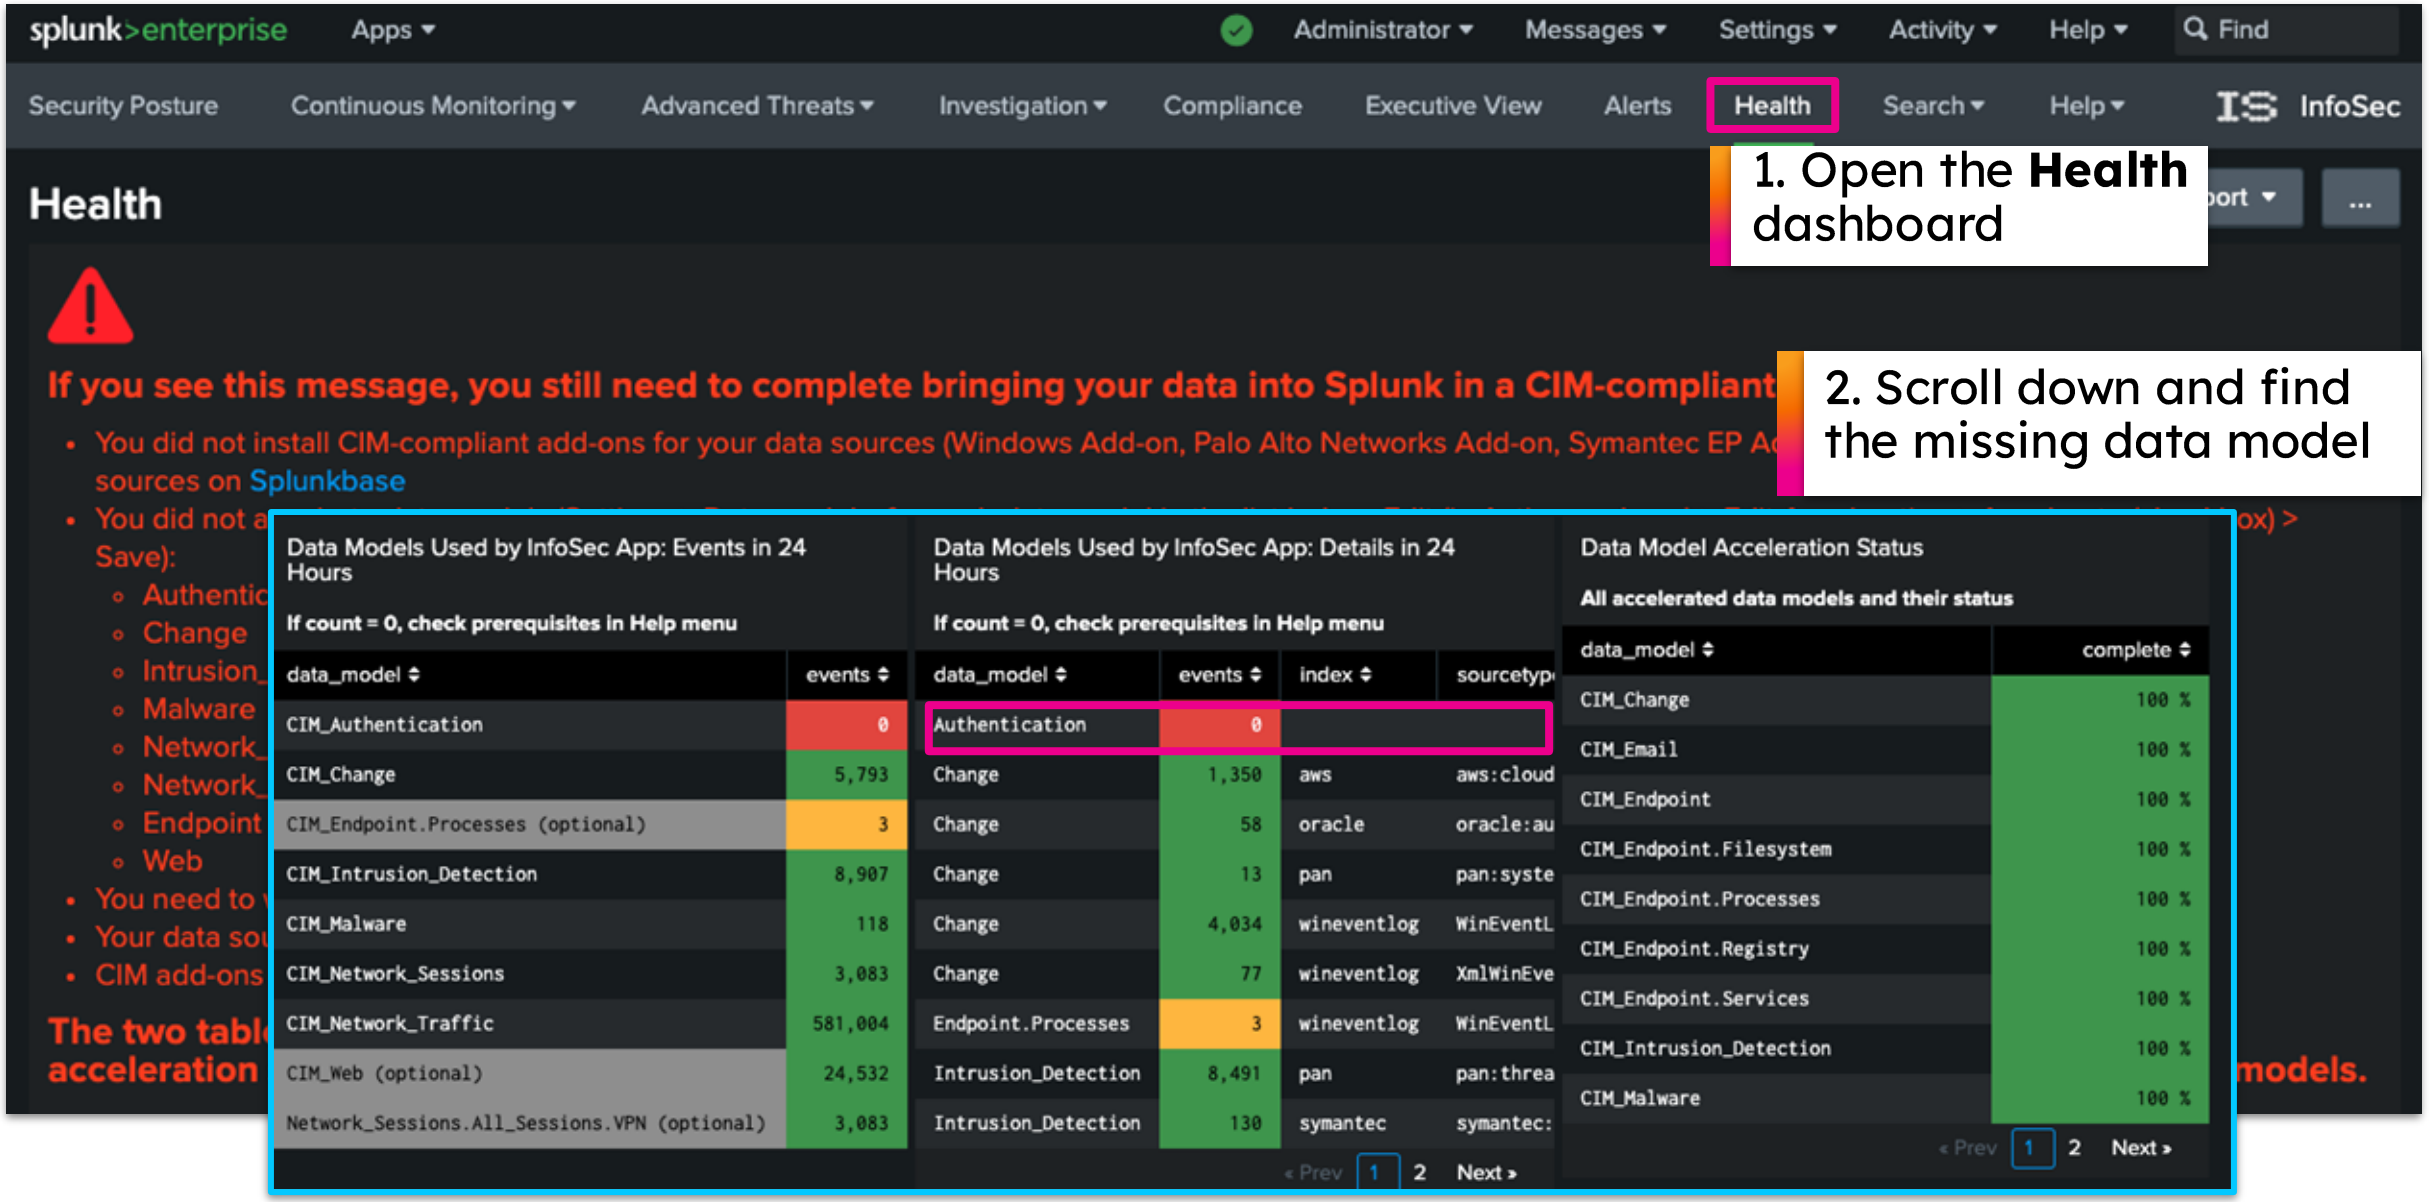

3. Click **Install**

4. Login with your splunk.com credentials

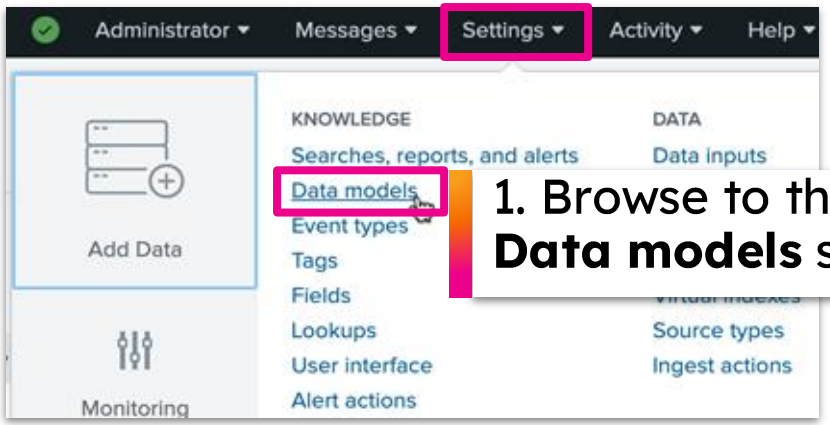

5. Click **Agree and Install**

Health Dashboard

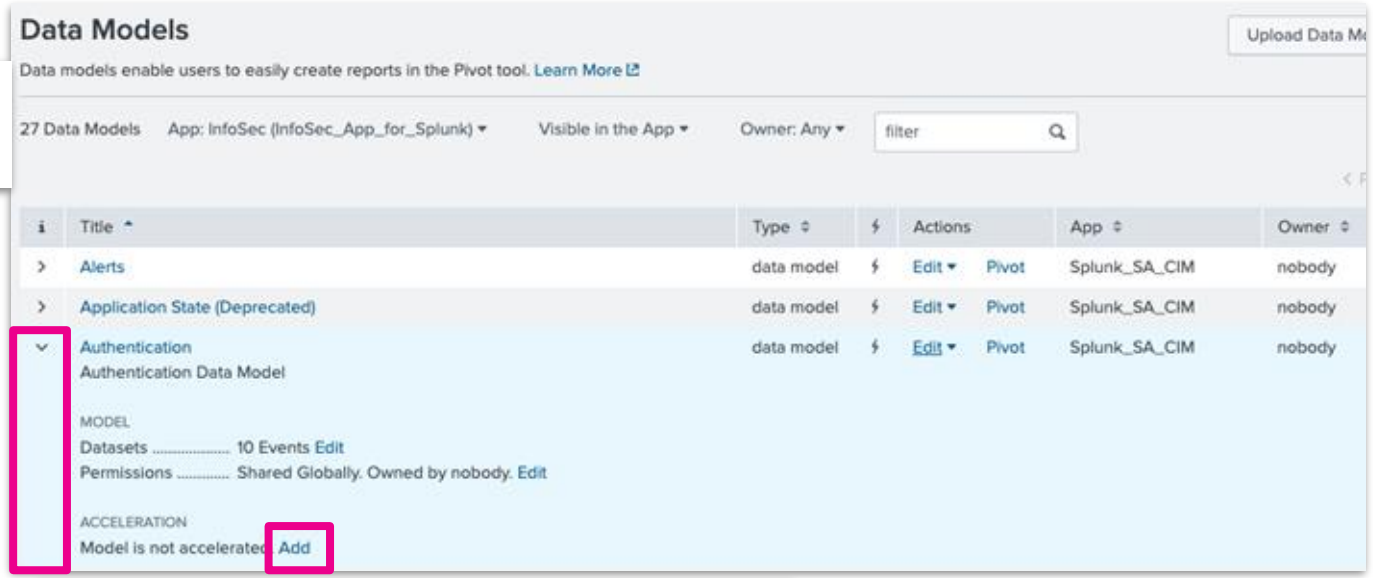

Authentication Data Model

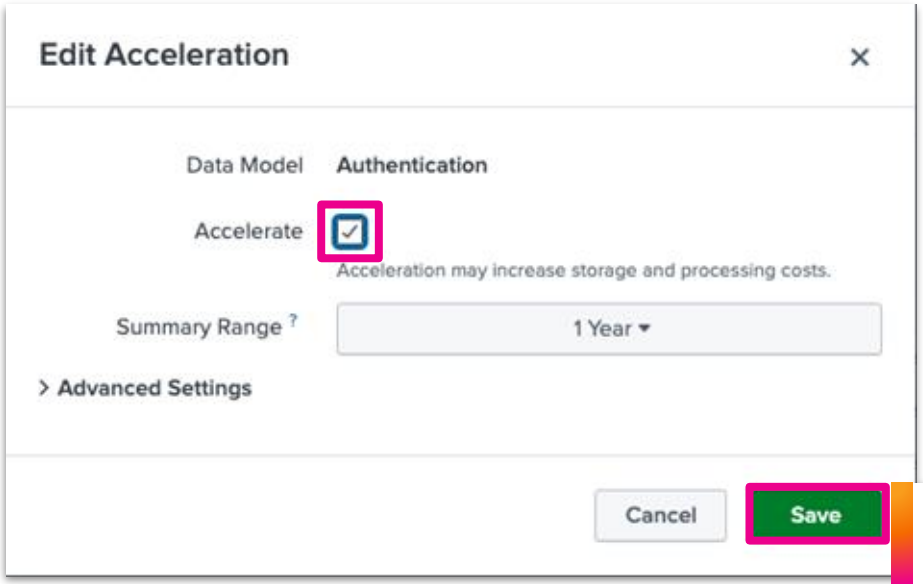

Edit the data model acceleration settings

1. Browse to the **Data models** settings

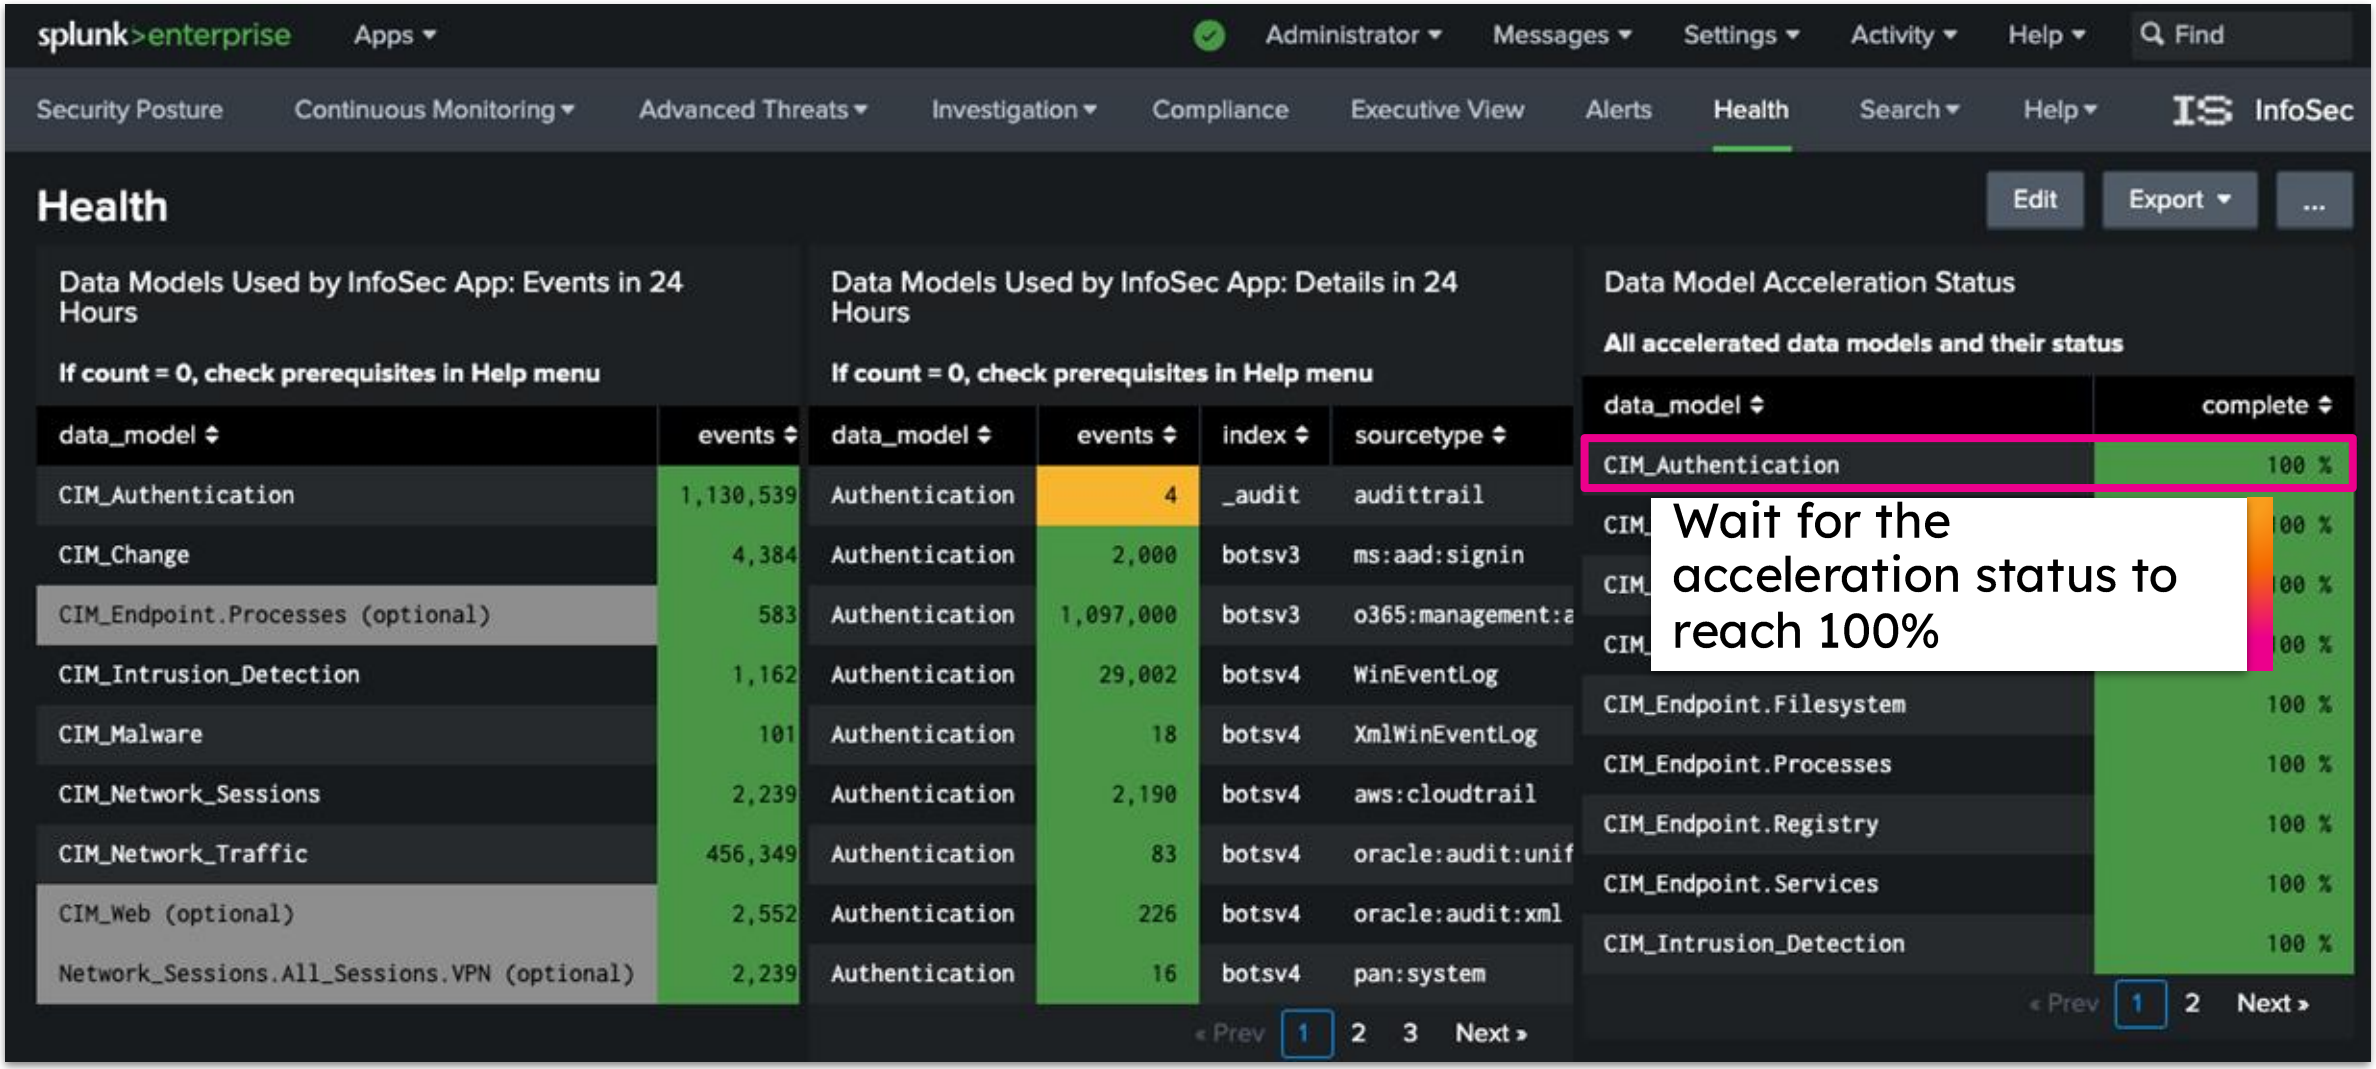

2. Expand the **Authentication** section and click **Add**

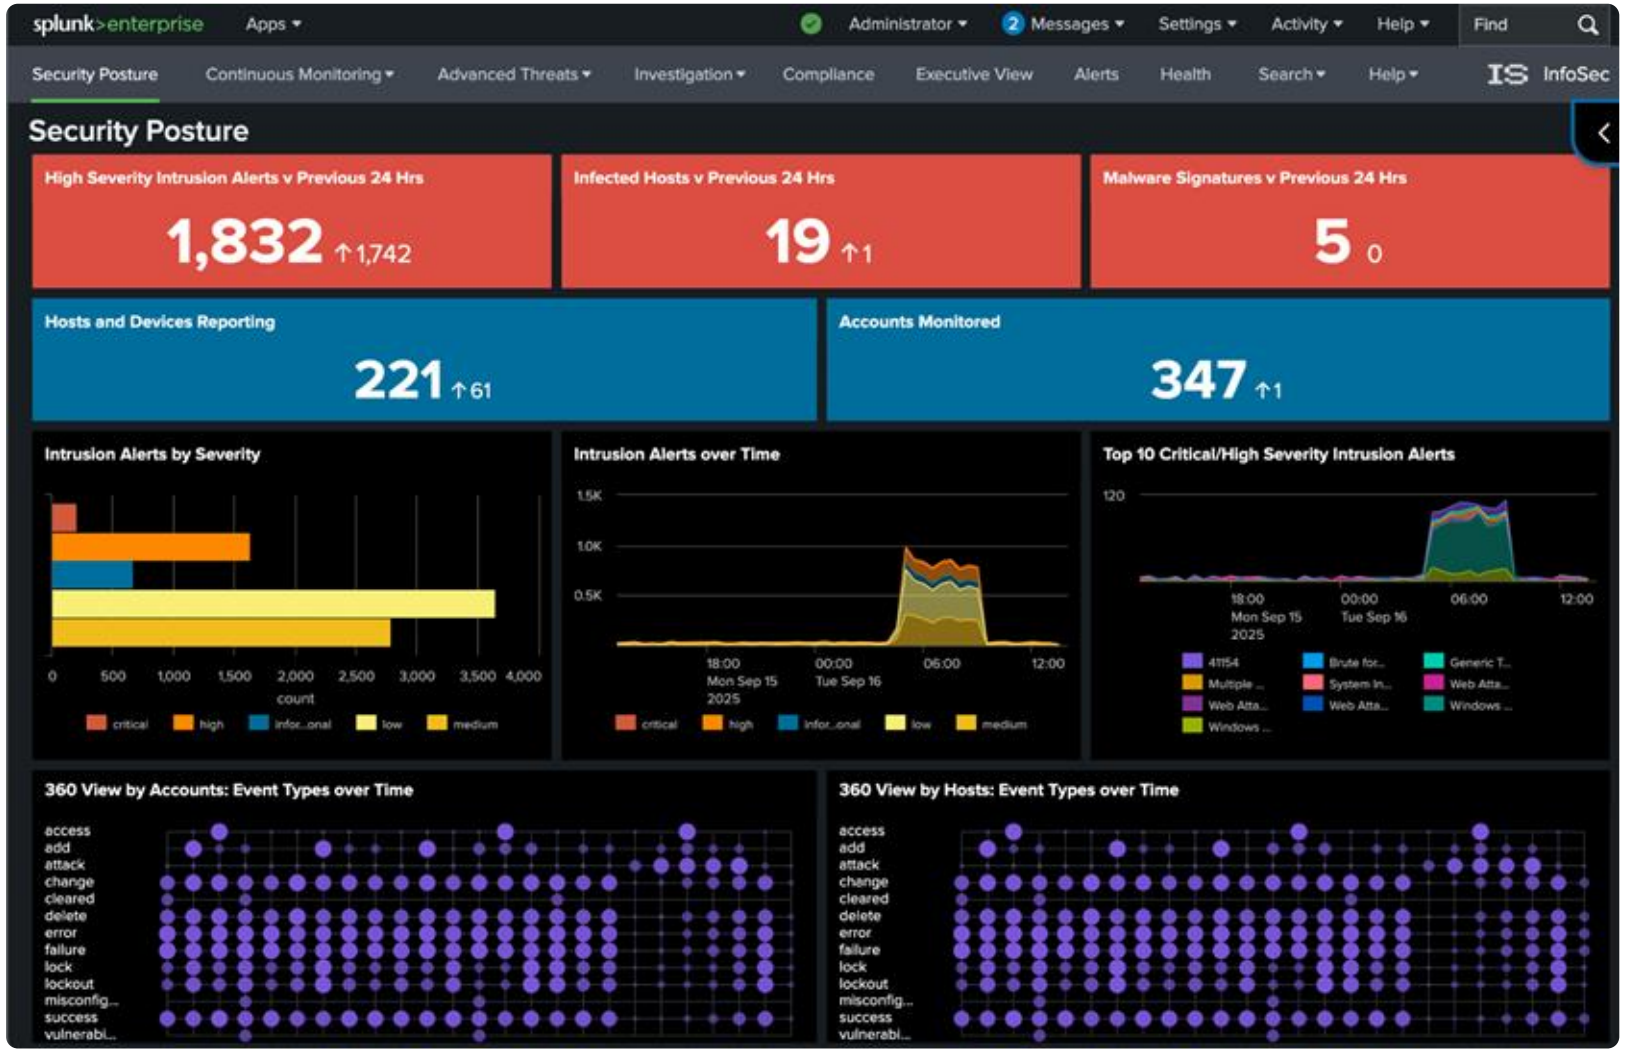

3. Check **Accelerate** and click **Save**

Health Dashboard

After 5-10 min the Authentication Data Model should be accelerated

Continuous Monitoring - Malware

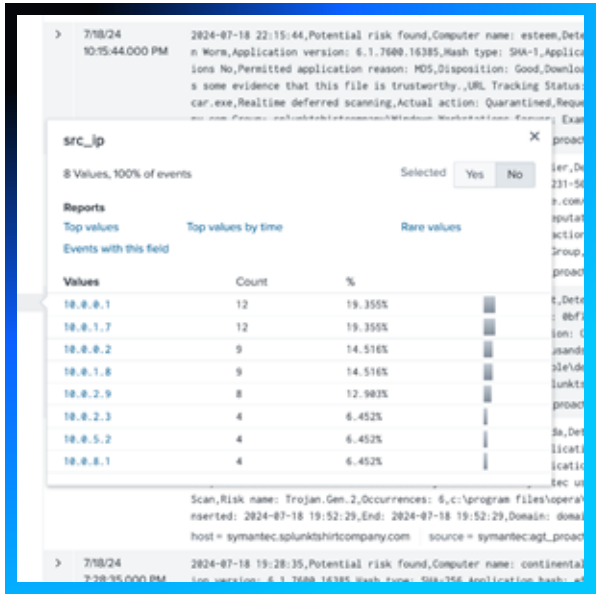

Investigate

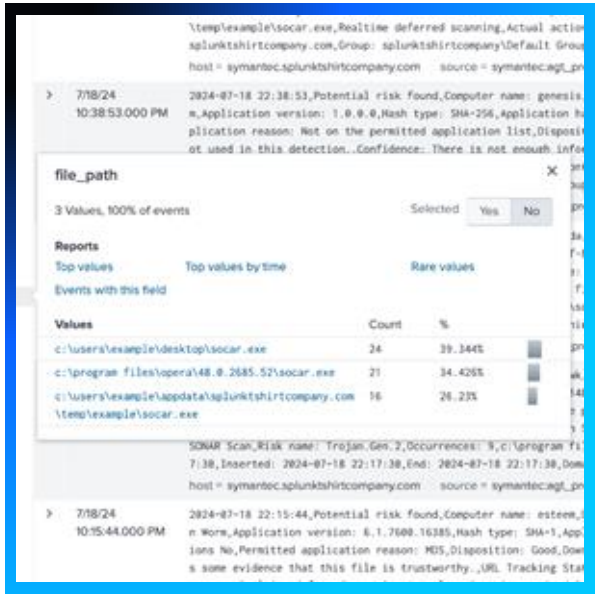

Use interesting fields for further investigation

Interesting fields can help your investigating

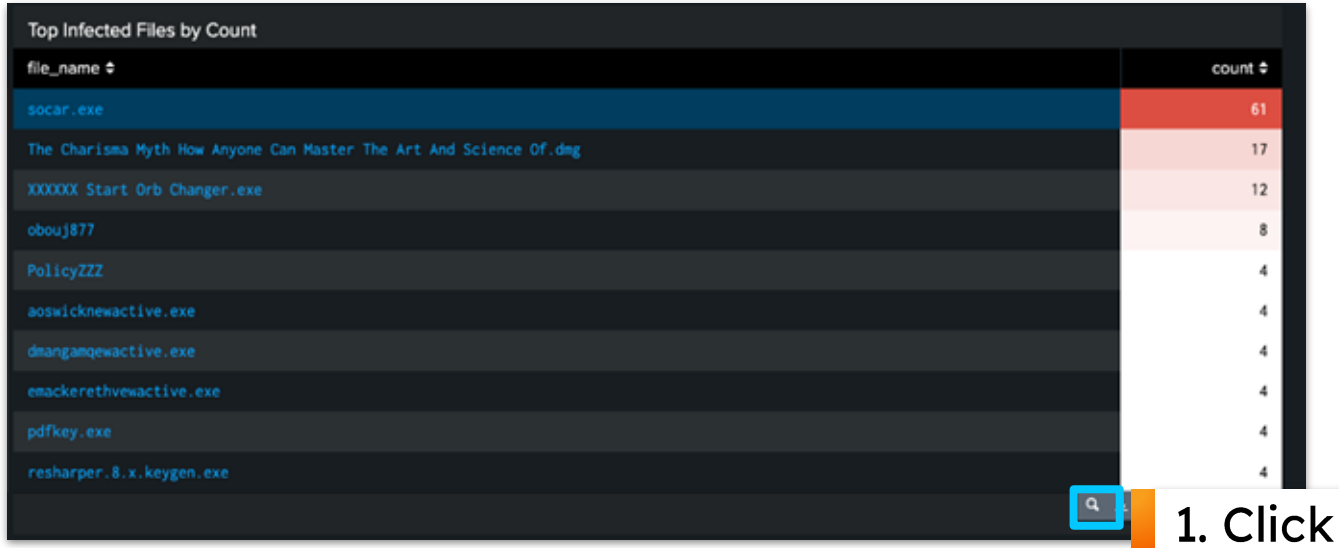

src_ip

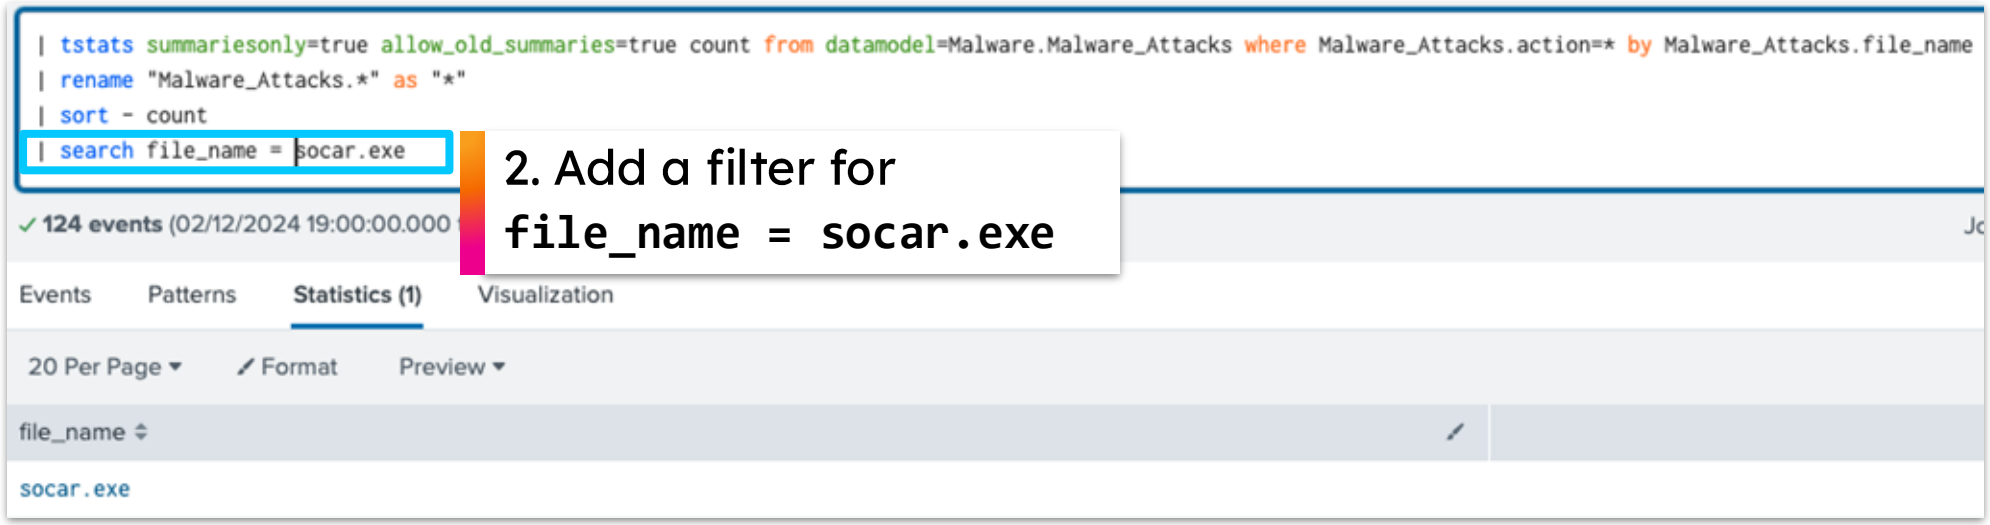

file_path

Alert

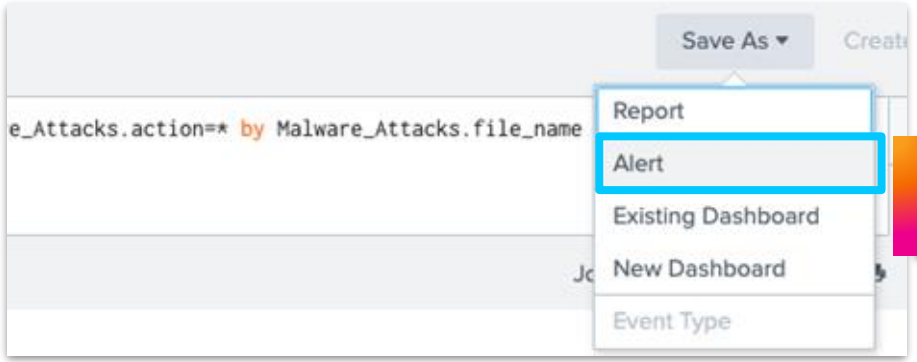

1. Click on the search button of the detection

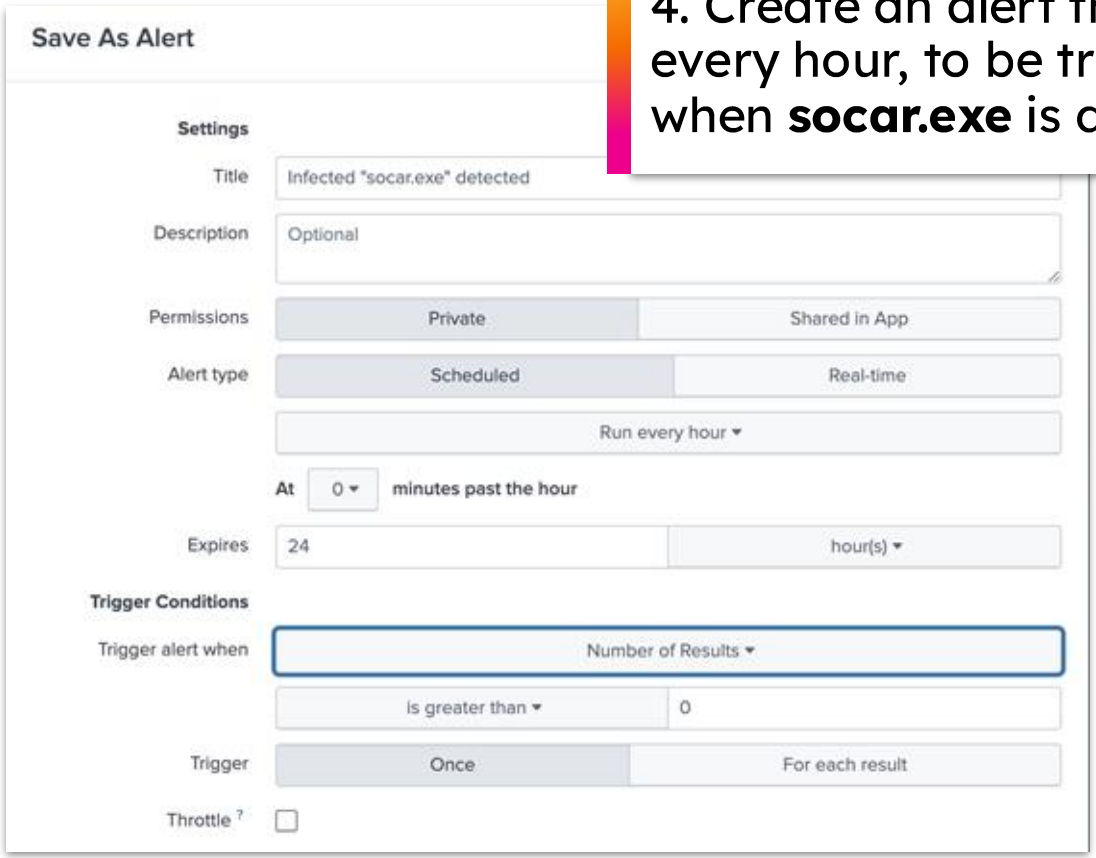

2. Add a filter for `file_name = socar.exe`

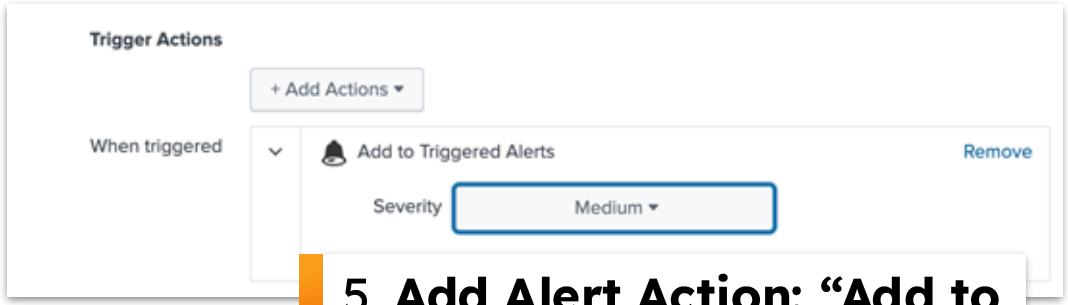

Alert

3. Click on **Save As > Alert**

4. Create an alert that runs every hour, to be triggered when **socar.exe** is detected

5. **Add Alert Action: “Add to Triggered Alerts”** with Severity: Medium

Alert Trigger Conditions

Alert conditions in Splunk are **criteria that determine when an alert should be triggered** based on search results

- Types of Alerts
  - Scheduled Alerts: run on a set schedule and can have custom trigger conditions
  - Real-time alerts: Trigger immediately when matching events occur
- Why is this important?
  - Monitors Specific Event Patterns
  - Prioritizes Critical Events
  - Enhances Notification Quality
  - Reduces Alert Fatigue
  - Customizes Alert Criteria

Refer to: https://docs.splunk.com/Documentation/Splunk/latest/Alert/AlertTriggerConditions

© 2026 SPLUNK LLC

Alert Trigger Actions

Alert actions help you **respond to triggered alerts.**

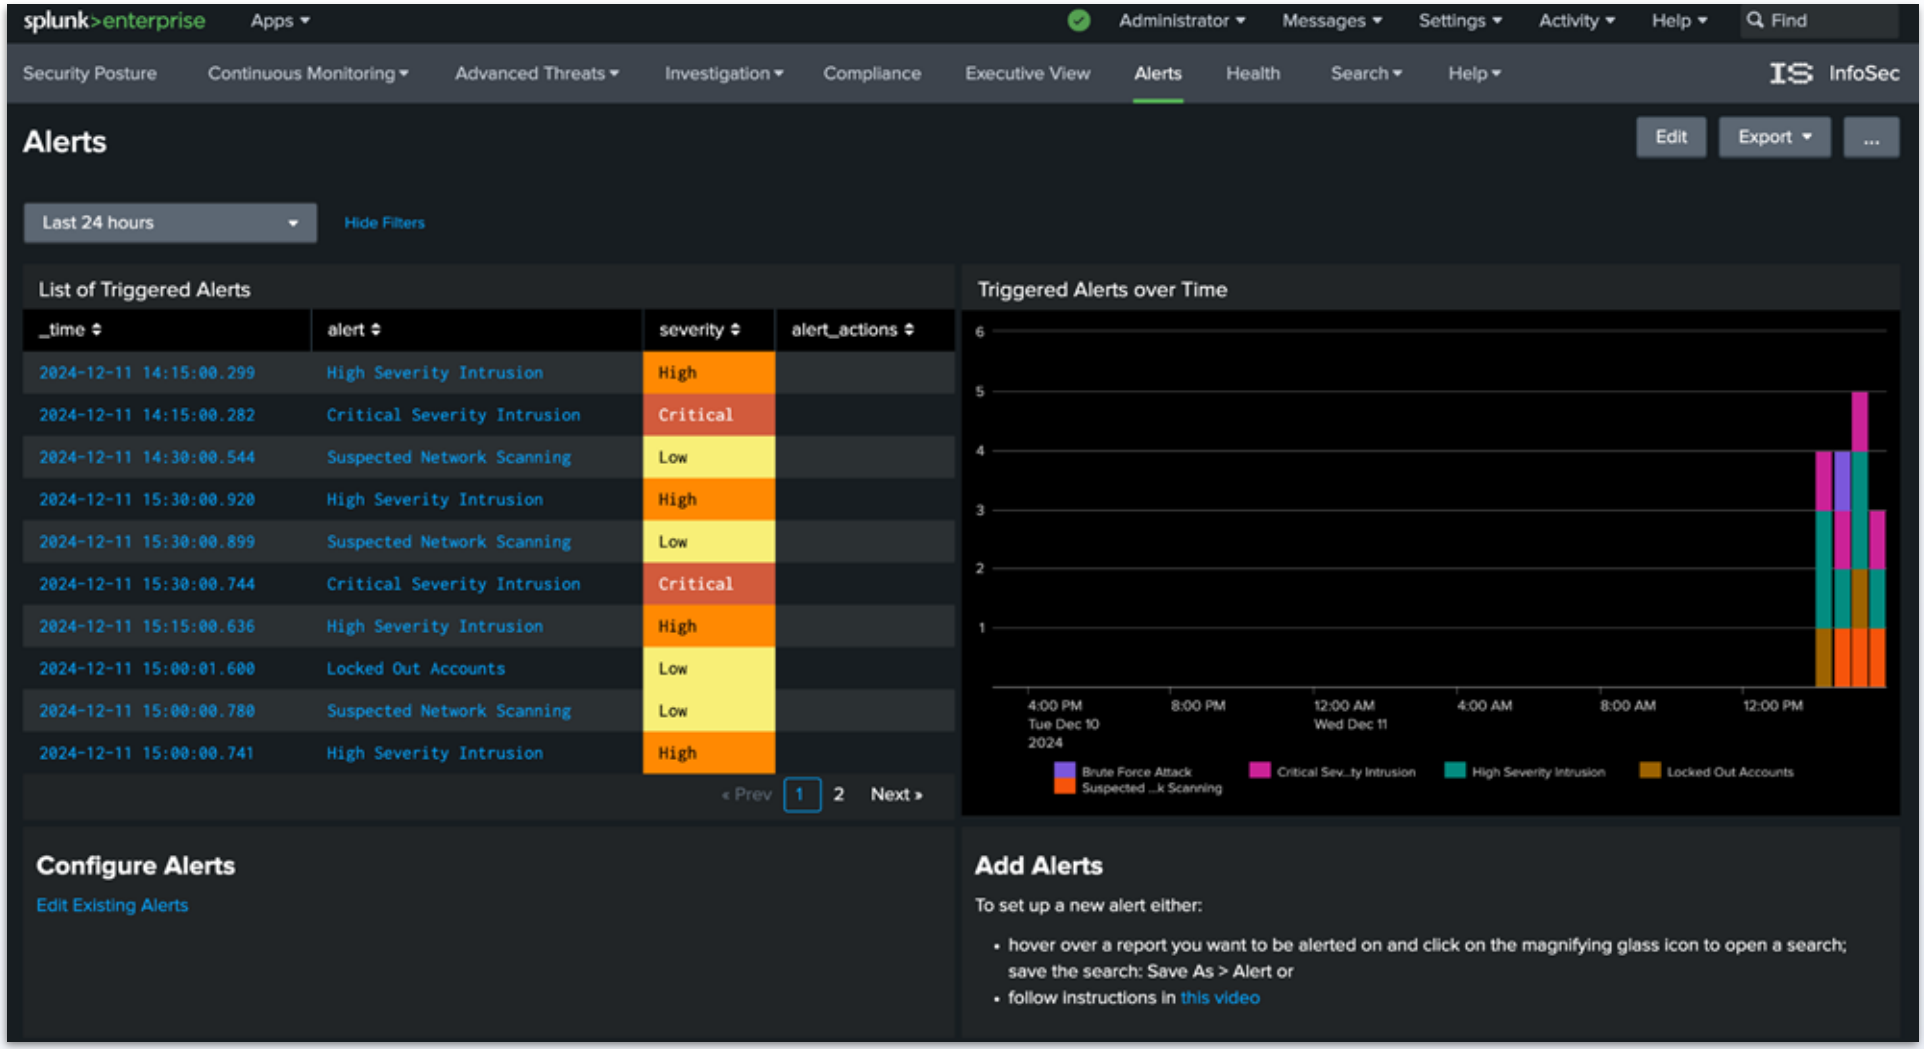

- You can enable one or more alert actions
- Email Notification Action
  - Webhook Alert Action
  - Output to CSV lookup
  - Log Events
  - Monitor Triggered Alerts
  - Splunk Mobile Alerts
  - Custom Alert actions
- Why is this important?
  - Automated Response
  - Improved Operational Efficiency
  - Enhanced Timely Notifications
  - Supporta Integrations with other providers

Refer to: https://docs.splunk.com/Documentation/SplunkCloud/latest/Alert/Setupalertactions

© 2026 SPLUNK LLC

Alert Dashboard

© 2026 Cisco and/or its affiliates. All rights reserved.

Cisco Confidential

What we have identified

Findings:

- The top infected file is **socar.exe**
- Looking at **src_ip** we found compromised hosts
- Looking at **server** we could identify the infected hosts
- Looking at **file_path** we now know where the malware is located
- We created an alert to be notified if socar.exe is infected again

Next Steps you can take:

- Investigate other activity from those IPs to uncover additional malware or lateral movement
- Isolate infected servers to prevent lateral movement
- Investigate how the malware propagated to these servers to close vulnerabilities

© 2026 SPLUNK LLC

Our progress so far

- [x] IT Teams: Install the Splunk Add-on for AWS and finish setting up the InfoSec app so the dashboards populate correctly
- [x] **Malware:** Find Malware-infected files and setup an alert for future detections
- [ ] **User behavior:** Look for suspicious user behavior, unauthorized role modifications, or unusual activity
- [ ] **Customize the InfoSec App:** Look for ways to customize the content for Buttercup State University
- [ ] **Add additional security content:** Review the content in Splunk Security Essentials and add any new use cases you think might be valuable

InfoSec App Dashboard

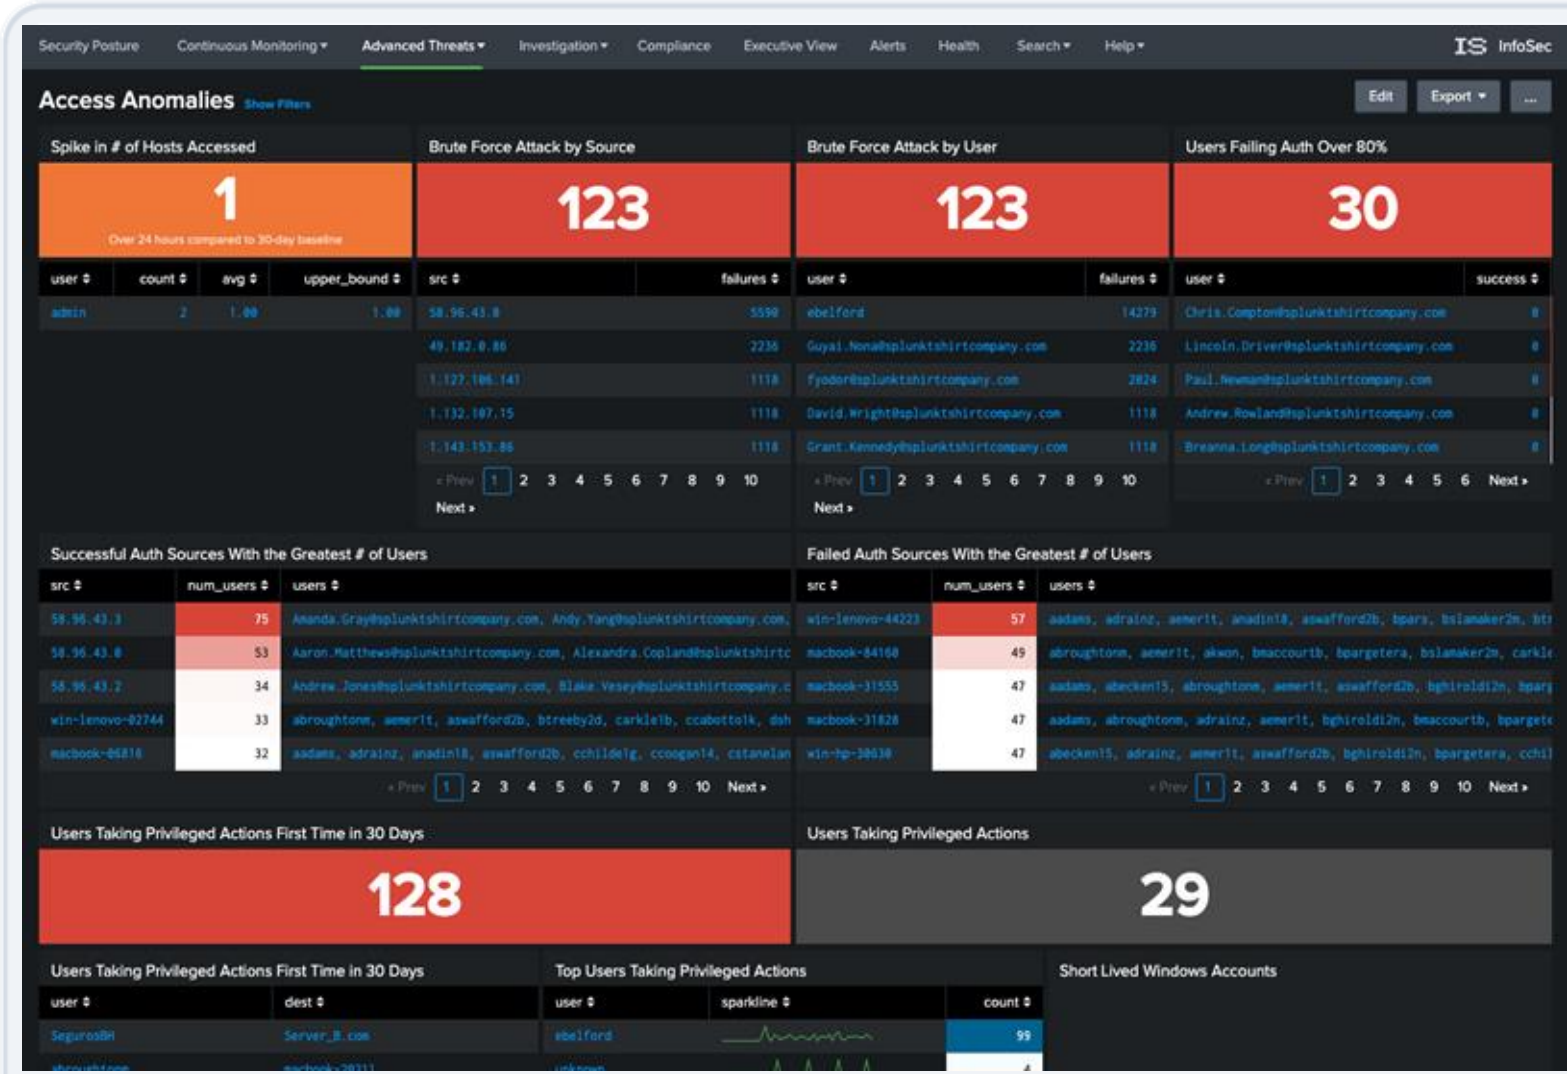

- Consolidated view of authentication actions
- Breaks down attempts by application
- Counts successful and failed events
- Identifies unusual authentication patterns
- Monitor user access and authentication activity
- Detect potential threats related to unauthorized access

© 2026 Cisco and/or its affiliates. All rights reserved.

InfoSec App Dashboard

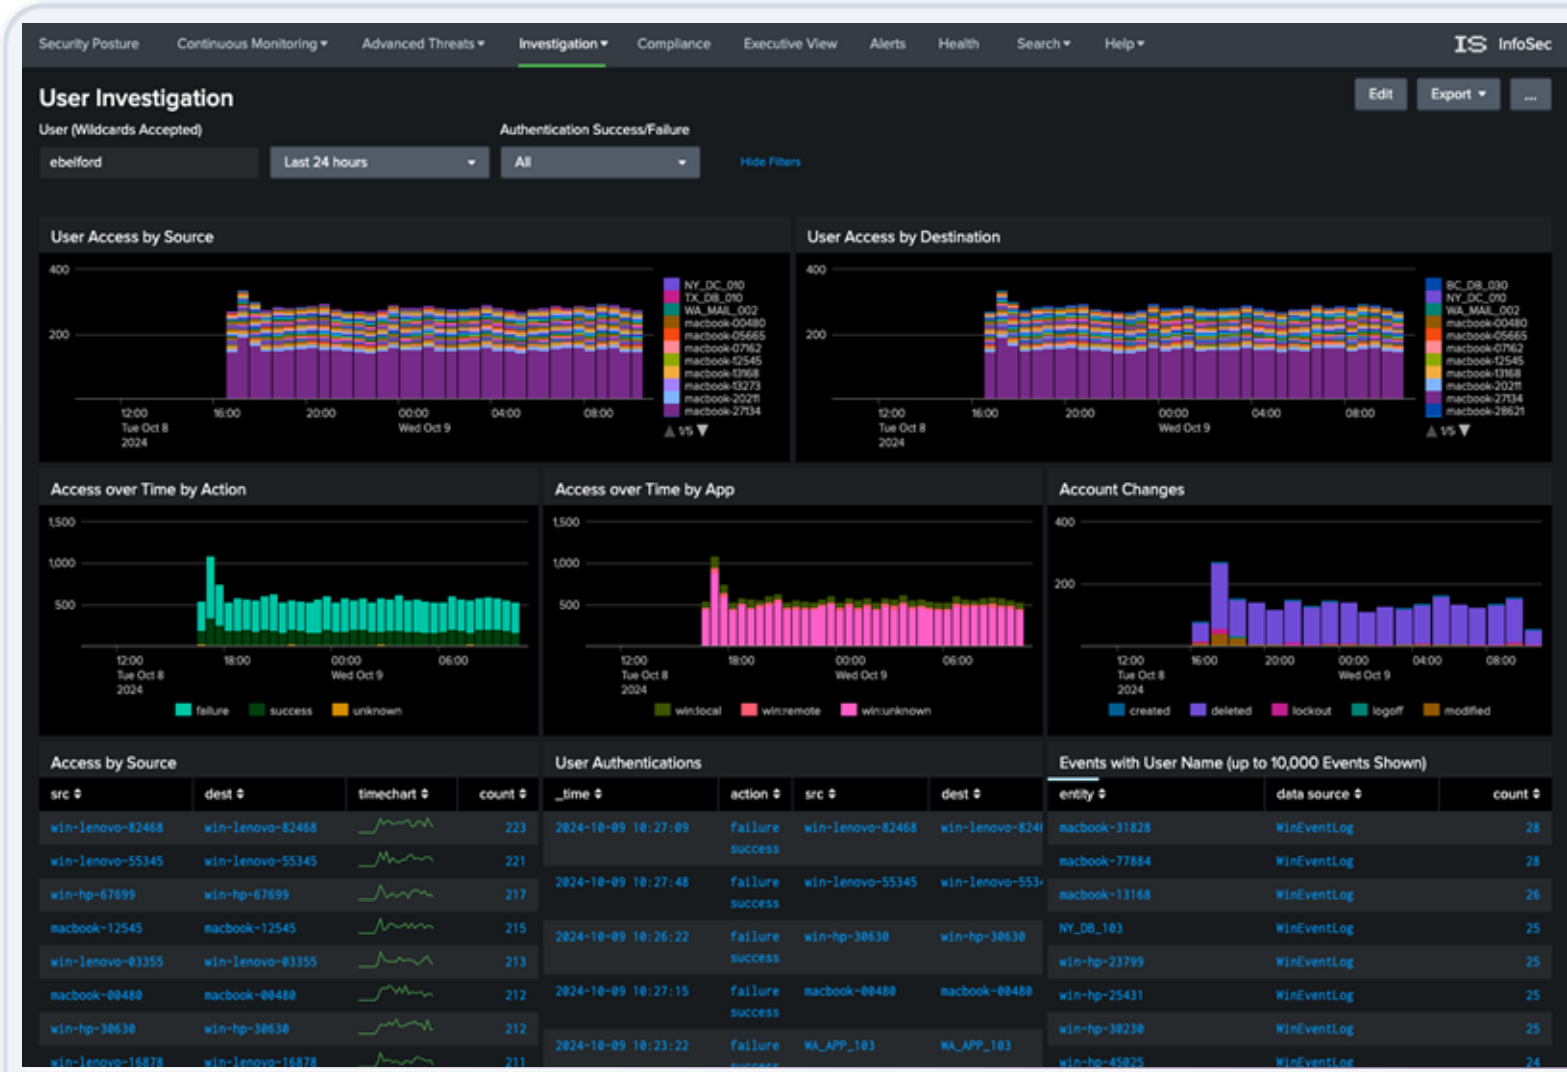

- Identifies spikes in access to hosts
- Detects brute force attacks by source or user
- Monitors accounts with high logon failure rates
- Flags users performing new privileged actions
- Highlights geographically improbable access
- Detecting potential security risks

© 2026 Cisco and/or its affiliates. All rights reserved.

InfoSec App Dashboard

- Provides an interface to investigate user behaviors
- Allows drill-down into specific user actions
- Offers filters for detailed searches
- Displays underlying search results for analysis
- Analyzing user activity and identifying anomalies
- Supporting incident response and threat

© 2026 Cisco and/or its affiliates. All rights reserved.

User Behavior Investigation

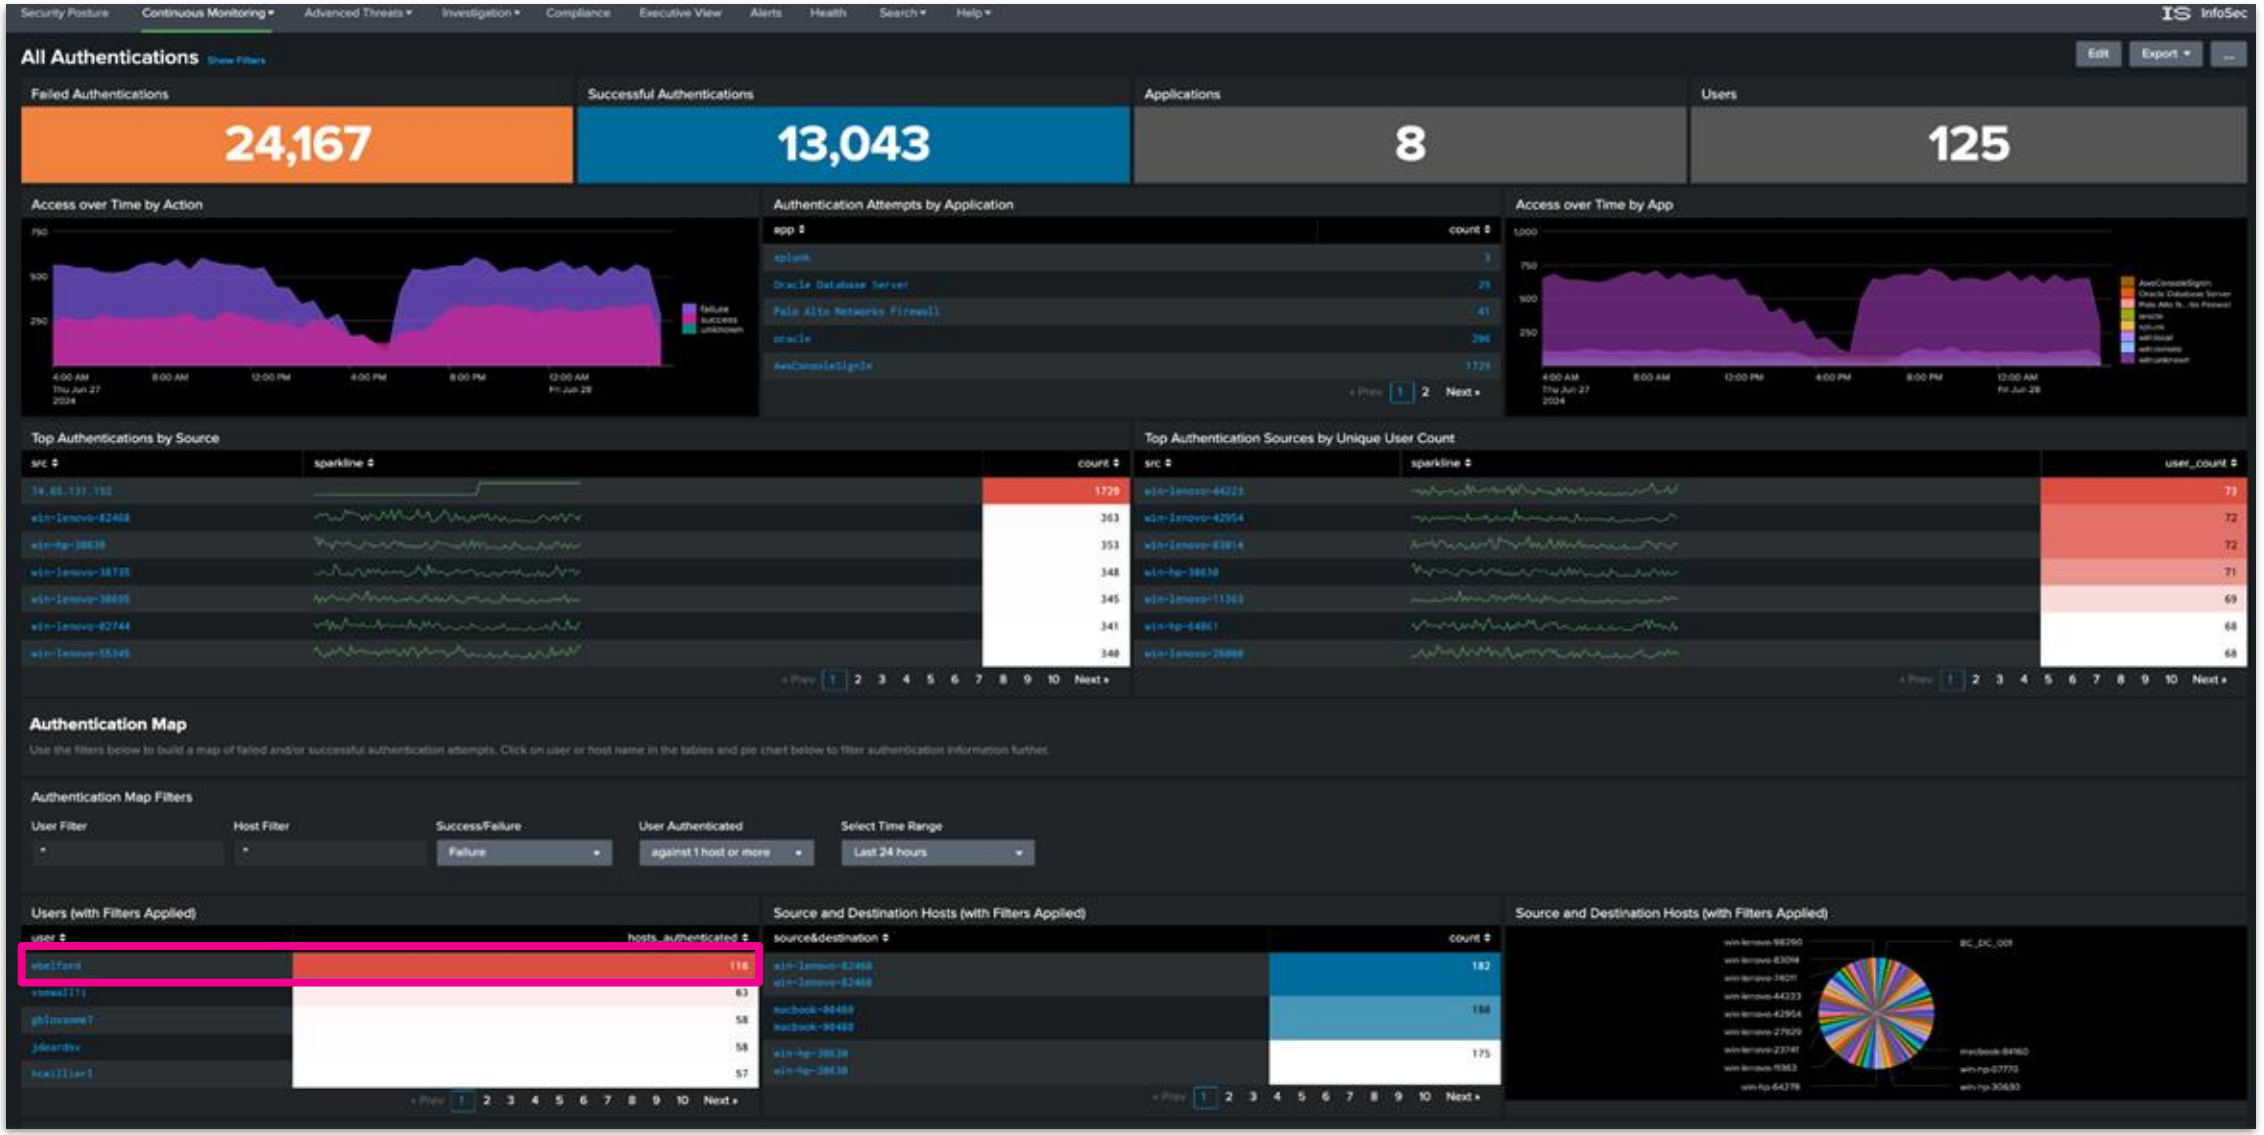

Look for sudden access changes, unauthorized role modifications, or unusual activity

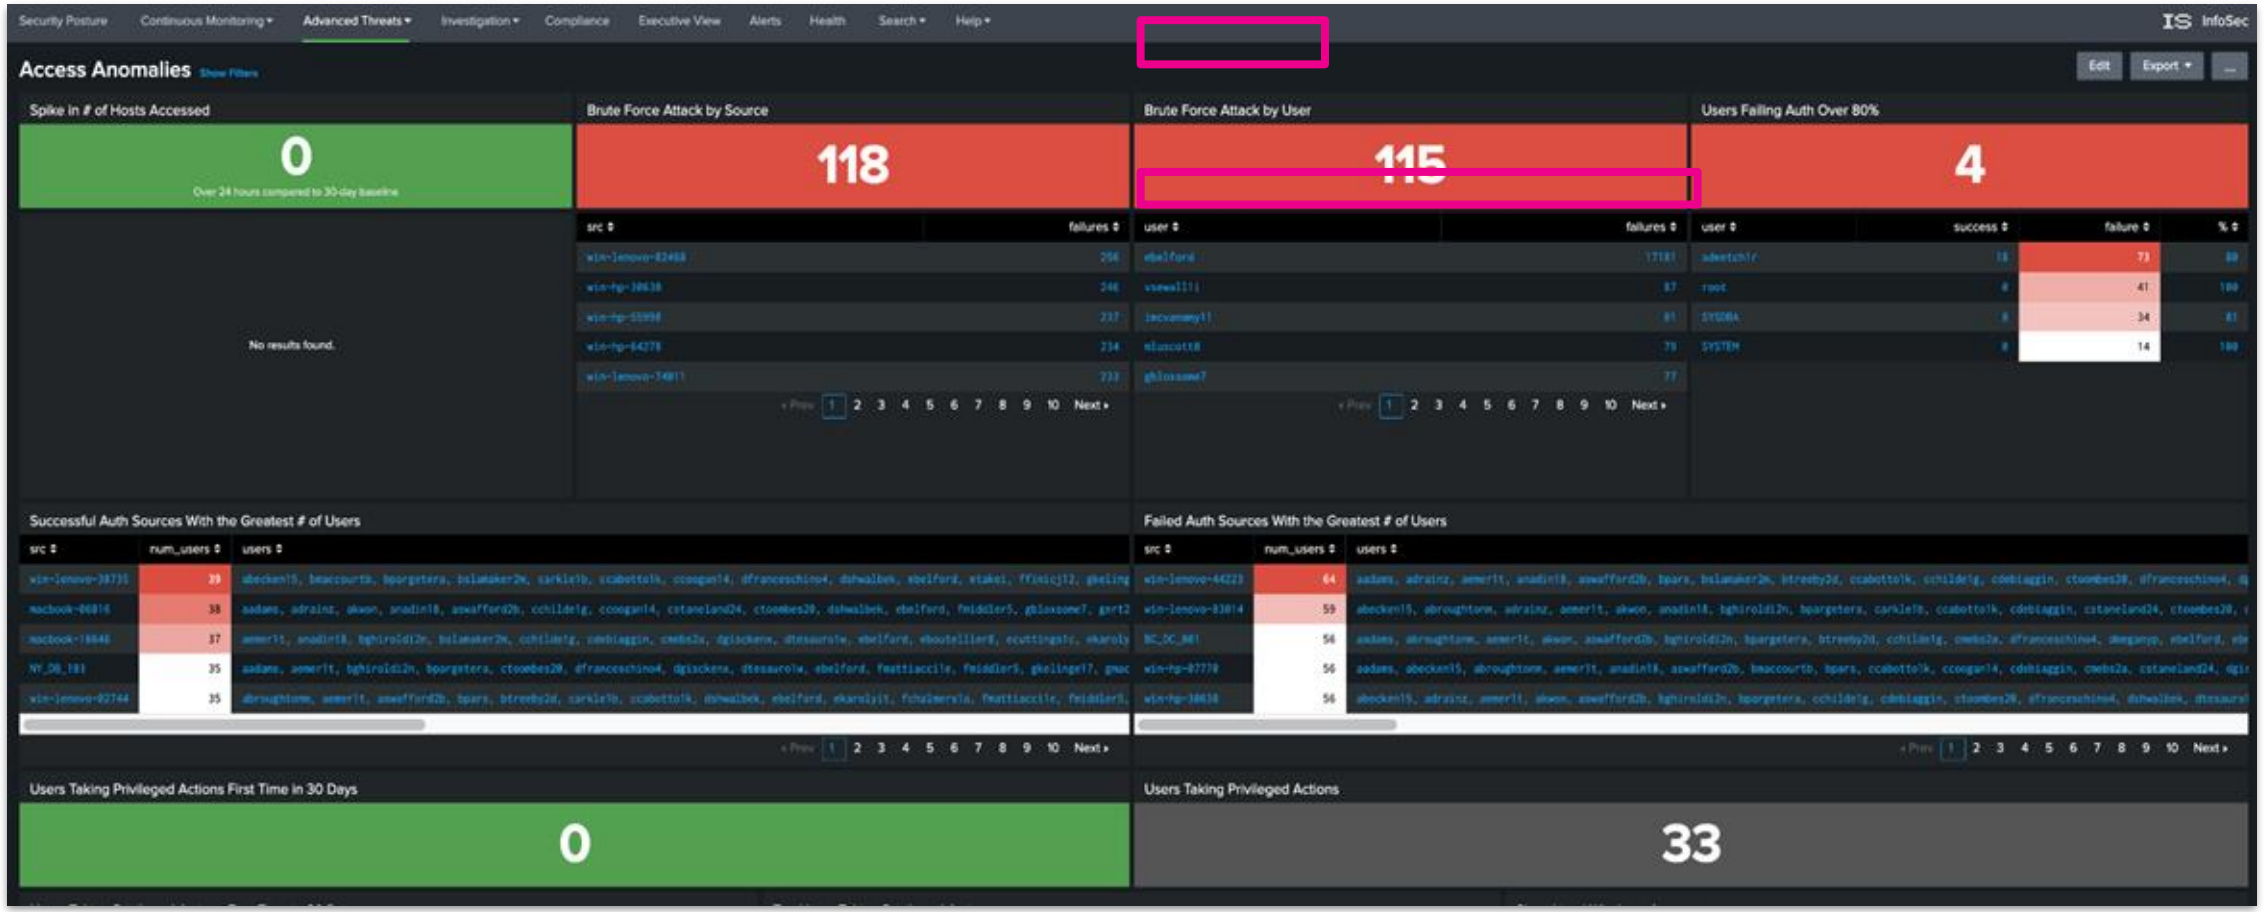

© 2026 Cisco and/or its affiliates. All rights reserved.

Continuous Monitoring - All Authentications

Advanced Threats - Access Anomalies

Investigation - User Investigation

What we have identified

Findings:

- We identified ebelford with the following unusual behaviors:
  - ebelford was the user accessing a high number of hosts within a
    24 hour period
  - ebelford has taken the highest amount of privileged actions
  - ebelford is the user with the most failed login attempts
- ebelford did delete a large number of accounts

Next Steps you can take:

- Lock out the user account and force them to reset the password
- Document all malicious activities and reverse the malicious activities
- Identify all servers accessed and see if there where other

Customize the InfoSec App

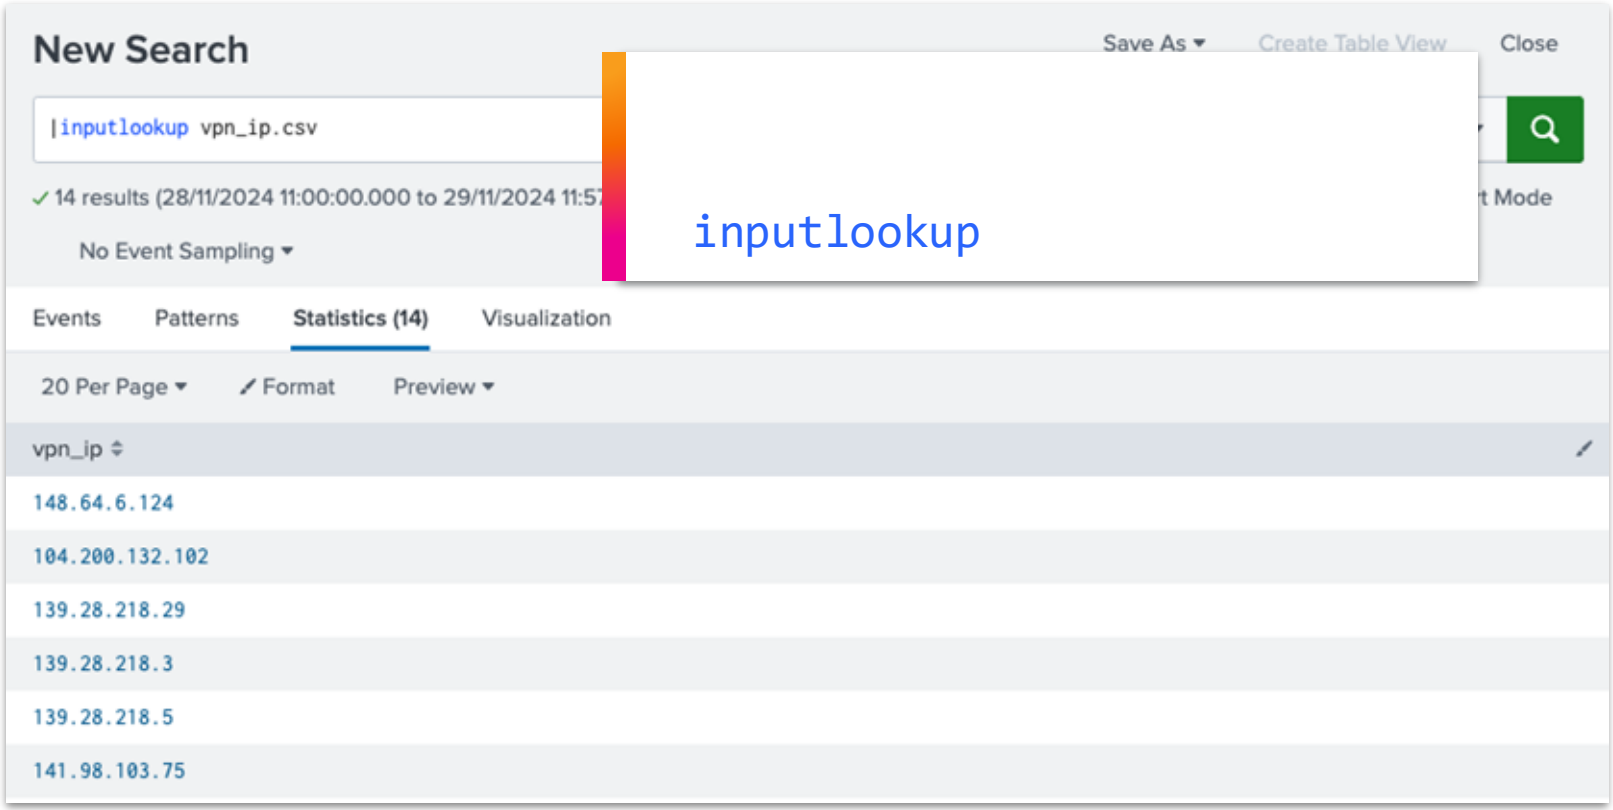

Look for ways to customize the content for Buttercup State University

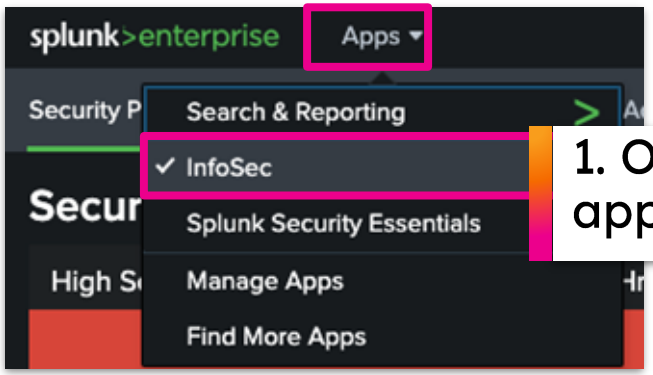

© 2026 Cisco and/or its affiliates. All rights reserved.

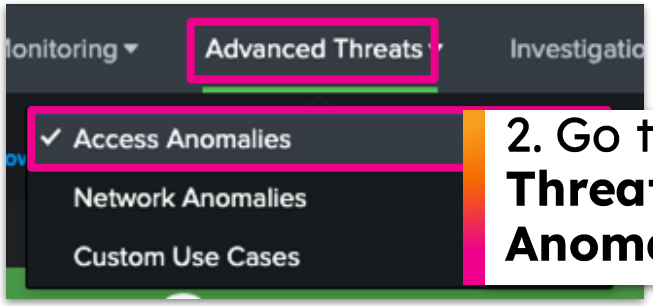

Go to the **Search** page

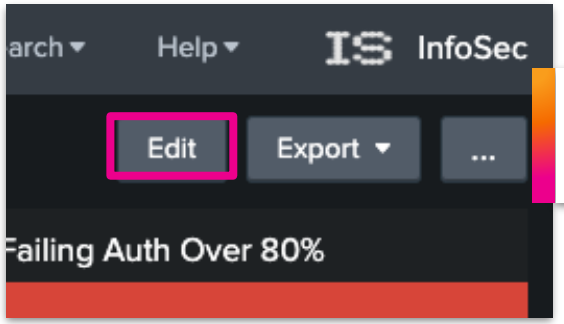

`inputlookup`

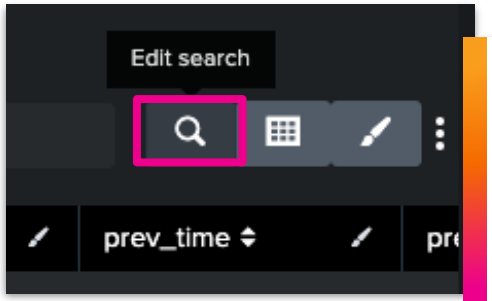

1. Open the **InfoSec** app

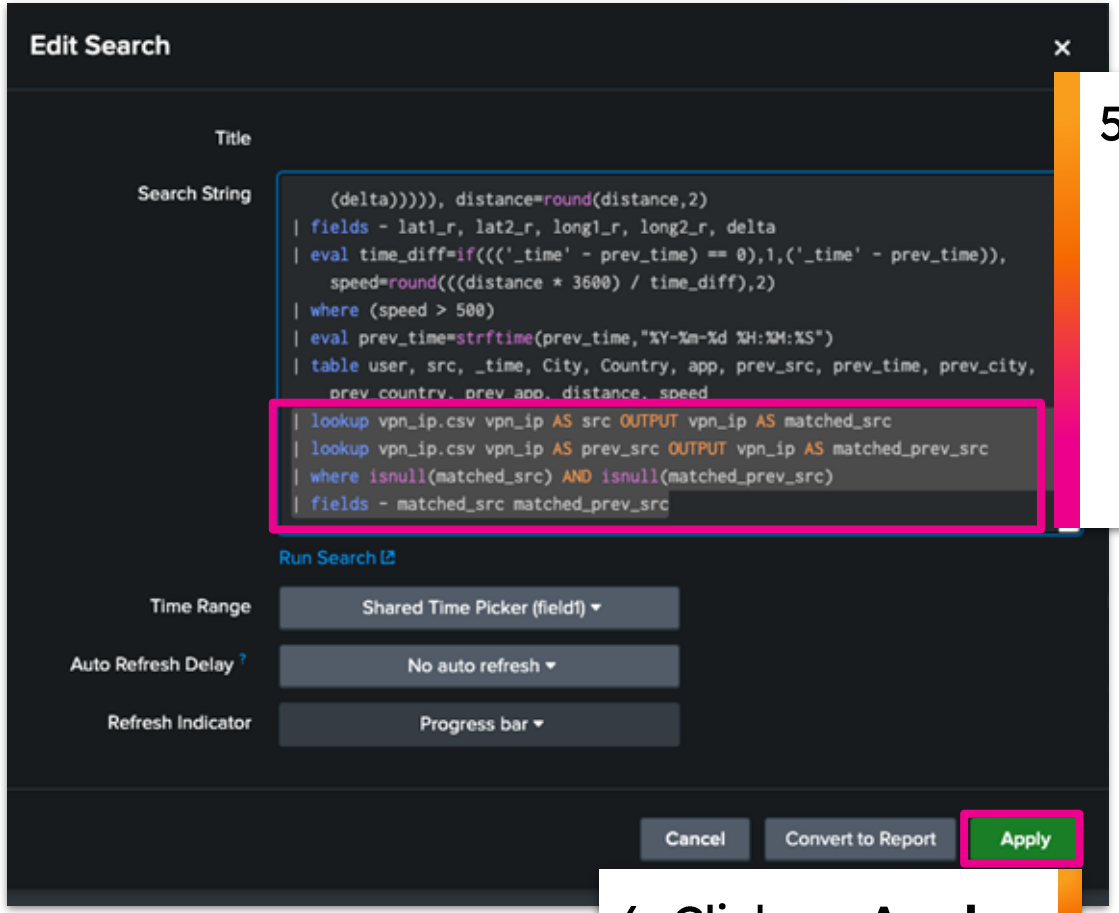

2. Go to **Advanced Threat** > **Access Anomalies**

3. Switch to **Edit** mode

4. Scroll down to the **Geographically Improbable Access** table and click **Edit search** (magnifying glass)

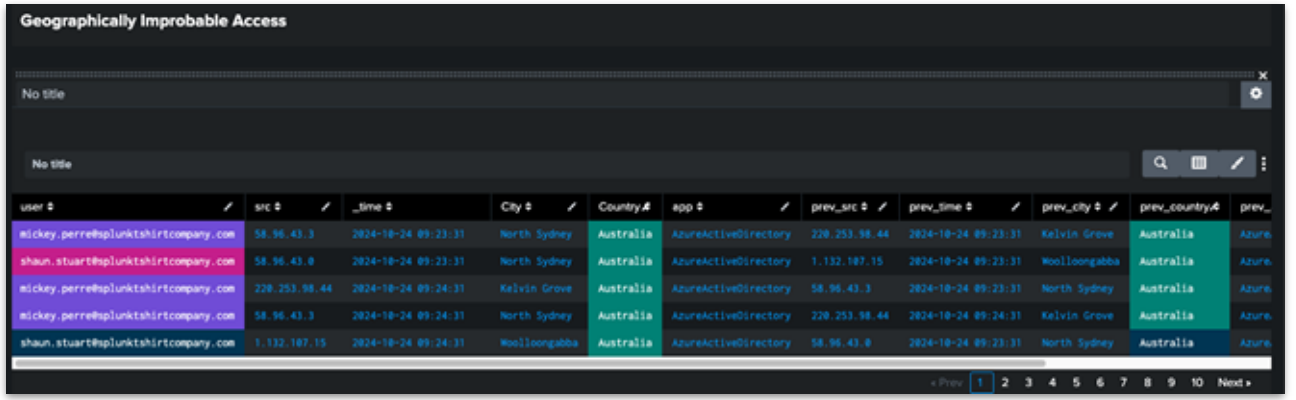

6. Click on **Apply**

5. At the end of the search, **add the following SPL:**

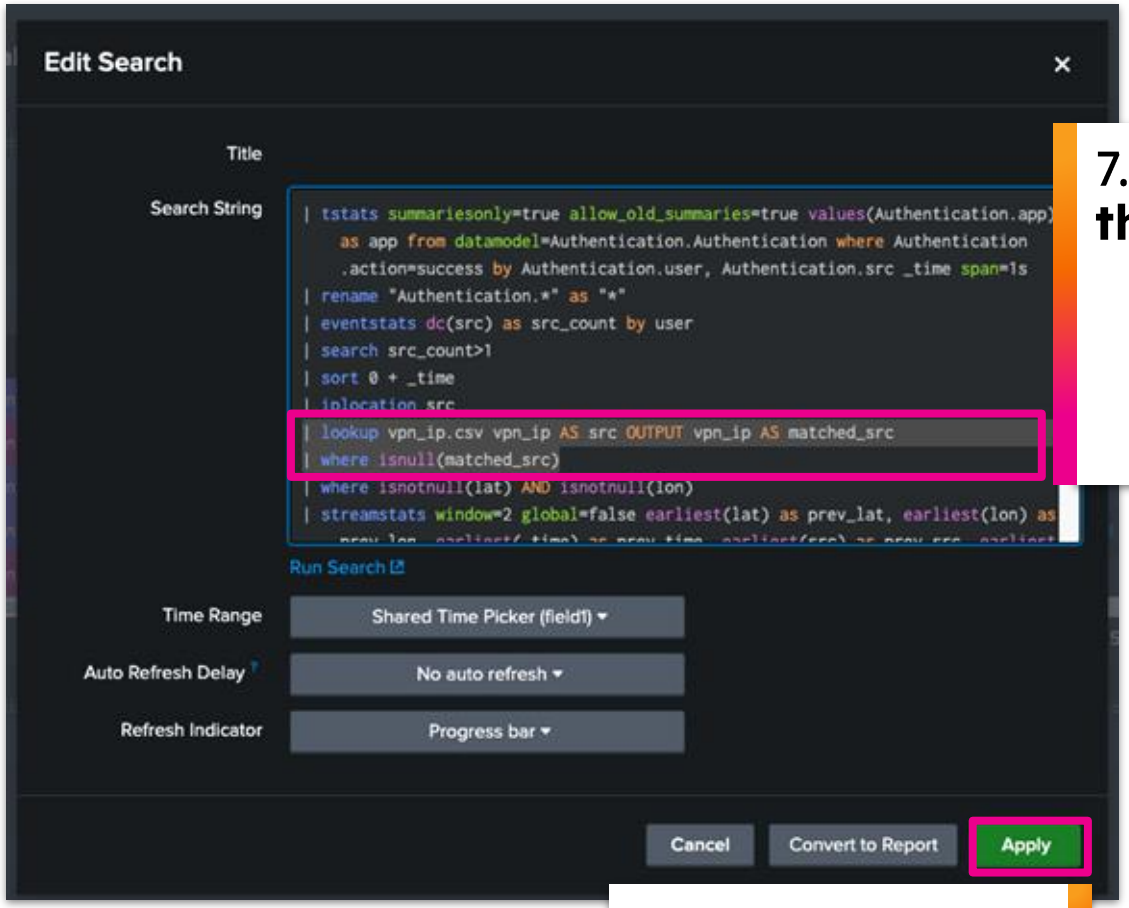

```
lookup                          AS      OUTPUT          AS

lookup                          AS          OUTPUT          AS

where isnull                     AND isnull
fields
```

(Optional)

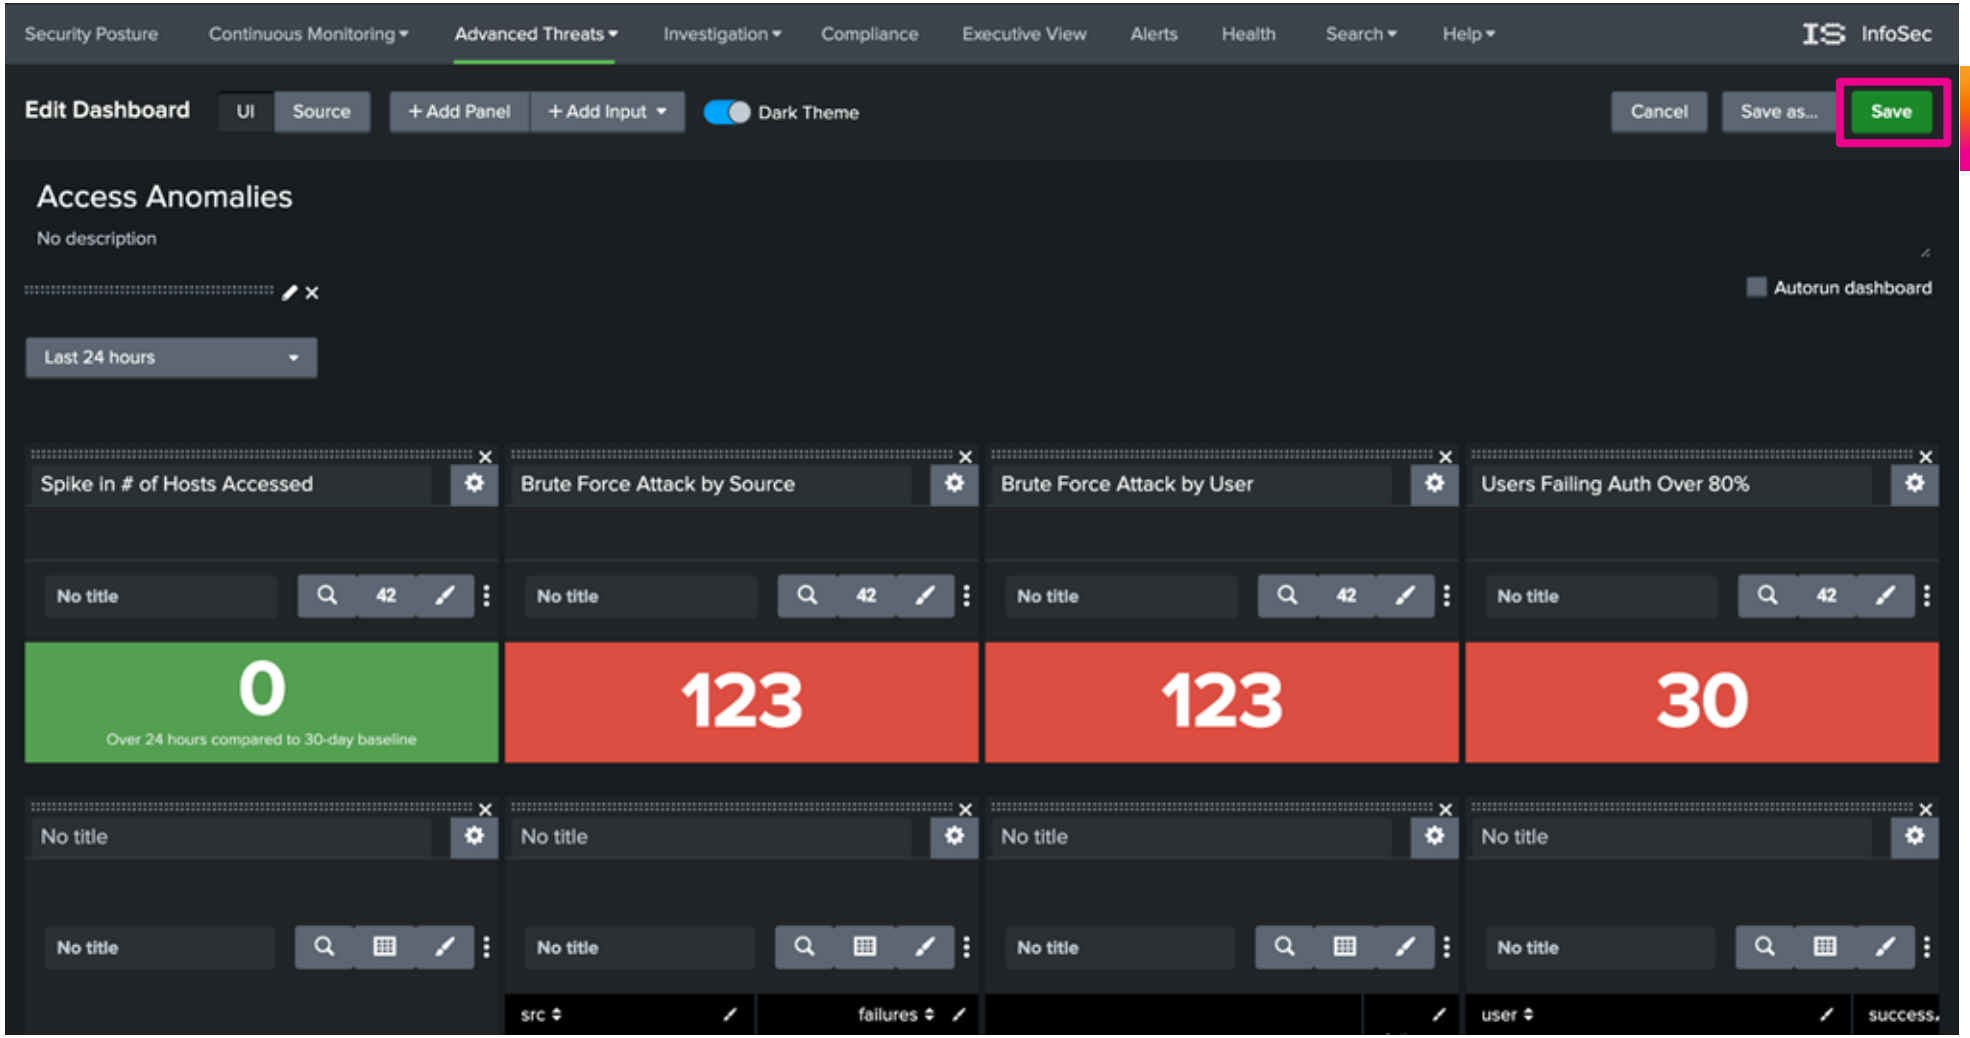

7. Edit the search of the **map visualisation** and **add these two lines** under the iplocation line:

```
lookup                    AS      OUTPUT          AS

where isnull
```

8 Click on **Apply**

Free security app on Splunkbase

- Works on Splunk Enterprise and Cloud
- Repository of over 1600 searches and detections out-of-the-box (OOTB)
- Maps detections to the MITRE ATT&CK framework
- Data inventory checking capabilities
- Categorized into sections:
  - Compliance
  - Insider Threat
  - Security Monitoring

© 2026 Cisco and/or its affiliates. All rights reserved.

Adding Security Content: New Use Case

The Security team wants a new dashboard panel to show recurring infections on hosts

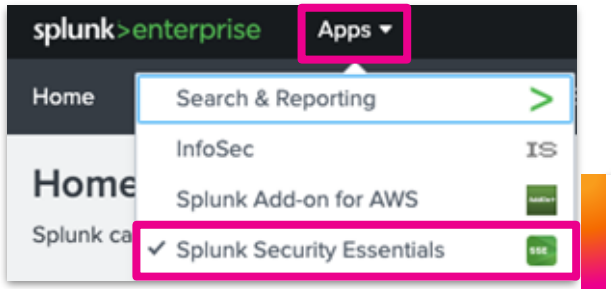

red

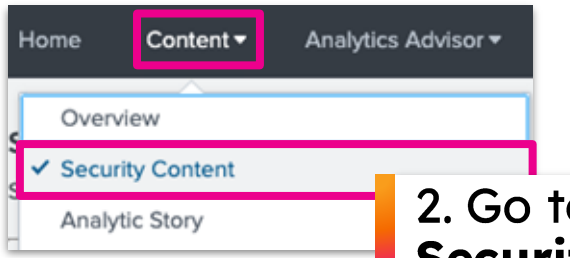

© 2026 Cisco and/or its affiliates. All rights reserved.

Confidential

Add new content from Splunk Security Essentials

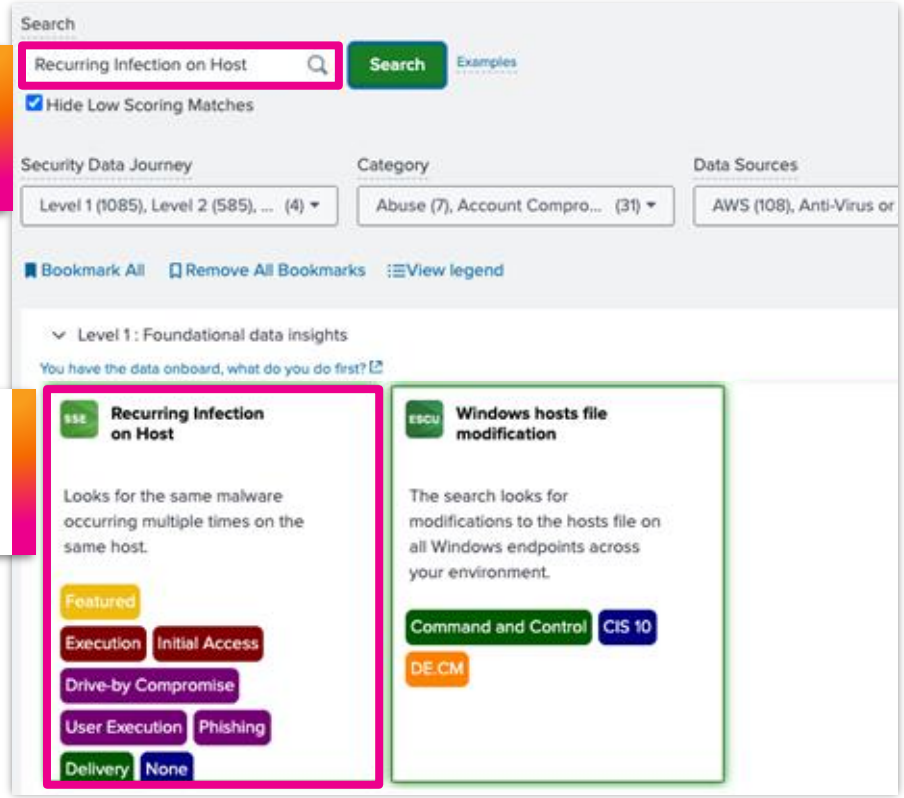

1. Open **Splunk Security Essentials**

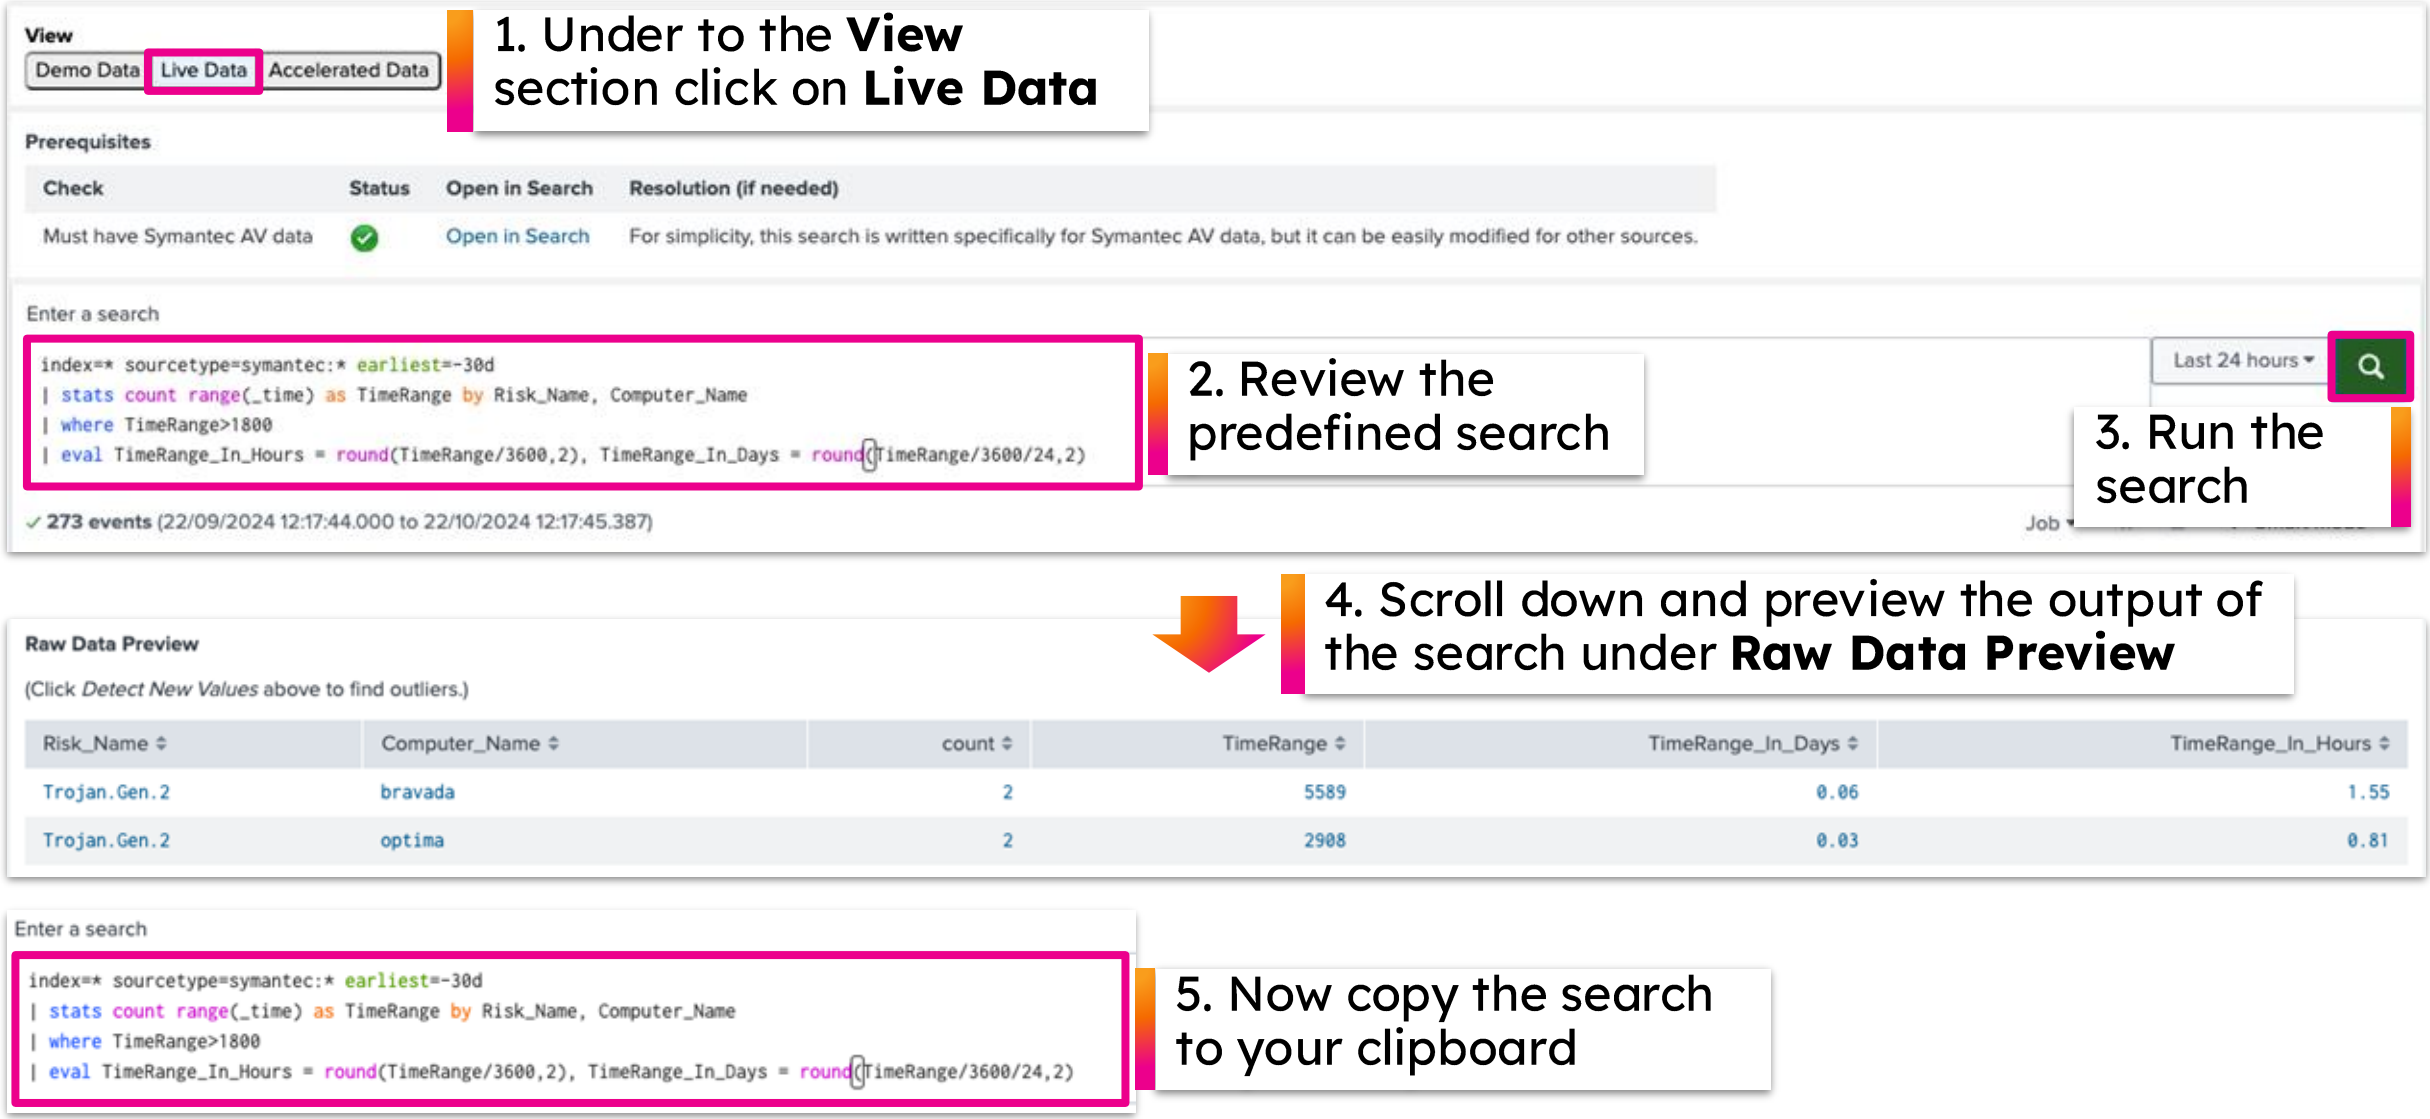

2. Go to **Content > Security Content**

3. Search for **“Recurring Infection on Host”**

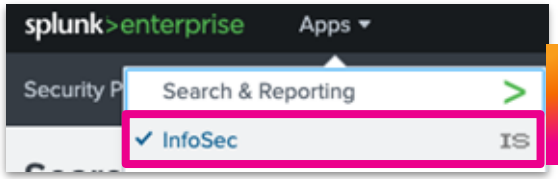

4. Click on the **Recurring Infection on Host** use case

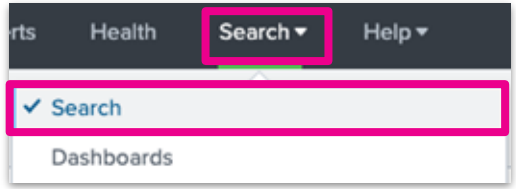

Add new content from Splunk Security Essentials

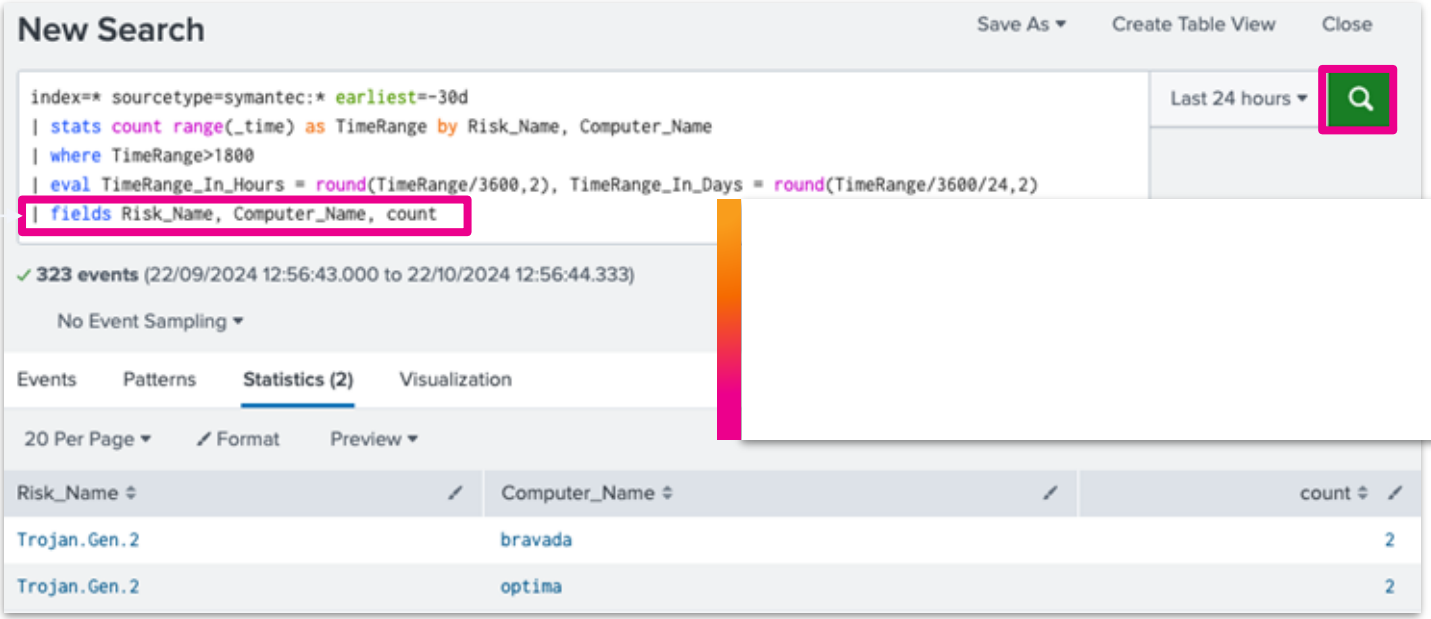

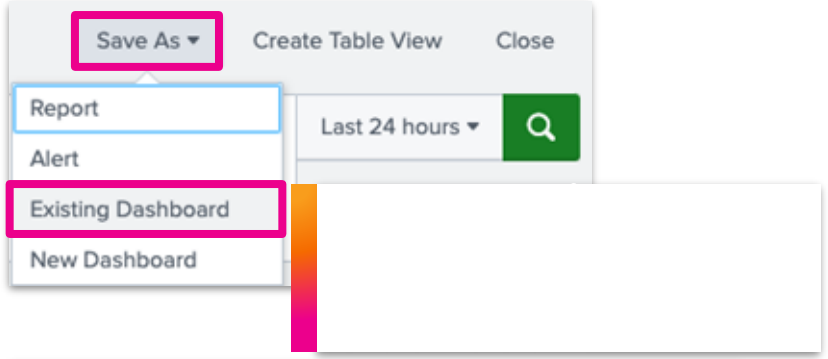

Add the new content to the Custom Use Case dashboard

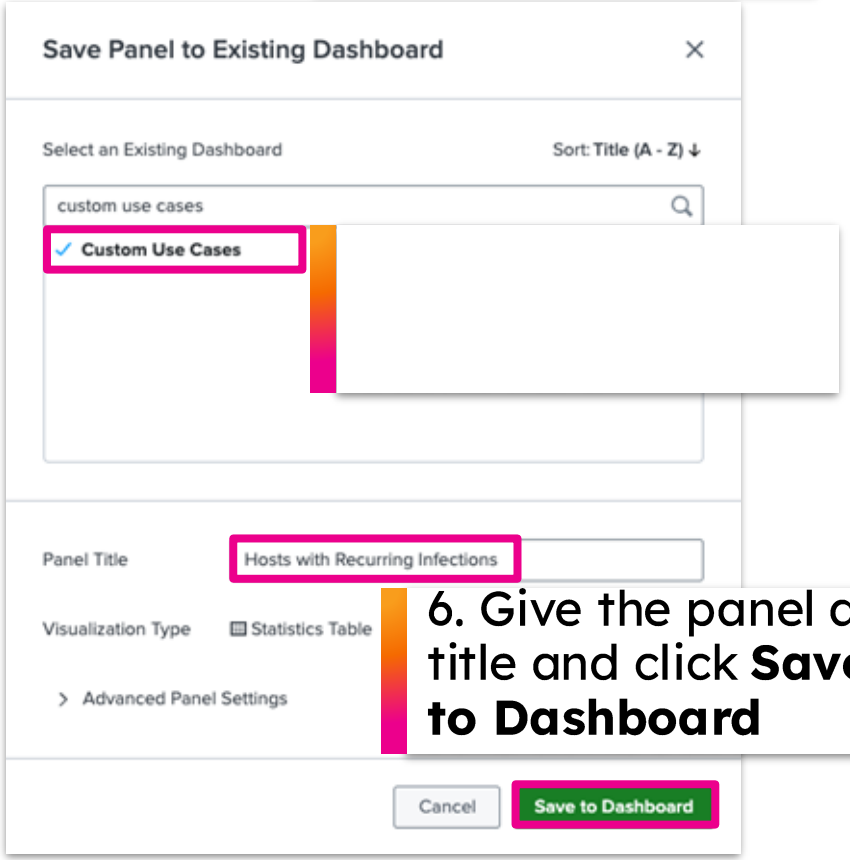

1. Return to the **InfoSec** app

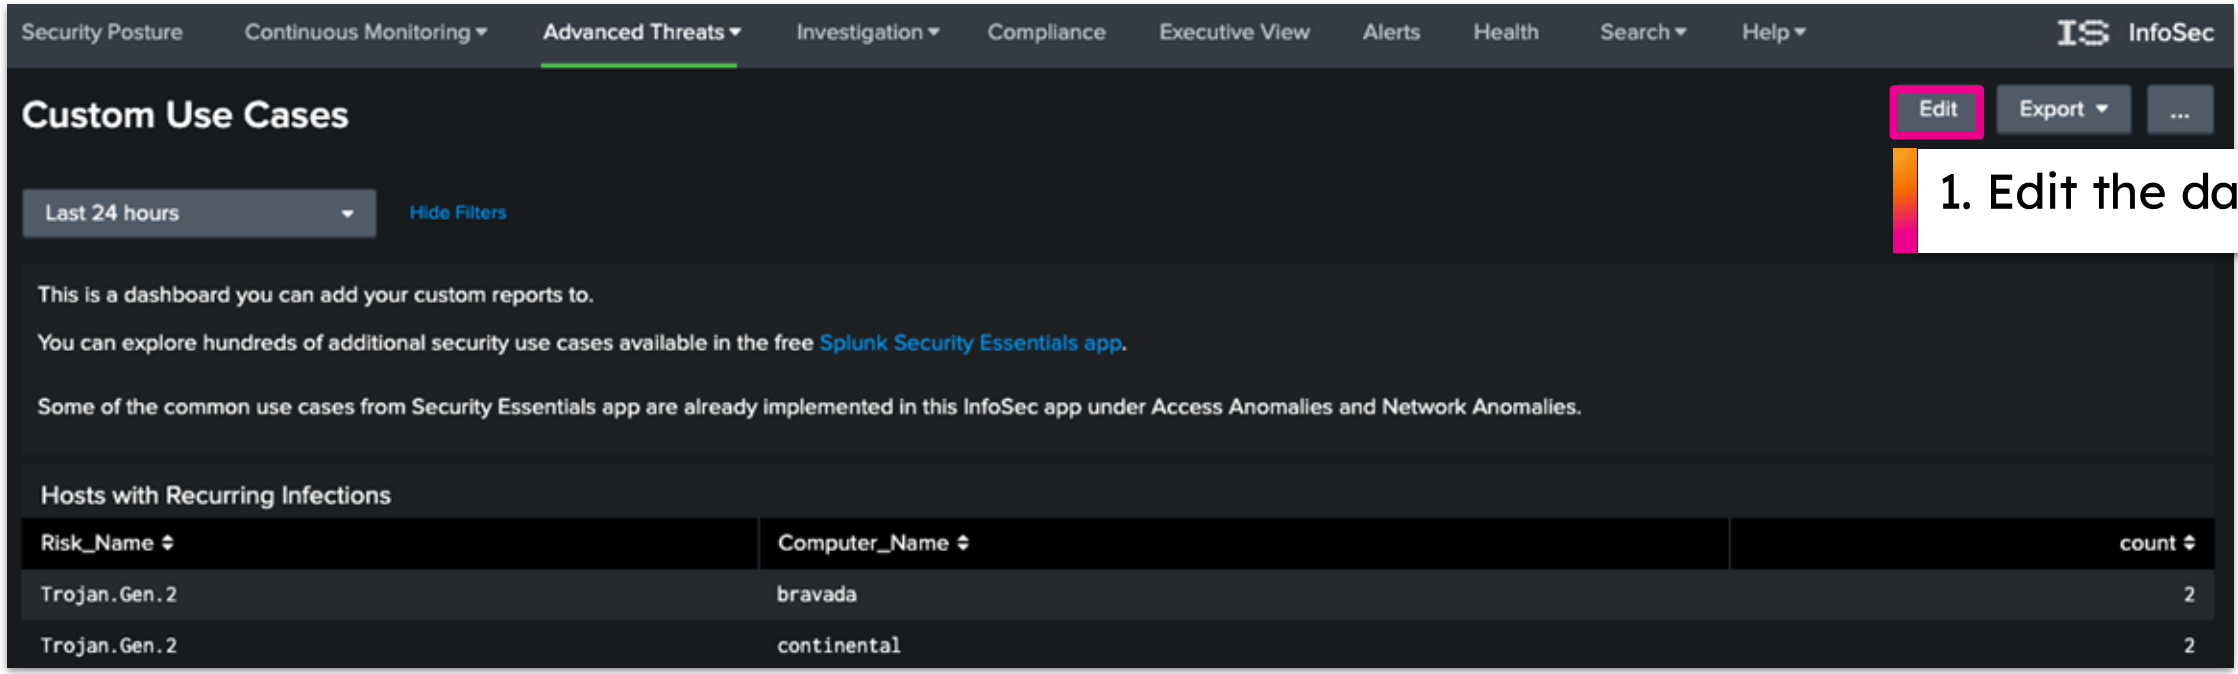

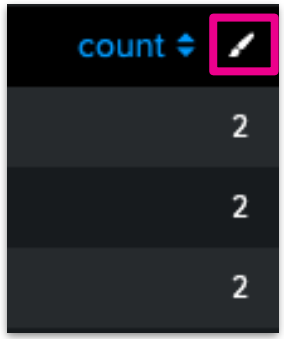

6. Give the panel a title and click **Save to Dashboard**

`fields`

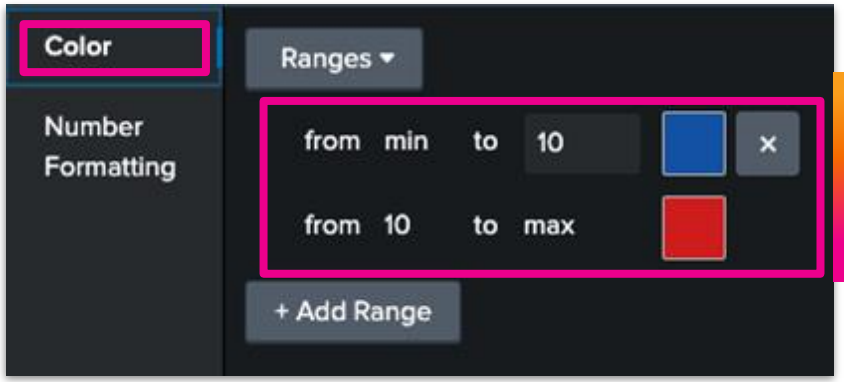

Add color to the new dashboard panel

1. Edit the dashboard

2. Format the **count** column

3. Edit the color ranges as shown so a **count** of 10 or greater will be red

Make sure you **save** your dashboard!

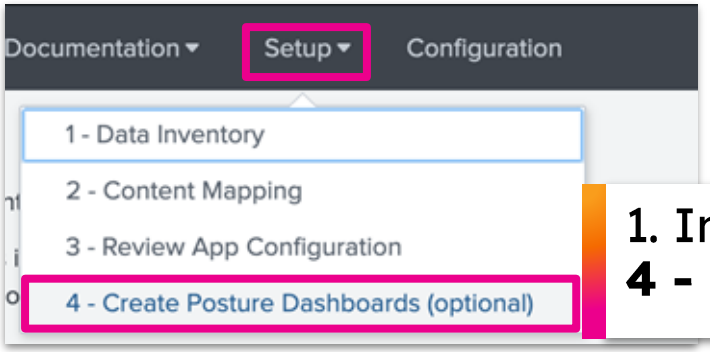

Adding Security Content: New Dashboard

The Security team wants a new custom dashboard showing network security insights

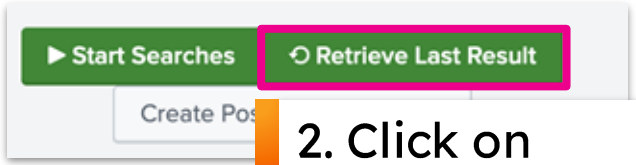

© 2026 C

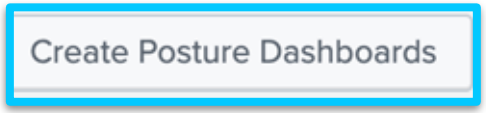

fidential

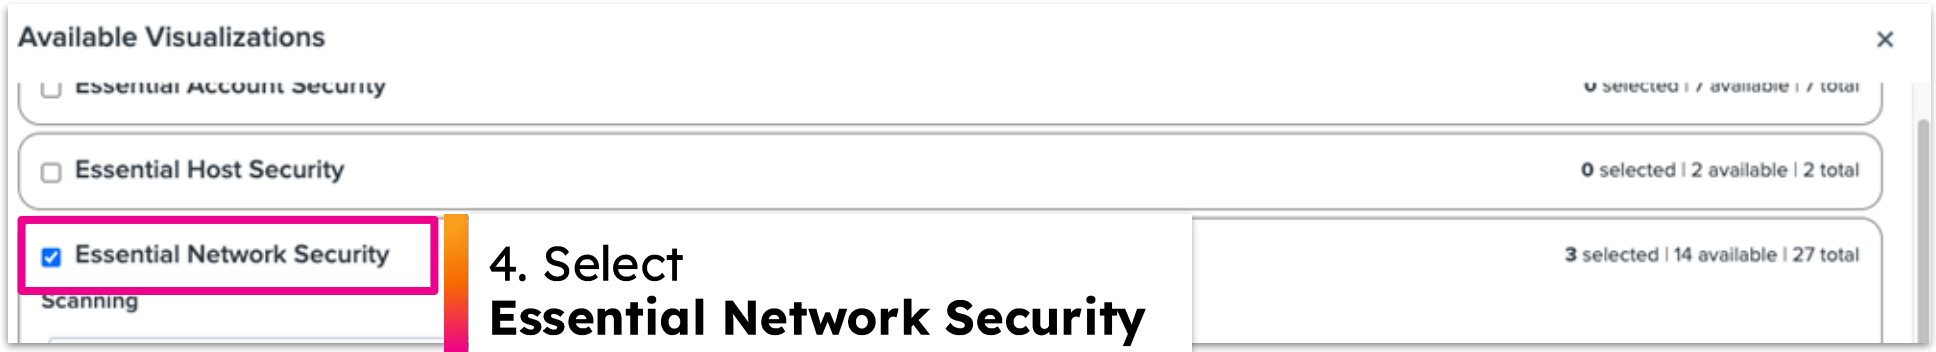

1. In SSE click on **Setup > 4 - Create Posture Dashboards**

2. Click on **Retrieve Last Result**

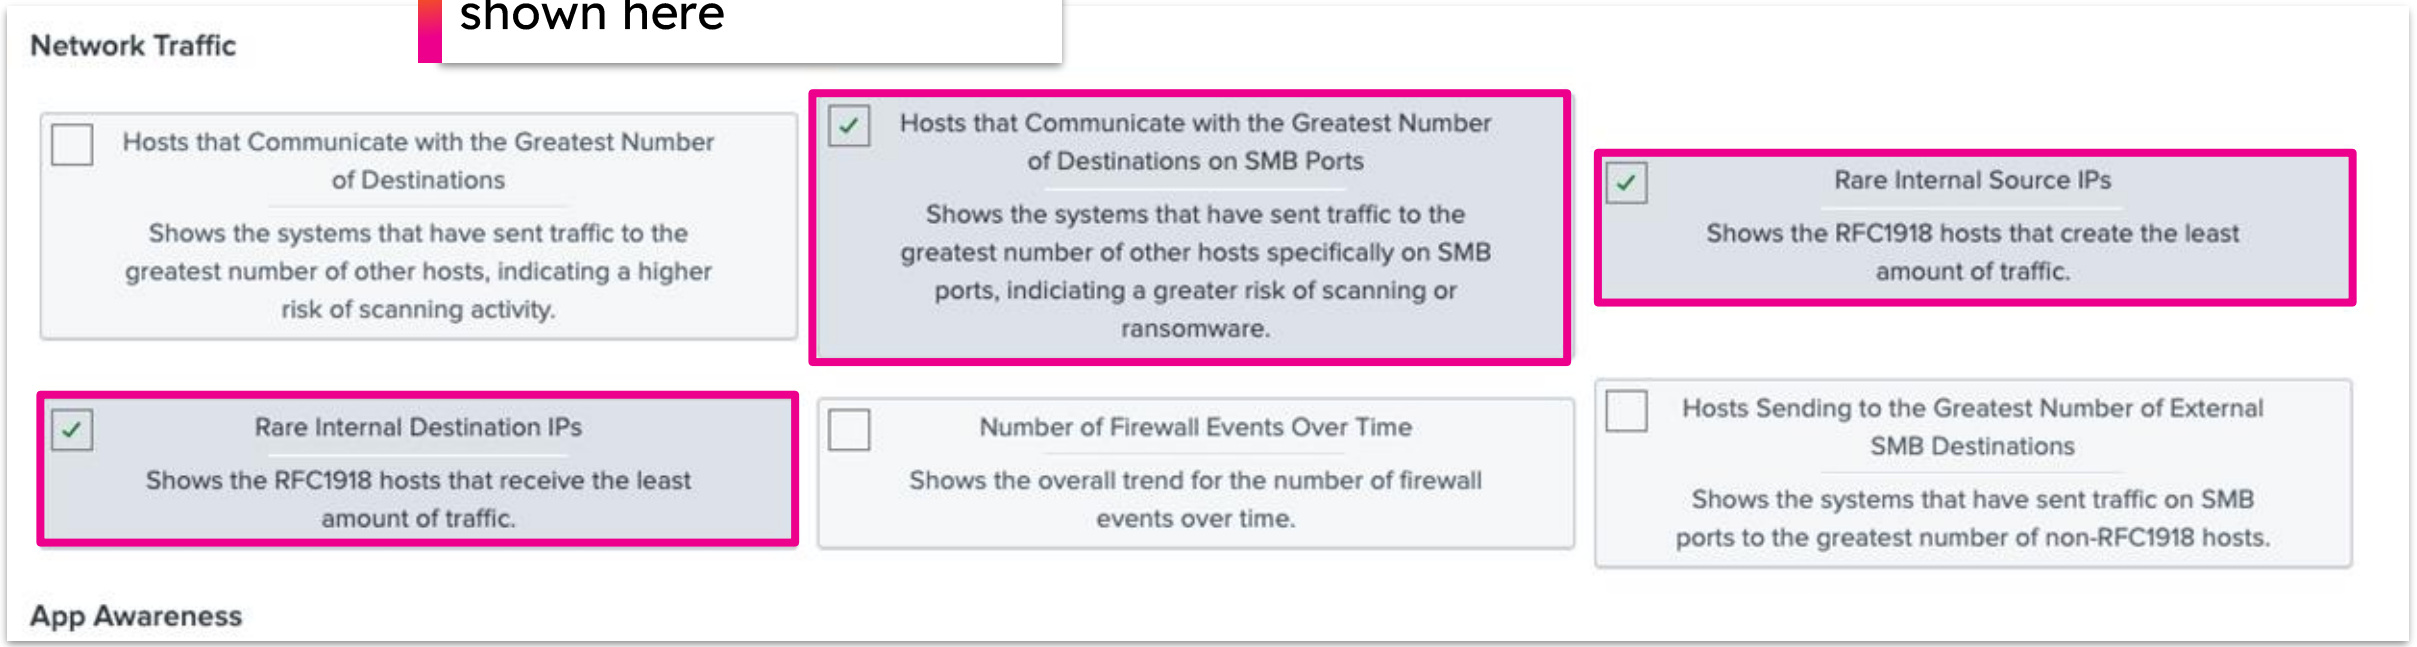

3. Click on **Create Posture Dashboards**

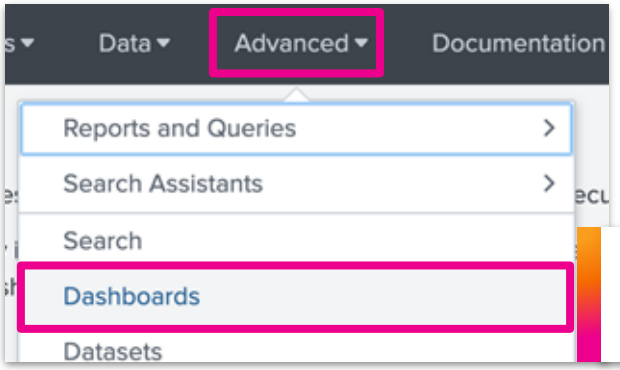

4. Select **Essential Network Security**

5. Select the detections shown here

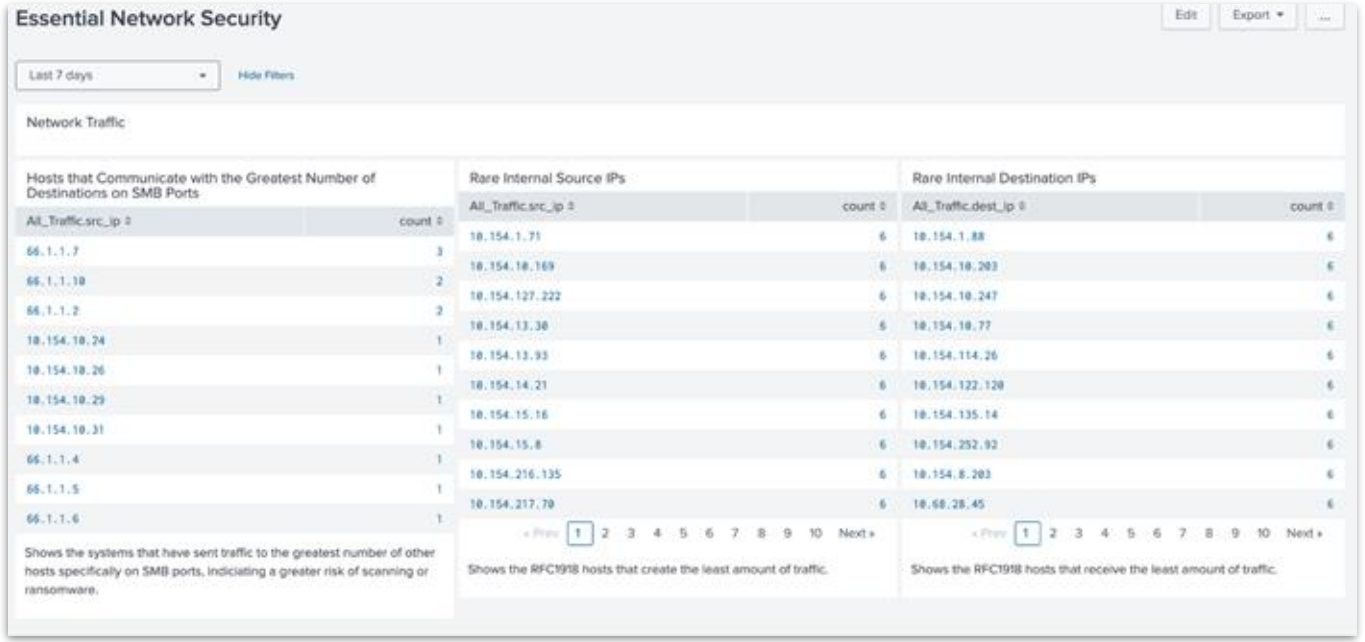

6. Click on **Create Dashboards**

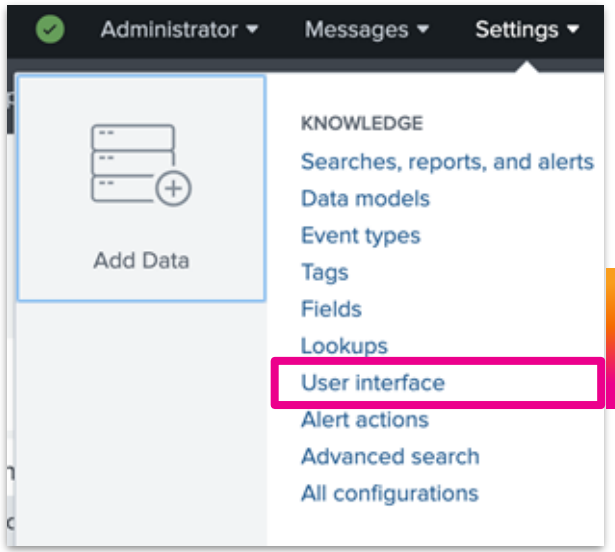

7. Click on **Advanced** > **Dashboards**

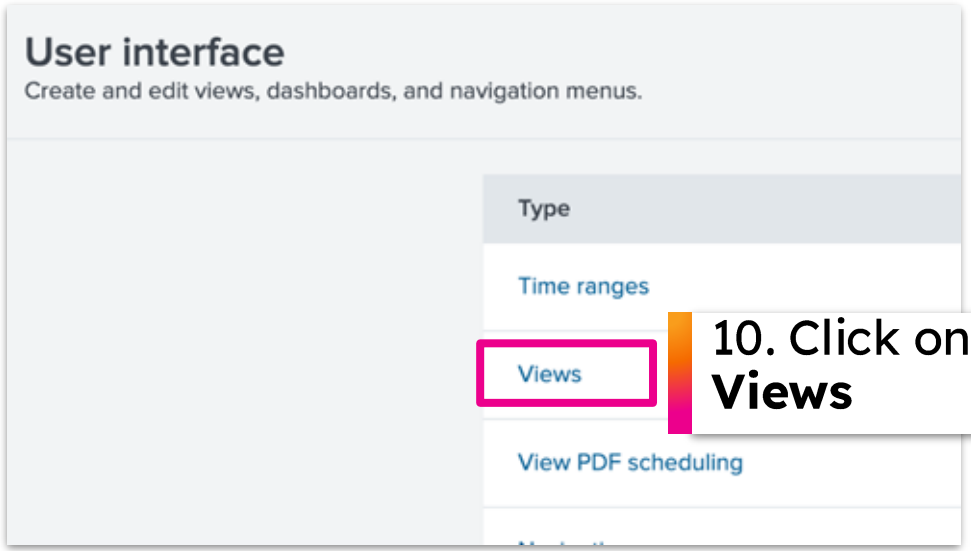

8. Find the new dashboard and verify it contains the chosen detections

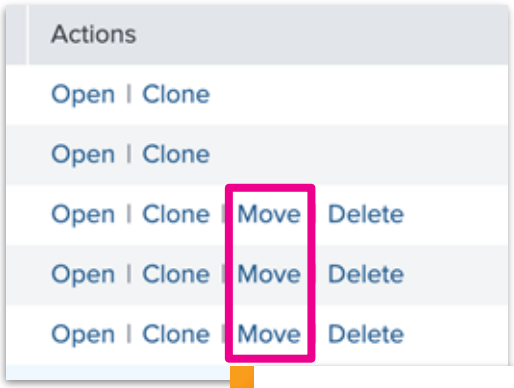

9. Click on **Settings** > **User Interface**

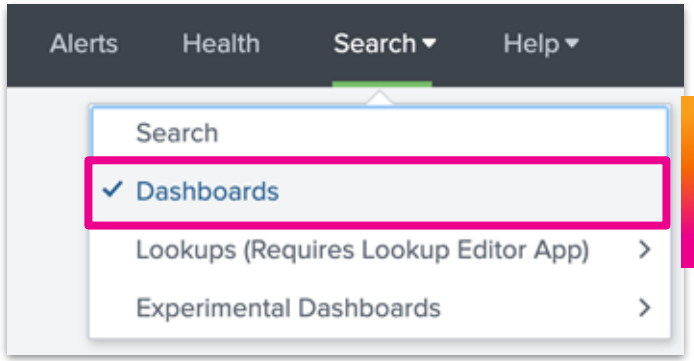

10. Click on **Views**

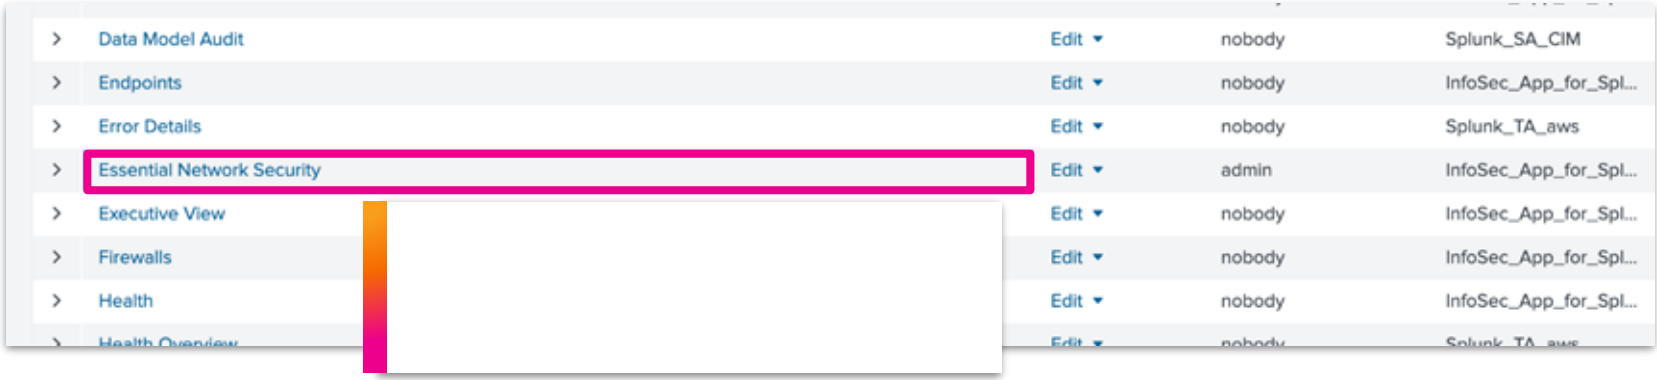

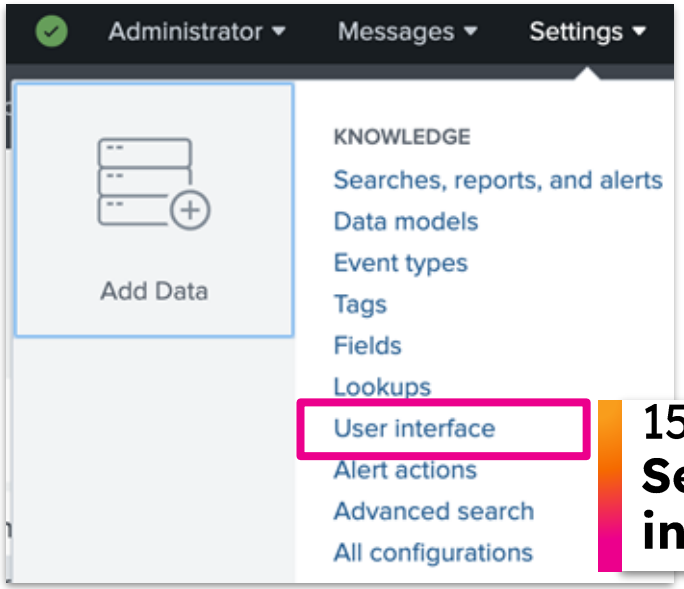

11. Find your dashboard and click on **Move**

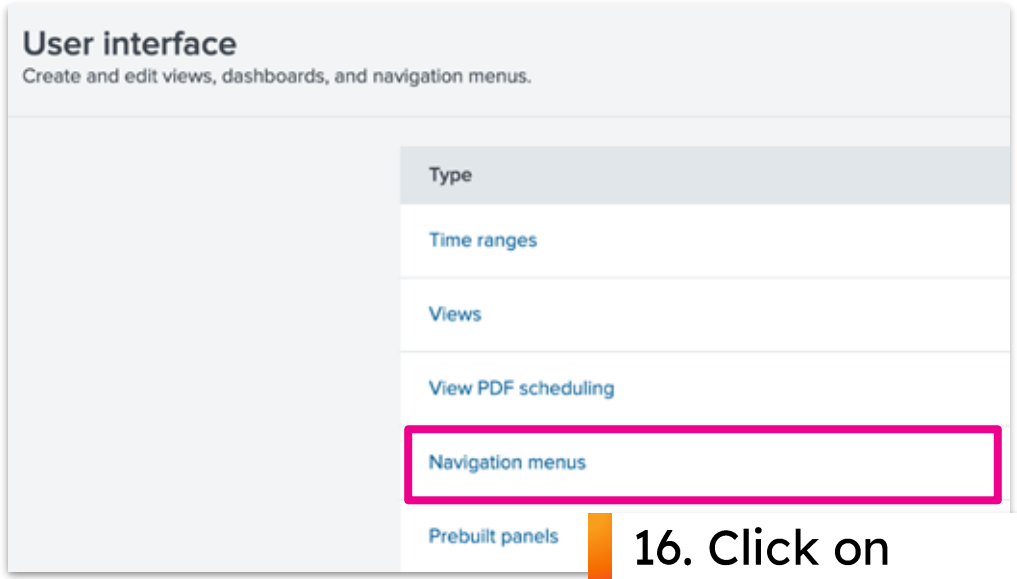

12. Find the **InfoSec** App in the list and click on **Move**

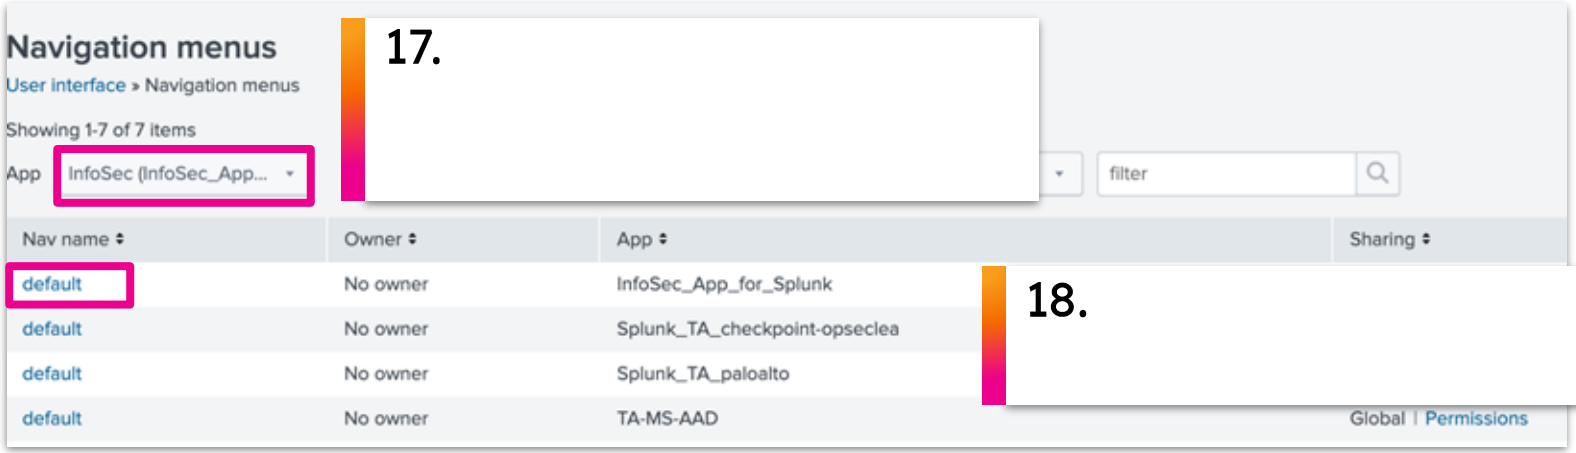

15. Go to **Settings > User interface**

16. Click on **Navigation menus**

17.

18.

Navigation menu XML *

Enter and edit navigation menu XML configuration.

© 2026 SPLUNK LLC

Cisco Confidential

Hands-on Workshop

- Go from Splunk CIM zero to hero in 3 hours!

  In-person and remote options available

- Learn how data maps to CIM data models

  Discover how you can use Splunk add-ons and custom knowledge objects to make data CIM compliant

- Apply SPL best practices for CIM data

  Learn the SPL commands available to search data mapping to CIM data models and accelerated data models

- Basic Splunk experience required

  Ideal for those who have experience using the search command, creating Splunk searches, and using add-ons

Normalize and visualize custom data using CIM data models and tstats!
